1	-	Emergent Cleaning of trash from HR trash rack at Dam Uni-II Power Station.	Work Order	-	-	-	-	-	-	-	NH/URI-II/ I/M/2024-954 dated 18.05.2024	M/s Pathan Industries Pvt. Ltd. R/o Ambok Colony, Rampgi, Uri, Baramulla, Kashmir	Non Govt.	Removal and disposal of trash /debris is essentially required at HR trash rack since this trash /debris can further accumulated to the intake forchay trash rack and further moves towards the HRT to damage Turbines and their components in Power House. Due to heavy rain and high inflow in monsoon season, the considerable volume of trash /debris enters in the reservoir and gets deposited /accumulated on the Head Regulator trash rack The accumulation of trash in front of HR Trash rack results in head loss of 1.5 to 2 meter even sometimes around 4.0 meter at Intake forchay trash rack and consequently reduction in huge power generation. In spite of that this leads to frequent back flushing which also increases the generation loss to the power station . Therefore, the HR Trash racks needs to be cleaned in minimum possible time to avoid any adverse effect /loss on generation.	Rs. 1,11,457/-	17.09.2024
