LETTER TO SHAREHOLDERS

Dear Shareholders,

It gives me immense pleasure to present your Company's Annual Report for the financial year 2011-12. You will be happy to know that your Company continued to move on the path of excellence that it has set out for itself. During the year, Company's 12 operating power stations located in different parts of the country generated 18,683 MUs which was the highest ever generation since its inception. It is a pleasure in conveying you that this power generation exceeded the annual MoU target of 18,500 MUs for an 'Excellent' rating by 183 MUs and higher by 0.42 per cent as compared to the previous year.

Considering the progress made by your Company during the year, the Directors have recommended a dividend of Re. 0.70 per share (excluding dividend tax) for the year 2011-12. The total dividend payout for the year will be Rs 861.05 crore which is 31.06 per cent of the profit after tax. The dividend will be paid after your approval at the Annual General Meeting.

I am also happy to inform you that your Company has commissioned two units of Chamera-III H.E. Project (3x77MW) in June 2012 and third unit on 4th July, 2012. At present construction of 9 hydroelectric projects with an installed capacity of 4,271 MW is under progress. Out of these, five projects viz.- Teesta Low Dam-III, Nimoo Bazgo, Chutak, Uri-II and Parbati-III are in advanced stages of completion.

I would like to mention here that work at Subansiri Lower H.E. Project (2000MW) is suffering since December, 2011 due to local agitation. The matter has been taken up at various levels. On the advise of PMO, Planning Commission has constituted a two member Technical Expert Committee (TEC) to look into the issues related to the demand raised by the local people. The report of TEC has been submitted to Planning Commission. Meanwhile, the contractors have started mobilizing their resources at site under escort at slow pace.

Your Company's commercial performance during the year 2011-12 has been highly satisfactory. Industrial relation was cordial even though a section of the workforce took part in one-day nationwide token strike. However, the strike had no impact on the Company's power generation.

Your Company along with all your efforts and initiatives has always moved ahead. I am pleased to share with you that as part of the future expansion programme, five projects with a capacity of 5,115 MW are under various stages of approval. In addition to these five projects, we are working on capacity addition of 3686 MW and these will be executed through Joint Venture with State Government /PSUs. These joint ventures include the Loktak Downstream Project in Manipur, Pakal Dul and others in Jammu & Kashmir and Tipaimukh Hydroelectric project in Manipur.

NHPC Limited

(A Government of India Enterprise)

It was an extremely satisfying moment for us when promoter's agreement for setting up a joint venture involving NHPC Limited, SJVN Limited and the Government of Manipur for implementing the Tipaimukh Hydroelectric Project in Manipur was signed in October 2011 .

Your Company is also participating in implementing rural electrification projects under the Rajiv Gandhi Gramin Vidyutikaran Yojana (RGGVY) in 27 districts spread over five states of West Bengal, Bihar, Jammu & Kashmir, Chhattisgarh and Odisha at an estimated cost of Rs 2,900 crore approximately. The work includes electrification of Unelectrified/De-electrified (UE/DE) villages, Partially Electrified (PE) villages and service connections to Below Poverty Line (BPL) households.

As on 31st March 2012, the cumulative achievements for UE/DE villages, PE villages and BPL connection were 9,092, 16,439 and 18.2 lakh respectively.

As you all know, your Company is spreading its wings beyond Indian shores. Accordingly, the 'Action Plan' on India-Bhutan cooperation in hydropower development your Company submitted the draft DPR for Chamkharchhu-I H.E. Project (770 MW) to the Royal Government of Bhutan (RGoB)/Government of India (Gol) in March 2012. The draft PFR for the Kuri Gongri Basin Projects was also submitted to RGoB/Gol in May 2012.

Your Company has also signed an agreement with the Mangdechhu Hydroelectric Project Authority for providing engineering and design consultancy services for the construction of the Mangdechhu H.E. Project (720 MW) in Bhutan.

Further, your Company's major consultancy assignments include those from central and state government agencies in India and others in neighbouring countries like Bhutan, Myanmar and Tajikistan. So far your Company has completed 84 consultancy assignments while another 18 are under progress.

Nimoo Bazgo (3X15 MW) and Chutak (4X11 MW) projects located in Jammu & Kashmir have been registered with the CDM Executive Board of the United Nations Framework Convention on Climate Change (UNFCCC). These projects will annually reduce emissions of 1,87,893 and 1,66,831 Metric Tons of CO₂ equivalent respectively on their commissioning.

Carbon credits are also expected under the Verified Emission Reductions (VERs) scheme from projects/power stations like Teesta-V.

19. REHABILITATION & RESETTLEMENT

NHPC formulated its own Rehabilitation & Resettlement (R&R) policy—2007 in line with the National Rehabilitation and Resettlement Policy (NRRP), 2007 in consultation with various stakeholders. As per the Central Electricity Regulatory Commission's guidelines, projects need to be financed with a debt to equity ratio of 70:30 for the purposes of tariff fixation. Your Directors believe that internal accruals of your Company will be sufficient to finance the equity component of new projects. Due to its low gearing and strong credit ratings, It is well positioned to raise the required borrowings.

The equity component is being funded through IPO proceeds/internal resource accruals.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY STRUCTURE AND DEVELOPMENT

Electric power plays an important role in the growth of an economy. The Indian power sector has seen substantial growth since independence and has a total installed capacity of 1,99,627 MW. The share of thermal, hydro, nuclear and renewable power in the total installed capacity as on 31st March, 2012 was 1,31,354 MW, 38,990 MW, 4,780 MW and 24,503 MW respectively.

The public sector has taken a lead in power generation in India with the Central and State Governments generating about 72 percent of the total installed capacity. The participation of the private sector, which generates about 28 percent of the power, too has been increasing since the liberalization of the economy in 1991.

However, many technical and operational abnormalities in the hydro sector during the XIth Plan (2007-12) increases the difference between the actual ratio for hydro-thermal mix and the desired ratio. A recent study also reveals that only 26 per cent of the total hydro potential of 1,48,700 MW, is being harnessed and a lot of the fraction is yet to be developed.

NHPC Limited, a Miniratna Schedule-'A' enterprise with an authorized share capital of ₹ 15,000 crore and an investment base of ₹ 50,000 crore, is focused on the development of hydropower. The company is also in the initial stages of adding the development of thermal and renewable energy to its operations.

NHPC is a name to reckon with in the field of hydropower as it has completed its projects in a professional manner irrespective of the remoteness of their locations and other challenging conditions such as technological and climatic challenges and has maintained its brand in the industry.

SWOT ANALYSIS

A) STRENGTHS – NHPC has the following primary competitive strengths:

- **Established track record in implementing hydroelectric projects:** NHPC has wide experience and expertise in implementing projects which provide it a significant competitive advantage. It has a strong design and engineering base with in-house expertise in geology, geo-physics, geo-technics, construction and material surveys. Its engineering capabilities cover the entire gamut from the stage of conceptualization till the commissioning of a project. NHPC's team is supported by international and domestic project consultants.
- **Exposure to the construction and operations of hydro projects in remote/non-penetrative areas and the geo-technically sensitive Himalayan terrain:** Almost all NHPC projects are situated in remote areas which come with a range of challenges—logistical, climatic and technological like Nimmo Bazgo and Chutak projects. However, with its strong and efficient team of competent and experienced professionals who have the capability to execute all types and sizes of hydropower projects, NHPC has successfully managed to develop and implement 15 power stations, including two through its subsidiary, NHDC. The Chamara-II Power Station of NHPC Limited, Indira Sagar and Omkareshwar projects of its subsidiary NHDC have been commissioned ahead of schedule.
- **Long-term power purchase agreements with customers:** Pursuing Power Purchase Agreements (PPAs), NHPC gets most of its revenue from the sale of energy to SEBs/power departments and their successor entities. The allocation of power from the different power stations to various beneficiaries is done by the Ministry of Power, Government of India. The billings made to the state entities are currently secured through letters of credit pursuant to the tripartite agreements entered into among the Government of India, the Reserve Bank of India and respective State Governments.

Further, the company also obtains commitments from beneficiaries for purchase of power from new projects as and when the Government of India decides to invest in such projects.

- **Strong operating performance:** Over the years, NHPC's power stations have shown improvements in their operations. Its operating power stations generated 18,683 MUs of power during 2011-12, exceeding the annual MoU target of 18,500 MUs for an 'Excellent' rating.
- **Competent and committed workforce:** NHPC has a competent and committed workforce. Its executives have extensive experience in the industry. Their skills, industry knowledge and operating experience provide NHPC with a significant competitive advantage.
- **Strong financial position:** NHPC is a Miniratna Schedule-'A' enterprise with an authorized share capital of ₹ 15,000 crore and an investment base of over ₹ 50,000 crore.

B) OPPORTUNITIES

The deteriorating hydro-thermal mix, increase in peak hour shortages and frequency variations have forced policymakers to turn their attention towards water resources and on developing hydropower. Besides India's huge untapped hydro potential, especially in the north-eastern region, with the focus shifting to hydropower, NHPC now has opportunities to add to its capacity in the coming years.

C) THREATS/WEAKNESSES

The NHPC management perceives the following as threats/risks/weaknesses in the construction of hydropower projects:

Time in clearances - Stringent norms and cumbersome procedures for getting environmental and forest clearances and clearances from the National Board for Wild Life (where ever applicable) leads to delays in obtaining clearances for projects, which may affect the capacity addition programmes.

Land acquisition - The process of land acquisition for infrastructure work as well as for a project's components including submergence, is quite cumbersome and time consuming.

Geological uncertainties - In spite of extensive surveys and investigations, various components of hydro projects such as head race tunnels, underground power houses, pressure shafts and surge shafts face geological surprises especially in the young Himalayan region. NHPC with its experience and expertise coupled with state-of-the art technology has been able to overcome such surprises many a times in the past, but there is a possibility that such surprises may result in time and cost over-runs of a project.

Inter-state and International disputes - As water is a state subject in India, there are often inter-state river disputes due to which many hydro projects may get delayed or abandoned. Certain projects are situated in border areas which affect India's international relations.

Natural calamities - As most of the hydro projects are located in hilly terrains, natural calamities like land slides, hill slope collapses and road blocks, floods and cloud bursts cause severe setbacks in construction schedules.

Unexpected complexities - Unexpected complexities and delays in clearances/execution due to reasons beyond one's control may cause variations/escalations in estimates. Further, changes in CERC's tariff regulations may affect the cash flow and results of operations.

RISKS AND CONCERNS

Hydropower schemes are capital intensive, have long gestation period and require huge investments which are major constraints in the exploitation of the vast hydropower potential available in the country. Since water is a state subject, state governments are demanding a higher share of free power and other incentives, which lead to higher tariffs.

OUTLOOK

Demand for electrical energy is increasing at a rate of 8 to 10 per cent annually. The increasing power demand needs installation of more power capacity. In 2011-12, an additional 26,001 MW of energy was made available which took India's total capacity to 1,99,627 MW which achievement is still not enough to meet the increasing demands in the country.

In spite of the government taking various initiatives in the power sector, developments in this sector need to be accelerated further. Speedy approvals of projects under government clearances and execution of projects under construction in time will be helpful in meeting demand targets.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

NHPC has in-built control systems in functional and operational areas. The transactions and processes are guided through a system of delegation of powers, documented policies, guidelines and manuals. The organisational structure is well defined in terms of hierarchical authority and responsibilities at particular levels of the hierarchy.

NHPC has an independent and full-fledged Internal Audit Department at the Corporate Office and has its units at Regional Offices, staffed with qualified experienced people who carry out audits at regular intervals. A summary of Audit Observations and Action Taken Reports are placed before the Audit Committee. The recommendations and directions of the Committee are carried out accordingly.

DISCUSSION ON THE FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

FINANCIAL DISCUSSION AND ANALYSIS

1.0 RESULTS OF OPERATIONS

A detailed financial discussion and analysis is furnished below on the Audited Financial Results of the Company for the Fiscal 2012 vis-à-vis Fiscal 2011.

1.1 Income

₹ in crore

	Fiscal 2012	Fiscal 2011
Units of electricity sold (million units)	16,357.09	16,293.32
Income		
Sales of Energy	5,509.65	4,046.59
Revenue from Contracts, Project Management and Consultancy Works	145.04	178.66
Other Income	1060.72	680.23
Total (excluding income from exceptional items)	6,715.41	4,905.48

The income of the Company comprises of income from Sales of electricity, Contracts, project management & consultancy services and Other income. Other income mainly includes interest earned on investments of surplus funds, interest on Securitised Bonds/ Long Term Advances, Dividend Income etc. Our total income increased by 36.90% to ₹ 6,715.41 crore in Fiscal 2012 from ₹4,905.48 crore in Fiscal 2011, primarily due to commissioning of Sewa-II power station, grossing up of Return on Equity (ROE) at corporate tax rate, finalization of tariff of Power Stations, Reimbursement of Water Cess & RLDC fees, interest from beneficiary states and increase in interest income from investment of surplus cash. Major increase in income is under the sub-head "Sale of energy". Broad principle of determination of tariff and recognition of Sale of Energy is deliberated below. Item wise reasons for variations are detailed in subsequent paras.

1.2 Broad principles of determination of tariff and Sale of Energy

1.2.1 Tariff

The charges for electricity are determined power station wise by the Central Electricity Regulatory Commission (CERC). A new order/ regulation was issued by CERC pursuant to notification no. L-7/145(160)/2008-CERC dated January 19, 2009 which relates to the tariff period 2009-14.

Tariff is determined by reference to Annual Fixed Charges (AFC), which comprise of Return on Equity (ROE), depreciation, interest on loan, interest on working capital and operation & maintenance expenses. ROE is grossed-up with reference to applicable income tax rate so as to recover income tax incidence.

For the purpose of recovery, AFC is bifurcated into two equal parts i.e. Energy Charges and Capacity Charges. Recovery of Energy Charges is dependent upon energy generated and full recovery is ensured when scheduled design energy level is achieved. Generation over and above design energy entitles for additional revenue in the form of secondary energy. Recovery of capacity charges is dependent on the actual availability of plant for generating power with reference to defined Normative Annual Plant Availability Factor (NAPAF), which has been prescribed for each power station based on its nature.

NHPC sells electricity to bulk customers comprising, mainly of electricity utilities owned by State Governments. Sale of electricity is made pursuant to long-term power purchase agreements. Sales have been recognized as per tariff notified by Central Electricity Regulatory Commission (CERC). Tariff for 2009-14 has since been fixed in respect of all the 12 Power Stations. However tariff of Teesta V Power Station is provisional pending approval of the revised cost of the Project.

The said regulations inter-alia provides that for the purpose of filing tariff petitions, ROE is to be grossed-up using applicable Minimum Alternate/ Corporate Income Tax Rate for the financial year 2008-09 as per the Income Tax Act, 1961. Further, CERC vide notification no. L-7/145(160)/2008-CERC dated 21.06.2011 provides that the Generating Company shall recover the shortfall or refund of excess Annual Fixed Charge on account of Return on Equity due to change in the tax rate (as amended from time to time) of the respective year directly without making any application before the Commission.

The revenue from sale of energy includes sales pertaining to earlier years but recognized in current year. It also includes Unscheduled Interchange (UI) charges for the variation in actual injection and scheduled net injection by the generating stations at rates linked to frequency prescribed in the regulation to bring grid discipline.

As per CERC Tariff Regulations, exchange rate variation on interest payments and repayments of foreign loans corresponding to the normative loans considered for tariff of stations/units is payable/recoverable to/from the beneficiaries on repayment of the foreign loans and interest thereon. Pursuant to an opinion of Expert Advisory Committee of the ICAI, foreign exchange rate variation on restatement of foreign currency loans as at the Balance Sheet date which is payable/recoverable to/from customers later-on on actual settlement is accounted for by creating a deferred liability/asset in the accounts instead of adjusting the same in the statement of profit & loss.

1.2.2 Sale of Energy

In Fiscal 2012, NHPC sold 16,357.09 MUs of electricity from an installed capacity of 3749.20 MW and in Fiscal 2011, it sold 16,293.32 MUs from an installed capacity of 3,749.20 MW which represents an increase of 0.39% in the number of units sold. Its average selling price (after adjustment of components of earlier year sales) was ₹ 2.98 per unit in Fiscal 2012, as compared to ₹ 2.81 per unit in Fiscal 2011. The increase in per unit rate is mainly attributable to account of water cess for full year during Fiscal 2012.

Sale of energy increased by 36.15% to ₹5,509.65 crore in Fiscal 2012 from ₹4,046.59 crore in Fiscal 2011 because of account of earlier year sales (net of AAD) & Water cess amounting to ₹467.28 & ₹691.73 crore respectively during Fiscal 2012. NHPC's plant availability factor (PAF) in Fiscal 2012 was 83.30% as compared to 85.20% in Fiscal 2011.

1.2.3 Adjusted Sale of Energy

For the purpose of year to year comparison, the impact of earlier year sales, water cess and RLDC Charges of earlier years have been excluded from the sale of energy in order to arrive at the adjusted sale of energy.

The revenue from sales of energy after such adjustments is as under:

₹ in crore

	Fiscal 2012	Fiscal 2011
Gross Sales	5,462.49	3,999.63
Less: Advance against Depreciation (AAD) net	(47.16)	(46.96)
Net Sales	5,509.65	4,046.59
Less:		
(a) Earlier year sales (net of AAD)	467.28	(381.62)
(b) Water Cess for 2010-11 accounted for in 2011-12	138.99	(138.99)
(c) RLDC charges	23.34	(11.80)
Adjusted Sale of Energy	4,880.04	4,579.00

Earlier year sales (net of AAD) of ₹ 467.28 crore in Fiscal 2012 arose primarily because of finalization and revision of tariff in respect of Power Stations.

Increase in Adjusted Sales by 6.57% is primarily attributable to commissioning of Sewa-II power station, finalization and revision of tariff in respect of Power Stations.

1.3 Revenue from Contracts, Project Management and Consultancy Works

NHPC also earns revenue by entering into projects for Construction contracts, project management and consultancy assignments. These assignments primarily include works relating to the Pradhan Mantri Gram Sadak Yojana for development of rural roads and the Rajiv Gandhi Grameen Vidyutikaran Yojna relating to the establishment of rural electrification infrastructure, primarily distribution lines. These two schemes are overseen by different agencies of the Government of India (GoI) and executed by PSUs and government departments. NHPC is responsible for executing the projects allocated to it in certain specified areas throughout India.

The Company's income from contracts, project management and consultancy works decreased by 18.82% from ₹ 178.66 crore in Fiscal 2011 to ₹ 145.04 crore in Fiscal 2012 mainly due to handing over of O&M works of Baglihar Power Station back to state of J&K w.e.f. 02.09.2011.

1.4 Other Income

'Other income' mainly comprises of income from securitized power bonds/long term advances issued under one time settlement scheme, interest from beneficiary states, income from investment of surplus cash, dividend on equity investment in subsidiary company and miscellaneous income.

NHPC's other income was ₹1060.72 crore in Fiscal 2012, an increase of 55.94% over the other income of ₹ 680.23 crore in Fiscal 2011. The major components of Other Income are placed and discussed hereunder:

Annual Report

2011-12

₹ in crore

Other Income	Fiscal 2012	Fiscal 2011
Interest on securitised power bonds/long term advances	113.41	137.35
Interest from beneficiary states	264.79	20.40
Interest on Term Deposit	461.97	404.94
Dividend	22.03	12.40
Write back of depreciation due to reversal of provision in respect of Teesta-V Power Station	42.97	-
Late Payment Surcharge	21.67	3.52
Liability/ Provisions not required written back	68.04	55.02
Other miscellaneous income	65.84	46.60
Total	1060.72	680.23

The reduction in interest income from securitised power bonds/long term advances to the extent of ₹23.94 crore is due to redemption of these bonds/long term advances amounting to ₹281.80 crore during Fiscal 2012.

Interest from beneficiary states have increased during Fiscal 2012 by ₹ 244.39 crore i.e. from ₹ 20.40 crore in Fiscal 2011 to ₹ 264.79 crores in Fiscal 2012 due to charging of interest on arrears arising due to finalization of tariff of various power stations in Fiscal 2012 in terms of tariff regulation.

Interest on Term Deposit has increased to ₹461.97 crore during Fiscal 2012 as against ₹404.94 crore during Fiscal 2011 due to higher rate of interest as well as increase in investment of surplus cash.

During Fiscal 2012, NHPC earned ₹22.03 crore as dividend from its investments mainly in subsidiary companies as against ₹12.40 crore during Fiscal 2011.

1.5 Expenditure

₹ in crore

Expenditure	Fiscal 2012	Fiscal 2011
Generation, Administration and Other Expenses		
- excluding Water Cess	381.59	381.59
-Water Cess	552.81	138.99
Employees ' Benefits Expense	829.04	699.62
Depreciation & Amortization	892.74	916.74
Finance Cost	342.24	366.60
Provisions	90.68	34.46
Expenditure on Contracts, Project Management and Consultancy Works	119.97	123.25
Total Expenditure	3,209.07	2,711.08

NHPC's total expenditure increased by 18.37% to ₹3,209.07 crore in Fiscal 2012 from ₹2,711.08 crore in Fiscal 2011 mainly due to levy of Water Cess (₹552.81 crore in Fiscal 2012 & ₹138.99 crore in Fiscal 2011) in respect of power stations situated in the State of J&K. The Company's total expenditure as a percentage of its total income was 47.79% in Fiscal 2012 compared to 55.27% in Fiscal 2011.

1.6 Generation, Administration and Other Expenses (excluding Water Cess)

Generation, administration and other expenses primarily consist of repair and maintenance of buildings and plant & machinery, security expenses, insurance expenses etc. These expenses represent approximately 11.89% of the total Company's expenditure in Fiscal 2012 as against 15.91% in Fiscal 2011. In absolute terms, these expenses decreased by approximately 11.55% to ₹381.59 crore in Fiscal 2012 from ₹431.42 crore in Fiscal 2011. This was mainly due to decrease in provisioning towards interest on Arbitration awards which was provided in Fiscal 2011. In terms of expenses per unit of saleable energy, it was ₹ 0.23 in Fiscal 2012 as compared to ₹ 0.26 in Fiscal 2011.

1.7 Water Cess

Water Cess increased to ₹552.81 crore during the current year from ₹ 138.99 crore in the previous year mainly due to a full year charge against charge for five months during Fiscal 2011, as water cess has been levied by J&K government on usage of water by power stations in the state of J&K w.e.f. 10.11.2010.

1.8 Employees' Benefit Expenses

Employee benefit expenses include salaries and wages, allowances, incentives, contribution to provident fund and other funds and welfare expenses. ENVIRONMENT MANAGEMENT

NHPC Limited is committed towards the conservation of nature and natural resources. The concept of sustainable development has been included at various stages of a hydro project's design, implementation and post-implementation phases. Environmental Impact Assessment (EIA) is an essential part of project planning and it integrates into various facets of the environment—land, water, air and socio-economic issues. EIA focuses on identifying probable impacts, both positive as well as adverse, of a project on the environment. Based on the findings of the EIA study, proper mitigatory Environment Management Plans (EMPs) are prepared. Adverse impacts of construction activities, if any, are mitigated and compensated for by adopting measures like compensatory afforestation, catchment area treatment, wildlife conservation, green belt development, fishery management, health management, rejuvenation of dumping and quarry sites and resettlement and rehabilitation.

A. Conservation of Energy

a) Energy conservation measures taken:

With a view to assessing and optimizing the power stations' performance, energy audit of power stations was completed and the recommendations of CPRI to improve energy savings are being implemented by the power stations.

b) Additional investment and proposal, if any, being implemented for reduction of consumption of energy:

Power stations are being pursued for implementation of energy audit measures as recommended by CPRI in its energy audit report.

c) Impacts of measures at (a) and (b) above for reduction of energy consumption and consequent impact on the cost of production of goods:

The anticipated energy savings is 13,430.823 MWh/year after implementing energy saving measures in a phased manner at Bairasiul, Salal, Loktak, Tanakpur, Chamara-I, Rangit, Uri-I, Chamara-II, Dhauliganga, Dulhasti and Teesta-V power stations as recommended by CPRI in its energy audit report, which will reduce the cost of generation of electricity.

B. Technology Absorption

e) Efforts made in technology absorption are detailed in Form B which is enclosed.

FORM – B

1. Specific areas in which R&D was carried out during 2011-12 by the Company:

a. MoU target entrusted by MoP during financial year 2011-12:

- Studying techniques to stop seepage in reservoirs/structures;
- Documentation for future reference with respect to problems already faced or being faced in the fields of geology and hydrology and measures taken up/being taken up;
- Computational fluid dynamics studies & analysis of surge shaft & pressure shaft of Teesta-V Power Station and dam-spillway of the Subansiri H. E. Project;
- Assessment of wind power potential at four NHPC power stations/projects; and
- Sale & realization of revenue for VERs issued by VCS registry for the Teesta-V Power Station for the generation period April 2008 to September 2009.

- b. **National Perspective Plan (NPP) for R&D projects:** Development of silt erosion resistant material for turbine of hydro generators; tunneling in water charged zones under high hydrostatic pressure.

2. **Benefits derived as a result of the above R&D:**

- **Studying techniques to stop seepage in reservoirs/structures:** This study was conducted with the help of IIT Delhi and NHPC may implement feasible remedial measures to stop the seepage flow in existing dams and also implement feasible preventive measures in the upcoming dams.
- **Development of hard coating facility – DPR preparation:** This project will lead to the establishment of an in-house facility of hard coating on turbine components and will help in tackling the problem of erosion due to silt laden water which is affecting a number of power stations, thus improving turbine availability.
- **NPP Project 'Development of silt erosion resistant material for turbines of hydro generators':** M/s National Metallurgical Laboratory (NML), Jamshedpur has developed a new alloy which it believes will have better erosion resistant characteristics. The testing of the material on miniature components is underway. Once the properties of this alloy are proven, it can help us in manufacturing underwater turbine components in future hydro projects.

3. **Future plan of action 2012-13**

- CFD analysis of penstock/pressure shaft, surge shaft and part of HRT of one hydropower project.
- Development of hard coating facility at the Salal power station – Award of work.
- National Perspective Plan (NPP) for R&D projects, 'Development of silt erosion resistant material for turbines of hydro generators': Field trials are under progress.
- National Perspective Plan (NPP) for R&D projects, 'Tunneling in water charged zones under high hydrostatic pressure'.

4. **Expenditure on R&D (2011-12):**

Total Expenditure on R&D during the financial year 2011-12 was ₹ 3,27,92,991.

Technology absorption, adaptation and innovation

1. **Efforts made towards technology absorption, adaptation and innovation:** In the past various experimental studies/trials were carried out in association with specialized organizations in the field of hard coatings for underwater turbine components to improve their performance against silt erosion and identified thermal spray techniques as a possible solution.
2. **Benefits derived as a result of the above efforts, for example, product improvement, cost reduction, product development and import substitution are:** Hard coatings is an ongoing process and benefits will be derived after finalizing the final coating material beneficial to underwater components of hydro turbines. Tungsten Carbide Cobalt coating with HVOF process seems to be showing encouraging results.
3. **Technology imported during last five years:** Particulars of some of the important technology imported during the last five years are:

S. No.	Technology Imported	Year of Import	Has technology been fully absorbed	If not fully absorbed, area where this has not taken place, reason thereof and future plans of action
a	Bidda Wind Power Project, J&K.	2011	No	DPR of the Bidda Wind Power Project, J&K has been prepared, technology absorption is expected after execution of the project.
b	Development of 3.75 MW Durgaduani Mini Tidal Power Project in Sunderbans, West Bengal.	2008	No	DPR of the Durgaduani Mini Tidal Power Project, WB was updated in 2007 with the help of M/s Hydro-Tasmania, Australia.
c	A pilot project for 25 kW solar power plant and stand alone street lights for NHPC's Nimmo Bazgo Hydroelectric Project were successfully commissioned on 17th January 2007 to promote green power.	2007	Yes

- 1) Provision on account of wage revision of the employees' w.e.f. 01.01.2007, which was continuing till last year has since been settled except an amount of ₹31.16 Crore, which is continuing due to non settlement of Personal Adjustment Pay (fitment benefits) for want of approval by Competent Authority and payment of arrear to some of the employees in subsidiary company. An amount of ₹24.91 Crore stands paid towards Personal Adjustment Pay, which is shown as "Advance Paid".

Tariff for the tariff period 2009-14 has since been fixed in respect of all the 12 Power Stations. However tariff of Teesta V Power Station is provisional pending approval of revised cost of the Project. In respect of subsidiary company, pending notification of tariff for the period 2009-2014, the sales for the year have been accounted for based on tariff petition filled for fixation of tariff and keeping in view the principles of conservatism, as the tariff petitions are subject to prudence check by CERC. However, billing during the year has been made at the tariff approved by the CERC as applicable on 31st March 2009.
- Sales includes ₹ 467.28 Crore (Previous year (-) ₹24.01 Crore) on account of earlier year sales arising out of finalisation of tariff in current year.

Accordingly sales on account of reimbursement of water cess amounting to ₹ 691.73 Crore including ₹139.02 crore for previous year has been recognized, which is yet to be billed for want of amendment to the CERC Regulations, 2009.
- CERC vide order dated 06.02.2012 has allowed recovery of Regional Load Dispatch Centre (RLDC) Fees & Charges from beneficiary states, which are to be paid by power generating companies in terms of CERC (Fees and Charges of RLDC and other related matters) Regulation 2009 dated 18.09.2009. Accordingly sales on account of recovery of RLDC fees & charges amounting to ₹ 33.05 Crore including ₹ 24.54 Crore for previous years has been recognized, which is yet to be billed for want of amendments to the CERC Regulations, 2009.
- Tariff regulation notified by CERC vide notification dated 19.01.2009 inter-alia provides that capital cost considered for fixation of tariff for current tariff period shall be subject to truing up at the end of the tariff period, which may result in increase or decrease in tariff. Accordingly, an amount of ₹ 34.60 Crore (Previous Year ₹ NIL) has been provided in the books by adjusting the sales for the year as an abundant precaution.
