The Company's net obligation in respect of long-term employee benefits is the amount of future benefits that employees have earned in return for their service in the current and prior periods. The benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The discount rate is based on the prevailing market yields of Indian government securities as at the reporting date that have maturity dates approximating the terms of the Company's obligations. The calculation is performed using the Projected Unit Credit Method. Contributions to the scheme and actuarial gains or losses are recognised in the Statement of Profit and Loss or included in the carrying amount of an asset if another standard permits such inclusion in the period in which they arise.

v) Termination benefits

The expenses incurred on terminal benefits in the form of ex-gratia payments and notice pay on voluntary retirement schemes are charged to the Statement of Profit and Loss in the year of incurrence of such expenses.

17.0 Borrowing costs

Borrowing costs consist of (a) interest expense calculated using the effective interest method as described in Ind AS 109 – 'Financial Instruments' (b) finance charges in respect of finance leases recognized in accordance with Ind AS 116– 'Leases' and(c) exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs.

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets are capitalised as part of the cost of such asset until such time the assets are substantially ready for their intended use. Qualifying assets are assets which necessarily take substantial period of time to get ready for their intended use or sale. All other borrowing costs are expensed in the period in which they occur.

When the Company borrows funds specifically for the purpose of obtaining a qualifying asset, the borrowing costs incurred are capitalised. When the Company borrows funds generally and uses them for the purpose of obtaining a qualifying asset, the capitalisation of the borrowing costs is computed based on the weighted average cost of all borrowings that are outstanding during the period and used for the acquisition, construction/exploration or erection of the qualifying asset. However, borrowing costs applicable to borrowings made specifically for the purpose of obtaining a qualifying asset are excluded from this calculation, until substantially all the activities necessary to prepare that asset for its intended use or sale are complete.

Income earned on temporary investment of the borrowings pending their expenditure on the qualifying assets is deducted from the borrowing costs eligible for capitalisation.

Capitalisation of borrowing cost ceases when substantially all the activities necessary to prepare the qualifying assets for their intended use are complete.

Other borrowing costs are recognized as an expense in the year in which they are incurred.

18.0 Depreciation and amortization

a) Depreciation on additions to /deductions from Property, Plant & Equipment (PPE) during the year is charged on pro-rata basis from / up to the date on which the asset is available for use / disposal.

b) (i) Depreciation on Property, Plant and Equipment of Operating Units of the Company capitalized till five years before the end of the useful life of the Power Station is charged to the Statement of Profit & Loss on straight-line method following the rates and methodology notified by CERC for the fixation of tariff except for assets specified in Policy No. 18.0(d).

(ii) Depreciation on Property, Plant and Equipment capitalized during the last five years of the useful life of a Power Station is charged on straight-line method for the period of extended life as per CERC Tariff Regulations/Orders, from the date on which such asset becomes available for use.

(iii) Where the life and / or efficiency of a Power Station is increased due to renovation and modernization, the expenditure thereon along with its unamortized depreciable amount is charged prospectively on straight-line method over the revised / remaining useful life.

c) i) Depreciation on Property, Plant and Equipment (except old and used) of other than Operating Units of the Company is charged to the extent of 90% of the cost of the asset following the rates notified by CERC for the fixation of tariff except for assets specified in Policy No. 18.0(d).

ii) Depreciation on old and used items of PPE of other than Operating Units is charged on straight-line method to the extent of 90% of the cost of the asset over estimated useful life determined on the basis of technical assessment.

NHPC LIMITED
एन एच पी सी
N.H.P.C
FARIDABAD

d) i) Depreciation in respect of following items of PPE is provided on straight line method based on the life and residual value (5%) given in the Schedule II of the Companies Act, 2013:

- Construction Plant & Machinery

- Computer & Peripherals

ii) Based on management assessment, depreciation on Mobile Phones is provided on straight line basis over a period of three years with residual value of Re 1.

iii) Based on management assessment, depreciation on Roof Top Solar Power System / Equipment is provided on straight line basis over a period of twenty five years with residual value of 10%.

e) Temporary erections are depreciated fully (100%) in the year of acquisition /capitalization by retaining Re. 1/- as WDV.

f) Assets valuing Rs. 5000/- or less but more than Rs. 750/- are fully depreciated during the year in which the asset becomes available for use with Re. 1/- as WDV.

g) Low value items, which are in the nature of assets (excluding immovable assets) and valuing upto Rs. 750/- are not capitalized and charged off to revenue in the year of use.

h) Leasehold Land of operating units, is amortized over the period of lease or 40 years whichever is lower, following the rates and methodology notified vide CERC tariff regulations.

i) Leasehold Land and buildings, of units other than operating units, is amortized over the period of lease or 40 years, whichever is lower.

j) PPE created on leasehold land are depreciated to the extent of 90% of original cost over the balance available lease period of respective land from the date such asset is available for use or at the applicable depreciation rates & methodology notified by CERC tariff regulations for such assets, whichever is higher.

k) Right to use in respect of land is amortized over a period of 30 years from the date of commercial operation of the project in line with CERC tariff regulations notified for tariff fixation.

l) Cost of software recognized as 'Intangible Assets' is amortized on straight line method over a period of legal right to use or three financial years, whichever is earlier, starting from the year in which it is acquired.

m) Where the cost of depreciable assets has undergone a change during the year due to increase/decrease in long term liabilities on account of exchange fluctuation, price adjustment, settlement of arbitration/court cases, change in duties or similar factors, the unamortized balance of such assets is depreciated prospectively over the residual life of such assets at the rate of depreciation and methodology notified by CERC tariff regulations.

n) Spare parts procured along with the Plant & Machinery or subsequently which are capitalized and added in the carrying amount of such item are depreciated over the residual useful life of the related plant and machinery at the rates and methodology notified by CERC.

o) Useful life, method of depreciation and residual value of assets where depreciation is charged as per management assessment are reviewed at the end of each financial year and adjusted prospectively over the balance life of the asset, wherever required.

19.0 Impairment of non-financial assets other than inventories

a) The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an

NHPC LIMITED
एनएचपीसी
N·H·P·C
FARIDABAD

asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets of the Company. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. The resulting impairment loss is recognised in the Statement of Profit and Loss.

b) In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

c) In case of expenditure on survey & investigation of projects, if it is decided to abandon such a project, expenditure incurred thereon is charged to the Statement of Profit and Loss in the year in which such decision is taken.

d) In case a project under survey and Investigation remains in abeyance by the order of appropriate authority/ by injunction of court order, any expenditure incurred on such projects from the date of order/ injunction of court is provided in the books from the date of such order till the period project is kept in abeyance by such order/ injunction. Provision so made is however reversed on the revocation of aforesaid order/ injunction.

e) Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

20.0 Income Taxes

Income tax expense comprises current and deferred tax. Tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised directly in equity or other comprehensive income, in which case the tax is also recognised directly in equity or in other comprehensive income.

a) Current tax

Current tax is the expected tax payable on the taxable income for the year on the basis of the tax laws applicable at the reporting date and any adjustments to tax payable in previous years. Taxable profit differs from profit as reported in the Statement of Profit and Loss because it excludes items of income or expense that are taxable or deductible in other years (temporary differences) and it further excludes items that are never taxable or deductible (permanent differences).

b) Deferred tax

i) Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Company's financial statements and the corresponding tax bases used in the computation of taxable profit and are accounted for using the Balance Sheet method. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are generally recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that future taxable profits will be available against which those deductible temporary differences, unused tax losses and unused tax credits can be utilised. Such assets and

NHPC LIMITED
एनएचपीसी
N.H.P.C
FARIDABAD

liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of an asset or liability in a transaction that at the time of the transaction affects neither the taxable profit or loss nor the accounting profit or loss.

ii) The carrying amount of deferred tax assets is reviewed at each Balance Sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available against which the temporary differences can be utilised.

iii) Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the Balance Sheet date. The measurement of deferred tax liabilities and assets reflects the tax consequences that would flow in the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

iv) Deferred tax is recognised in the Statement of Profit and Loss except to the extent that it relates to items recognised directly in other comprehensive income or equity, in which case it is recognised in Other Comprehensive Income or Equity.

v) Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities, and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

vi) Deferred tax recovery adjustment account is credited/ debited to the extent the deferred tax for the current period forms part of current tax in the subsequent periods and affects the computation of return on equity (ROE), a component of tariff.

vii) When there is uncertainty regarding income tax treatments, the Company assesses whether a tax authority is likely to accept an uncertain tax treatment. If it concludes that the tax authority is unlikely to accept an uncertain tax treatment, the effect of the uncertainty on taxable income, tax bases and unused tax losses and unused tax credits is recognised. The effect of the uncertainty is recognised using the method that, in each case, best reflects the outcome of the uncertainty: the most likely outcome or the expected value. For each case, the Company evaluates whether to consider each uncertain tax treatment separately, or in conjunction with another or several other uncertain tax treatments, based on the approach that best prefixes the resolution of uncertainty.

21.0 Compensation from third parties

Impairments or losses of items, related claims for payments of compensation from third parties including insurance companies and any subsequent purchase or construction of assets/inventory are separate economic events and are accounted for separately.

Compensation from third parties including from insurance companies for items of property, plant and equipment or for other items that were impaired, lost or given up is included in the Statement of Profit and Loss when the compensation becomes receivable. Insurance claims for loss of profit are accounted for based on certainty of realisation.

22.0 Segment Reporting

a) In accordance with Ind AS 108 – Operating Segment, the operating segments used to present segment information are identified on the basis of internal reports used by the Company's Management to allocate resources to the segments and assess their performance. The Board of Directors is collectively the Company's "Chief Operating Decision Maker" or "CODM" within the meaning of Ind AS 108.

NHPC LIMITED
एन एच पी सी
NHPC
FARIDABAD

b) Electricity generation is the principal business activity of the Company. Other operations viz., Contracts, Project Management, Consultancy works and Trading of Power do not form a reportable segment as per the Ind AS -108 - 'Operating Segments'.

c) The Company has a single geographical segment as all its Power Stations are located within the Country.

23.0 Leases

The Company assesses whether a contract is or contains a lease at the inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- the contract involves the use of an identified asset – this may be specified explicitly or implicitly and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified;
- the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Company has the right to direct the use of the asset. The Company has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Company has the right to direct the use of the asset if either:
  - the Company has the right to operate the asset; or
  - the Company designed the asset in a way that predetermines how and for what purpose it will be used.

At inception or on reassessment of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for the leases of land and buildings in which it is a lessee, the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

i. Company as a lessee

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

Land taken for use from State Government (without transfer of title) and expenses on relief and rehabilitation as also on creation of alternate facilities for land evacuees or in lieu of existing facilities coming under submergence and where construction of such alternate facilities is a specific pre-condition for the acquisition of the land for the purpose of the project, are accounted for as Right of Use Assets.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability. Assessment of impairment is done using the principles of Ind AS 36-Impairment of Assets as given in Significant Accounting Policy No. 19.0 above.

NHPC LIMITED
एनएचपीसी
N.H.P.C
FARIDABAD

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or when a lease contract is modified, and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in statement of profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Company presents right-of-use assets that do not meet the definition of investment property as a separate line item on the face of the balance sheet.

The Company has elected not to recognise right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

ii. Company as a lessor

When the Company acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset.

For embedded leases in the nature of a Finance Lease, the investment in the plant is recognised as a Lease Receivable. The minimum lease payments are identified by segregating the embedded lease payments from the rest of the contract amounts (including Advance Against Depreciation (AAD) recognised in accordance with CERC Tariff regulations 2004-09 up to 31st March 2009 and considered as deferred income). Each lease receipt is allocated between the receivable and finance lease income (forming part of revenue from operations) so as to achieve a constant rate of return on the Lease Receivable outstanding.

Subsequent to initial recognition, the Company regularly reviews the estimated unguaranteed residual value and applies the impairment requirements of Ind AS 109, recognising an allowance for expected credit losses on the lease receivables.

NHPC LIMITED
एन एच पी सी
NHPC
FARIDABAD

Finance lease income is calculated with reference to the gross carrying amount of the lease receivables, except for credit-impaired financial assets for which interest income is calculated with reference to their amortised cost (i.e. after a deduction of the loss allowance).

If an arrangement contains lease and non-lease components, the Company applies Ind AS 115 to allocate the consideration in the contract.

In the case of Operating Leases or embedded operating leases, the lease income from the operating lease is recognised in revenue over the lease term to reflect the pattern of use benefit derived from the leased asset. The respective leased assets are included in the Balance Sheet based on their nature and depreciated over its economic life.

24.0 Business combinations

Business combinations are accounted for using the acquisition accounting method as at the date of the acquisition, which is the date at which control is transferred to the Company. The consideration transferred in the acquisition and the identifiable assets acquired and liabilities assumed are recognized at fair values on their acquisition date. Goodwill is initially measured at cost, being the excess of the consideration transferred over the net identifiable assets acquired and liabilities assumed. Where the fair value of net identifiable assets acquired and liabilities assumed exceed the consideration transferred, after reassessing the fair values of the net assets and contingent liabilities, the excess is recognized as capital reserve. Acquisition related costs are expensed as incurred.

25.0 Material prior period errors

Material prior period errors are corrected retrospectively by restating the comparative amounts for the prior periods presented in which the error occurred. If the error occurred before the earliest period presented, the opening balances of assets, liabilities and equity for the earliest period presented, are restated unless it is impracticable, in which case, the comparative information is adjusted to apply the new accounting policy prospectively from the earliest date practicable.

26.0 Earnings per share

a) Basic earnings per equity share is computed by dividing the net profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the financial year.

b) Diluted earnings per equity share is computed by dividing the net profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

c) Basic and diluted earnings per equity share are also presented using the earnings amounts excluding the movements in regulatory deferral account balances.

27.0 Statement of Cash Flows

a) **Cash and Cash Equivalents:**

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. However, for Balance Sheet presentation, Bank overdrafts are shown within "Borrowings" under Current Liabilities.

b) Statement of cash flows is prepared in accordance with the indirect method prescribed in Ind AS 7- 'Statement of Cash Flows'.

28.0 Current versus non-current classification

NHPC LIMITED
एन एच पी सी
N.H.P.C
FARIDABAD

The Company presents assets and liabilities in the Balance Sheet based on current/non-current classification.

a) An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

b) A liability is current when:

- It is expected to be settled in the normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

c) Deferred tax assets and liabilities are classified as non-current assets and liabilities.

29.0 Miscellaneous

a) Each material class of similar items is presented separately in the financial statements. Items of a dissimilar nature or function are presented separately unless they are immaterial.

b) Liabilities for Goods in transit/Capital works executed but not certified are not provided for, pending inspection and acceptance by the Company.

(IV) Recent accounting pronouncements: Standards issued but not yet effective

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards. As on date there is no notification which would have been applicable from April 1, 2021.

a) Provision for employee benefit scheme, doubtful debts, inventory and others	-	-
b) Other Items	-	-
c) MAT credit entitlement	-	-
Deferred Tax Assets	-	-
Deferred Tax Liability (Net)	-	-

18.1 Movement in Deferred Tax Liability/ (Assets)

18.2 Pursuant to the provisions of Section 115BAA of the Income Tax Act 1961 announced by Tax Laws (amended) Ordinance 2019 and promulgated as Taxation Laws (amendment) Act 2019 enacted on 11th December 2019 applicable with effect from 1st April 2019, Domestic Companies have options to pay Income Tax at the concessional rates by forgoing certain exemptions/ deductions (the new tax regime) as specified in the said section. The company has Minimum Alternate Tax (MAT) credit of Rs. ..... lying unutilized as on 30th September, 2020 and is availing tax deductions in respect of its profit from generation of power from certain power stations. In view of this it has been decided to continue with existing tax structure for Current and Deferred Tax recognition. Necessary decision for exercising the option under section 115BAA will be taken once tax deductions are not available and MAT credit is substantially exhausted.

18.3 MAT credit entitlement is required to be recognised as Deferred Tax Assets based on convincing evidence of probability of future taxable profit in foreseeable future against which such credit can be utilized. Considering this and in absence of any current development for utilisation of MAT credit entitlement, the unutilized MAT credit of Rs. ..... on the principal of prudence as being followed in earlier years has been continued not to be recognised in financial statements. Moreover, Deferred Tax accrual or reversal has consequential impact on related Regulatory Deferral Account balances and even otherwise this is not expected to have material impact on the profit of the company.

NOTE NO. 19 OTHER NON CURRENT LIABILITIES

2.3.1 Amounts recognised in the Statement of Profit and Loss for investment property

(Amount in ₹)

	As at 31.3.2021	As at 31.03.2020
Rental income	-	-
Direct operating expenses from property that generated rental income	-	-
Direct operating expenses from property that did not generate rental	-	-

2.3.2 Fair Value of Investment property

As at 31.3.2021	As at 31.03.2020
	-

2.3.3 Investment property comprise of freehold land which was bought for normal business requirements of the Company. However, due to change in business plans, the Company is in the process of finalising the future use of the property. IND AS 40, Investment Property, provides by way of example that land held for a currently undetermined future use is to be regarded as held for capital appreciation and hence to be classified as Investment Property. Accordingly such land has been classified as Investment Property.

2.3.4 Valuation process

The above land is carried in the financial statements at cost. However, the fair value of investment property has been arrived on the basis of market value as per valuation report and considered to be level-2 of fair valuation hierarchy.

B) FAIR VALUATION MEASUREMENT

(Amount in ₹)

(i) Fair Value Hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair values are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the company has classified its financial instruments into the following three levels prescribed under Ind AS 113 "Fair Value Measurements"

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments and traded bonds that have quoted price. The fair value of all equity instruments including bonds which are traded in the recognised Stock Exchange and money markets are valued using the closing prices as at the reporting date.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.The fair value of financial assets and liabilities included in level 3 is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes of similar instruments. This includes derivative MTM assets/liabilities,security deposits/ retention money and loans at below market rates of interest.

(a) Financial Assets/Liabilities Measured at Fair Value-Recurring Fair Value Measurement:

Total Financial Liabilities		3,642,806	3,642,806	1,853,595	1,853,595

Note:-

1. The Carrying amounts of current investments, Trade and other receivables, Cash and cash equivalents,Short-term loans and advances, Short term borrowings, Trade payables and other current financial liabilities are considered to be the same as their fair values, due to their short term nature.

2. For financial assets and financial liabilities measured at fair value, the carrying amounts are equal to the fair value.

(d) Valuation techniques and process used to determine fair values

(1) The Company values financial assets or financial liabilities using the best and most relevant data available. Specific valuation techniques used to determine fair value of financial instruments includes:
-Use of Quoted market price or dealer quotes for similar instruments.
- Fair value of remaining financial instruments is determined using discounted cash flow analysis.

(2) The discount rate used to fair value financial instruments classified at Level -3 is based on the Weighted Average Rate of company's outstanding borrowings except subordinate debts and foreign currency borrowings.

(3) Financial liabilities that are subsequently measured at amortised cost are recognised initially at fair value minus transaction costs using the effective interest method where such transaction costs incurred on long term borrowings are material.

(2)Financial Risk Management

(A) Financial risk factors

Risk	Exposure arising from	Measurement	Management
Credit risk	Cash & Cash equivalents, Other Bank Balances ,Trade receivables and financial assets measured at amortised cost, Lease Receivable.	Aging analysis, credit rating.	Diversification of bank deposits, letter of credit for selected customers.
Liquidity Risk	Borrowings and other facilities.	Rolling cash flow forecasts & Budgets	Availability of committed credit lines and borrowing facilities.
Market Risk- Interest rate	Long term borrowings at variable rates	Sensitivity Analysis	1. Diversification of fixed rate and floating rates 2. Refinancing 3. Actual Interest is recovered through tariff as per CERC Regulation
Market Risk- security prices	Investment in equity and debt securities	Sensitivity Analysis	Portfolio diversification
Market Risk- foreign exchange	Recognised financial liabilities not denominated in INR.	Sensitivity Analysis	Foreign exchange rate variation is recovered through tariff as per CERC Regulation. Call spread option and coupon only swap

Risk management framework

The Company's activities make it susceptible to various risks. The Company has taken adequate measures to address such concerns by developing adequate systems and practices. Company has a well-defined risk management policy to provide overall framework for the risk management in the Company. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

The Company is exposed to the following risks from its use of financial instruments:

i) Credit risk

Credit risk is the risk that a counter party will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The company is exposed to credit risk from its operating activities (primarily trade receivables/leased assets) and from its financing activities including deposits with banks and financial institutions.

ii) Liquidity risk.

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses.

iii) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise three types of risk: currency rate risk, interest rate risk and other price risks, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits and investments. Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The company operates in a regulated environment. Tariff of the company is fixed by the Central Electricity Regulatory Commission (CERC) through Annual Fixed Charges (AFC) comprising the following five components:
1. Return on Equity (RoE), 2. Depreciation, 3. Interest on Loans, 4. Operation & Maintenance Expenses and 5. Interest on Working Capital Loans. In addition to the above Foreign Currency Exchange variations and Taxes are also recoverable from Beneficiaries in terms of the Tariff Regulations. Hence variation in interest rate, currency exchange rate variations and other price risk variations are recoverable from tariff and do not impact the profitability of the company.

(B) Credit Risk

The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and other financial instruments.

Trade Receivables, unbilled revenue & lease receivables :-

The Company extends credit to customers in normal course of business. The Company monitors the payment track record of the customers. Outstanding receivables are regularly monitored. The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are mainly state government authorities and operate in largely independent markets. Unbilled revenue primarily relates to the Company's right to consideration for work completed but not billed at the reporting date and have substantially the same risk characteristics as trade receivables for the same type of contracts.

Lease receivables of the company are with regard to Power Purchase Agreements classified as deemed lease as per Appendix C of Ind AS 17- 'Leases' as referred to in Note No. 34. The power purchase agreements are for sale of power to single beneficiary and recoverability of interest income and principal on leased assets i.e. PPE of the power stations are assessed on the same basis as applied for trade receivables.

Financial assets at amortised cost :-

NHPC LIMITED FARIDABAD

The Company has given loans to employees at concessional rates as per Company's policy which have been measured at amortised cost at Balance Sheet date. The recovery of the loan is on fixed instalment basis from the monthly salary of the employees. The loans are secured by way of mortgage/hypothecation of the assets for which such loans are given. Management has assessed the past data and does not envisage any probability of default on these loans.

Loans to Government of Arunanchal Pradesh : The Company has given loan to Government of Arunachal Pradesh at 9% rate of interest as per the terms and conditions of Memorandum of understanding signed between the Company and Government of Arunachal Pradesh for construction of hydroelectric projects in the state. The loan has been measured at amortised cost. The loan is recoverable from the share of free power of the state government from the first hydroelectric project to be commissioned in the state. Management does not envisage any probability of default on the loan.

Financial instruments and cash deposits :-

The Company considers factors such as track record, size of the bank, market reputation and service standards to select the banks with which balances and deposits are maintained. Generally, the balances are maintained with the banks with which the Company has also availed borrowings. The Company invests surplus cash in short term deposits with scheduled banks. The company has balances and deposits with banks which are well diversified across private and public sector banks with limited exposure with any single bank.

(i) Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was as under:

(Amount in ₹)

Particulars	As at 31st March, 2021	As at 31st March, 2020
Financial assets for which loss allowance is measured using 12 months Expected Credit Losses (ECL)		
Non-current investments (Other than Subsidiaries and Joint Ventures)	-	-
Loans -Non Current (including interest)	-	-

Loans -Current	-	-
Other Financial Assets (Excluding Lease Receivables)	136,416,476	197,759
Total (A)	**141,572,441**	**3,147,453**
Financial assets for which loss allowance is measured using Life time Expected Credit Losses (ECL)		
Trade Receivables	-	-
Lease Receivables (Including Interest)	-	-
Total (B)	-	-
TOTAL (A+B)	**141,572,441**	**3,147,453**

(ii) Provision for expected credit losses :-

(a) Financial assets for which loss allowance is measured using 12 month expected credit losses

The Company assesses outstanding receivables on an ongoing basis considering changes in payment behaviour and provides for expected credit loss on case-to-case basis.

(b) Financial assets for which loss allowance is measured using life time expected credit losses

A default in recovery of financial assets occurs when in view of the management there is no significant possibility of recovery of receivables after considering all available options for recovery. As the power stations and beneficiaries of the company are spread over various states of India, geographically there is no concentration of credit risk.

The Company primarily sells electricity to bulk customers comprising mainly of state utilities owned by State Governments. The Company has a robust payment security mechanism in the form of Letters of Credit (LC) backed by the Tri-Partite Agreements (TPA) signed among the Govt. of India, RBI and the individual State Governments subsequent to the issuance of the One Time Settlement Scheme of SEBs dues during 2001-02 by the GOI, which was valid till October 2016. Govt of India has approved the extension of these TPAs for another period of 10 years. Most of the States have signed these TPAs and signing is in progress for the balance states. As per the provisions of the TPA, the customers are required to establish LC covering 105% of the average monthly billing of the Company for last 12 months. The TPA also provided that if there is any default in payment of current dues by any State Utility the outstanding dues can be deducted from the Central Plan Assistance of the State and paid to the concerned CPSU. There is also provision of regulation of power by the Company in case of non payment of dues and non-establishment of LC.

CERC Tariff Regulations 2019-24 allow the Company to raise bills on beneficiaries for late-payment surcharge. which adequately compensates the Company for time value of money arising due to delay in payment. Further, the fact that beneficiaries are primarily State Governments/ State Discoms and considering the historical credit loss experience for trade receivables, the Company does not envisage either impairment in the value of receivables from beneficiaries or loss due to time value of money due to delay in realization of trade receivables. However, the Company assesses outstanding trade receivables on an ongoing basis considering changes in operating results and payment behaviour and provides for expected credit loss on case-to-case basis. As at the reporting date company does not envisage any default risk on account of non-realisation of trade receivables.

NHPC LIMITED FARIDABAD

(Iii) Reconciliation of impairment loss provisions

The movement in the allowance for impairment in respect of financial assets during the period was as follows:

(Amount in ₹)

	Trade Receivables	Claim Recoverable	Loans	Total
Balance as at 1.4.2019	-	72,342,220.00	-	72,342,220.00
Changes in Loss Allowances	0	0	0	0
Balance as at 1.4.2020	0	72342220	0	72342220
Changes in Loss Allowances	0	0	0	0
Balance as at 31.3.2021	0	72342220	0	72342220

Based on historical default rates, the company believes that no impairment allowance is necessary in respect of any other financial assets as the amounts of such allowances are not significant.

(C) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due.

i) The Company's objective is to maintain optimum levels of liquidity at all times to meet its cash and collateral requirements. The Company relies on a mix of borrowings and excess operating cash flows to meet its need for funds. The current committed lines of credit and internal accruals are sufficient to meet its short to medium term expansion needs. The Company monitors rolling forecasts of its liquidity requirements to ensure that it has sufficient cash to meet capital expenditure and operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the borrowing limits or covenants (where applicable) are not breached on any of its borrowing facilities.

The company had access to the following undrawn borrowing facilities at the end of the reporting period:

(Amount in ₹)

	As at 31st March, 2021	As at 31st March, 2020
At Floating Rate		
fixed rate		
Total	-	-

ii) Maturities of Financial Liabilities:

The amounts disclosed in the table below are the contractual undiscounted cash flows. Balances due within 1 year is equal to their carrying balances as the impact of discounting is not significant.

As at 31st March, 2021

(Amount in ₹)

Contractual maturities of financial liabilities	Note No.	Outstanding Debt as on 31.3.2021	Within 1 Year	More than 1 Year & Less than 3 Years	More than 3 Year & Less than 5 Years	More than 5 Year

Total Financial Liabilities		165,765,628	163,610,725	2,154,903	-	-

NHPC LIMITED FARIDABAD

(D) Market Risk:

The sensitivity analysis excludes the impact of movements in market variables on the carrying value of post-employment benefit obligation provisions and on the non-financial assets and liabilities. The sensitivity of the relevant item of the Statement of Profit and Loss is the effect of the assumed changes in the respective market risks. The Company's activities expose it to a variety of financial risks, including the effects of changes in interest rates.

(i) Interest rate risk and sensitivity

The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long term debt obligations with floating interest rates. Company's policy is to maintain most of its borrowings at fixed rate. Company's fixed rate borrowings are carried at amortised cost and are not subject to interest rate risk. Further the company refinance these debts as and when favourable terms are available. The company is also compensated for variability in floating rate through recovery by way of tariff adjustments under CERC tariff regulations.

The exposure of the company's borrowing to interest rate changes at the end of the reporting period are as follows:

(Amount in ₹)

Particulars	As at 31st March, 2021	As at 31st March, 2021	As at 31st March, 2020	As at 31st March, 2020
	weighted average interest rate		weighted average interest rate	
Floating Rate Borrowings (INR)				
Floating Rate Borrowings (FC)				
Fixed Rate Borrowings (INR)				
Fixed Rate Borrowings (FC)				
Total		-		-

Interest Rate Sensitivity Analysis

Profit or loss is sensitive to higher/lower interest expense from borrowings as a result of change in interest rates. The majority of the borrowings of the company are at fixed interest rate. In case of floating rate borrowings there is no impact on Statement of Profit and Loss of the company due to increase/decrese in interest rates, as the same is recoverable from beneficiaries through tariff .

(ii) Price Risk:

(a) Exposure

The company's exposure to price risk arises from investment in equity shares and debt instruments classified in the financial statements as Fair Value Through OCI. Company's investment in equity shares are listed in recognised stock exchange and are publicly traded in the stock exchanges. Company's investment in debt instruments comprise quoted Government Securities and Public Sector Bonds and are publicly traded in the market. The investment has been classified under non-current investment in Balance Sheet.

(b) Price Risk Sensitivity

For Investment in Equity Instruments (Investment in equity shares of IOB and PTC)

The table below summarises the impact of increase/decrease in the market price of investment in equity instruments on the company's equity for the period/ year:

(Amount in ₹)

Particulars	As at 31st March, 2021		As at 31st March, 2020	
Investment in Equity shares of :	% change	Impact on other components of equity	% change	Impact on other components of equity
PTC India Ltd				
Indian Overseas Bank				

Sensitivity has been worked out based on the previous 3 years average of six monthly fluctuations in the share price as quoted on the National Stock Exchange (NSE).

For Investment in Debt Instruments (Investments in Government and Public Sector Undertaking Bonds)

The table below summarises the impact of increase/decrease of the market value of the debt instruments on company's equity for the period/ year:

(Amount in ₹)

Particulars	As at 31st March, 2021		As at 31st March, 2020	
	% change	Impact on other components of equity	% change	Impact on other components of equity
Government Securities				
Public Sector Undertaking Tax Free Bonds				

(iii)Foreign Currency Risk

The company is compensated for variability in foreign currency exchange rate through recovery by way of tariff adjustments under the CERC Tariff Regulations.

(a) Foreign Currency Exposure:

The company's exposure to foreign currency risk at the end of the reporting period expressed in INR are as follows :

(Amount in ₹)

Particulars	As at 31st March, 2021	As at 31st March, 2020
Financial Liabilities:		
Foreign Currency Loans		
Japan International Corporation LTD (JPY)		
MUFG BANK (JPY)		
Other Financial Liabilities	-	-
Net Exposure to foreign currency (liabilities)	0	0

Out of the above, loan from MUFG bank is hedged by derivative instrument. For balance exposure gain/(loss) on account of exchange variation is recoverable from beneficieries asper Tariff Regulation 2019-24. Therefore, currency risk in respect of such exposure would not be very significant.

(b) Sensitivity Analysis

There is no impact of foreign currency fluctuations on the profit of the company as these are either adjusted to the carrying cost of respective fixed asset/Capital Work-in-Progress or recovered through tariff as per CERC Tariff Regulation 2014-19.

(3) Capital Management

(a) Capital Risk Management

The primary objective of the Company's capital management is to maximize the shareholder value. CERC Tariff Regulations prescribe Debt : Equity ratio of 70:30 for the purpose of fixation of tariff of Power Projects. Accordingly the company manages its capital structure to maintain the normative capital structure prescribed by the CERC.

The Company monitors capital using Debt : Equity ratio, which is net debt divided by total capital. The Debt : Equity ratio are as follows:

(Amount in ₹)

Statement of Gearing Ratio		
Particulars	As at 31st March, 2021	As at 31st March, 2020
(a) Total Debt	-	-
(b) Total Capital	3,409,050,459	3,651,788,361
Gearing Ratio (a/b)	0.00	0.00

Note: For the purpose of the Company's capital management, capital includes issued capital and reserves. Net debt includes interest bearing loans and borrowings.

(b) Loan Covenants:

Under the terms of the major borrowing facilities, the company is required to comply with the following financial covenants:-

1. Company shall maintain credit rating AAA and if rating comes down, rate of interest shall be increased by 25 basis point for each notch below AAA rating .

2. Debt to net worth should not exceed 2:1.

3 Interest coverage ratio should be more than 2 times and should be calculated as ((Net Profit+Non Cash Expenditures+Interest Payable-Non Cash Income)/Interest Payable))

4 The gross Debt Service Coverage Ratio of the Company will no time be less than 1.25 during the currency of loan.

5.The Government of India holding in the company not to fall below 51%.

6. First Charge on Assets with 1:1.33 coverage on pari paasu basis.

During the period the company has complied with the above loan covenants.

Annexure to Note 2.1 & 2.6 as at
31.3.2021

i) Amounts recognised in profit or loss for investment property

Rental income	
Direct operating expenses from property that generated rental income	Nil
Direct operating expenses from property that did not generate rental income	Nil
	Nil

(ii) Fair Value of Investment property

(iii) Investment property comprise of freehold land which was bought for normal business requirements of the Company. However, due to change in business plans, the Company is in the process of finalizing the future use of the property. IND AS 40 Investment Property, provides by way of example that land held for a currently undetermined future use is to be regarded as held for capital appreciation and hence to be classified as Investment Property. Accordingly such land has been classified as Investment Property.

(iv) Valuation process

The above land is carried in the financial statements at cost. However, the fair value of investment property has been arrived on the basis of circle rates notified by the state govt. prevailing in the locality where property is situated

NHPC LIMITED FARIDABAD

NOTE NO. 1: COMPANY INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

(I) Reporting entity

NHPC Limited (the "Company") is a Company domiciled in India and limited by shares (CIN: L40101HR1975GOI032564). The shares of the Company are listed and traded on the National Stock Exchange of India Limited (NSE) and Bombay Stock Exchange India Limited (BSE) in India. The address of the Company's registered office is NHPC Limited, NHPC Office Complex, Sector-33, Faridabad, Haryana- 121003. The Company is primarily involved in the generation and sale of bulk power to various Power Utilities. Other business in which the Company is involved includes providing project management / construction contracts/ consultancy assignment services and trading of power.

(II) Basis of preparation

(A) Statement of Compliance

These standalone financial statements are prepared on going concern basis following accrual system of accounting and comply with the Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 and subsequent amendments thereto, the Companies Act, 2013 (to the extent notified and applicable), applicable provisions of the Companies Act, 1956, and the provisions of the Electricity Act, 2003 to the extent applicable.

These financial statements were authorised for issue by the Board of Directors on .....

(B) Basis of Measurement

The financial statements have been prepared on historical cost basis, except for:

- Certain financial assets and liabilities measured at fair value.
- Plan assets of defined employee benefit plans measured at fair value.

The methods used to measure fair values are discussed in Note 33.

Historical cost is the amount of cash or cash equivalents paid or the fair value of the consideration given to acquire assets at the time of their acquisition or the amount of proceeds received in exchange for the obligation, or at the amounts of cash or cash equivalents expected to be paid to satisfy the liability in the normal course of business. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

(C) Application of new and revised standards

During the year, the Ministry of Corporate Affairs has notified the Companies (Indian Accounting Standards) Amendment Rules, 2021 which has brought about certain amendments in the existing Indian Accounting Standards. Impact of these amendments are disclosed hereunder:

(i) **Interest rate benchmark reform – Phase 2: Amendments to Ind AS 109, Ind AS 107 and Ind AS 116:** The Companies (Indian Accounting Standards) Amendment Rules, 2021 has added certain provisions regarding interest rate benchmark reforms under Ind AS 109" Financial Instruments". Consequential amendments have also been made in Ind AS 107- Financial Instruments-Disclosures and Ind AS 116- Leases. There is, however, no material impact on the financial statements of the Company.

(ii) **Ind AS 116: COVID-19 related rent concession**

MCA issued an amendment to Ind AS 116 Covid-19-Related Rent Concessions beyond 30 June 2021 to update the condition for lessees to apply the relief to a reduction in lease payments originally due on or before 30 June 2022 from 30 June 2021. The amendment applies to annual reporting periods beginning on or after 1 April 2021. In case a lessee

NHPC LIMITED FARIDABAD

has not yet approved the financial statements for issue before the issuance of this amendment, then the same may be applied for annual reporting periods beginning on or after 1 April 2020.

These amendments had no material impact on the financial statements of the Company.

(iii) **Amendment to Ind AS 105, Ind AS 16 and Ind AS 28**

The definition of "Recoverable amount" is amended such that the words "the higher of an asset's fair value less costs to sell and its value in use" are replaced with "higher of an asset's fair value less costs of disposal and its value in use". Consequential amendments have been made in Ind AS 105, Ind AS 16 and Ind AS 28.

These amendments had no material impact on the financial statements of the Company.

(iv) Amendments/ revision in other standards are either not applicable or do not have any material impact on the financial statements.

(D) Functional and presentation currency

These financial statements are presented in Indian Rupees (INR), which is the Company's functional currency. All financial information presented in INR has been rounded off to the nearest crore (upto two decimals) except where indicated otherwise.

(E) Use of estimates and management judgments

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that may impact the application of accounting policies and the reported value of assets, liabilities, income, expenses and related disclosures including contingent assets and contingent liabilities at the Balance Sheet date. The estimates and management's judgments are based on previous experience and other factors considered reasonable and prudent in the circumstances. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

In order to enhance understanding of the financial statements, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that may have the most significant effect on the amounts recognised in the financial statements are included in the following notes:

Critical judgments and estimates

a) Leases

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116- Leases. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Identification of a lease requires significant judgment.

To assess whether a contract conveys the right to control the use of an identified asset for a period of time, an entity shall assess whether, throughout the period of use, the customer has both of the following:

a. the right to obtain substantially all of the economic benefits from use of the identified asset; and

b. the right to direct the use of the identified asset.

To control the use of an identified asset, a customer is required to have the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use. A customer has the right to direct the use of an identified asset throughout the period of use if the customer has the right to direct how and for what purpose the asset is used throughout the period of use.

NHPC LIMITED
एनएचपीसी NHPC
FARIDABAD

The Company also uses significant judgment in assessing the lease term (including anticipated renewals) and the applicable discount rate.

The Company determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. In assessing whether the Company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Company revises the lease term if there is a change in the non-cancellable period of a lease.

The discount rate is the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

The Company enters into power purchase agreements with beneficiaries. Power Purchase Agreements (PPA) in the nature of embedded lease with a single beneficiary where the minimum lease term is for the major part of the plant's economic life and the minimum lease payments amount to substantially all the fair value of the plant are considered as a Finance Lease. Other embedded leases are considered as Operating Lease. For embedded leases in the nature of a Finance Lease, the investment in the power station is recognised as a Lease Receivable. The minimum lease payments are identified by segregating the embedded lease payments from the rest of the contract amounts. Each lease receipt is allocated between the receivable and finance lease income so as to achieve a constant rate of return on the Lease Receivable outstanding.

In the case of operating leases or embedded operating leases, the lease income from the operating lease is recognised in revenue on a straight-line basis over the lease term. The respective leased assets are included in the Balance Sheet based on their nature.

b) Useful life of Property, Plant and Equipment and Intangible Assets

The estimated useful life of property, plant and equipment and intangible assets are based on a number of factors including the effects of obsolescence, demand, competition and other economic factors (such as the stability of the industry and known technological advances) and the level of maintenance expenditures required to obtain the expected future cash flows from the asset.

Useful life of the assets used for generation of electricity is determined by the Central Electricity Regulatory Commission (CERC) Tariff Regulations as mentioned in part B of Schedule II of the Companies Act, 2013 except for construction plant and machinery and computers and peripherals which are in accordance with useful life as prescribed in Schedule II of the Companies Act, 2013 and mobile phones which are as per management assessment.

c) Recoverable amount of Property, Plant and Equipment, Capital Work in Progress and Intangible Assets

The recoverable amount of property, plant and equipment, capital work in progress and intangible assets are based on estimates and assumptions, in particular the expected market outlook and future cash flows associated with the power plants. Any changes in these assumptions may have a material impact on the measurement of the recoverable amount resulting in impairment.

d) Post-retirement benefit plans

Employee benefit obligations are measured on the basis of actuarial assumptions which include mortality and withdrawal rates as well as assumptions concerning future developments in discount rates, the rate of salary increase, the inflation rate and expected rate of return on plan assets. The Company considers that the assumptions used to

NHPC LIMITED
एन एच पी सी
N·H·P·C
FARIDABAD

10

measure its obligations are appropriate and documented. However, any changes in these assumptions may have an impact on the resulting calculations.

e) Revenue

The Company records revenue from sale of power based on Tariff approved by the CERC, as per the principles of Ind AS 115- *Revenue from Contracts with Customers*. However, in cases where tariff rates are yet to be approved, provisional rates are adopted considering the applicable CERC Tariff Regulations. Further, where tariff is pending revision due to revision in cost estimates, tariffs are computed based on the parameters and methods prescribed under the CERC Tariff Regulations and an estimated amount of revenue is recognised when an application is made to the CERC after obtaining necessary approvals to the extent it is highly probable that there will be no downward adjustment to the revenue recognised.

f) Provisions and contingencies

The assessments undertaken in recognising provisions and contingencies have been made in accordance with Ind AS 37, 'Provisions, Contingent Liabilities and Contingent Assets'. The evaluation of the likelihood of the contingent events has been made on the basis of best judgment by management regarding probable outflow of economic resources. Such estimation can change due to unforeseeable developments.

g) Recoverable Amount of Rate Regulated Assets

The operating activities of the Company are subject to cost-of-service regulations whereby tariff charged for electricity generated is based on allowable costs like interest costs, depreciation, operation and maintenance including a stipulated return. Guidance Note on Rate Regulated Activities issued by the ICAI (previous GAAP) and Ind AS 114- 'Regulatory Deferral Accounts' permits an entity to include in the rate base, as part of the cost of self-constructed (tangible) PPE or internally generated intangible assets, amounts that would otherwise be recognised as an expense in the Statement of Profit and Loss in accordance with Ind AS. The Company estimates that items of regulatory deferral accounts recognised in the financial statements are recoverable as per the current CERC Tariff Regulations 2019-24. However, changes in CERC tariff regulations beyond the current tariff period may affect the recoverability of such balances.

h) Impairment of Trade Receivables

Considering the historical credit loss experience for trade receivables, the Company does not envisage either impairment in the value of receivables from beneficiaries or loss due to time value of money owing to delay in realization of trade receivables, except to the extent already provided for.

i) Investment in Subsidiaries and Joint Ventures

Investment has been carried at cost and as per assessment by the Company, there is no indication of impairment on such investments. Any changes in assumption may have a material impact on the measurement of the recoverable amount.

j) Insurance Claim Recoverable

The recoverable amount of insurance claims in respect of damages to Property, Plant and Equipment, Capital Work in Progress is based on estimates and assumptions as per terms and conditions of insurance policies.

(III) SIGNIFICANT ACCOUNTING POLICIES:

Summary of the significant accounting policies for the preparation of financial statements as given below have been applied consistently to all periods presented in the financial statements. These accounting policies are formulated in a manner that results in financial statements containing relevant and reliable information about the transactions, other events and conditions to which they apply. These policies need not be applied when the effect of applying them is immaterial.

NHPC LIMITED
एनएचपीसी
N.H.P.C.
FARIDABAD

Up to March 31, 2015, Property, Plant and Equipment, Capital Work in Progress, Intangible Assets and Investment Property were carried in the Balance Sheet in accordance with Indian GAAP. The Company had elected to avail the exemption granted by IND AS 101, "First time adoption of IND AS" to regard those amounts as the deemed cost at the date of transition to IND AS (i.e., as on April 1, 2015). Therefore, the carrying amount of property, plant and equipment, Capital Work in Progress, intangible assets and Investment Property as per the previous GAAP as at April 1, 2015, were maintained on transition to Ind AS.

1.0 Property, Plant and Equipment (PPE)

a) An item of PPE is recognized as an asset if it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

b) PPE are initially measured at cost of acquisition/construction including decommissioning or restoration cost wherever required. The cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. In cases where final settlement of bills with contractors is pending, but the asset is complete and available for operating in the manner intended by the management, capitalisation is done on estimated basis subject to necessary adjustments, including those arising out of settlement of arbitration/court cases.

c) Expenditure incurred on renovation and modernization of power station on completion of the originally estimated useful life of the power station is added to the cost of the related asset when it meets the recognition criteria. PPE acquired as replacement of the existing assets are capitalized and its corresponding replaced assets removed/ retired from active use are derecognized.

d) After initial recognition, Property, Plant and Equipment is carried at cost less accumulated depreciation/amortisation and accumulated impairment losses, if any.

e) Deposits, payments made/ liabilities created provisionally towards compensation (including interest on enhanced compensation till the date of award by the Court), rehabilitation & resettlement and other expenses including expenditure on environment management plans relatable to land in possession are treated as cost of land.

f) Assets over which the Company has control, though created on land not belonging to the Company, are included under Property, Plant and Equipment.

g) Standby equipment and servicing equipment which meet the recognition criteria of Property, Plant and Equipment are capitalized.

h) Spares parts (procured along with the Plant and Machinery or subsequently) which meet the recognition criteria are capitalized. The carrying amount of those spare parts that are replaced is derecognized when no future economic benefits are expected from their use or upon disposal. Other spare parts are treated as "stores and spares" forming part of inventory.

i) If the cost of the replaced part or earlier inspection is not available, the estimated cost of similar new parts/inspection is used as an indication of what the cost of the existing part/ inspection component was when the item was acquired or inspection carried out.

j) An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit and Loss when the asset is derecognised.

2.0 Capital work in Progress (CWIP)

a) Expenditure incurred on assets under construction (including a project) is carried at cost under CWIP. Such costs comprise purchase price of assets including import duties and non-refundable taxes (after deducting trade discounts and rebates), expenditure in relation to

NHPC LIMITED FARIDABAD

survey and investigation activities of projects, cost of site preparation, initial delivery and handling charges, installation and assembly costs, etc.

b) Costs including employee benefits, professional fees, expenditure on maintenance and up-gradation of common public facilities, depreciation on assets used in construction of project, interest during construction and other costs that are directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management are accumulated under "Expenditure Attributable to Construction (EAC)" and subsequently allocated on systematic basis over major immovable assets, other than land and infrastructure facilities on commissioning of projects. Net pre-commissioning income/ expenditure is adjusted directly in the cost of related assets.

c) Capital Expenditure incurred for creation of facilities, over which the Company does not have control but the creation of which is essential principally for construction of the project is accumulated under "Expenditure Attributable to Construction" and carried under "Capital Work in Progress" and subsequently allocated on a systematic basis over major immovable assets, other than land and infrastructure facilities on commissioning of projects, keeping in view the "attributability" and the "Unit of Measure" concepts in Ind AS 16- "Property, Plant and Equipment". Expenditure of such nature incurred after completion of the project, is charged to the Statement of Profit and Loss.

3.0 Investment Property

Investment properties are initially measured at cost, including transaction costs. Subsequent to initial recognition, investment properties are carried at cost less accumulated depreciation and accumulated impairment loss, if any.

Investment properties are derecognised either when they have been disposed off or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in the Statement of Profit and Loss in the period of derecognition.

Transfers to or from investment property is made when and only when there is a change in use supported by evidence.

4.0 Intangible Assets and Intangible Assets under Development

a) Expenditure on research is charged to expenditure as and when incurred. Expenditure on development is capitalized only if the expenditure can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable and the Company intends to & has sufficient resources to complete development and to use or sell the asset.

b) Intangible assets that are acquired by the Company and which have finite useful lives, are measured on initial recognition at cost. Cost includes any directly attributable expenses necessary to make the assets ready for its intended use. After initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

c) Subsequent expenditure is recognized as an increase in the carrying amount of the asset when it is probable that future economic benefits deriving from the cost incurred will flow to the Company and the cost of the item can be measured reliably.

d) An item of Intangible asset is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

5.0 Foreign Currency Transactions

NHPC LIMITED FARIDABAD

a) Transactions in foreign currency are initially recorded at the functional currency spot rate at the date the transaction first qualifies for recognition. At each reporting date, monetary items denominated in foreign currency are translated at the functional currency exchange rates prevailing on that date.

b) Exchange differences relating to PPE/capital work-in-progress arising out of transaction entered into prior to April 1, 2004 are adjusted to the carrying cost of respective PPE/capital work-in-progress.

c) Exchange differences arising from translation of foreign currency borrowings entered into prior to March 31, 2016 recoverable from or payable to beneficiaries in subsequent periods as per CERC Tariff regulations are recognised as "Deferred Foreign Currency Fluctuation Recoverable/ Payable Account" and adjusted from the year in which the same is recovered/ paid.

d) Exchange differences arising from settlement/ translation of monetary items denominated in foreign currency entered into on or after April 1, 2016 to the extent recoverable from or payable to the beneficiaries in subsequent periods as per CERC Tariff Regulations are recognized as 'Regulatory Deferral Account Balances' during construction period and adjusted from the year in which the same become recoverable from or payable to the beneficiaries.

e) Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Where the Company has paid or received advance consideration in a foreign currency, the date of transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it), is the date when the Company initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration.

6.0 Regulatory Deferral Accounts

a) Where an item of expenditure incurred during the period of construction of a project is recognised as expense in the Statement of Profit and Loss i.e., not allowed to be capitalized as part of cost of relevant PPE in accordance with Ind AS, but is nevertheless permitted by CERC to be recovered from the beneficiaries in future through tariff, the right to recover the same is recognized as "Regulatory Deferral Account balances."

b) Expense/ income recognised in the Statement of Profit and Loss to the extent recoverable from or payable to the beneficiaries in subsequent periods as per CERC Tariff Regulations are recognised as "Regulatory Deferral Account balances."

c) These Regulatory Deferral Account balances are adjusted from the year in which the same become recoverable from or payable to the beneficiaries.

d) Regulatory Deferral Account balances are evaluated at each Balance Sheet date to ensure that the underlying activities meet the recognition criteria and it is probable that future economic benefits associated with such balances will flow to the entity. If these criteria are not met, the Regulatory Deferral Account balances are derecognised.

e) Regulatory Deferral Account balances are tested for impairment at each Balance Sheet date.

7.0 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Normally at initial recognition, the transaction price is the best evidence of fair value.

However, when the Company determines that transaction price does not represent the fair value, it uses inter-alia valuation techniques that are appropriate in the circumstances and

NHPC LIMITED FARIDABAD

for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All financial assets and financial liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy. This categorisation is based on the lowest level input that is significant to the fair value measurement as a whole:

• Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

• Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

• Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For financial assets and financial liabilities that are recognised at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation at the end of each reporting period.

8.0 Investments in subsidiaries and joint ventures

Investments in equity shares of subsidiaries and joint ventures are carried at cost less impairment, if any.

9.0 Financial assets other than investment in subsidiaries and joint ventures

A financial asset includes inter-alia any asset that is cash, equity instrument of another entity or contractual right to receive cash or another financial asset or to exchange financial asset or financial liability under conditions that are potentially favourable to the Company. A financial asset is recognized when and only when the Company becomes party to the contractual provisions of the instrument.

Financial assets of the Company comprise Cash and Cash Equivalents, Bank Balances, Investments in equity shares of companies other than in subsidiaries and joint ventures, Trade Receivables, Loan to employees, security deposit, claims recoverable etc.

a) Classification

The Company classifies its financial assets in the following categories:

- At amortised cost,
- At fair value through other comprehensive income (FVTOCI), and
- At fair value through profit and loss

The classification depends on the following:

(a) The entity's business model for managing the financial assets and

(b) The contractual cash flow characteristics of the financial asset.

For assets measured at fair value, gains and losses are either recorded in the Statement of Profit and Loss or under Other Comprehensive Income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through Other Comprehensive Income.

b) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or Loss, transaction costs that are attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the Statement of Profit and Loss.

NHPC LIMITED FARIDABAD

The Company measures the trade receivables at their transaction price, if the trade receivables do not contain a significant financing component.

c) Subsequent measurement

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

i) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and

ii) Contractual terms of the asset give rise on specified dates to cash flows that are Solely Payments of Principal and Interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the Effective Interest Rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in interest income in the Statement of Profit and Loss. The losses arising from impairment are recognised in the Statement of Profit and Loss.

Debt instrument at Fair Value through Other Comprehensive Income (FVTOCI)

A 'debt instrument' is classified as at FVTOCI if both the following criteria are met:

i) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and

ii) The asset's contractual cash flows represent Solely Payments of Principal and Interest (SPPI).

Debt instruments at fair value through Other Comprehensive Income are measured at each reporting date at fair value. Fair value movements are recognized in Other Comprehensive Income (OCI). However, the Company recognizes interest income, impairment losses, reversals and foreign exchange gain or loss in the Statement of Profit and Loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to profit and loss. Interest income from these financial assets is included in other income using the EIR method.

Equity investments:

All equity investments in entities other than subsidiaries and joint ventures are measured at fair value. Equity instruments which are held for trading, if any, are classified at Fair Value through Profit or Loss (FVTPL). The Company classifies all other equity instruments at FVTOCI. The Company makes such election on an instrument by- instrument basis. The classification is made on initial recognition and is irrevocable.

All fair value changes of an equity instrument classified at FVTOCI, are recognized in OCI. There is no subsequent reclassification of fair value gains and losses to the Statement of Profit and Loss. However, the Company may transfer the cumulative gain or loss within equity. Dividends from such investments are recognised in the Statement of Profit and Loss as "other income" when the company's right to receive payments is established.

Equity instruments included within the FVTPL category, if any, are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Trade Receivables:

Trade receivables containing a significant financing component are subsequently measured at amortised cost using the effective interest method.

d) Derecognition

A financial asset is derecognised only when:

NHPC LIMITED
एनएचपीसी N.H.P.C
FARIDABAD

i) The Company has transferred the rights to receive cash flows from the financial asset, or

ii) Retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the Company has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognised. Where the Company has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognised.

Where the Company has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the Company has not retained control of the financial asset. Where the Company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

On derecognition, the difference between the carrying amount and the amount of consideration received / receivable is recognized in the Statement of Profit and Loss.

e) Impairment of financial assets

In accordance with Ind AS 109, the Company applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on the following financial assets:

i) Financial assets that are debt instruments, and are measured at amortised cost.

ii) Financial assets that are debt instruments and are measured as at FVTOCI

iii) Contract Assets and Trade Receivables under Ind AS 115- *Revenue from Contracts with Customers*

iv) Lease Receivables under Ind AS 116- *Leases.*

The Company follows the 'simplified approach' permitted under Ind AS 109, "Financial Instruments" for recognition of impairment loss allowance based on life time expected credit loss from initial recognition on contract assets, lease receivables and trade receivables resulting from transactions within the scope of Ind AS 116 and Ind AS 115.

For recognition of impairment loss on other financial assets, the Company assesses whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. For assessing increase in credit risk and impairment loss, the Company assesses the credit risk characteristics on instrument-by-instrument basis. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, the Company reverts to recognize impairment loss allowance based on 12-month ECL. The amount of expected credit loss/ reversal for the period is recognized as expense/ income in the Statement of Profit and Loss.

10.0 Inventories

Inventories mainly comprise stores and spare parts to be used for maintenance of Property, Plant and Equipment and are valued at cost or net realizable value (NRV) whichever is lower. The cost is determined using weighted average cost formula and NRV is the estimated selling price in the ordinary course of business, less the estimated costs necessary to make the sale.

Scrap is valued at net realisable value.

The amount of any write-down of inventories to net realisable value and all losses of inventories is recognized as an expense in the period in which write-down or loss occurs.

11.0 Dividends

NHPC LIMITED
एन एच पी सी
NHPC
FARIDABAD

Final dividends and interim dividends payable to the Company's shareholders are recognised as change in equity in the period in which they are approved by the Company's shareholders and the Board of Directors respectively.

12.0 Financial liabilities

Financial liabilities of the Company are contractual obligations to deliver cash or another financial asset to another entity or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the Company.

The Company's financial liabilities include loans and borrowings, trade and other payables.

a) Classification, initial recognition and measurement

Financial liabilities are recognised initially at fair value less transaction costs that are directly attributable and subsequently measured at amortised cost. Financial liabilities are classified as subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the fair value at initial recognition is recognised in the Statement of Profit and Loss or in the carrying amount of an asset if another standard permits such inclusion, over the period of the borrowings using the effective rate of interest.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

b) Subsequent measurement

After initial recognition, financial liabilities are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in the Statement of Profit and Loss or in the carrying amount of an asset if another standard permits such inclusion, when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance cost in the Statement of Profit and Loss.

c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

d) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

e) Derivative financial instruments

Derivative financial instruments that are held by the Company to hedge the foreign currency and interest rate risk exposures and are not designated as hedges are accounted for at fair value through profit or loss. Changes in fair value are recognised in the Statement of Profit and Loss.

13.0 Government Grants

a) The benefits of a government loan at a below market rate of interest is treated as Government Grant. The loan is initially recognised and measured at fair value and the government grant is measured as the difference between the initially recognized amount of the loan and the proceeds received. The loan is subsequently measured as per the

NHPC LIMITED FARIDABAD

accounting policy applicable to financial liabilities and government grant is recognized initially as deferred income and subsequently in the Statement of Profit and Loss on a systematic basis over the useful life of the asset.

b) Monetary grants from the government for creation of assets are initially recognised as deferred income when there is reasonable assurance that the grant will be received and the company will comply with the conditions associated with the grant. The deferred income so recognised is subsequently amortised in the Statement of Profit and Loss over the useful life of the related assets.

c) Government grant related to income is recognised in the Statement of Profit and Loss on a systematic basis over the periods in which the entity recognises as expenses the related costs for which the grants are intended to compensate.

14.0 Provisions, Contingent Liabilities and Contingent Assets

a) Provisions are recognised when the Company has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Such provisions are determined based on management estimate of the amount required to settle the obligation at the Balance Sheet date. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably. The expense relating to a provision net of any reimbursement is presented in the Statement of Profit and Loss or in the carrying amount of an asset if another standard permits such inclusion.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows using a current pre-tax rate that reflects the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

b) Contingent liabilities are possible obligations that arise from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events not wholly within the control of the Company. Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Contingent liabilities are disclosed on the basis of judgment of management/independent experts. These are reviewed at each Balance Sheet date and are adjusted to reflect the current management estimate.

c) Contingent assets are possible assets that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent assets are disclosed in the financial statements when inflow of economic benefits is probable on the basis of judgment of management. These are assessed continually to ensure that developments are appropriately reflected in the financial statements.

15.0 Revenue Recognition and Other Income

Company's revenues arise from sale and trading of energy, project management / construction contracts/ consultancy assignment services and other income. Revenue from other income comprises interest from banks, employees, contractors etc., dividend from investments in joint ventures and subsidiary companies, dividend from investments in equity in other bodies corporate, interest from investment in bonds, surcharge received from beneficiaries for delayed payments, sale of scrap, other miscellaneous income, etc.

a) **Revenue from sale of power**

NHPC LIMITED FARIDABAD

i) Revenue is measured based on the consideration that is specified in a contract with a customer or is expected to be received in exchange for the products or services and excludes amounts collected on behalf of third parties. The Company recognises revenue when it transfers control over the products or services to a customer.

ii) Revenue from sale of power (except minimum lease receipts in respect of power stations considered as Finance Lease/Operating Lease) is accounted for as per tariff notified by the Central Electricity Regulatory Commission (CERC) under the CERC (Terms & Conditions of Tariff) Regulations, 2019 as modified by the orders of Appellate Tribunal for Electricity to the extent applicable. In the case of Power Stations where provisional/ final tariff is yet to be notified or where incentives/disincentives are chargeable/ payable as per CERC (Terms & Conditions of Tariff) Regulations, revenue is recognised to the extent it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. Rebates given to beneficiaries as early payments incentives are deducted from the amount of revenue.

iii) Customers are billed on a periodic and regular basis. As at each reporting date, revenue from sale of power includes an accrual for sales delivered to customers but not yet billed (unbilled revenue).

iv) Recovery/ refund towards foreign currency variation in respect of foreign currency loans and recovery towards Income Tax are recognised on year to year basis based on regulatory norms. Recovery towards deferred tax items recognized till March 31, 2009 are accounted for when the same materialises.

v) Adjustments arising out of finalisation of Regional Energy Account (REA), though not material, are effected in the year of respective finalisation.

vi) Advance Against Depreciation (AAD) considered as deferred income up to 31st March 2009 is included in sales on straight line basis over the balance useful life after a period of 12 years from the date of commercial operation of the Power Station.

b) Revenue from Project Management / Construction Contracts/ Consultancy assignments

i) Revenue from Project Management / Construction Contracts/ Consultancy assignments is measured based on the consideration that is specified in a contract with a customer or is expected to be received in exchange for the services and excludes amounts collected on behalf of third parties. The Company recognises revenue on the basis of input method. Input method recognises revenue on the basis of the costs incurred towards the satisfaction of a performance obligation relative to the total expected costs to the satisfaction of that performance obligation.

ii) Contract modifications, if any, are accounted for when there is a change in the scope or price (or both) of a contract that is approved by the parties to the contract and when the parties to a contract approve a modification that either creates new or changes existing enforceable rights and obligations of the parties to the contract. Accounting for modifications of contracts involves assessing whether the services added to an existing contract are distinct and whether the pricing is at the standalone selling price. Contract modifications are recorded on standalone basis when the scope of the contract increases because of the addition of promised goods or services or the price of the contract increases by an amount of consideration that reflects the Company's standalone selling prices of the additional promised goods or services and any appropriate adjustments to that price to reflect the circumstances of the particular contract. Services added that are not distinct are accounted for on a cumulative catch-up basis, while those that are distinct are accounted for prospectively, either as a separate contract, if the additional services are priced at the

NHPC LIMITED FARIDABAD

standalone selling price, or as a termination of the existing contract and creation of a new contract if not priced at the standalone selling price.

c) Revenue from trading of power

i) Accounting for revenue from trading of power involves assessment of the contract conditions to determine whether the Company is required to act in the capacity of a principal or as an agent. The Company acts in the nature of a principal in case it obtains control of the electricity before transferring it to the customer. Indicators of control includes assessment of whether the company is primarily responsible for fulfilling the promise to provide the electricity, it has the discretion to establish the price or whether it bears the inventory risk. Where the Company does not obtain control of the electricity before transferring it to the customer and its performance obligation is to arrange for the supply of electricity by another party, it acts in the nature of an agent.

ii) Where the Company acts as a principal in a contract for trading of power, the amount of the transaction price allocated to the performance obligation that is satisfied is recognised as revenue.

iii) Where the Company acts as an agent in a contract for trading of power, the net consideration retained after paying the supplier for the electricity provided to the customer is recognised as revenue from operations. Financial assets and liabilities arising out of these transactions are not set off.

d) Other income

i) Dividend income is recognized when the right to receive the same is established.

ii) For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial asset to the gross carrying amount of the financial asset. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

iii) Interest/Surcharge recoverable from customers including those arising out of contracts for trading of power and liquidated damages /interest on advances to contractors is recognised when it is highly probable that a significant reversal in the amount of revenue recognised will not occur in the future.

16.0 Employee Benefits

i) Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed or included in the carrying amount of an asset if another standard permits such inclusion as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term performance related cash bonus if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

ii) Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into separate trusts and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution plans are recognised as an employee benefit expense in the Statement of Profit and Loss or included in the carrying amount of an asset if another standard permits such inclusion in the

NHPC LIMITED FARIDABAD

periods during which services are rendered by employees. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction from future payments is available. Contributions to a defined contribution plan that is due more than 12 months after the end of the period in which the employees render the service are discounted to their present value.

Employees Defined Contribution Superannuation Scheme (EDCSS) for providing pension benefits and Social Security Scheme administered through separate trusts are accounted for as defined contribution plans.

iii) Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's Gratuity Scheme, Retired Employees Health Scheme (REHS), Provident Fund Scheme, Allowance on Retirement/Death, Memento on Superannuation to employees and Employees Family Economic Rehabilitation Scheme are in the nature of defined benefit plans. All these plans, other than Allowance on Retirement/Death ,Memento on Superannuation to employees and Employees Family Economic Rehabilitation Scheme are administered through separate trusts.

The liability or asset recognised in the Balance Sheet in respect of Gratuity and Retired Employees Health Scheme is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets.

In respect of Provident Fund Scheme, a liability is recognised in the Balance Sheet where the present value of the defined benefit obligation at the end of the reporting period is higher than the fair value of plan assets. Any surplus of fair value of plan assets over the present value of the defined benefit obligation at the end of the reporting period is not recognised as an asset since the Company does not have any right to the benefits either in the form of refunds from the Plan or by way of lower contribution to the Plan.

The defined benefit obligation is calculated annually by the actuary using the Projected Unit Credit Method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss or included in the carrying amount of an asset if another standard permits such inclusion.

Remeasurement gains (except in the case of Provident Fund Scheme) and losses arising from experience adjustments and changes in actuarial assumptions are recognised directly in Other Comprehensive Income in the period in which they occur and are included in retained earnings in the Statement of Changes in Equity.

iv) Other long-term employee benefits

Benefits under the Company's leave encashment scheme constitute other long term employee benefits.

The Company's net obligation in respect of long-term employee benefits is the amount of future benefits that employees have earned in return for their service in the current and prior periods. The benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The discount rate is based on the prevailing market yields of Indian government securities as at the reporting date that have maturity dates approximating the terms of the Company's obligations. The calculation is performed using the Projected Unit Credit Method. Contributions to the scheme and actuarial gains or losses are recognised in the Statement of Profit and Loss or included in the carrying

NHPC LIMITED
एन एच पी सी
N.H.P.C
FARIDABAD

amount of an asset if another standard permits such inclusion in the period in which they arise.

v) Termination benefits

The expenses incurred on terminal benefits in the form of ex-gratia payments and notice pay on voluntary retirement schemes are charged to the Statement of Profit and Loss in the year of incurrence of such expenses.

17.0 Borrowing costs

Borrowing costs consist of (a) interest expense calculated using the effective interest method as described in Ind AS 109 – 'Financial Instruments' (b) finance charges in respect of finance leases recognized in accordance with Ind AS 116– 'Leases' and(c) exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs.

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets are capitalised as part of the cost of such asset until such time the assets are substantially ready for their intended use. Qualifying assets are assets which necessarily take substantial period of time to get ready for their intended use or sale. All other borrowing costs are expensed in the period in which they occur.

When the Company borrows funds specifically for the purpose of obtaining a qualifying asset, the borrowing costs incurred are capitalised. When the Company borrows funds generally and uses them for the purpose of obtaining a qualifying asset, the capitalisation of the borrowing costs is computed based on the weighted average cost of all borrowings that are outstanding during the period and used for the acquisition, construction/exploration or erection of the qualifying asset. However, borrowing costs applicable to borrowings made specifically for the purpose of obtaining a qualifying asset are excluded from this calculation, until substantially all the activities necessary to prepare that asset for its intended use or sale are complete.

Income earned on temporary investment of the borrowings pending their expenditure on the qualifying assets is deducted from the borrowing costs eligible for capitalisation.

Capitalisation of borrowing cost ceases when substantially all the activities necessary to prepare the qualifying assets for their intended use are complete.

Other borrowing costs are recognized as an expense in the year in which they are incurred.

18.0 Depreciation and amortization

a) Depreciation on additions to /deductions from Property, Plant & Equipment (PPE) during the year is charged on pro-rata basis from / up to the date on which the asset is available for use / disposal.

b) (i) Depreciation on Property, Plant and Equipment of Operating Units of the Company capitalized till five years before the end of the useful life of the Power Station is charged to the Statement of Profit & Loss on straight-line method following the rates and methodology notified by CERC for the fixation of tariff except for assets specified in Policy No. 18.0(d).

(ii) Depreciation on Property, Plant and Equipment capitalized during the last five years of the useful life of a Power Station is charged on straight-line method for the period of extended life as per CERC Tariff Regulations/Orders, from the date on which such asset becomes available for use.

(iii) Where the life and / or efficiency of a Power Station is increased due to renovation and modernization, the expenditure thereon along with its unamortized depreciable amount is charged prospectively on straight-line method over the revised / remaining useful life.

NHPC LIMITED FARIDABAD

c) i) Depreciation on Property, Plant and Equipment (except old and used) of other than Operating Units of the Company is charged to the extent of 90% of the cost of the asset following the rates notified by CERC for the fixation of tariff except for assets specified in Policy No. 18.0(d).

ii) Depreciation on old and used items of PPE of other than Operating Units is charged on straight-line method to the extent of 90% of the cost of the asset over estimated useful life determined on the basis of technical assessment.

d) i) Depreciation in respect of following items of PPE is provided on straight line method based on the useful life and residual value (5%) given in the Schedule II of the Companies Act, 2013:

- Construction Plant and Machinery

- Computer and Peripherals

ii) Based on management assessment, depreciation on Mobile Phones is provided on straight line basis over a period of three years with residual value of Re 1.

iii) Based on management assessment, depreciation on Roof Top Solar Power System / Equipment is provided on straight line basis over a period of twenty five years with residual value of 10%.

e) Temporary erections are depreciated fully (100%) in the year of acquisition /capitalization by retaining Re. 1/- as WDV.

f) Assets valuing Rs. 5000/- or less but more than Rs. 750/- are fully depreciated during the year in which the asset becomes available for use with Re. 1/- as WDV.

g) Low value items, which are in the nature of assets (excluding immovable assets) and valuing up to Rs. 750/- are not capitalized and charged off to expenditure in the year of use.

h) Leasehold Land of operating units, is amortized over the period of lease or 40 years whichever is lower, following the rates and methodology notified vide CERC tariff regulations.

i) Leasehold Land and buildings, of units other than operating units, is amortized over the period of lease or 40 years, whichever is lower.

j) PPE created on leasehold land are depreciated to the extent of 90% of original cost over the balance available lease period of respective land from the date such asset is available for use or at the applicable depreciation rates & methodology notified by CERC tariff regulations for such assets, whichever is higher.

k) Right to use in respect of land is amortized over a period of 30 years from the date of commercial operation of the project in line with CERC tariff regulations notified for tariff fixation.

l) Cost of software recognized as 'Intangible Assets' is amortized on straight line method over a period of legal right to use or three financial years, whichever is earlier, starting from the year in which it is acquired.

m) Where the cost of depreciable assets has undergone a change during the year due to increase/decrease in long term liabilities on account of exchange fluctuation, price adjustment, settlement of arbitration/court cases, change in duties or similar factors, the unamortized balance of such assets is depreciated prospectively over the residual life of such assets at the rate of depreciation and methodology notified by CERC tariff regulations.

n) Spare parts procured along with the Plant and Machinery or subsequently which are capitalized and added in the carrying amount of such item are depreciated over the

NHPC LIMITED
एनएचपीसी
N·H·P·C
FARIDABAD

residual useful life of the related plant and machinery at the rates and methodology notified by CERC.

o) Useful life, method of depreciation and residual value of assets where depreciation is charged as per management assessment are reviewed at the end of each financial year and adjusted prospectively over the balance useful life of the asset, wherever required.

19.0 Impairment of non-financial assets other than inventories

a) The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets of the Company. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. The resulting impairment loss is recognised in the Statement of Profit and Loss.

b) In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

c) In case of expenditure on survey & investigation of projects, if it is decided to abandon such a project, expenditure incurred thereon is charged to the Statement of Profit and Loss in the year in which such decision is taken.

d) In case a project under survey and Investigation remains in abeyance by the order of appropriate authority/ by injunction of court order, any expenditure incurred on such projects from the date of order/ injunction of court is provided in the books from the date of such order till the period project is kept in abeyance by such order/ injunction. Provision so made is however reversed on the revocation of aforesaid order/ injunction.

e) Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

20.0 Income Taxes

Income tax expense comprises current and deferred tax. Tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised directly in equity or other comprehensive income, in which case the tax is also recognised directly in equity or in other comprehensive income.

a) Current tax

Current tax is the expected tax payable on the taxable income for the year on the basis of the tax laws applicable at the reporting date and any adjustments to tax payable in previous years. Taxable profit differs from profit as reported in the Statement of Profit and Loss because it excludes items of income or expense that are taxable or deductible in other years (temporary differences) and it further excludes items that are never taxable or deductible (permanent differences).

b) Deferred tax

NHPC LIMITED FARIDABAD

i) Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Company's financial statements and the corresponding tax bases used in the computation of taxable profit and are accounted for using the Balance Sheet method. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are generally recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that future taxable profits will be available against which those deductible temporary differences, unused tax losses and unused tax credits can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of an asset or liability in a transaction that at the time of the transaction affects neither the taxable profit or loss nor the accounting profit or loss.

ii) The carrying amount of deferred tax assets is reviewed at each Balance Sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available against which the temporary differences can be utilised.

iii) Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the Balance Sheet date. The measurement of deferred tax liabilities and assets reflects the tax consequences that would flow in the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

iv) Deferred tax is recognised in the Statement of Profit and Loss except to the extent that it relates to items recognised directly in other comprehensive income or equity, in which case it is recognised in Other Comprehensive Income or Equity.

v) Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities, and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

vi) Deferred tax recovery adjustment account is credited/ debited to the extent the deferred tax for the current period forms part of current tax in the subsequent periods and affects the computation of return on equity (ROE), a component of tariff.

vii) When there is uncertainty regarding income tax treatments, the Company assesses whether a tax authority is likely to accept an uncertain tax treatment. If it concludes that the tax authority is unlikely to accept an uncertain tax treatment, the effect of the uncertainty on taxable income, tax bases and unused tax losses and unused tax credits is recognised. The effect of the uncertainty is recognised using the method that, in each case, best reflects the outcome of the uncertainty: the most likely outcome or the expected value. For each case, the Company evaluates whether to consider each uncertain tax treatment separately, or in conjunction with another or several other uncertain tax treatments, based on the approach that best prefixes the resolution of uncertainty.

21.0 Compensation from third parties

Impairments or losses of items, related claims for payments of compensation from third parties including insurance companies and any subsequent purchase or construction of assets/inventory are separate economic events and are accounted for separately.

Compensation from third parties including from insurance companies for items of property, plant and equipment or for other items that were impaired, lost or given up is included in the Statement of Profit and Loss when the compensation becomes receivable. Insurance claims for loss of profit are accounted for based on certainty of realisation.

NHPC LIMITED FARIDABAD

22.0 Segment Reporting

a) In accordance with Ind AS 108 – Operating Segment, the operating segments used to present segment information are identified on the basis of internal reports used by the Company's Management to allocate resources to the segments and assess their performance. The Board of Directors is collectively the Company's "Chief Operating Decision Maker" or "CODM" within the meaning of Ind AS 108.

b) Electricity generation is the principal business activity of the Company. Other operations viz., Contracts, Project Management, Consultancy works and Trading of Power do not form a reportable segment as per the Ind AS -108.

c) The Company has a single geographical segment as all its Power Stations are located within the Country.

23.0 Leases

The Company assesses whether a contract is or contains a lease at the inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- the contract involves the use of an identified asset – this may be specified explicitly or implicitly and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified;
- the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Company has the right to direct the use of the asset. The Company has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Company has the right to direct the use of the asset if either:
  - the Company has the right to operate the asset; or
  - the Company designed the asset in a way that predetermines how and for what purpose it will be used.

At inception or on reassessment of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for the leases of land and buildings in which it is a lessee, the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

i. Company as a lessee

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

Land taken for use from State Government (without transfer of title) and expenses on relief and rehabilitation as also on creation of alternate facilities for land evacuees or in lieu of existing facilities coming under submergence and where construction of such alternate facilities is a specific pre-condition for the acquisition of the land for the purpose of the project, are accounted for as Right of Use Assets.

NHPC LIMITED FARIDABAD

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability. Assessment of impairment is done using the principles of Ind AS 36-Impairment of Assets as given in Significant Accounting Policy No. 19.0 above.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or when a lease contract is modified, and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in statement of profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Company presents right-of-use assets that do not meet the definition of investment property as a separate line item on the face of the balance sheet.

The Company has elected not to recognise right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

ii. Company as a lessor

When the Company acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset.

For embedded leases in the nature of a Finance Lease, the investment in the power station is recognised as a Lease Receivable. The minimum lease receipts are identified by segregating the embedded lease receipts from the contract amounts (including Advance Against Depreciation (AAD) recognised in accordance with CERC Tariff regulations 2004-09 up to 31st March 2009 and considered as deferred income). Each lease receipt is allocated between

NHPC LIMITED
एनएचपीसी
N·H·P·C
FARIDABAD

the receivable and finance lease income (forming part of revenue from operations) so as to achieve a constant rate of return on the Lease Receivable outstanding.

Subsequent to initial recognition, the Company regularly reviews the estimated unguaranteed residual value and applies the impairment requirements of Ind AS 109- Financial Instruments, recognising an allowance for expected credit losses on the lease receivables.

Finance lease income is calculated with reference to the gross carrying amount of the lease receivables, except for credit-impaired financial assets for which interest income is calculated with reference to their amortised cost (i.e. after a deduction of the loss allowance).

If an arrangement contains lease and non-lease components, the Company applies Ind AS 115- *Revenue from Contracts with Customers* to allocate the consideration in the contract.

In the case of Operating Leases or embedded operating leases, the lease income from the operating lease is recognised in revenue over the lease term to reflect the pattern of use benefit derived from the leased asset. The respective leased assets are included in the Balance Sheet based on their nature and depreciated over its economic life.

24.0 Business combinations

Business combinations are accounted for using the acquisition accounting method as at the date of the acquisition, which is the date at which control is transferred to the Company. The consideration transferred in the acquisition and the identifiable assets acquired and liabilities assumed are recognized at fair values on their acquisition date. Goodwill is initially measured at cost, being the excess of the consideration transferred over the net identifiable assets acquired and liabilities assumed. Where the fair value of net identifiable assets acquired and liabilities assumed exceed the consideration transferred, after reassessing the fair values of the net assets and contingent liabilities, the excess is recognized as capital reserve. Acquisition related costs are expensed as incurred.

25.0 Material prior period errors

Material prior period errors are corrected retrospectively by restating the comparative amounts for the prior periods presented in which the error occurred. If the error occurred before the earliest period presented, the opening balances of assets, liabilities and equity for the earliest period presented, are restated unless it is impracticable, in which case, the comparative information is adjusted to apply the new accounting policy prospectively from the earliest date practicable.

26.0 Earnings per share

a) Basic earnings per equity share is computed by dividing the net profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the financial year.

b) Diluted earnings per equity share is computed by dividing the net profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

c) Basic and diluted earnings per equity share are also presented using the earnings amounts excluding the movements in regulatory deferral account balances.

27.0 Statement of Cash Flows

a) **Cash and Cash Equivalents:**

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily

NHPC LIMITED FARIDABAD

convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. However, for Balance Sheet presentation, Bank overdrafts are shown within "Borrowings" under Current Liabilities.

b) Statement of cash flows is prepared in accordance with the indirect method prescribed in Ind AS 7- 'Statement of Cash Flows'.

28.0 Current versus non-current classification

The Company presents assets and liabilities in the Balance Sheet based on current/non-current classification.

a) An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

b) A liability is current when:

- It is expected to be settled in the normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

c) Deferred tax assets /liabilities are classified as non-current assets / liabilities.

29.0 Miscellaneous

a) Each material class of similar items is presented separately in the financial statements. Items of a dissimilar nature or function are presented separately unless they are immaterial.

b) Liabilities for Goods in transit/Capital works executed but not certified are not provided for, pending inspection and acceptance by the Company.

(IV) Recent accounting pronouncements: Standards issued but not yet effective

The Ministry of Corporate Affairs has vide notification dated March 23, 2022 notified Companies (Indian Accounting Standards) Amendment Rules, 2022 which amends certain Indian Accounting Standards, and are effective April 1, 2022. The summary of the major amendments and its impact on the Company are given hereunder:

(i) Ind AS 16 – Proceeds before intended use

The amendment prohibits an entity recognising the excess of net sale proceeds of items produced over the cost of testing, in the Statement of Profit and Loss. Instead, the same shall be deducted from the directly attributable costs considered as part of cost of an item of property, plant, and equipment.

The Company does not expect the amendment to have any impact in the financial statements.

(ii) Ind AS 37 – Onerous Contract – Cost of fulfilling a Contract

NHPC LIMITED FARIDABAD

The amendments specify that the "Cost of fulfilling" a contract comprises the "cost that relate directly to the Contract". Cost that relate directly to the Contract are both the incremental costs of fulfilling the contract (example: direct labour, material) and allocation of other costs that relate directly to fulfilling the contract.

This amendment is essentially in the nature of a clarification and the Company does not expect the amendment to have any material impact in the financial statements.

(iii) Ind AS 103: Business Combination

The amendment states that to qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities as provided in the Conceptual Framework for Financial Reporting under Indian Accounting Standards (Conceptual Framework) issued by the Institute of Chartered Accountants of India. Therefore, the acquirer does not recognise those costs as part of applying the acquisition method. Instead, the acquirer recognises those costs in its post-combination financial statements in accordance with other Ind AS.

These amendments have no material impact on the financial statements of the Company.

(iv) Ind AS 109 – Annual improvement to Ind AS (2021)

The amendment clarifies which fees an entity includes when it applies the "ten percent" test of Ind AS 109 in assessing whether to derecognise a financial liability.

The Company does not expect the amendment to have any impact in the financial statements.

2.4.1 Amounts recognised in the Statement of Profit and Loss for investment property

(Amount in ₹)

	As at 31.3.2022	As at 31.03.2021
Rental income	-	-
Direct operating expenses from property that generated rental income	-	-
Direct operating expenses from property that did not generate rental	-	-

2.4.2 Fair Value of Investment property

As at 31.3.2022	As at 31.03.2021

2.4.3 Investment property comprise of freehold land which was bought for normal business requirements of the Company. However, due to change in business plans, the Company is in the process of finalising the future use of the property. IND AS 40, Investment Property, provides by way of example that land held for a currently undetermined future use is to be regarded as held for capital appreciation and hence to be classified as Investment Property. Accordingly such land has been classified as Investment Property.

2.4.4 Valuation process

The above land is carried in the financial statements at cost. However, the fair value of investment property has been arrived on the basis of market value as per valuation report and considered to be level-2 of fair valuation hierarchy.The valuation is carried out by a registered valuer as defined under rule 2 of Companies (Registered Valuer and Valuation) Rules, 2017.

2.4.5 Title deeds of Immoveable Properties not held in name of the Company as on 31st March 2022:-

	Description of item of Property	Gross Carrying Value	Title Deeds held in the name of	Whether title deed holder is a promoter, director or relative of Promoter/director or employee of promoter/director	Reason for not being held in the name of the Company
Investment Property					

2.4.6 Title deeds of Immoveable Properties not held in name of the Company as on 31st March 2021:-

	Description of item of Property	Gross Carrying Value	Title Deeds held in the name of	Whether title deed holder is a promoter, director or relative of Promoter/director or employee of promoter/director	Reason for not being held in the name of the Company
Investment Property

2.2.3 Expenditure attributable to Construction (EAC) includes ₹ ..... (Previous period ₹ .....) towards borrowing cost capitalised during the period. - Only for construction projects. (Also Refer Note-32)

2.2.4 Capital Work in Progress (CWIP) includes a cumulative expenditure of ₹ ..... (Previous period ₹ .....) including Survey, Investigation, Consultancy and Supervision Charges of ₹ ..... (Previous period ₹ .....) on projects under Survey & Investigation stage. Of this, a sum of ₹ .....(Previous period ₹ .....) pertains to Subansiri Upper Project, which had been decided by Government of Arunachal Pradesh to be handed over to a Private Developer. However, pending handing over of the project & recovery of expenditure incurred on it, the said amount remains provided for in the books as an abundant precaution. Out of the balance of ₹ ..... (Previous period ₹ .....) pertaining to projects with the company, a sum of ₹ ..... (Previous period ₹ .....) has been provided upto date where uncertainties are attached and ₹ ..... (Previous period ₹ .....), pertaining to other projects having reasonable certainty of getting clearance, is carried over. (Also Refer Note 34(24), 34(25), 34(26) and 34(27))

2.2.5 Siang Basin, Subansiri Basin & Dibang Multipurpose Projects were taken over from Brahmaputra Board. Pending settlement of accounts with Brahmaputra Board, assets and liabilities have been accounted for to the extent of amounts incurred by the Company on these projects. Siang Lower & Siyom HE Projects (in Siang Basin) & Subansiri Middle (in Subansiri Basin) have since been handed over to Private Developer and liability arising out of settlement of accounts with Brahmaputra Board towards these projects if any, is recoverable from respective Private Developers. - Only for Dibang & Subansiri Lower Project

2.2.6 Underground Works amounting to ₹ NIL (Previous period ₹ NIL) created on "Land -Right to Use" classified under Right of Use Assets, are included under respective heads of Capital Work in Progress (CWIP).

2.2.7 Refer Note no. 34(9) of Standalone Financial Statements for information of non-current assets pledged with banks as security for related borrowings. (For CO Only)

2.2.8 Capital Expenditure on projects under construction approved by the competent authority undergoes revision over period of time as hydroelectric projects are time. intensive and some takes longer period than envisaged. As a consequence the cost escalation occur, which requires approval of competent authority. Pending such approval the expenditure incurred is carried forward in Capital Work in Progress (CWIP).

2.2.9 Refer Note no. 34(4) of Standalone Financial Statements for information regarding assets capitalised on provisional basis.

2.2.10 Refer Note no. 34(18) of Standalone Financial Statements for information regarding Impairment of Assets.

18.1 Movement in Deferred Tax Liability/ (Assets)

18.2 Pursuant to the provisions of Section 115BAA of the Income-Tax Act 1961 announced by Tax Laws (amended) Ordinance 2019 and promulgated as Taxation Laws (amendment) Act 2019 enacted on 11th December 2019 applicable with effect from 1st April 2019, Domestic Companies have options to pay Income Tax at the concessional rates by forgoing certain exemptions/ deductions (the new tax regime) as specified in the said section. The company has Minimum Alternate Tax (MAT) credit of Rs. ..... lying unutilized as on 31st March, 2022 and is availing tax deductions in respect of its profit from generation of power from certain power stations. In view of this it has been decided to continue with existing tax structure for Current and Deferred Tax recognition. Necessary decision for exercising the option under section 115BAA will be taken once tax deductions are not available and MAT credit is substantially exhausted.

18.3 During the year, the Company has recognised MAT credit amounting to Rs. ____ Crore out of total MAT Credit of Rs. _____ crore available to the Company in future (31 March 2021: ₹ Nil) as the same is likely to give future economic benefits in the form of availability of set off against future income tax liability. Out of the above, an amount of Rs. _____ Crore (31 March 2021: ₹ Nil) has been recognised as payable to beneficiaries through regulatory deferral account balances. (Also refer Note _____).

B) FAIR VALUATION MEASUREMENT

(i) Fair Value Hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair value are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the company has classified its financial instruments into the following three levels prescribed under Ind AS-113 "Fair Value Measurements"

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments and traded bonds that have quoted price. The fair value of all equity instruments including bonds which are traded in the recognised Stock Exchange and money markets are valued using the closing prices as at the reporting date.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.The fair value of financial assets and liabilities included in level 3 is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes of similar instruments. This includes derivative MTM assets/liabilities,security deposits/ retention money and loans at below market rates of interest.

(a) Financial Assets/Liabilities Measured at Fair Value-Recurring Fair Value Measurement:

(Amount in ₹)

		As at 31st March, 2022			As as 31st March, 2021		
	Note No.	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3

- In Debt Instruments (Government/ Public Sector Undertaking)- Quoted *	3.1	-			-		
Financial Assets at FVTPL :							
(i) Derivative MTM Asset (Call spread option and Coupon only swap)	3.3		-			0	
Total		-	-	-	-	-	-

Note:

* in the absence of latest quoted market rates in respect of these instruments, rates have been derived as per Fixed Income Money Market and Derivatives Association of India (FIMMDA).

All other financial assets and financial liabilities have been measured at amortised cost at balance sheet date and classified as non-recurring fair value measurement.

(Amount in ₹)

(b) Financial Assets/Liabilities measured at amortised cost for which Fair Value are disclosed:

Total Financial Liabilities		1,742.739	1,742.739	3,642.806	3,642.806

Note:-

1. The Carrying amounts of current investments, Trade and other receivables, Cash and cash equivalents,Short-term loans and advances, Short term borrowings, Trade payables and other current financial liabilities are considered to be the same as their fair values, due to their short term nature.

2. For financial assets and financial liabilities measured at fair value, the carrying amounts are equal to the fair value.

(d) Valuation techniques and process used to determine fair values

(1) The Company values financial assets or financial liabilities using the best and most relevant data available. -Specific valuation techniques used to determine fair value of financial instruments includes:
-Use of Quoted market price or dealer quotes for similar instruments.
- Fair value of remaining financial instruments is determined using discounted cash flow analysis.

(2) The discount rate used to fair value financial instruments classified at Level -3 is based on the Weighted Average Rate of company's outstanding borrowings except subordinate debts and foreign currency borrowings

(3) Financial liabilities that are subsequently measured at amortised cost are recognised initially at fair value minus transaction costs using the effective interest method where such transaction costs incurred on long term borrowings are material.

NHPC LIMITED FARIDABAD

(2)Financial Risk Management

(A) Financial risk factors

Risk	Exposure arising from	Measurement	Management
Credit risk	Cash & Cash equivalents, Other Bank Balances ,Trade receivables and financial assets measured at amortised cost, Lease Receivable.	Aging analysis, credit rating.	Diversification of bank deposits, letter of credit for selected customers.
Liquidity Risk	Borrowings and other facilities.	Rolling cash flow forecasts & Budgets	Availability of committed credit lines and borrowing facilities.
Market Risk- Interest rate	Long term borrowings at variable rates	Sensitivity Analysis	1. Diversification of fixed rate and floating rates 2. Refinancing 3. Actual Interest is recovered through tariff as per CERC Regulation
Market Risk- security prices	Investment in equity and debt securities	Sensitivity Analysis	Portfolio diversification
Market Risk- foreign exchange	Recognised financial liabilities not denominated in INR.	Sensitivity Analysis	Foreign exchange rate variation is recovered through tariff as per CERC Regulation. Call spread option and coupon only swap

Risk management framework

The Company's activities make it susceptible to various risks. The Company has taken adequate measures to address such concerns by developing adequate systems and practices. Company has a well-defined risk management policy to provide overall framework for the risk management in the Company. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

The Company is exposed to the following risks from its use of financial instruments:

i) Credit risk

Credit risk is the risk that a counter party will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The company is exposed to credit risk from its operating activities (primarily trade receivables/leased assets) and from its financing activities including deposits with banks and financial institutions.

ii) Liquidity risk.

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses.

iii) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise three types of risk: currency rate risk, interest rate risk and other price risks, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits and investments. Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The company operates in a regulated environment. Tariff of the company is fixed by the Central Electricity Regulatory Commission (CERC) through Annual Fixed Charges (AFC) comprising the following five components:

1. Return on Equity (RoE), 2. Depreciation, 3. Interest on Loans, 4. Operation & Maintenance Expenses and 5. Interest on Working Capital Loans. In addition to the above Foreign Currency Exchange variations and Taxes are also recoverable from Beneficiaries in terms of the Tariff Regulations. Hence variation in interest rate, currency exchange rate variations and other price risk variations are recoverable from tariff and do not impact the profitability of the company.

(B) Credit Risk

The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and other financial instruments.

Trade Receivables, unbilled revenue & lease receivables :-

The Company extends credit to customers in normal course of business. The Company monitors the payment track record of the customers. Outstanding receivables are regularly monitored. The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are mainly state government authorities and operate in largely independent markets. Unbilled revenue primarily relates to the Company's right to consideration for work completed but not billed at the reporting date and have substantially the same risk characteristics as trade receivables for the same type of contracts.

Lease receivables of the company are with regard to Power Purchase Agreements classified as finance lease as per Ind AS 116- 'Leases' as referred to in Note No. 34. The power purchase agreements are for sale of power to single beneficiary and recoverability of interest income and principal on leased assets i.e. PPE of the power stations are assessed on the same basis as applied for trade receivables.

Financial assets at amortised cost :-

NHPC LIMITED FARIDABAD

105

Employee Loans: The Company has given loans to employees at concessional rates as per Company's policy which have been measured at amortised cost at Balance Sheet date. The recovery of the loan is on fixed instalment basis from the monthly salary of the employees. The loans are secured by way of mortgage/hypothecation of the assets for which such loans are given. Management has assessed the past data and does not envisage any probability of default on these loans.

Loans to Government of Arunanchal Pradesh : The Company has given loan to Government of Arunachal Pradesh at 9% rate of interest as per the terms and conditions of Memorandum of understanding signed between the Company and Government of Arunachal Pradesh for construction of hydroelectric projects in the state. The loan has been measured at amortised cost. The loan is recoverable from the share of free power of the state government from the first hydroelectric project to be commissioned in the state. Management does not envisage any probability of default on the loan.

Financial instruments and cash deposits :-

The Company considers factors such as track record, size of the bank, market reputation and service standards to select the banks with which balances and deposits are maintained. Generally, the balances are maintained with the banks with which the Company has also availed borrowings. The Company invests surplus cash in short term deposits with scheduled banks. The company has balances and deposits with banks which are well diversified across private and public sector banks with limited exposure with any single bank.

(I) Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was as

(Amount in ₹)

Particulars	As at 31st March, 2022	As at 31st March, 2021
Financial assets for which loss allowance is measured using 12 months Expected Credit Losses (ECL)		
Non-current investments (Other than Subsidiaries and Joint Ventures)	-	-
Loans -Non Current (including interest)	-	-

Bank balances other than Cash and Cash Equivalents	5,856,392	5,604,703
Loans -Current	-	-
Other Financial Assets (Excluding Lease Receivables)	73,873,828	136,416,476
Total (A)	79,823,517	141,572,441
Financial assets for which loss allowance is measured using Life time Expected Credit Losses (ECL)		
Trade Receivables	4,436,022	-
Lease Receivables (Including Interest)	-	-
Total (B)	4,436,022	-
TOTAL (A+B)	84,259,539	141,572,441

(ii) Provision for expected credit losses :-

(a) Financial assets for which loss allowance is measured using 12 month expected credit losses

The Company assesses outstanding receivables on an ongoing basis considering changes in payment behaviour and provides for expected credit loss on case-to-case basis.

(b) Financial assets for which loss allowance is measured using life time expected credit losses

A default in recovery of financial assets occurs when in view of the management there is no significant possibility of recovery of receivables after considering all available options for recovery. As the power stations and beneficiaries of the company are spread over various states of India, geographically there is no concentration of credit risk.

The Company primarily sells electricity to bulk customers comprising mainly of state utilities owned by State Governments. The Company has a robust payment security mechanism in the form of Letters of Credit (LC) backed by the Tri-Partite Agreements (TPA) signed among the Govt. of India, RBI and the Individual State Governments subsequent to the issuance of the One Time Settlement Scheme of SEBs dues during 2001-02 by the GOI, which was valid till October 2016. Govt of India has approved the extension of these TPAs for another period of 10 years. Most of the States have signed these TPAs and signing is in progress for the balance states. As per the provisions of the TPA, the customers are required to establish LC covering 105% of the average monthly billing of the Company for last 12 months. The TPA also provided that if there is any default in payment of current dues by any State Utility the outstanding dues can be deducted from the Central Plan Assistance of the State and paid to the concerned CPSU. There is also provision of regulation of power by the Company in case of non payment of dues and non-establishment of LC.

CERC Tariff Regulations 2019-24 allow the Company to raise bills on beneficiaries for late-payment surcharge. which adequately compensates the Company for time value of money arising due to delay in payment. Further, the fact that beneficiaries are primarily State Governments/ State Discoms and considering the historical credit loss experience for trade receivables, the Company does not envisage either impairment in the value of receivables from beneficiaries or loss due to time value of money due to delay in realization of trade receivables. However, the Company assesses outstanding trade receivables on an ongoing basis considering changes in operating results and payment behaviour and provides for expected credit loss on case-to-case basis. As at the reporting date company does not envisage any default risk on account of non-realisation of trade receivables.

(III) Reconcillation of Impairment loss provisions
The movement in the allowance for impairment in respect of financial assets during the period was as follows:

(Amount in ₹)

	Trade Receivables	Claim Recoverable	Loans	Total
Balance as at 1.4.2020	-	72,342,220.00		72,342,220.00
Changes in Loss Allowances	0	0	0	0
Balance as at 1.4.2021	0	72342220	0	72342220
Changes in Loss Allowances	0	-13808256	0	-13808256
Balance as at 31.3.2022	0	58533964	0	58533964

Based on historical default rates, the company believes that no impairment allowance is necessary in respect of any other financial assets as the amounts of such allowances are not significant.

NHPC LIMITED FARIDABAD

(C) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due.

i) The Company's objective is to maintain optimum levels of liquidity at all times to meet its cash and collateral requirements. The Company relies on a mix of borrowings and excess operating cash flows to meet its need for funds. The current committed lines of credit and internal accruals are sufficient to meet its short to medium term expansion needs. The Company monitors rolling forecasts of its liquidity requirements to ensure that it has sufficient cash to meet capital expenditure and operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the borrowing limits or covenants (where applicable) are not breached on any of its borrowing facilities.

The company had access to the following undrawn borrowing facilities at the end of the reporting period:

(Amount in ₹)

Particulars	As at 31st March, 2022	As at 31st March, 2021
At Floating Rate		
fixed rate		
Total	-	-

ii) Maturities of Financial Liabilities:

The amounts disclosed in the table below are the contractual undiscounted cash flows. Balances due within 1 year is equal to their carrying balances as the impact of discounting is not significant.

As at 31st March, 2022

NHPC LIMITED FARIDABAD

108

(D) Market Risk:

The sensitivity analysis excludes the impact of movements in market variables on the carrying value of post-employment benefit obligation provisions and on the non-financial assets and liabilities. The sensitivity of the relevant item of the Statement of Profit and Loss is the effect of the assumed changes in the respective market risks. The Company's activities expose it to a variety of financial risks, including the effects of changes in interest rates.

(I) Interest rate risk and sensitivity

The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long term debt obligations with floating interest rates. Company's policy is to maintain most of its borrowings at fixed rate. Company's fixed rate borrowings are carried at amortised cost and are not subject to interest rate risk. Further the company refinance these debts as and when favourable terms are available. The company is also compensated for variability in floating rate through recovery by way of tariff adjustments under CERC tariff regulations.

The exposure of the company's borrowing to interest rate changes at the end of the reporting period are as follows:

(Amount in ₹)

Particulars	As at 31st March, 2022	As at 31st March, 2022	As at 31st March, 2021	As at 31st March, 2021
	weighted average interest rate		weighted average interest rate	
Floating Rate Borrowings (INR)				
Floating Rate Borrowings (FC)				
Fixed Rate Borrowings (INR)				
Fixed Rate Borrowings (FC)				
Total				

Interest Rate Sensitivity Analysis

Profit or loss is sensitive to higher/lower interest expense from borrowings as a result of change in interest rates. The majority of the borrowings of the company are at fixed interest rate. In case of floating rate borrowings there is no impact on Statement of Profit and Loss of the company due to increase/decrese in interest rates, as the same is recoverable from beneficiaries through tariff .

(ii) Price Risk:

(a) Exposure

The company's exposure to price risk arises from investment in equity shares and debt instruments classified in the financial statements as Fair Value Through OCI. Company's investment in equity shares are listed in recognised stock exchange and are publicly traded in the stock exchanges. Company's investment in debt instruments comprise quoted Government Securities and Public Sector Bonds and are publicly traded in the market. The investment has been classified under non-current investment in Balance Sheet.

NHPC LIMITED FARIDABAD

(b) Price Risk Sensitivity

For Investment in Equity Instruments (Investment in equity shares of IOB and PTC)

The table below summarises the impact of increase/decrease in the market price of investment in equity instruments on the company's equity for the period/ year:

(Amount in ₹)

Particulars	As at 31st March, 2022		As at 31st March, 2021	
Investment in Equity shares of :	% change	Impact on other components of equity	% change	Impact on other components of equity
PTC India Ltd				
Indian Overseas Bank				

Sensitivity has been worked out based on the previous 3 years average of six monthly fluctuations in the share price as quoted on the National Stock Exchange (NSE).

For Investment in Debt Instruments (Investments in Government and Public Sector Undertaking Bonds)

The table below summarises the impact of increase/decrease of the market value of the debt instruments on company's equity for the period/ year:

(Amount in ₹)

Particulars	As at 31st March, 2022		As at 31st March, 2021	
	% change	Impact on other components of equity	% change	Impact on other components of equity
Government Securities				
Public Sector Undertaking Tax Free Bonds				

(III)Foreign Currency Risk

The company is compensated for variability in foreign currency exchange rate through recovery by way of tariff adjustments under the CERC Tariff Regulations.

(a) Foreign Currency Exposure:

The company's exposure to foreign currency risk at the end of the reporting period expressed in INR are as follows :

(Amount in ₹)

Particulars	As at 31st March, 2022	As at 31st March, 2021
Financial Liabilities:		
Foreign Currency Loans		
Japan International Corporation LTD (JPY)		
MUFG BANK (JPY)		
Other Financial Liabilities	-	-
Net Exposure to foreign currency (liabilities)	0	0

Out of the above, loan from MUFG bank is hedged by derivative instrument. For balance exposure gain/(loss) on account of exchange variation is recoverable from beneficieries asper Tariff Regulation 2019-24. Therefore, currency risk in respect of such exposure would not be very significant.

(b) Sensitivity Analysis

There is no impact of foreign currency fluctuations on the profit of the company as these are either adjusted to the carrying cost of respective fixed asset/Capital Work-in-Progress or recovered through tariff as per CERC Tariff Regulation 2014-19.

FARIDABAD NHPC LIMITED

(3) Capital Management

(a) Capital Risk Management

The primary objective of the Company's capital management is to maximize the shareholder value. CERC Tariff Regulations prescribe Debt : Equity ratio of 70:30 for the purpose of fixation of tariff of Power Projects. Accordingly the company manages its capital structure to maintain the normative capital structure prescribed by the CERC.

The Company monitors capital using Debt : Equity ratio, which is net debt divided by total capital. The Debt : Equity ratio are as follows:

(Amount in ₹)

Statement of Gearing Ratio		
Particulars	As at 31st March, 2022	As at 31st March, 2021
(a) Total Debt	-	-
(b) Total Capital	3,205,525,189	3,390,351,074
Gearing Ratio (a/b)	0.00	0.00

Note: For the purpose of the Company's capital management, capital includes issued capital and reserves. Net debt includes interest bearing loans and borrowings.

(b) Loan Covenants:

Under the terms of the major borrowing facilities, the company is required to comply with the following financial covenants:-

1. Company shall maintain credit rating AAA and if rating comes down, rate of interest shall be increased by 25 basis point for each notch below AAA rating

2. Debt to net worth should not exceed 2:1.

3 Interest coverage ratio should be more than 2 times and should be calculated as ((Net Profit+Non Cash Expenditures+Interest Payable-Non Cash Income)/Interest Payable))

4 The gross Debt Service Coverage Ratio of the Company will no time be less than 1.25 during the currency of loan.

5.The Government of India holding in the company not to fall below 51%.

6. First Charge on Assets with 1:1.33 coverage on pari paasu basis.

During the year the company has complied with the above loan covenants.

i) Amounts recognised in profit or loss for investment property

Rental income	nil
Direct operating expenses from property that generated rental income	nil
Direct operating expenses from property that did not generate rental income	nil

(ii) Fair Value of Investment property

(iii) Investment property comprise of freehold land which was bought for normal business requirements of the Company. However, due to change in business plans, the Company is in the process of finalising the future use of the property. IND AS 40, Investment Property, provides by way of example that land held for a currently undetermined future use is to be regarded as held for capital appreciation and hence as investment property. Accordingly such land has been classified as investment Property.

(iv) Valuation process
The above land is carried in the financial statements at cost. However, the fair value of investment property has been arrived on the basis of circle rates notified by the state govt. prevailing in the locality where property is situated.

NOTE NO. 34:

1 Disclosures relating to Contingent Liabilities:

Contingent Liabilities to the extent not provided for -

a) Claims against the Company not acknowledged as debts in respect of:

(i) Capital works

Particulars	(Amount in Rs.) 31.03.2022	31.03.2021
Claim of Contractors (Aggregated amount): Contractors have lodged claims against the Company on account of rate and quantity deviation, cost relating to extension of time, idling charges due to stoppage of work/delays in handing over the site etc. These claims are being contested by the company as being not admissible in terms of provisions of the respective contracts or are lying at arbitration tribunal/other forums/under examination with the Company	8,098,698,696	9,307,092,541
Arbitration awards including updated interest thereon, against the Company, which have been challenged/decided to be challenged in the Court of Law included in the claim:	7,997,373,549	7,624,550,281
Provisions created against above claims: Management has assessed the above claims and recognized a provision based on probability of outflow of resources embodying economic benefits.	460,267,362	460,267,362
Amount of contingent liability i.e. amounts for which Company may be held contingently liable	7,638,431,334	8,846,825,179
Decrease of contingent liability from Opening Balance of Contingent Liability		1,585,174,421
In respect of such estimated contingent claims either the outflow of resources embodying economic benefits is not probable or a reliable estimate of the amount required for settling the obligation cannot be made. In respect of the rest of the claims/obligations, possibility of any outflow in settlement is considered as remote.		

(ii) Land Compensation cases

Particulars	(Amount in Rs.) 31.03.2022	31.03.2021
Claim of erstwhile Land Holders: In respect of land acquired for the projects, some of the erstwhile land owners have filed claims for higher compensation before various authorities/courts.	391,649,805	206,324,373
Provisions created against above claims: Pending settlement, the Company has assessed and recognise a provision based on probability of outflow of resources embodying economic benefits	128,800,000	-
Amount of contingent liability i.e. amounts for which Company may be held contingently liable	262,849,805	206,324,373
Decrease of contingent liability from Opening Balance of Contingent Liability		-
In respect of such estimated contingent claims either the outflow of resources embodying economic benefits is not probable. In respect of the rest of the claims/obligations, possibility of any outflow in settlement is considered as remote.		

(iii) Disputed Tax Demands

Particulars	(Amount in Rs.) 31.03.2022	31.03.2021
Disputed Income Tax/Sales Tax/Service Tax/ other taxes/duties matters pending before various appellate authorities:	251,528,073	251,528,073
Provisions created against above claims: Pending settlement, the Company has assessed and recognise a provision based on probability of outflow of resources embodying economic benefits	-	-
Amount of contingent liability i.e. amounts for which Company may be held contingently liable	251,528,073	251,528,073
Decrease of contingent liability from Opening Balance of Contingent Liability		-
In respect of such estimated contingent claims either the outflow of resources embodying economic benefits is not probable. In respect of the rest of the claims/obligations, possibility of any outflow in settlement is considered as remote.		

(iV) Others

Particulars	(Amount in Rs.) 31.03.2022	31.03.2021
Claims on account of other miscellaneous matters pending before various forums	1,200,597	1,302,107
Provisions created against above claims: Pending settlement, the Company has assessed and recognise a provision based on probability of outflow of resources embodying economic benefits	-	-
Amount of contingent liability i.e. amounts for which Company may be held contingently liable	1,200,597	1,302,107
Decrease of contingent liability from Opening Balance of Contingent Liability		101,510
In respect of such estimated contingent claims either the outflow of resources embodying economic benefits is not probable. In respect of the rest of the claims/obligations, possibility of any outflow in settlement is considered as remote.		

The above is summarized as below:

(Amount in Rs.)

Sl. No.	Particulars	Claims as on 31.03.2022	up to date Provision against the claims	Contingent liability as on 31.03.2022	Contingent liability as on 31.03.2021	Addition/	Decrease of contingent liability from Opening Balance as on 01.04.2021
(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)=(v)-(vi)	(viii)
1	Capital Works	8,098,698,696	460,267,362	7,638,431,334	8,846,825,179	-1,208,393,845	1,585,174,421
2	Land Compen-sation cases	391,649,805	128,800,000	262,849,805	206,324,373	56,525,432	-

(D) **Other notes to related party transactions:**

(i) Terms and conditions of transactions with the related parties:

(a) Transactions with the state governments and entities controlled by the Government of India are carried out at market terms on arms- length basis (except subordinate debts received from Central Government at concessional rate) through a transparent price discovery process against open tenders, except in a few cases of procurement of spares/services from Original Equipment Manufacturers (OEMs) for proprietary items on single tender basis due to urgency, compatibility or other reasons. Such single tender procurements are also done through a process of negotiation with prices benchmarked against available price data of same/similar items.

(b) Unsecured loan of Rs 18.40 crore (Previous Year Rs. 6.00 crore) granted to NHPTL is interest bearing @ 10% to be compounded annually.

(c) Consultancy services provided by the Company to subsidiary and joint venture companies are generally on nomination basis at the terms, conditions and principles applicable for consultancy services provided to other parties.

(d) Outstanding balances of subsidiary and joint venture companies as at 31.03.2022 are unsecured and settlement occurs through banking transactions. These balances other than loans are interest free. No impairment of receivables relating to amounts owed by related parties has been recognised. Assessment of impairment is undertaken each financial year through examining the financial position of the related party and the market in which the related party operates.

(ii) Commitment towards further investments in the subsidiary and joint venture companies are disclosed at Note 34(3).

(iii) Contributions to post-employment benefit plans are net of refunds from trusts.

A) Company as Lessee:

(i) Treatment of Leases as per Ind AS 116 :

The Company assesses whether a contract is or contains a lease, at the inception of the contract. The Company recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (such as tablets and personal computers, small items of office furniture and telephones). For these leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Company uses its incremental borrowing rate.

The Company has applied the following practical expedients on initial application of Ind AS 116:

(a) Applied a single discount rate to a portfolio of leases of similar assets in similar economic environment with a similar end date.

(b) Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term on the date of initial application.

(c) Excluded the initial direct costs, if any from the measurement of the right-of-use asset at the date of recognition of right-of-use asset.

(d) Ud. Used hindsight when determining the lease term if the contract contains options to extend or terminate the lease.

The weighted average incremental borrowing rate applied to leases recognised during FY 2021-22 is 6.20%.

There were no future minimum lease rental commitments in respect of non-cancellable operating leases as per Ind AS 17 as on March 31, 2019 as disclosed in Sl. No. 16 of Note No. 34 of Annual Report for the Financial Year 2018-19. Accordingly, lease liabilities accounted as at April 1, 2019 due to transition to Ind AS 116 is substantially due to inclusion of present value of the lease payments for the cancellable term of these lease agreements.

(ii) Nature of lease: The Company's significant leasing arrangements are in respect of the following assets:

(a) Premises under cancellable lease arrangements for residential use of employees ranging from 3-4 months to three years.

(b) Premises for offices, guest houses & transit camps on lease which are not non-cancellable and are usually renewable on mutually agreeable terms.

(c) Land obtained on lease for construction of projects and / or administrative offices.

(d) Vehicles on operating leases generally for a period of 1 to 2 years and such leases are not non-cancellable.

(iii) Amount recognised in the Statement of Profit and Loss / Expenditure Attributable to Construction in respect of short term, low value and variable lease during the year ended 31.03.2022: :

Description	31.03.2022	31.03.2021
Expenditure on short-term leases (Refer Note 25.3 and 29.4)	22,322,134	21,789,066
Expenditure on lease of low-value assets (Refer Note 29.4)		
Variable lease payments not included in the measurement of lease liabilities (Refer Note 29.4)		

(iv) Other Disclosures:

Description	31.03.2022	31.03.2021
Commitment for Short Term Leases as on 31.03.2022		

(iv) The following is the movement in lease liabilities(Refer Note 16.1.5):

Particulars	31.03.2022	31.03.2021
OPening Balance at 01.04.2021		
Additions in lease liabilities		
Finance cost accrued during the year		
Payment of lease liabilities		
Closing Balance at 31.03.2022		

NHPC LIMITED एनएचपीसी N.H.P.C. FARIDABAD

B) Finance Lease – Company as Lessor (Shall be provided only by Power Stations accounts as Finance Lease)
C) Operating Lease –Company as Lessor :(Shall be provided at CO level)

Against material damage	223853998	14,600,000	135,930,998	73323000	149,260,998
Business Interruption Loss	-	-	-	-	-
Total	223,853,998	14,600,000	135,930,998		149,260,998
Income recognised in respect of "Business Interruption Loss" during the year is ₹NIL.(Cumulative as on 31.03.2021 is ₹NIL).					

21 Nature and details of provisions (refer Note No. 17 and 22)

(i) General

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a Finance Cost.

(ii) Provision for employee benefits (Other than provisions for defined contribution and defined benefit plans which have been disclosed as per Ind AS-19 at S. No. 10 of Note No. 34):

a) Provision for Performance Related Pay/Incentive:

Short-term Provision has been recognised in the accounts towards Performance Related Pay/ incentive to employees on the basis of Management estimates as per company's rules in this regard which are based on the guidelines of the Department of Public Enterprises, Government of India.

b) Provision For Wage Revision as per 3rd Pay Revision Committee (PRC):

Short term provision for wage revision of the employees of the company was recognised earlier as per notification of the Department of Public Enterprises, Government of India.

(iii) Other Provisions:

NHPC LIMITED FARIDABAD

a) Provision For Tariff Adjustment:
Provision for tariff adjustment is made on estimated basis against probable refund to beneficiaries on reassessment of tariff billed, pending approval of Tariff/truing up for the Year 2014-19/2019-24 by Central Electricity Regulatory Commission (CERC).

b) Provision for Livelihood Assistance:
Provision has been recognised at discounted value adjusted for average inflation in the accounts towards special financial package finalised in consultation with the State Government and approved by the Board of Directors of NHPC for livelihood assistance of the project affected families (PAFs) in Parbati-II and Parbati-III. As per the package, pending finalisation of modalities of payment, one eligible person from each PAF shall be provided livelihood assistance equivalent to minimum wage of unskilled category as per the Government of Himachal Pradesh/ Central Government whichever is higher, on monthly instalment basis, for the Years as under:

i) Till the date of superannuation for PAFs eligible for employment.
ii) For 2000 days to those PAFs left with zero balance land but excluded for employment.
iii) For 1000 days to all remaining PAFs.

c) Provision for Committed Capital Expenditure:
Provision has been recognised at discounted value in case of non- current amount for Capital Expenditure to be incurred towards environment, compensatory afforestation, local area development, etc. which was a pre-condition for granting approval for construction of the project and expenditure towards which had not been completed till commissioning of the project. Such provisions are adjusted against the incurrence of actual expenditure as per demand raised by the concerned State Government Authorities.

d) Provision for restoration expenses of insured assets:
Provision has been recognised in the accounts based on Management Estimates for restoration of damaged assets insured under Mega and Construction Plant and Machinery Policy. Utilization of the provision is to be made against incurrence of actual expenditure towards restoration of the assets.

e) Provisions for expenditure in respect of Arbitration Award/Court cases:
This includes provisions created on the basis of management assessment as to probable outflow in respect of contractors claims against which arbitration award/Court decision have been received and which have been further challenged in a Court of Law. Utilization/outflow of the provision is to be made on the outcome of the case.

f) Provisions- Others: This includes provisions towards:-
(i) Contractor claims, Land compensation cases, disputed tax demands and other cases created on the basis of management assessment towards probable outflow. Utilization/outflow of the provision is to be made on the outcome of the case.

(ii) Wage revision of Central Government Employees whose services are utilised by the company.

(iii) Provision for interest to beneficiaries on excess tariff recovered in terms of Tariff Regulations for the Year 2014-19 where the capital cost considered for fixation of tariff by the CERC on the basis of projected capital cost as on Commercial Operation Date or the projected additional capital expenditure exceeds the actual capital cost incurred.

(iv) Upfront provision for rebate towards interest on House Building Advance provided to employees based on the historical trend of rebate allowed.

(v) Upfront provision for rebate to customers for sale of power based on the historical trend of rebate allowed.

22 Disclosure regarding Relationship with Struck off Companies: Following is the disclosure regarding balances with the companies struck off under section 248 of the Companies Act, 2013 or section 560 of the Companies Act, 1956:

Name of the struck off company	Nature of transactions with struck off company	Balance Outstanding as at 31.03.2022	Relationship with the struck off company, if any, to be disclosed	Balance Outstanding as at 31.03.2021	Relationship with the struck off company, if any, to be disclosed

23 Unit/Project specific notes :

(i) Dulhasti Power Station in r/o Bursar Project
As per deliberations of the Board of Directors in its meeting held on 20.03.2014, the viability of Bursar HE Project is dependent upon financial support from Government of India and Government of Jammu & Kashmir. Ministry of Power (MOP), Government of India was approached to provide funding for Survey and Investigation of Bursar Project to make it viable. As advised by the MoP, Ministry of Water Resources (MoWR) was approached to provide funds. In the meeting held with MoWR on 27.04.2015, it was informed by the representatives of MoWR that the request of the company for release of funds for preparation of DPR is under consideration for approval of Government of India. Detailed Project Report (DPR) of the project was submitted to CEA and expenditure of ₹ .....incurred have been carried forward as Capital Work in Progress. However, as an abundant precaution, provision made in earlier years in this respect has been continued in the books of accounts.

(ii) Tanakpur Power Station in respect of Kotlibhel Projects
Kotlibhel-1A, Kotlibhel-1B and Kotlibhel-II projects are three of the 24 hydro-electric projects located in the State of Utterakhand which are covered by the order dated 13.08.2013 of Hon'ble Supreme Court of India directing MoEF not to grant environmental/forest clearance to these projects until further order and to examine the significant impact on the bio-diversity of Alaknanda and Bhagirathi river basin. Pending adjudication about the fate of these projects, the expenditure incurred upto 31.03.2022 amounting to ₹ ....., ₹ ..... and ₹ ..... have been carried forward as Capital Work in Progress in respect of Kotlibhel-1A, Kotlibhel-1B and Kotlibhel-II projects respectively. However, as an abundant precaution, provision for these amounts totalling ₹ .....up to 31.03.2022 has been made in the books of accounts.

NHPC LIMITED FARIDABAD

(iii) Subansiri Lower Project in respect of Tawang I & II projects

a) Forest Clearance in respect of Tawang Stage-II Hydroelectric Project is under process. Forest Clearance for Tawang-I Hydroelectric Project shall be taken up after Forest Clearance of Tawang-II HE Project. Pending this, expenditure of ₹..... (previous year ₹ .....) incurred on these projects is being carried forward as Capital Work in Progress. Further, due to uncertainties in the implementation of Tawang I and II Projects, a provision of Rs....(previous year Rs.....) has been made in the books of accounts as an abundant precaution.

(iv) Dhauliganga power station in r/o Dhauliganga Intermediate Project:

a) Implementation of Dhauliganga Intermediate, Chungar Chal and Kharmoli Lumti Tulil Hydroelectric Projects has been temporarily put on hold. Pending final decision to hand over these projects to the Government of Uttarakhand, the expenditure incurred upto 31.03.2022 amounting to ₹ ..... (previous year ₹ .....) have been carried forward as Capital Work in Progress. However, as an abundant precaution, provision for ₹ ..... (previous year .....) has been made in the books of accounts.

b) Measures to reduce capital cost and optimise tariff of Goriganga IIIA Project are being explored. Pending decision on the same, the expenditure incurred upto 31.03.2022 amounting to ₹ ..... (previous year ₹ .....) have been carried forward as Capital Work in Progress. However, as an abundant precaution, provision for ₹ ..... (previous year Rs .....) has been made in the books of accounts.

Appendix-V to Note-34
Disclosures relating to creation of Regulatory Deferral Account (RDA)balances as per Ind AS 114

1 Subansiri Lower Project

The Company is principally engaged in the construction and operation of hydroelectric power projects. The price (tariff) to be charged by the company for electricity sold to its customers is determined by Central Electricity Regulatory Commission (CERC) under applicable CERC (terms & conditions of tariff) Regulations. The said price (tariff) is based on allowable costs like interest costs, depreciation, operation and maintenance charges plus a stipulated return. This form of rate regulation is known as cost-of-service regulations. The basic objective of such regulations is to give the entity the opportunity to recover its costs of providing the goods or services plus a fair return.

For the purpose, the Company is required to make an application to CERC based on capital expenditure incurred duly certified by the Auditors or already admitted by CERC or projected to be incurred upto the date of commercial operation and additional capital expenditure duly certified by the Auditor or projected to be incurred during tariff year. The tariff determined by CERC is recovered from the customers (beneficiaries) on whom the same is binding.

The above rate regulation results in creation of right (asset) or an obligation (liability) as envisaged in the accounting framework which is not the case in other industries. Guidance Note on Accounting for Rate Regulated Activities (Previous GAAP) issued by the ICAI is applicable to entities that provide goods or services whose prices are subject to cost-of-service regulations and the tariff determined by the regulator is binding on the customers (beneficiaries). As per guidance note, a regulatory asset is recognized when it is probable (a reasonable assurance) that the future economic benefits associated with it will flow to the entity as a result of the actual or expected actions of the regulator under applicable regulatory framework and the amount can be measured reliably.

The guidance note also provides that in some cases, a regulator permits an entity to include in the rate base, as part of the cost of self-constructed (tangible) fixed assets or internally generated intangible assets, amounts that would otherwise be recognized as expense in the statement of profit and loss in accordance with Accounting Standards.

With effect from 01.04.2016, such rate regulated items are to be accounted for as per Ind AS 114 'Regulatory Deferral Accounts.' Ind AS 114 allows an entity to continue to apply previous GAAP accounting policies for the recognition, measurement, impairment and derecognition of regulatory deferral account balances. For this purpose, Guidance Note of the ICAI on 'Accounting for Rate Regulated Activities' shall be considered to be the Previous GAAP.

Construction activities at site of Subansiri Lower Project were interrupted w.e.f. 16.12.2011 and the matter was pending before National Green Tribunal. Technical and administrative work at the project was however continued.

Vide order dated 31st July 2019, the Hon'ble NGT has held that there is no justification in the petitions of the applicants pleading bias in the constitution of the Expert Committee by the MoEF & CC and accordingly, the cases against Subansiri Lower Project pending with the NGT have been dismissed. Active construction work at the project has been resumed from October-2019.

In line with the opinion of Expert Advisory Committee (EAC) of the Institute of Chartered Accountants of India (ICAI), borrowing cost of ₹ 2735.61 Crore (upto Previous year₹ 2735.61 Crore), employee benefits expense, depreciation and other expense of ₹ 1427.67 crore (upto Previous year ₹ 1427.67 Crore), net of other income of ₹ 322.60 Crore (upto Previous year ₹ 322.60 Crore) incurred till 30th September2019 has been charged to the Statement of Profit and Loss.

As active construction work at the project has been resumed during FY 2019-20, borrowing cost, employee benefits expense, depreciation and other expense (net of other income) incurred with effect from 01.10.2019 has been capitalized as Expenditure attributable to Construction.

During financial year 2014-15, the company had adopted the accounting as per Guidance Note on Rate Regulated Activities issued by the ICAI which allows recognition of 'Regulatory Asset' and corresponding 'Regulatory Income' of the right to recover such expense which are not allowed to be capitalized as part of cost of relevant fixed asset in accordance with the Accounting Standards, but are nevertheless permitted by Central Electricity Regulatory Commission (CERC), the regulator, to be recovered from the beneficiaries in future through tariff.

Since Ind AS 114 'Regulatory Deferral Accounts' allows an entity to continue to apply previous GAAP accounting policies for the recognition, measurement, impairment and derecognition of regulatory deferral account balances and recognizes the Guidance Note of the ICAI on 'Accounting for Rate Regulated Activities' as the previous GAAP, the company has continued with the accounting policy for regulatory deferral account balances.

The total Regulatory Deferral Account Debit balances recognised in respect of Subansiri Lower Project for and upto the year ended 31.03.2022 are as under:

Regulatory asset created in relation to:	Upto 31.03.2021 (Rs)	During the year (Rs)	Upto 31.03.2022(Rs)
Borrowing Costs			
Employee Benefit expense			
Depreciation			
Other Expense			
Other Income			
Total			

NHPC LIMITED FARIDABAD

Further, no regulatory deferral account balances has been recognized during the year 2021-22.

As per management assessment, there is no impairment in the carrying amount of ₹.....included under Capital Work in Progress of the Project including the regulatory deferral account balances recognized therein.

After Commercial Operation Date (COD) of the Project, amount recognized as Regulatory Deferral Account balances in respect of Subansiri Lower Project shall be amortized/ liquidated in proportion to depreciation following the rates and methodology notified under CERC Tariff Regulations over the life of the Project, i.e. 40 years.

Tariff Regulations for the period 2019-2024 have been notified by the CERC. In addition to the existing Tariff Regulations (2014-19) authorizing capitalisation of borrowing and other attributable costs incurred due to uncontrollable factors including force majeure events like blockade/ embargo as per Tariff Regulations 2014-19, the new regulations also include delay in obtaining statutory approval for projects as one of the force majeure events. Accordingly, Management considers that adverse changes in Tariff Regulations are not likely to be a significant area of risk for the future recovery of RDA balances recognized in respect of Subansiri Lower Project.

Risks and uncertainties that might affect the future recovery of the Regulatory Deferral Account balances being created in respect of Subansiri Lower Project are:

a) Demand Risk: Recovery of the Regulatory Deferral Account Balances shall be by way of depreciation through tariff. Accordingly, the same is affected by the normal risks and uncertainties impacting sale of electricity in India like difficulty in signing of long term Power Purchase Agreements (PPAs), at the rate covering the cost and required return ensuring the viability of the Project.

b) Regulatory Risk: Tariff regulations further provide that if the delay is not attributable to the generating company but is due to uncontrollable factors, IEDC may be allowed after due prudence check. Any disallowance of expenditure after prudence check can affect the quantum of regulatory deferral account balances to be recovered from beneficiaries.

NHPC LIMITED
एन एच पी सी
NHPC
FARIDABAD

2 Regulatory Deferral Account balances in respect of expenditure recognized due to 3rd Pay Revision of Central Public Sector Units (CPSUs):

Pay of employees of CPSUs including Central Govt. Employees under IDA pay scale have been revised from 1st January, 2017. As approved by the Government of India, in addition to enhancing Basic Pay, DA and allowances with effect from 01.01.2017, the ceiling limit of Gratuity has been enhanced from the existing ₹0.10 crores to ₹0.20 crores with effect from 01.01.2017. Pay revision for all employees have been implemented.

CERC Tariff Regulations 2014-19 read with the Statement of Reasons CERC (Terms and Conditions of Tariff) Regulations, 2014 provides that the impact of actual increase in employee cost on account of wage revision of operational Power Stations including employees of Kendriya Vidyalaya and CISF Personnel is recoverable from the beneficiaries in future through tariff. Further, during the tariff period 2004-09, CERC had allowed recovery of the actual increase in employee cost on account of wage revision (with effect from 01.01.2007) upto 50% of the salary and wages (Basic + DA) of the employees of the petitioner company as on 31.12.2006 from the beneficiaries in twelve equal monthly installments. Tariff Regulations for the period 2019-2024 read with corrigendum dated 15th March 2019 notified by the CERC also provide for recoverability of pay revision from the beneficiaries in future through tariff.

Keeping in view the provisions of Ind AS 114- "Regulatory Deferral Accounts", additional expenditure on employee benefits (including employees of Kendriya Vidyalaya and CISF Personnel) due to revision of pay/gratuity ceiling, to the extent charged to the Statement of Profit and Loss and to Other Comprehensive Income till 31st March 2019, have been recognized as 'Regulatory Deferral Account balances'. These balances shall be recovered by way of billing to beneficiaries once the petition filed with CERC in this regard is approved.

As opposed to tariff period 2014-19 where RDA balances of pay revision had been created based on the expectation that CERC would allow the same in tariff in line with that allowed earlier for pay revision during FY 2009, tariff regulation 2019-24 specifically allows for recovery of additional expenditure on account of pay revision.

The Regulatory Deferral Account Balance (assets) recognized in the books to be recovered from the beneficiaries in future periods are as follows:

Particulars	Regulatory Deferral Account Balances (Rs.)
Opening balance as on 01.04.2021	394,584,888
Addition during the year (+)	-
Amount collected during the year (-)	-
Regulatory income recognized in the Statement of Profit and Loss (B+C)	-
Closing balance as on 31.03.2022 (A+D)	394,584,888

Recoverability of the Regulatory Deferral Account balances on account of Pay Revision of Employees is however, subject to Regulatory Risk since such expenditures are generally allowed by the CERC after due prudence check. Any disallowance of expenditure after prudence check can affect the quantum of regulatory deferral account balances to be recovered from beneficiaries. The company expects to recover the carrying amount of Regulatory Deferral Account balances in respect of 3rd pay revision during the current CERC Regulation 2019-24 periods.

NHPC LIMITED FARIDABAD

3 Regulatory Deferral Account balances due to moderation of tariff of Kishanganga Power Station:

As per CERC Tariff Regulations 2014-19/2019-24, depreciation on capital cost of a Power Station forms one of the components of tariff. Depreciation is charged in the books as per the rates provided in the Tariff Regulations 2014-19/2019-24 in the initial operating period of 12 years and thereafter the balance depreciation is spread over equally in the remaining 23/28 years so as to recover 90 percent of the capital cost of the Power Station by way of depreciation. As per Tariff regulations 2019-24, the operating life of a hydro-power station is 40 years.

As per CERC Tariff Regulations, 2019-24, tariff for sale of electricity by the generating company may also be determined in deviation of the norms specified in the Regulations provided the levelised tariff over the useful life of the project on the basis of the norms in deviation does not exceed the levelised tariff calculated on the basis of the norms specified in the Regulations. Similar provisions exist in the Tariff Regulations for the period 2019-2024 notified by the CERC.

In the case of Kishanganga Power Station (Commercial Operation Date: 17th May, 2018), the Company has made moderation in tariff of Kishanganga Power Station by fixing lower tariff in the initial ten years and then fixing higher tariff in the remaining 25 years by way of charging 1.5% depreciation from the 1st to the 10th year and 2.5% depreciation from 11th to the 40th year, thus aggregating 90 percent of the Capital Cost of the Power Station. This moderation, with the intent to reduce tariff in the initial years of operation, has been duly approved by the CERC.

Moderation of depreciation rates for tariff determination in Kishanganga Power Station gives rise to a significant mismatch by way of higher depreciation charged in the books (as per CERC Tariff Regulations, 2019-24) during the first 12 years of commercial operation and recovery by way of tariff as per Tariff Order of the Power Station approved by the CERC. The lower recovery during the first 12 years would, however, be compensated over the balance period of the operational life of the Power Station by way of higher recovery of depreciation through tariff than that charged in the books. This deferment of recovery of costs with the intent to reduce tariff in the initial years and its recovery in subsequent years demonstrates that an asset exists by way of the right to recover current costs in future through tariff and such right is enforceable.

Keeping in view the provisions of Ind AS 114- "Regulatory Deferral Accounts", difference between depreciation charged to the Statement of Profit and Loss Account as per Tariff Regulations 2019-24 and the depreciation allowed by way of tariff and which is recoverable from the beneficiaries in subsequent periods is being recognized as 'Regulatory Deferral Account balances' with effect from Commercial Operation Date of the Power Station. RDA balances created during the first 12 years of commercial operation shall be recovered from beneficiaries by way of higher depreciation as a component of tariff over the balance useful life of the Power Station, i.e. over a period of 28 years.

The regulated assets (+)/liability (-) recognized in the books to be recovered from or payable to beneficiaries in future periods are as follows:

Particulars	Regulatory Deferral Account Balances (Rs)
Opening balance as on 01.04.2021	
Addition during the year (assets (+)/ liability (-))	
Amount collected (-)/refunded (+) during the year	
Regulatory income/(expense) recognized in the Statement of Profit and Loss (B-C)	
Closing balance as on 31.03.2022 (A+D)	

TThe Company has long term Power Purchase Agreements in respect of Kishanganga Power Station. Since the proposal for moderation of tariff already stands approved by the CERC, the Company does not envisage any significant risk as regards recoverability of the Regulatory Deferral Account balances created in respect of Kishanganga Power Station.

However, as depreciation charge in the books and recovery thereof through tariff are dependent on the Capital Cost of the Power Station as allowed by CERC, recovery of the regulatory deferral account balances in respect of Kishanganga Power Station would be subject to Regulatory Risk. Approval of actual capital expenditure on the Power Station including expenditure on account of time and cost overruns etc. are subject to prudence check by the CERC, Any disallowance of expenditure after prudence check can affect the quantum of regulatory deferral account balances to be recovered from beneficiaries.

NHPC LIMITED FARIDABAD

4 Regulatory Deferral Account balances in respect of exchange differences on Foreign Currency Monetary items:

As per Ind AS 23- "Borrowing Costs", borrowing cost on foreign currency loans to the extent treated as an adjustment to interest costs is allowed to be capitalised during construction period. Further, Ind AS 21-"The Effects of Changes in Foreign Exchange Rates" provides that exchange differences arising on settlement or translation of monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements shall be recognized in the Profit and Loss in the period in which they arise.

Para D13AA of Ind AS 101- "First Time Adoption of Ind AS" provides that a first-time adopter may continue the existing accounting policy adopted for accounting of exchange differences arising from translation of long-term foreign currency monetary items. Accordingly, for periods beginning on or after 01.04.2016, all exchange differences arising on translation/ settlement of monetary items other than exchange difference on borrowings to the extent treated as an adjustment to interest cost during construction period are to be charged to the Statement of Profit and Loss.

As per the CERC Tariff Regulations 2014-19, any gain or loss on account of exchange risk variation shall be recoverable as part of capital cost for calculation of tariff on Commercial Operation Date (COD) of a project and on actual payment basis during Operation and Maintenance (O&M) period. Further, CERC in previous tariff orders has allowed exchange differences incurred during the construction period as a part of capital cost.

Keeping in view the provisions of Ind AS 114- "Regulatory Deferral Accounts" as regards recognition and CERC Tariff Regulations 2014-19 as regards recoverability, exchange differences arising on translation/ settlement of foreign currency monetary items to the extent charged to the Statement of Profit and Loss are being recognized as 'Regulatory Deferral Account balances' with effect from(with effect from.) 01.04.2016. These balances are adjusted from the year in which the same become recoverable from or payable to the beneficiaries after Commercial Operation Date (COD) of the Project.

The regulated assets (+)/liability (-) recognized in the books to be recovered from or payable to beneficiaries in future periods are as follows:

Particulars	Regulatory Deferral Account Balances (Rs)
Opening balance as on 01.04.2021	
Addition during the year (assets (+)/ liability (-))	
Amount collected (-)/refunded (+) during the year	
Regulatory income/(expense) recognized in the Statement of Profit and Loss (B-C)	
Closing balance as on 31.03.2022 (A+D)	

Tariff Regulations for the period 2019-2024 have been notified by the CERC. Regulations regarding recoverability of Foreign Exchange rate Variation (FERV) as part of capital cost for calculation of tariff on Commercial Operation Date (COD) of a project and on actual payment basis during O&M period of a Power Station as per Tariff Regulations 2014-19 have been continued for the tariff period 2019-24 also. Accordingly, Management considers that adverse changes in Tariff Regulations are not likely to be a significant area of risk for the future recovery of RDA balances recognized in respect of exchange differences on Foreign Currency Monetary items.

Recoverability of the Regulatory Deferral account balances is however, subject to Demand Risk since recovery/payment of the regulatory deferral debit/credit balance shall be by way of billing to the beneficiaries. Accordingly, the same is affected by the normal risks and uncertainties impacting sale of electricity in India like difficulty in signing of long term PPAs, etc.

2.2.3 Expenditure attributable to Construction (EAC) includes ₹ ..... (Previous year ₹ .....) towards borrowing cost capitalised during the year. **- Only for construction projects. (Also Refer Note-32)**

2.2.4 Capital Work in Progress (CWIP) includes a cumulative expenditure of ₹ ..... (Previous year ₹ .....) including Survey, Investigation, Consultancy and Supervision Charges of ₹ ..... (Previous year ₹ .....) on projects under Survey & Investigation stage. Of this, a sum of ₹ .....(Previous year ₹ .....) pertains to Subansiri Upper Project, which had been decided by Government of Arunachal Pradesh to be handed over to a Private Developer. However, pending handing over of the project & recovery of expenditure incurred thereon, the said amount remains provided for in the books as an abundant precaution. Out of the balance of ₹ ..... (Previous year ₹ .....) pertaining to projects with the company, a sum of ₹ ..... (Previous year ₹ .....) has been provided upto date where uncertainties are attached and ₹ ..... (Previous year ₹ .....), pertaining to other projects having reasonable certainty of getting clearance, is carried over. **(Also Refer Note 34(24), 34(25), 34(26) and 34(27))**

2.2.5 Siang Basin, Subansiri Basin & Dibang Multipurpose Projects were taken over from Brahmaputra Board. Pending settlement of accounts with Brahmaputra Board, assets and liabilities have been accounted for to the extent of amounts incurred by the Company on these projects. Siang Lower & Siyom HE Projects (in Siang Basin) & Subansiri Middle (in Subansiri Basin) have since been handed over to Private Developer and liability arising out of settlement of accounts with Brahmaputra Board towards these projects if any, is recoverable from respective Private Developers. **- Only for Dibang & Subansiri Lower Project**

2.2.6 Underground Works amounting to ₹ ..... (Previous year ₹ .....) created on "Land -Right to Use" classified under Right of Use Assets, are included under respective heads of Capital Work in Progress (CWIP).

2.2.7 Refer Note no. 34(9) of Standalone Financial Statements for information of non-current assets pledged with banks as security for related borrowings. **(For CO Only)**

2.2.8 Capital Expenditure on projects under construction approved by the competent authority undergoes revision over period of time as hydroelectric projects are lime intensive and some takes longer period than envisaged. As a consequence the cost escalation occur, which requires approval of competent authority. Pending such approval the expenditure incurred is carried forward in Capital Work in Progress (CWIP).

2.2.9 Refer Note no. 34(18) of Standalone Financial Statements for information regarding Impairment of Assets.

2.2.10 Expenditure attributable to construction (EAC) includes ₹ ..... (Previous year ₹ .....) on account of expenses on downstream protection work in respect of Subansiri Lower Project, against which grant amounting to ₹ ..... (Previous year ₹ .....) has been received from Government of India. The Grant so received has been recognised under 'Other non current liabilities' (Note-19.1) and shall be amortised in the Statement of Profit and Loss after commissioning of the project on a systematic basis over the useful life of the project. **For Subansiri Lower Project only**

2.4.1 Amounts recognised in the Statement of Profit and Loss for investment property

(Amount in ₹)

	For the Year ended 31st March, 2023	For the Year ended 31st March, 2022
Rental income	-	-
Direct operating expenses from property that generated rental income	-	-
Direct operating expenses from property that did not generate rental income	-	-
	As at 31.03.2023	As at 31.03.2022

2.4.2 **Fair Value of investment property**

2.4.3 Investment property comprise of freehold land which was bought for normal business requirements of the Company. However, due to change in business plans, the Company is in the process of finalising the future use of the property. IND AS 40, Investment Property, provides by way of example that land held for a currently undetermined future use is to be regarded as held for capital appreciation and hence to be classified as Investment Property. Accordingly such land has been classified as Investment Property.

2.4.4 **Valuation process**

The above land is carried in the financial statements at cost. However, the fair value of investment property has been arrived on the basis of market value as per valuation report and considered to be level-II of fair valuation hierarchy.

B) FAIR VALUATION MEASUREMENT

(Amount in `)

(i) Fair Value Hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair value are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the company has classified its financial instruments into the following three levels prescribed under Ind AS-113 "Fair Value Measurements"

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments and traded bonds that have quoted price. The fair value of all equity instruments including bonds which are traded in the recognised Stock Exchange and money markets are valued using the closing prices as at the reporting date.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.The fair value of financial assets and liabilities included in level 3 is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes of similar instruments. This includes derivative security deposits/ retention money and loans at below market rates of interest.

(a) Financial Assets/Liabilities Measured at Fair Value-Recurring Fair Value Measurement:

Total Financial Liabilities		**1,897,055**	**1,918,775**	**1,742,739**	**1,742,739**

Note:-

1. The Carrying amounts of current investments, Trade and other receivables (Current), Cash and cash equivalents,Short-term loans and advances, Short Term Borrowings, Trade payables and other current financial liabilities are considered to be the same as their fair values, due to their short term nature.

-For financial assets and financial liabilities measured at fair value, the carrying amounts are equal to the fair value

(d) Valuation techniques and process used to determine fair values

(1) The Company values financial assets or financial liabilities using the best and most relevant data available. Specific valuation techniques used to determine fair value of financial instruments includes:

-Use of Quoted market price or dealer quotes for similar instruments

- Fair value of remaining financial instruments is determined using discounted cash flow analysis

(2) The discount rate used to fair value financial instruments classified at Level -3 is based on the Weighted Average Rate of company's outstanding borrowings except subordinate debts and foreign currency borrowings.

(3) Financial liabilities that are subsequently measured at amortised cost are recognised initially at fair value minus transaction costs using the effective interest method where such transaction costs incurred on long term borrowings are material.

NHPC LIMITED FARIDABAD

(2)Financial Risk Management

(A) Financial risk factors

Risk	Exposure arising from	Measurement	Management
Credit risk	Cash & Cash equivalents, Other Bank Balances ,Trade receivables and financial assets measured at amortised cost, Lease Receivable,	Aging analysis, credit rating	Diversification of bank deposits, letter of credit for selected customers.
Liquidity Risk	Borrowings and other facilities	Rolling cash flow forecasts & Budgets	Availability of committed credit lines and borrowing facilities.
Market Risk- Interest rate	Long term borrowings at variable rates	Sensitivity Analysis	1. Diversification of fixed rate and floating rates. 2. Refinancing. 3. Actual Interest is recovered through tariff as per CERC Regulation
Market Risk- security prices	Investment in equity and debt securities	Sensitivity Analysis	Portfolio diversification
Market Risk- foreign exchange	Recognised financial liabilities not denominated in INR	Sensitivity Analysis	Foreign exchange rate variation is recovered through tariff as per CERC Regulation. Call spread option and coupon only swap

Risk management framework

The Company's activities make it susceptible to various risks. The Company has taken adequate measures to address such concerns by developing adequate systems and practices. Company has a well-defined risk management policy to provide overall framework for the risk management in the Company. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

The Company is exposed to the following risks from its use of financial instruments:

i) Credit risk

Credit risk is the risk that a counter party will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The company is exposed to credit risk from its operating activities (primarily trade receivables/leased assets) and from its financing activities including deposits with banks and financial institutions.

ii) Liquidity risk.

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses.

iii) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise three types of risk: currency rate risk, interest rate risk and other price risks, such as equity and debt price risk. Financial instruments affected by market risk include loans and borrowings, deposits and investments. Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The company operates in a regulated environment. Tariff of the company is fixed by the Central Electricity Regulatory Commission (CERC) through Annual Fixed Charges (AFC) comprising the following five components:
1. Return on Equity (RoE), 2. Depreciation, 3. Interest on Loans, 4. Operation & Maintenance Expenses and 5. Interest on Working Capital Loans. In addition to the above Foreign Currency Exchange variations and Taxes are also recoverable from Beneficiaries in terms of the Tariff Regulations. Hence variation in interest rate, currency exchange rate variations and other price risk variations are recoverable from tariff and do not impact the profitability of the company.

(B) Credit Risk

The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and other financial instruments.

Trade Receivables, unbilled revenue & lease receivables :-

The Company extends credit to customers in normal course of business. The Company monitors the payment track record of the customers. Outstanding receivables are regularly monitored. The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are mainly state government authorities and operate in largely independent markets. Unbilled revenue primarily relates to the Company's right to consideration for work completed but not billed at the reporting date and have substantially the same risk characteristics as trade receivables for the same type of contracts.

Lease receivables of the company are with regard to Power Purchase Agreements classified as finance lease as per Ind AS 116- 'Leases' as referred to in Note No. 34. The power purchase agreements are for sale of power to single beneficiary and recoverability of interest income and principal on leased assets i.e. PPE of the power stations are assessed on the same basis as applied for trade receivables.

Financial assets at amortised cost :-

Employee Loans: The Company has given loans to employees at concessional rates as per Company's policy which have been measured at amortised cost at Balance Sheet date. The recovery of the loan is on fixed instalment basis from the monthly salary of the employees. The loans are secured by way of mortgage/hypothecation of the assets for which such loans are given. Management has assessed the past data and does not envisage any probability of default on these loans.

Loans to Government of Arunanchal Pradesh : The Company has given loan to Government of Arunachal Pradesh at 9% rate of interest as per the terms and conditions of Memorandum of understanding signed between the Company and Government of Arunachal Pradesh for construction of hydroelectric projects in the state. The loan has been measured at amortised cost. The loan is recoverable from the share of free power of the state government from the first hydroelectric project to be commissioned in the state. Management does not envisage any probability of default on the loan.

Financial instruments and cash deposits :-

The Company considers factors such as track record, size of the bank, market reputation and service standards to select the banks with which balances and deposits are maintained. Generally, the balances are maintained with the banks with which the Company has also availed borrowings. The Company invests surplus cash in short term deposits with scheduled banks. The company has balances and deposits with banks which are well diversified across private and public sector banks with limited exposure with any single bank.

Corporate Guarantee issued by the Company: -

The Company has issued following irrevocable and unconditional Corporate Guarantees to Subsidiary Companies of NHPC Limited for a Guarantee Fee of 1.20% plus applicable GST. Exposure of the Company from the Guarantee shall be the principal outstanding under the said credit facility including any interest, commission, charges etc. payable to the Bank by subsidiaries.

(a) The Company has issued Corporate Guarantee in favour of HDFC Bank Limited for Term Loan Facility for Bundelkhand Saur Urja Ltd (BSUL) amounting to Rs.213.25 Crores. The outstanding balance of said term loan is Rs.133.00 Crores as on 31.03.2023.

(b) The Company has issued Corporate Guarantee in favour of J&K Bank Limited for Term Loan Facility for Lanco Teesta Hydro Power Limited (LTHPL) amounting to Rs.550.00 Crores. The outstanding balance of said term loan is Rs.550.00 Crores as on 31.03.2023.

(c) The Company has issued Corporate Guarantee in favour of J&K Bank Limited for Term Loan Facility for Jal Power Corporation Limited amounting to Rs.313.00 Crores. The outstanding balance of said term loan is Rs.280.00 Crores as on 31.03.2023.

However, on the reporting date management does not envisage any probability of the default by the Subsidiary Company.

(i) Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was as under:

(Amount in ₹)

Particulars	As at 31st March, 2023	As at 31st March, 2022
Financial assets for which loss allowance is measured using 12 months Expected Credit Losses (ECL)		
Non-current investments (Other than Subsidiaries and Joint Ventures)	-	-
Loans -Non Current (including interest)	-	-
Other Non Current Financial Assets (Excluding Lease Receivables and Share Application Money Pending Allotment)	-	-
Current Investments	-	-
Cash and cash equivalents	(746,043)	93,297
Bank balances other than Cash and Cash Equivalents	6,125,672	5,856,392
Loans -Current	-	-
Other Financial Assets (Excluding Lease Receivables)	56,700,872	73,873,828
Total (A)	**62,080,501**	**79,823,517**
Financial assets for which loss allowance is measured using Life time Expected Credit Losses (ECL)		
Trade Receivables	226,670	4,436,022
Lease Receivables (Including Interest)	-	-
Total (B)	**226,670**	**4,436,022**
TOTAL (A+B)	**62,307,171**	**84,259,539**

(ii) Provision for expected credit losses :-

(a) Financial assets for which loss allowance is measured using 12 month expected credit losses

The Company assesses outstanding receivables on an ongoing basis considering changes in payment behaviour and provides for expected credit loss on case-to-case basis.

(b) Financial assets for which loss allowance is measured using life time expected credit losses

A default in recovery of financial assets occurs when in view of the management there is no significant possibility of recovery of receivables after considering all available options for recovery. As the power stations and beneficiaries of the company are spread over various states of India, geographically there is no concentration of credit risk.

The Company primarily sells electricity to bulk customers comprising mainly of state utilities owned by State Governments. The Company has a robust payment security mechanism in the form of Letters of Credit (LC) backed by the Tri-Partite Agreements (TPA) signed among the Govt. of India, RBI and the individual State Governments subsequent to the issuance of the One Time Settlement Scheme of SEBs dues during 2001-02 by the GOI, which was valid till October 2016. Govt of India has approved the extension of these TPAs for another period of 10 years. Most of the States have signed these TPAs and signing is in progress for the balance states. As per the provisions of the TPA, the customers are required to establish LC covering 105% of the average monthly billing of the Company for last 12 months. The TPA also provided that if there is any default in payment of current dues by any State Utility the outstanding dues can be deducted from the Central Plan Assistance of the State and paid to the concerned CPSU. There is also provision of regulation of power by the Company in case of non payment of dues and non-establishment of LC.

CERC Tariff Regulations 2019-24 allow the Company to raise bills on beneficiaries for late-payment surcharge, which adequately compensates the Company for time value of money arising due to delay in payment. Further, the fact that beneficiaries are primarily State Governments/ State Discoms and considering the historical credit loss experience for trade receivables, the Company does not envisage either impairment in the value of receivables from beneficiaries or loss due to time value of money due to delay in realization of trade receivables. However, the Company assesses outstanding trade receivables on an ongoing basis considering changes in operating results and payment behaviour and provides for expected credit loss on case-to-case basis. As at the reporting date company does not envisage any default risk on account of non-realisation of trade receivables.

(iii) Reconciliation of impairment loss provisions

The movement in the allowance for impairment in respect of financial assets during the year was as follows:

(Amount in ₹)

	Trade Receivables	Investments	Claim Recoverable	Loans	Total
Balance as at 1.4.2021	-	-	**58,533,964**	-	**58,533,964**
Changes in Loss Allowances	-	-	-	-	-
Balance as at 1.4.2022	-	-	**58,533,964**	-	**58,533,964**
Changes in Loss Allowances	-	-	-	-	-
Balance as at 31.3.2023	-	-	**58,533,964**	-	**58,533,964**

Based on historical default rates, the company believes that no impairment allowance is necessary in respect of any other financial assets as the amounts of such allowances are not significant.

(C) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due.

I) The Company's objective is to maintain optimum levels of liquidity at all times to meet its cash and collateral requirements. The Company relies on a mix of borrowings and excess operating cash flows to meet its need for funds. The current committed lines of credit and internal accruals are sufficient to meet its short to medium term expansion needs. The Company monitors rolling forecasts of its liquidity requirements to ensure that it has sufficient cash to meet capital expenditure and operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the borrowing limits or covenants (where applicable) are not breached on any of its borrowing facilities.

The company had access to the following undrawn borrowing facilities at the end of the reporting year:

(Amount in `)

Particulars	As at 31st March, 2023	As at 31st March, 2022
At Floating Rate		
Fixed rate		
Total	-	-

II) Maturities of Financial Liabilities:

The amounts disclosed in the table below are the contractual undiscounted cash flows. Balances due within 1 year is equal to their carrying balances as the impact of discounting is not significant.

As at 31st March, 2023

(Amount in `)

FARIDABAD NHPC LIMITED

(D) Market Risk:

The sensitivity analysis excludes the impact of movements in market variables on the carrying value of post-employment benefit obligation provisions and on the non-financial assets and liabilities. The sensitivity of the relevant item of the Statement of Profit and Loss is the effect of the assumed changes in the respective market risks. The Company's activities expose it to a variety of financial risks, including the effects of changes in interest rates.

(i) Interest rate risk and sensitivity

The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long term debt obligations with floating interest rates. Company's policy is to maintain most of its borrowings at fixed rate. Company's fixed rate borrowings are carried at amortised cost and are not subject to interest rate risk. Further the company refinance these debts as and when favourable terms are available. The company is also compensated for variability in floating rate through recovery by way of tariff adjustments under CERC tariff regulations.

The exposure of the company's borrowing to interest rate changes at the end of the reporting year are as follows:

(Amount in ₹)

Particulars	As at 31st March, 2023	As at 31st March, 2023	As at 31st March, 2022	As at 31st March, 2022
	weighted average interest rate		weighted average interest rate	
Floating Rate Borrowings (INR)				
Floating Rate Borrowings (FC)				
Fixed Rate Borrowings (INR)				
Fixed Rate Borrowings (FC)				
Total		-		-

Interest Rate Sensitivity Analysis

Profit or loss is sensitive to higher/lower interest expense from borrowings as a result of change in interest rates. The majority of the borrowings of the company are at fixed interest rate. In case of floating rate borrowings there is no impact on Statement of Profit and Loss of the company due to increase/decrese in interest rates, as the same is recoverable from beneficiaries through tariff.

(ii) Interest Rate Benchmark reform rate:

During the Previous year, the Company has transitioned the outstanding Foreign Currency (JPY) Loan amounting to Rs. ..... repayable in one instalment bullet on 25.07.2024 from floating rate of 6 month (LIBOR+ 0.75 %) to Compounded Reference Rate (i.e. TONA+CAS) +0.75%.

Contractual terms of the Company's bank borrowings stands amended as a direct consequence of the change in interest rate benchmark reform and the new basis for determining the contractual cash flows is economically equivalent to the basis immediately preceding the change.

The Company has opted for the practical expedient in Ind AS 109 i.e. Changes to cash flow flows that are directly required by the reform, to be treated as changes to a floating interest rate, equivalent to a movement in a market rate of interest.

The total outstanding amount of exposure that is directly affected by the Interest rate benchmark reform (IBOR) is Rs. ..... Further, the total amount of exposure on account of principal and Interest is hedged by derivative instruments.

Accordingly, there is no material impact on the Statement of Profit and Loss of the Company due to interest rate benchmark reforms.

(ii) Price Risk:

(a) Exposure

The company's exposure to price risk arises from investment in equity shares and debt instruments classified in the financial statements as Fair Value Through OCI. Company's investment in equity shares are listed in recognised stock exchange and are publicly traded in the stock exchanges. Company's investment in debt instruments comprise quoted Government Securities and Public Sector Bonds and are publicly traded in the market. The investment has been classified under non-current investment in Balance Sheet.

At a reporting date, the exposure to equity and debt instruments are as under:-

(Amount in ₹)

Particulars	As at 31st March, 2023	As at 31st March, 2022
Equity Instruments	-	-
Debt Instruments	-	-

FARIDABAD NHPC LIMITED

(b) Price Risk Sensitivity

For Investment in Equity Instruments (Investment in equity shares of PTC)

The table below summarises the impact of increase/decrease in the market price of investment in equity instruments on the company's equity for the year:

(Amount in ₹)

Particulars	As at 31st March, 2023		As at 31st March, 2022	
Investment in Equity shares of :	% change	Impact on other components of equity	% change	Impact on other components of equity
PTC India Ltd				

Sensitivity has been worked out based on the previous 3 years average of six monthly fluctuations in the share price as quoted on the National Stock Exchange (NSE).

For Investment in Debt Instruments (Investments in Government and Public Sector Undertaking Bonds)

The table below summarises the impact of increase/decrease of the market value of the debt instruments on company's equity for the year:

(Amount in ₹)

Particulars	As at 31st March, 2023		As at 31st March, 2022	
	% change	Impact on other components of equity	% change	Impact on other components of equity
Government Securities				
Public Sector Undertaking Tax Free Bonds				

(iii)Foreign Currency Risk

The company is compensated for variability in foreign currency exchange rate through recovery by way of tariff adjustments under the CERC Tariff Regulations.

(a) Foreign Currency Exposure:

The company's exposure to foreign currency risk at the end of the reporting year expressed in INR are as follows :

(Amount in ₹)

Particulars	As at 31st March, 2023	As at 31st March, 2022
Financial Liabilities:		
Foreign Currency Loans		
Japan International Corporation LTD (JPY)		
MUFG BANK (JPY)		
Other Financial Liabilities	-	-
Net Exposure to foreign currency (liabilities)	0	0

Out of the above, loan from MUFG bank is hedged by derivative instrument. For balance exposure gain/(loss) on account of exchange variation is recoverable from beneficieries asper Tariff Regulation 2019-24. Therefore, currency risk in respect of such exposure would not be very significant.

(b) Sensitivity Analysis

There is no impact of foreign currency fluctuations on the profit of the company as these are either adjusted to the carrying cost of respective fixed asset/Capital Work-in-Progress or recovered through tariff as per CERC Tariff Regulation 2014-19.

(3) Capital Management

(a) Capital Risk Management

The primary objective of the Company's capital management is to maximize the shareholder value. CERC Tariff Regulations prescribe Debt : Equity ratio of 70:30 for the purpose of fixation of tariff of Power Projects. Accordingly, the company manages its capital structure to maintain the normative capital structure prescribed by the CERC.

The Company monitors capital using Debt : Equity ratio, which is total debt divided by total capital. The Debt : Equity ratio are as follows:

(Amount In `)

Statement of Gearing Ratio

Particulars	As at 31st March, 2023	As at 31st March, 2022
(a) Total Debt	-	-
(b) Total Capital	3,576,418,897	2,949,087,431
Gearing Ratio (a/b)	0.00	0.00

Note: For the purpose of the Company's capital management, capital includes issued capital and reserves. Total debt includes Long term debts and Lease Liabilities including current maturities thereof, Short term Borrowings and Payable towards Bonds fully serviced by Government of India.

(b) Loan Covenants:

Under the terms of the major borrowing facilities, the company is required to comply with the following financial covenants:-

1. Company shall maintain credit rating AAA and if rating comes down, rate of interest shall be increased by 25 basis point for each notch below AAA rating .

2. Debt to net worth should not exceed 2:1.

3 Interest coverage ratio should be more than 2 times and should be calculated as ((Net Profit+Non Cash Expenditures+Interest Payable-Non Cash Income)/Interest Payable))

4 The gross Debt Service Coverage Ratio of the Company will no time be less than 1.25 during the currency of loan.

5.The Government of India holding in the company not to fall below 51%.

6. First Charge on Assets with 1:1.33 coverage on pari paasu basis.

During the year the company has complied with the above loan covenants.

NHPC LIMITED FARIDABAD

NHPC Limited (A Government of India Enterprise)

NOTE NO. 34:

1 Disclosures relating to Contingent Liabilities:

Contingent Liabilities to the extent not provided for -

a) **Claims against the Company not acknowledged as debts in respect of:**

(i)

Capital works	(Amount in Rs.)	
Particulars	**31.03.2023**	**31.03.2022**
Claim of Contractors (Aggregated amount): Contractors have lodged claims against the Company on account of rate and quantity deviation, cost relating to extension of time, idling charges due to stoppage of work/delays in handing over the site etc. These claims are being contested by the company as being not admissible in terms of provisions of the respective contracts or are lying at arbitration tribunal/other forums/under examination with the Company	8,475,479,207.00	8,098,698,696.00
Arbitration awards including updated interest thereon, against the Company, which have been challenged/decided to be challenged in the Court of Law included in the claim:	8,370,196,753.00	7,997,373,549.00
Provisions created against above claims: Management has assessed the above claims and recognized a provision based on probability of outflow of resources embodying economic benefits.	460,267,362.00	460,267,362.00
Amount of contingent liability i.e. amounts for which Company may be held contingently liable	**8,015,211,845.00**	**7,638,431,334.00**
Decrease of contingent liability from Opening Balance of Contingent Liability		
In respect of such estimated contingent claims either the outflow of resources embodying economic benefits is not probable or a reliable estimate of the amount required for settling the obligation cannot be made. In respect of the rest of the claims/obligations, possibility of any outflow in settlement is considered as remote.		

(ii)

Land Compensation cases	(Amount in Rs.)	
Particulars	**31.03.2023**	**31.03.2022**
Claim of erstwhile Land Holders: In respect of land acquired for the projects, some of the erstwhile land owners have filed claims for higher compensation before various authorities/courts.	403255764	391649805
Provisions created against above claims: Pending settlement, the Company has assessed and recognise a provision based on probability of outflow of resources embodying economic benefits	128800000	128800000
Amount of contingent liability i.e. amounts for which Company may be held contingently liable	**274455764**	**262849805**
Decrease of contingent liability from Opening Balance of Contingent Liability	**50651646**	
In respect of such estimated contingent claims either the outflow of resources embodying economic benefits is not probable. In respect of the rest of the claims/obligations, possibility of any outflow in settlement is considered as remote.		

(iii)

Disputed Tax Demands	(Amount in Rs.)	
Particulars	**31.03.2023**	**31.03.2022**
Disputed Income Tax/Sales Tax/Service Tax/ other taxes/duties matters pending before various appellate authorities:	251528073	251528073
Provisions created against above claims: Pending settlement, the Company has assessed and recognise a provision based on probability of outflow of resources embodying economic benefits	0	0
Amount of contingent liability i.e. amounts for which Company may be held contingently liable	**251528073**	**251528073**
Decrease of contingent liability from Opening Balance of Contingent Liability	**0**	
In respect of such estimated contingent claims either the outflow of resources embodying economic benefits is not probable. In respect of the rest of the claims/obligations, possibility of any outflow in settlement is considered as remote.		

(iV)

Others	(Amount in Rs.)	
Particulars	**31.03.2023**	**31.03.2022**
Claims on account of other miscellaneous matters pending before various forums	1200597	1200597
Provisions created against above claims: Pending settlement, the Company has assessed and recognise a provision based on probability of outflow of resources embodying economic benefits	0	0
Amount of contingent liability i.e. amounts for which Company may be held contingently liable	**1200597**	**1200597**
Decrease of contingent liability from Opening Balance of Contingent Liability	**0**	
In respect of such estimated contingent claims either the outflow of resources embodying economic benefits is not probable. In respect of the rest of the claims/obligations, possibility of any outflow in settlement is considered as remote.		

The above is summarized as below:

(Amount in Rs.)

Sl. No.	Particulars	Claims as on 31.03.2023	up to date Provision against the claims	Contingent liability as on 31.03.2023	Contingent liability as on 31.03.2022	Addition/	Decrease of contingent liability from Opening Balance as on 01.04.2022
(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)=(v)-(vi)	(viii)
1	Capital Works	8475479207	460267362	8015211845	7638431334	376780511	0
2	Land Compen-sation cases	403255764	128800000	274455764	262849805	11605959	50651646

(D) **Other notes to related party transactions:**

NHPC LIMITED FARIDABAD

NOTE NO. 34:

Terms and conditions of transactions with the related parties:

Transactions with the state governments and entities controlled by the Government of India are carried out at market terms on arms- length basis (except subordinate debts received from Central Government at concessional rate) through a transparent price discovery process against open tenders, except in a few cases of procurement of spares/services from Original Equipment Manufacturers (OEMs) for proprietary items on single tender basis due to urgency, compatibility or other reasons. Such single tender procurements are also done through a process of negotiation with prices benchmarked against available price data of same/similar items.

8 **Particulars of Security: The same shall be made in the Standalone accounts of the Company: (Provided at CO level)**

(iii)	The amount of interest due and payable for the year of delay in making payment (which have been paid but beyond the appointed day during the year) but without adding the interest specified under the Micro, Small and Medium Enterprises Development Act, 2006;		
(iv)	The amount of interest accrued and remaining unpaid as on Balance Sheet date.		
(v)	The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues above are actually paid to the small enterprise, for the purpose of disallowance of a deductible expenditure under section 23 of the Micro, Small and Medium Enterprises Development Act, 2006.		

15 **Disclosures regarding leases as per IND AS -116 "Leases":**

A) **Company as Lessee:**

(i) Treatment of Leases as per Ind AS 116 :

The Company assesses whether a contract is or contains a lease, at the inception of the contract. The Company recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (such as tablets and personal computers, small items of office furniture and telephones). For these leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Company uses its incremental borrowing rate.

The Company has applied the following practical expedients on initial application of Ind AS 116:

(a) Applied a single discount rate to a portfolio of leases of similar assets in similar economic environment with a similar end date.

(b) Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term on the date of initial application.

(c) Excluded the initial direct costs, if any from the measurement of the right-of-use asset at the date of recognition of right-of-use asset.

(d) Used hindsight when determining the lease term if the contract contains options to extend or terminate the lease.

The weighted average incremental borrowing rate applied to leases recognised during FY 2022-23 is 6.58%.

(ii) Nature of lease: The Company's significant leasing arrangements are in respect of the following assets:

(a) Premises under cancellable lease arrangements for residential use of employees ranging from 3-4 months to three years.

(b) Premises for offices, guest houses & transit camps on lease which are not non-cancellable and are usually renewable on mutually agreeable terms.

(c) Land obtained on lease for construction of projects and / or administrative offices.

(d) Vehicles on operating leases generally for a period of 1 to 2 years and such leases are not non-cancellable.

NHPC LIMITED एनएचपीसी N.H.P.C FARIDABAD

(iii) **Amount recognised in the Statement of Profit and Loss / Expenditure Attributable to Construction in respect of short term, low value and variable lease during the year ended 31.03.2023: :**

Business Interruption Loss					
Total					
Income recognised in respect of "Business Interruption Loss" during the year is ₹ Nil.(Cumulative as on 31.03.2023 is ₹ Nil.).					

20 **Nature and details of provisions (refer Note No. 17 and 22)**

(i) **General**

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a Finance Cost.

(ii) **Provision for employee benefits (Other than provisions for defined contribution and defined benefit plans which have been disclosed as per Ind AS-19 at S. No. 10 of Note No. 34):**

a) **Provision for Performance Related Pay/Incentive:**

Short-term Provision has been recognised in the accounts towards Performance Related Pay/ incentive to employees on the basis of Management estimates as per company's rules in this regard which are based on the guidelines of the Department of Public Enterprises, Government of India.

b) **Provision For Wage Revision as per 3rd Pay Revision Committee (PRC):**

Short term provision for wage revision of the employees of the company was recognised earlier as per notification of the Department of Public Enterprises, Government of India.

(iii) **Other Provisions:**

a) **Provision For Tariff Adjustment:**

Provision for tariff adjustment is made on estimated basis against probable refund to beneficiaries on reassessment of tariff billed, pending approval of Tariff/truing up for the Year 2014-19/2019-24 by Central Electricity Regulatory Commission (CERC).

b) **Provision for Livelihood Assistance:**

Provision has been recognised at discounted value adjusted for average inflation in the accounts towards special financial package finalised in consultation with the State Government and approved by the Board of Directors of NHPC for livelihood assistance of the project affected families (PAFs) in Parbati-II and Parbati-III. As per the package, pending finalisation of modalities of payment, one eligible person from each PAF shall be provided livelihood assistance equivalent to minimum wage of unskilled category as per the Government of Himachal Pradesh/ Central Government whichever is higher, on monthly instalment basis, for the Years as under:

i) Till the date of superannuation for PAFs eligible for employment.
ii) For 2000 days to those PAFs left with zero balance land but excluded for employment.
iii) For 1000 days to all remaining PAFs.

c) **Provision for Committed Capital Expenditure:**
Provision has been recognised at discounted value in case of non- current amount for Capital Expenditure to be incurred towards environment, compensatory afforestation, local area development, etc. which was a pre-condition for granting approval for construction of the project and expenditure towards which had not been completed till commissioning of the project. Such provisions are adjusted against the incurrence of actual expenditure as per demand raised by the concerned State Government Authorities.

d) **Provision for restoration expenses of Insured assets:**
Provision has been recognised in the accounts based on Management Estimates for restoration of damaged assets insured under Mega and Construction Plant and Machinery Policy. Utilization of the provision is to be made against incurrence of actual expenditure towards restoration of the assets.

e) **Provisions for expenditure in respect of Arbitration Award/Court cases:**
This includes provisions created on the basis of management assessment as to probable outflow in respect of contractors claims against which arbitration award/Court decision have been received and which have been further challenged in a Court of Law. Utilization/outflow of the provision is to be made on the outcome of the case.

f) Provisions- Others: This includes provisions towards:-

(i) Contractor claims, Land compensation cases, disputed tax demands and other cases created on the basis of management assessment towards probable outflow. Utilization/outflow of the provision is to be made on the outcome of the case.

(ii) Wage revision of Central Government Employees whose services are utilised by the company.

(iii) Provision for interest to beneficiaries on excess tariff recovered in terms of Tariff Regulations for the Year 2014-19 where the capital cost considered for fixation of tariff by the CERC on the basis of projected capital cost as on Commercial Operation Date or the projected additional capital expenditure exceeds the actual capital cost incurred.

(iv) Upfront provision for rebate towards interest on House Building Advance provided to employees based on the historical trend of rebate allowed.

(v) Upfront provision for rebate to customers for sale of power based on the historical trend of rebate allowed.

21 Disclosure regarding Impact of Change in Accounting Policies:

Description of change in Accounting Policies	Impact on the Statement of Profit/Loss - Increase in Profit/ (Decrease in Profit)	Impact on the Line Item of Balance Sheet as at 31.03.2023
Accounting Policy on Recognition of Carbon Credits/ CERs/VERs		
Change in the useful life of the assets provided to employees at Residential Office	(10085)	(10085)

22 Unit/Project specific notes (Shall be provided only by the specified units) :

(i) Dulhasti Power Station in r/o Bursar Project

As per deliberations of the Board of Directors in its meeting held on 20.03.2014, the viability of Bursar HE Project is dependent upon financial support from Government of India and Government of Jammu & Kashmir. Ministry of Power (MOP), Government of India was approached to provide funding for Survey and Investigation of **Bursar Project** to make it viable. As advised by the MoP, Ministry of Water Resources (MoWR) was approached to provide funds. In the meeting held with MoWR on 27.04.2015, it was informed by the representatives of MoWR that the request of the company for release of funds for preparation of DPR is under consideration for approval of Government of India. Detailed Project Report (DPR) of the project was submitted to CEA and expenditure of ₹ .....incurred have been carried forward as Capital Work in Progress. However, as an abundant precaution, provision made in earlier years in this respect has been continued in the books of accounts.

(ii) Tanakpur Power Station in respect of Kotlibhel Projects

Kotlibhel-1A, Kotlibhel-IB and Kotlibhel-II projects are three of the 24 hydro-electric projects located in the State of Uttarakhand which are covered by the order dated 13.08.2013 of Hon'ble Supreme Court of India directing MoEF not to grant environmental/forest clearance to these projects until further order and to examine the significant impact on the bio-diversity of Alaknanda and Bhagirathi river basin. Pending adjudication about the fate of these projects, the expenditure incurred upto 31.03.2023 amounting to ₹ ....., ₹ ..... and ₹ ..... have been carried forward as Capital Work in Progress in respect of Kotlibhel-1A, Kotlibhel-IB and Kotlibhel-II projects respectively. However, as an abundant precaution, provision for these amounts totalling ₹ .....up to 31.03.2023 has been made in the books of accounts.

(iii) RO Itanagar in respect of Tawang I & II projects

a) Forest Clearance in respect of Tawang Stage-II Hydroelectric Project is under process. Forest Clearance for Tawang-I Hydroelectric Project shall be taken up after Forest Clearance of Tawang-II HE Project. Pending this, expenditure of ₹..... (previous year ₹ .....) incurred on these projects is being carried forward as Capital Work in Progress. Further, due to uncertainties in the implementation of Tawang I and II Projects, a provision of Rs....(previous year Rs.....) has been made in the books of accounts as an abundant precaution.

(iv) Dhauliganga power station in c/o Dhauliganga Intermediate Project:

a) Implementation of Dhauliganga Intermediate, Chungar Chal and Kharmoli Lumti Tulli Hydroelectric Projects has been temporarily put on hold. Pending final decision to hand over these projects to the Government of Uttarakhand, the expenditure incurred upto 31.03.2023 amounting to ₹ ..... (previous year ₹ .....) have been carried forward as Capital Work in Progress. However, as an abundant precaution, provision for ₹ ..... (previous year .....) has been made in the books of accounts.

b) Measures to reduce capital cost and optimise tariff of Goriganga IIIA Project are being explored. Pending decision on the same, the expenditure incurred upto 31.03.2023 amounting to ₹ ..... (previous year ₹ .....) have been carried forward as Capital Work in Progress. However, as an abundant precaution, provision for ₹ ..... (previous year Rs .....) has been made in the books of accounts.

v) Wind Power Project, Jaisalmer:

Quantitative details of Renewable Energy Certificates (RECs) in respect of renewable energy

Sl. No.	Description	Quantity
1	No. of RECs issued	
2	No. of RECs under certification	
3	No. of RECs sold during the year	

23 Quantitative details of Carbon Credit Certificates (CER/VER) in respect of Hydro Generating Power Stations:

Sl. No.	Description	Quantity (In Numbers)	
		31.03.2023	31.03.2022
1	Opening Balance	2436839	
2	Issued/Generated during the Year	0	
3	Sold during the year	0	
4	Closing Balance (1+2-3)	2436839	
5	No. of CER/VER under certification	11731679	

24 Following information is required for preparation of Statement of Cash Flows:

Particulars	For the year ended on 31.03.2023	For the year ended on 31.03.2022
Cash flow from sale of Property, Plant & Equipment and Intangible Assets (Excluding Taxes)		

25 Disclosures relating to creation of Regulatory Deferral Account (RDA)balances as per Ind AS 114 : (Disclosures relating to creation of Regulatory Deferral Account (RDA)balances as per Ind AS 114 are given in Appendix V.The units having RDA balances should copy the content pertaining to their unit & paste here under)

NOTE NO. 1: COMPANY INFORMATION AND MATERIAL ACCOUNTING POLICIES

(I) Reporting entity

NHPC Limited (the "Company") is a Company domiciled in India and limited by shares (CIN: L40101HR1975GOI032564). The shares of the Company are listed and traded on the National Stock Exchange of India Limited (NSE) and Bombay Stock Exchange India Limited (BSE) in India. The address of the Company's registered office is NHPC Limited, NHPC Office Complex, Sector-33, Faridabad, Haryana- 121003. The Company is primarily involved in the generation and sale of bulk power to various Power Utilities. Other business in which the Company is involved includes providing project management / construction contracts/ consultancy assignment services and trading of power.

(II) Basis of preparation

(A) Statement of Compliance

These standalone financial statements are prepared on going concern basis following accrual system of accounting and comply with the Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 and subsequent amendments thereto, the Companies Act, 2013 (to the extent notified and applicable), applicable provisions of the Companies Act, 1956, and the provisions of the Electricity Act, 2003 to the extent applicable.

(B) Basis of Measurement

The financial statements have been prepared on historical cost basis, except for:

- Certain financial assets and liabilities measured at fair value
- Plan assets of defined employee benefit plans measured at fair value
- right of use assets – measured at present value of future cash outflows at initial recognition
- assets held for sale - measured at fair value less cost to sell

The methods used to measure fair values are discussed in Note 33.

Historical cost is the amount of cash or cash equivalents paid or the fair value of the consideration given to acquire assets at the time of their acquisition or the amount of proceeds received in exchange for the obligation, or at the amounts of cash or cash equivalents expected to be paid to satisfy the liability in the normal course of business. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

(C) Application of new and revised standards

Vide notification dated March 31, 2023, the Ministry of Corporate Affairs has notified the Companies (Indian Accounting Standards) Amendment Rules, 2023 which amends certain Indian Accounting Standards, and are effective from April 1, 2023. The summary of the major amendments and its impact on the Company are given hereunder:

i) **Disclosure of accounting policies – amendments to Ind AS 1 – Presentation of financial statements:** This amendment requires the entities to disclose their material accounting policies rather than their significant accounting policies. These amendments define what is 'material accounting policy information' (being information that, when considered together with other information included in an entity's financial statements, can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements) and explain how to identify when accounting policy information is material. They further clarify that immaterial accounting policy information do not need to be disclosed. If disclosed, they should not obscure material accounting information.

NHPC LIMITED FARIDABAD

The Company has evaluated the amendment and suitably modified its Material Accounting Policies. However, impact of the said amendment on the Company's financial statements is not significant.

ii) **Definition of accounting estimates – amendments to Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors:** The amendment clarifies how entities should distinguish changes in accounting policies from changes in accounting estimates. The distinction is important, because changes in accounting estimates are applied prospectively to future transactions and other future events, whereas changes in accounting policies are generally applied retrospectively to past transactions and other past events (as well as the current period).

The Company has evaluated the amendment and there is no impact on the Company's financial statements.

iii) **Deferred tax related to assets and liabilities arising from a single transaction – amendments to Ind AS 12 - Income Taxes:** This amendment has narrowed the scope of the initial recognition exemption so that it does not apply to transactions that give rise to equal and offsetting temporary differences.

The Company has evaluated the amendment and there is no impact on the Company's financial statements.

iv) Amendments/ revisions in other standards are either not applicable or do not have any material impact on the financial statements.

(D) Functional and presentation currency

These financial statements are presented in Indian Rupees (INR), which is the Company's functional currency.

(E) Use of estimates and management judgments

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that may impact the application of accounting policies and the reported value of assets, liabilities, income, expenses and related disclosures including contingent assets and contingent liabilities at the Balance Sheet date. The estimates and management's judgments are based on previous experience and other factors considered reasonable and prudent in the circumstances. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

In order to enhance understanding of the financial statements, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that may have the most significant effect on the amounts recognised in the financial statements are included in the following notes:

Critical judgments and estimates

a) Leases

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116- *Leases*. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Identification of a lease requires significant judgment.

The Company also uses significant judgment in assessing the lease term (including anticipated renewals) and the applicable discount rate.

NHPC LIMITED FARIDABAD

5

b) Useful life of Property, Plant and Equipment and Intangible Assets

The estimated useful life of property, plant and equipment and intangible assets are based on a number of factors including the effects of obsolescence, demand, competition and other economic factors (such as the stability of the industry and known technological advances) and the level of maintenance expenditures required to obtain the expected future cash flows from the asset.

c) Recoverable amount of Property, Plant and Equipment, Capital Work in Progress and Intangible Assets

The recoverable amount of property, plant and equipment, capital work in progress and intangible assets are based on estimates and assumptions, in particular the expected market outlook and future cash flows associated with the power plants. Any changes in these assumptions may have a material impact on the measurement of the recoverable amount resulting in impairment.

d) Post-retirement benefit plans

Employee benefit obligations are measured on the basis of actuarial assumptions which include mortality and withdrawal rates as well as assumptions in respect of future developments in discount rates, the rate of salary increase, inflation rate and expected rate of return on plan assets. The Company considers that the assumptions used to measure its obligations are appropriate and documented. However, any changes in these assumptions may have an impact on the resulting calculations.

e) Revenue

The Company records revenue from sale of power based on tariff approved by the CERC, as per the principles of Ind AS 115- *Revenue from Contracts with Customers*. However, in cases where tariff rates are yet to be approved, provisional rates are adopted considering the applicable CERC Tariff Regulations. Further, where revision in tariff due to revision in cost estimates are pending, tariff is computed based on the parameters and methods prescribed under the CERC Tariff Regulations and an estimated amount of revenue is recognised when an application is made to the CERC after obtaining necessary approvals to the extent it is highly probable that there will be no downward adjustment to the revenue recognised.

f) Provisions and contingencies

The assessments undertaken in recognising provisions and contingencies have been made in accordance with Ind AS 37, 'Provisions, Contingent Liabilities and Contingent Assets'. The evaluation of the likelihood of the contingent events has been made on the basis of best judgment by management regarding probable outflow of economic resources. These estimates can change due to unforeseeable developments.

g) Recoverable Amount of Rate Regulated Assets

The operating activities of the Company are subject to cost-of-service regulations whereby tariff charged for electricity generated is based on allowable costs like interest costs, depreciation, operation and maintenance including a stipulated return. Guidance Note on Rate Regulated Activities issued by the ICAI (previous GAAP) and Ind AS 114- 'Regulatory Deferral Accounts' permits an entity to include in the rate base, as part of the cost of self-constructed (tangible) PPE or internally generated intangible assets, amounts that would otherwise be recognised as an expense in the Statement of Profit and Loss in accordance with Ind AS. The Company estimates that items of regulatory deferral accounts recognised in the financial statements are recoverable as per the current CERC Tariff Regulations 2019-24. However, changes in CERC tariff regulations beyond the current tariff period may affect the recoverability of such balances.

h) Impairment of Trade Receivables

NHPC LIMITED FARIDABAD

Considering the historical credit loss experience for trade receivables, the Company does not envisage either impairment in the value of receivables from beneficiaries or loss due to time value of money owing to delay in realization of trade receivables, except to the extent already provided for. CERC Tariff Regulations provide for recovery of Late Payment Surcharge for delayed payments which compensates for loss due to time value of money, except to the extent already provided for.

i) Insurance Claim Recoverable

The recoverable amount of insurance claims in respect of damages to Property, Plant and Equipment and Capital Work in Progress is based on estimates and assumptions as per terms and conditions of insurance policies and management estimate of amount recoverable from the Insurance Company based on past experience.

j) Cost of Carbon Credits / Certified Emission Reductions (CERs)/ Verified Carbon Units (VCUs)

The cost of Carbon Credits / Certified Emission Reductions (CERs)/ Verified Carbon Units (VCUs) are measured as per Management estimate.

k) Assets classified as held for sale

Management judgment is required to apply the accounting of non-current assets held for sale under Ind AS 105 - 'Non-current assets held for sale and discontinued operations'. In assessing the applicability, management exercises judgment to evaluate availability of the asset for immediate sale, management's commitment for the sale and probability of sale within one year to conclude if their carrying amount will be recovered principally through a sale transaction rather than through continuing use.

(III) MATERIAL ACCOUNTING POLICIES:

Summary of the material accounting policies for preparation of financial statements as given below have been applied consistently to all periods presented in the financial statements. These accounting policies are formulated in a manner that results in financial statements containing relevant and reliable information about the transactions, other events and conditions to which they apply. These policies need not be applied when the effect of applying them is immaterial.

Up to March 31, 2015, Property, Plant and Equipment, Capital Work in Progress, Intangible Assets and Investment Property were carried in the Balance Sheet in accordance with Indian GAAP. The Company had elected to avail the exemption granted by IND AS 101, "First time adoption of IND AS" to regard those amounts as the deemed cost at the date of transition to IND AS (i.e., as on April 1, 2015). Therefore, the carrying amount of Property, Plant and Equipment, Capital Work in Progress, Intangible Assets and Investment Property as per the previous GAAP as at April 1, 2015, were maintained on transition to Ind AS.

1.0 Property, Plant and Equipment (PPE)

a) An item of PPE is recognized as an asset if it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

b) PPE are initially measured at cost of acquisition/construction including decommissioning or restoration cost wherever required. The cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. In cases where final settlement of bills with contractors is pending, but the asset is complete and available for operating in the manner intended by the management, capitalisation is done on estimated basis subject to necessary adjustments, including those arising out of settlement of arbitration/court cases.

NHPC LIMITED FARIDABAD

c) Subsequent costs is recognized in the carrying amount of the asset when it is probable that future economic benefits deriving from the cost incurred will flow to the enterprise and the cost of the item can be measured reliably.

d) Expenditure incurred on renovation and modernization of power station on completion of the originally estimated useful life of the power station is added to the cost of the related asset when it meets the recognition criteria. PPE acquired as replacement of the existing assets are capitalized and its corresponding replaced assets removed/ retired from active use are derecognized.

e) After initial recognition, Property, Plant and Equipment is carried at cost less accumulated depreciation/amortisation and accumulated impairment losses, if any.

f) Deposits, payments made/ liabilities created provisionally towards compensation (including interest on enhanced compensation till the date of award by the Court), rehabilitation & resettlement and other expenses including expenditure on environment management plans relatable to land in possession are treated as cost of land.

g) Assets over which the Company has control, though created on land not belonging to the Company, are included under Property, Plant and Equipment.

h) Standby equipment and servicing equipment which meet the recognition criteria of Property, Plant and Equipment are capitalized.

i) Spares parts (procured along with the Plant and Machinery or subsequently) which meet the recognition criteria are capitalized. The carrying amount of those spare parts that are replaced is derecognized when no future economic benefits are expected from their use or upon disposal. Other spare parts are treated as "stores and spares" forming part of inventory.

j) Expenditure on major inspection and overhauls of generating unit is capitalized, when it meets the asset recognition criteria. Any remaining carrying amount of the cost of the previous inspection and overhaul is derecognized.

k) The cost of replacing part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is derecognized regardless of whether the replaced part has been depreciated separately. If it is not practicable to determine the carrying amount of the replaced part, the Company uses the cost of the replacement as an indication of what the cost of replaced part was at the time it was acquired or constructed. The costs of the day-to-day servicing of property, plant and equipment are recognized in the statement of profit and loss as and when incurred.

l) An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition/ disposal of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit and Loss when the asset is derecognised.

2.0 Capital work in Progress (CWIP)

a) Expenditure incurred on assets under construction (including a project) is carried at cost under CWIP. Such costs comprise purchase price of assets including import duties and non-refundable taxes (after deducting trade discounts and rebates), expenditure in relation to survey and investigation activities of projects, cost of site preparation, initial delivery and handling charges, installation and assembly costs, etc.

b) Costs including employee benefits, professional fees, expenditure on maintenance and up-gradation of common public facilities, depreciation on assets used in construction of project including Right-of-Use assets, interest during construction and other costs that are directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management are accumulated under "Expenditure

FARIDABAD

Attributable to Construction (EAC)" and subsequently allocated on systematic basis over major immovable assets, other than land and infrastructure facilities on commissioning of projects. Net pre-commissioning income/ expenditure is adjusted directly in the cost of related assets.

c) Capital Expenditure incurred for creation of facilities, over which the Company does not have control but the creation of which is essential principally for construction of the project is accumulated under "Expenditure Attributable to Construction" and carried under "Capital Work in Progress" and subsequently allocated on a systematic basis over major immovable assets, other than land and infrastructure facilities on commissioning of projects, keeping in view the "attributability" and the "Unit of Measure" concepts in Ind AS 16- "Property, Plant and Equipment". Expenditure of such nature incurred after completion of the project, is charged to the Statement of Profit and Loss.

3.0 Investment Property

Investment properties are initially measured at cost, including transaction costs. Subsequent to initial recognition, investment properties are carried at cost less accumulated depreciation and accumulated impairment loss, if any.

The Company measures investment property using cost based measurement and fair value of investment property is disclosed in the notes.

Investment properties are derecognised either when they have been disposed off or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in the Statement of Profit and Loss in the period of derecognition. Any gain or loss arising on derecognition/ disposal of the asset is included in the Statement of Profit and Loss.

Transfers to or from investment property is made when and only when there is a change in use supported by evidence.

4.0 Intangible Assets and Intangible Assets under Development

a) Expenditure on research is charged to expenditure as and when incurred. Expenditure on development is capitalized only if the expenditure can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable and the Company intends to & has sufficient resources to complete development and to use or sell the asset.

b) Intangible assets that are acquired by the Company and which have finite useful lives, are measured on initial recognition at cost. Cost includes any directly attributable expenses necessary to make the assets ready for its intended use. After initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

c) Intangible assets under development represent expenditure incurred on intangible assets which are in the development phase and are carried at cost less accumulated impairment loss, if any.

d) Subsequent costs are recognized as an increase in the carrying amount of the asset when it is probable that future economic benefits deriving from the cost incurred will flow to the Company and the cost of the item can be measured reliably.

e) An item of Intangible asset is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

5.0 Foreign Currency Transactions

NHPC LIMITED
एन एच पी सी
N.H.P.C
FARIDABAD

a) Transactions in foreign currency are initially recorded at the functional currency spot rate at the date the transaction first qualifies for recognition. At each reporting date, monetary items denominated in foreign currency are translated at the functional currency exchange rates prevailing on that date.

b) Exchange differences relating to PPE/capital work-in-progress arising out of transaction entered into prior to April 1, 2004 are adjusted to the carrying cost of respective PPE/capital work-in-progress.

c) Exchange differences arising from translation of foreign currency borrowings entered into prior to March 31, 2016 recoverable from or payable to beneficiaries in subsequent periods as per CERC Tariff regulations are recognised as "Deferred Foreign Currency Fluctuation Recoverable/ Payable Account" and adjusted from the year in which the same is recovered/ paid.

d) Exchange differences arising from settlement/ translation of monetary items denominated in foreign currency entered into on or after April 1, 2016 to the extent recoverable from or payable to the beneficiaries in subsequent periods as per CERC Tariff Regulations are recognized as 'Regulatory Deferral Account Balances' during construction period and adjusted from the year in which the same become recoverable from or payable to the beneficiaries.

e) Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Where the Company has paid or received advance consideration in a foreign currency, the date of transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it), is the date when the Company initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration.

6.0 Regulatory Deferral Accounts

a) Where an item of expenditure incurred during the period of construction of a project is recognised as expense in the Statement of Profit and Loss i.e., not allowed to be capitalized as part of cost of relevant PPE in accordance with Ind AS, but is nevertheless permitted by CERC to be recovered from the beneficiaries in future through tariff, the right to recover the same is recognized as "Regulatory Deferral Account balances."

b) Expense/ income recognised in the Statement of Profit and Loss to the extent recoverable from or payable to the beneficiaries in subsequent periods as per CERC Tariff Regulations are recognised as "Regulatory Deferral Account balances."

c) These Regulatory Deferral Account balances are adjusted from the year in which the same become recoverable from or payable to the beneficiaries.

d) Regulatory Deferral Account balances are evaluated at each Balance Sheet date to ensure that the underlying activities meet the recognition criteria and it is probable that future economic benefits associated with such balances will flow to the entity. If these criteria are not met, the Regulatory Deferral Account balances are derecognised.

e) Regulatory Deferral Account balances are tested for impairment at each Balance Sheet date.

7.0 Fair value measurement

At initial recognition, transaction price is the best evidence of fair value. However, when the Company determines that transaction price does not represent the fair value, it uses inter-alia valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

NHPC LIMITED
एनएचपीसी
N·H·P·C
FARIDABAD

All financial assets and financial liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy. This categorisation is based on the lowest level input that is significant to the fair value measurement as a whole:

• Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

• Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

• Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For financial assets and financial liabilities that are recognised at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation at the end of each reporting period.

8.0 Investments in subsidiaries and joint ventures

Investments in equity shares of subsidiaries and joint ventures are carried at cost less impairment losses, if any in the value of the investments. Where an indication of impairment exists, considering entities with common line of activities as a single cash generating unit, the carrying amounts of investments are assessed and written down to its recoverable amount at the end of reporting period. On disposal of investments in subsidiaries, associates and joint venture, the difference between net disposal proceeds and the carrying amounts are recognized in the statement of profit and loss.

9.0 Financial assets other than investment in subsidiaries and joint ventures

A financial asset includes inter-alia any asset that is cash, equity instrument of another entity or contractual right to receive cash or another financial asset or to exchange financial asset or financial liability under conditions that are potentially favourable to the Company. A financial asset is recognized when and only when the Company becomes party to the contractual provisions of the instrument.

Financial assets of the Company comprise Cash and Cash Equivalents, Bank Balances, Investments in equity shares of companies, Trade Receivables, Loan to employees, security deposit, claims recoverable etc.

a) Classification

The Company classifies its financial assets in the following categories:

- At amortised cost,
- At fair value through other comprehensive income (FVTOCI), and
- At fair value through profit and loss

The classification depends on the following:

(a) The entity's business model for managing the financial assets and

(b) The contractual cash flow characteristics of the financial asset.

For assets measured at fair value, gains and losses are either recorded in the Statement of Profit and Loss or under Other Comprehensive Income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through Other Comprehensive Income.

b) Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the

acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the Statement of Profit and Loss.

The Company measures trade receivables at their transaction price, if the trade receivables do not contain a significant financing component.

c) Subsequent measurement

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

i) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and

ii) Contractual terms of the asset give rise on specified dates to cash flows that are Solely Payments of Principal and Interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the Effective Interest Rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in interest income in the Statement of Profit and Loss. Losses arising from impairment are recognised in the Statement of Profit and Loss.

Debt instrument at Fair Value through Other Comprehensive Income (FVTOCI)

A 'debt instrument' is classified as at FVTOCI if both the following criteria are met:

i) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and

ii) The asset's contractual cash flows represent Solely Payments of Principal and Interest (SPPI).

Debt instruments at fair value through Other Comprehensive Income are measured at each reporting date at fair value. Fair value movements are recognized in Other Comprehensive Income (OCI). However, the Company recognizes interest income, impairment losses, reversals and foreign exchange gain or loss in the Statement of Profit and Loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to profit and loss. Interest income from these financial assets is included in other income using the EIR method.

Equity investments:

All equity investments in entities other than subsidiaries and joint ventures are measured at fair value. Equity instruments which are held for trading, if any, are classified at Fair Value through Profit or Loss (FVTPL). The Company classifies all other equity instruments at FVTOCI. The Company makes such election on an instrument by- instrument basis. The classification is made on initial recognition and is irrevocable.

All fair value changes of an equity instrument classified at FVTOCI, are recognized in OCI. There is no subsequent reclassification of fair value gains and losses to the Statement of Profit and Loss. However, the Company may transfer the cumulative gain or loss within equity. Dividends from such investments are recognised in the Statement of Profit and Loss as "other income" when the company's right to receive payments is established.

Equity instruments included within the FVTPL category, if any, are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Trade Receivables:

Trade receivables containing a significant financing component are subsequently measured at amortised cost using the effective interest method.

NHPC LIMITED
एन एच पी सी
NHPC
FARIDABAD

d) Derecognition

A financial asset is derecognised only when:

i) The Company has transferred the rights to receive cash flows from the financial asset, or

ii) Retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the Company has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognised. Where the Company has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognised.

Where the Company has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the Company has not retained control of the financial asset. Where the Company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

On derecognition, the difference between the carrying amount and the amount of consideration received / receivable is recognized in the Statement of Profit and Loss.

e) Impairment of financial assets

In accordance with Ind AS 109, the Company applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on the following financial assets:

i) Financial assets that are debt instruments, and are measured at amortised cost.

ii) Financial assets that are debt instruments and are measured as at FVTOCI

iii) Contract Assets and Trade Receivables under Ind AS 115- *Revenue from Contracts with Customers*

iv) Lease Receivables under Ind AS 116- *Leases*.

The Company follows the 'simplified approach' permitted under Ind AS 109, "Financial Instruments" for recognition of impairment loss allowance based on life time expected credit loss from initial recognition on contract assets, lease receivables and trade receivables resulting from transactions within the scope of Ind AS 116 and Ind AS 115.

For all other financial assets, expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition, in which case those financial assets are measured at lifetime ECL. Any increase or reversal of loss allowance computed using ECL model, is recognized as an impairment gain or loss in the Statement of Profit and Loss.

10.0 Inventories

Inventories mainly comprise stores and spare parts to be used for maintenance of Property, Plant and Equipment and are valued at cost or net realizable value (NRV) whichever is lower. The cost is determined using weighted average cost formula and NRV is the estimated selling price in the ordinary course of business, less the estimated costs necessary to make the sale.

Carbon Credits / Certified Emission Reductions (CERs)/ Verified Carbon Units (VCUs) are valued at lower of cost and net realizable value.

The amount of any write-down of inventories to net realisable value and all losses of inventories is recognized as an expense in the period in which write-down or loss occurs.

11.0 Dividends

NHPC LIMITED
एन एच पी सी
NHPC
FARIDABAD

Final dividends and interim dividends payable to the Company's shareholders are recognised as change in equity in the period in which they are approved by the Company's shareholders and the Board of Directors respectively.

12.0 Financial liabilities

The Company's financial liabilities include loans and borrowings, trade and other payables. A financial liability is recognized when and only when the Company becomes party to the contractual provisions of the instrument.

a) Classification, initial recognition and measurement

Financial liabilities are recognised initially at fair value less transaction costs that are directly attributable and subsequently measured at amortised cost. Financial liabilities are classified as subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the fair value at initial recognition is recognised in the Statement of Profit and Loss or in the carrying amount of an asset if another standard permits such inclusion, over the period of the borrowings using the effective rate of interest.

b) Subsequent measurement

After initial recognition, financial liabilities are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in the Statement of Profit and Loss or in the carrying amount of an asset if another standard permits such inclusion, when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance cost in the Statement of Profit and Loss.

c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

d) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

e) Derivative financial instruments

Derivative financial instruments that are held by the Company to hedge the foreign currency and interest rate risk exposures and are not designated as hedges are accounted for at fair value through profit or loss. Changes in fair value are recognised in the Statement of Profit and Loss.

13.0 Government Grants

a) The benefits of a government loan at a below market rate of interest is treated as a Government Grant. The loan is initially recognised and measured at fair value and the grant is measured as the difference between the initially recognized amount of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy applicable to financial liabilities and the grant is recognized initially as deferred income and subsequently amortised in the Statement of Profit and Loss on a systematic basis over the useful life of the asset.

NHPC LIMITED FARIDABAD

b) Monetary grants from the government for creation of assets are initially recognised as deferred income when there is reasonable assurance that the grant will be received and the company will comply with the conditions associated with the grant. The deferred income so recognised is subsequently amortised in the Statement of Profit and Loss over the useful life of the related assets.

c) Government grant related to income is recognised in the Statement of Profit and Loss on a systematic basis over the periods in which the entity recognises as expenses the related costs for which the grants are intended to compensate.

14.0 Provisions, Contingent Liabilities and Contingent Assets

a) Provisions are recognised when the Company has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Such provisions are determined based on management estimate of the amount required to settle the obligation at the Balance Sheet date. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably. The expense relating to a provision net of any reimbursement is presented in the Statement of Profit and Loss or in the carrying amount of an asset if another standard permits such inclusion.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows using a current pre-tax rate that reflects the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

b) Contingent liabilities are possible obligations that arise from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events not wholly within the control of the Company. Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Contingent liabilities are disclosed on the basis of judgment of management/independent experts. These are reviewed at each Balance Sheet date and are adjusted to reflect the current management estimate.

c) Contingent assets are possible assets that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent assets are disclosed in the financial statements when inflow of economic benefits is probable on the basis of judgment of management. These are assessed continually to ensure that developments are appropriately reflected in the financial statements.

15.0 Revenue Recognition and Other Income

Company's revenues arise from sale and trading of energy, project management / construction contracts/ consultancy assignment services and other income. Revenue from other income comprise of interest from banks, employees, contractors etc., dividend from investments in joint ventures and subsidiary companies, dividend from investments in equity in other bodies corporate, interest from investment in bonds, surcharge received from beneficiaries for delayed payments, sale of scrap, other miscellaneous income, etc.

a) Revenue from sale of power

i) Revenue is measured based on the consideration that is specified in a contract with a customer or is expected to be received in exchange for the products or services and excludes amounts collected on behalf of third parties. The Company recognises revenue from contracts for sale of power over time as the customers simultaneously receive and consume the benefits provided by the Company.

NHPC LIMITED FARIDABAD

ii) Revenue from sale of power (except minimum lease receipts in respect of power stations considered as Finance Lease/Operating Lease) is accounted for as per tariff notified by the Central Electricity Regulatory Commission (CERC) under the CERC (Terms & Conditions of Tariff) Regulations as modified by the orders of Appellate Tribunal for Electricity to the extent applicable. In the case of Power Stations where provisional/ final tariff is yet to be notified or where incentives/disincentives are chargeable/ payable as per CERC (Terms & Conditions of Tariff) Regulations, revenue is recognised to the extent it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. Rebates given to beneficiaries as early payments incentives are deducted from the amount of revenue.

iii) Customers are billed on a periodic and regular basis. As at each reporting date, revenue from sale of power includes an accrual for sales delivered to customers but not yet billed (unbilled revenue).

iv) Recovery/ refund towards foreign currency variation in respect of foreign currency loans and recovery towards Income Tax are recognised on year to year basis based on regulatory norms. Recovery towards deferred tax items recognized till March 31, 2009 are accounted for when the same materialises.

v) Adjustments arising out of finalisation of Regional Energy Account (REA), though not material, are effected in the year of respective finalisation.

vi) Advance Against Depreciation (AAD) considered as deferred income up to 31st March 2009 is included in sales on straight line basis over the balance useful life after a period of 12 years from the date of commercial operation of the Power Station.

b) Revenue from Project Management / Construction Contracts/ Consultancy assignments

i) Revenue from Project Management / Construction Contracts/ Consultancy assignments is measured based on the consideration that is specified in a contract with a customer or is expected to be received in exchange for the services and excludes amounts collected on behalf of third parties. The Company recognises revenue on the basis of input method. Input method recognises revenue on the basis of the costs incurred towards the satisfaction of a performance obligation relative to the total expected costs to the satisfaction of that performance obligation.

ii) Contract assets are recognised when there is excess of revenue earned over billings on contracts. Contract assets are transferred to trade receivables revenue when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms. The contract liabilities primarily relate to the advance consideration received from the customers.

iii) Contract modifications, if any, are accounted for when there is a change in the scope or price (or both) of a contract that is approved by the parties to the contract and when the parties to a contract approve a modification that either creates new or changes existing enforceable rights and obligations of the parties to the contract. Accounting for modifications of contracts involves assessing whether the services added to an existing contract are distinct and whether the pricing is at the standalone selling price. Contract modifications are recorded on standalone basis when the scope of the contract increases because of the addition of promised goods or services or the price of the contract increases by an amount of consideration that reflects the Company's standalone selling prices of the additional promised goods or services and any appropriate adjustments to that price to reflect the circumstances of the particular contract. Services added that are not distinct are accounted for on a cumulative catch-up basis, while those that are distinct are accounted for prospectively, either as a separate contract, if the additional services are priced at the

NHPC LIMITED FARIDABAD

standalone selling price, or as a termination of the existing contract and creation of a new contract if not priced at the standalone selling price.

c) Revenue from trading of power

i) Accounting for revenue from trading of power involves assessment of the contract conditions to determine whether the Company is required to act in the capacity of a principal or as an agent. The Company acts in the nature of a principal in case it obtains control of the electricity before transferring it to the customer. Indicators of control includes assessment of whether the company is primarily responsible for fulfilling the promise to provide the electricity, it has the discretion to establish the price or whether it bears the inventory risk. Where the Company does not obtain control of the electricity before transferring it to the customer and its performance obligation is to arrange for the supply of electricity by another party, it acts in the nature of an agent.

ii) Where the Company acts as a principal in a contract for trading of power, the amount of the transaction price allocated to the performance obligation that is satisfied is recognised as revenue.

iii) Where the Company acts as an agent in a contract for trading of power, the net consideration retained after paying the supplier for the electricity provided to the customer is recognised as revenue from operations. Financial assets and liabilities arising out of these transactions are not set off.

d) Other income

i) Dividend income is recognized when the right to receive the same is established.

ii) For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

iii) Interest/Surcharge recoverable from customers including those arising out of contracts for trading of power and liquidated damages /interest on advances to contractors is recognised when it is highly probable that a significant reversal in the amount of revenue recognised will not occur in the future.

e) Revenue from sale of carbon credits/ CERs/VERs

Revenue is recognized on transfer/ sale of Carbon Credits/ Certified Emission Reductions (CERs)/ Verified Carbon Units (VCUs) to the extent it is highly probable that a significant reversal in the amount of revenue recognized will not occur in the future.

16.0 Employee Benefits

i) Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed or included in the carrying amount of an asset if another standard permits such inclusion as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term performance related cash bonus if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

NHPC LIMITED
एनएचपीसी
FARIDABAD

ii) Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into separate trusts and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution plans are recognised as an employee benefit expense in the Statement of Profit and Loss or included in the carrying amount of an asset if another standard permits such inclusion in the periods during which services are rendered by employees. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction from future payments is available. Contributions to a defined contribution plan that is due more than 12 months after the end of the period in which the employees render the service are discounted to their present value.

Employees Defined Contribution Superannuation Scheme (EDCSS) for providing pension benefits and Social Security Scheme administered through separate trusts are accounted for as defined contribution plans.

iii) Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's Gratuity Scheme, Retired Employees Health Scheme (REHS), Provident Fund Scheme, Allowance on Retirement/Death, Memento on Superannuation to employees and Employees Family Economic Rehabilitation Scheme are in the nature of defined benefit plans. All these plans, other than Allowance on Retirement/Death, Memento on Superannuation to employees and Employees Family Economic Rehabilitation Scheme are administered through separate trusts.

The liability or asset recognised in the Balance Sheet in respect of Gratuity and Retired Employees Health Scheme is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets.

In respect of Provident Fund Scheme, a liability is recognised in the Balance Sheet where the present value of the defined benefit obligation at the end of the reporting period is higher than the fair value of plan assets. Any surplus of fair value of plan assets over the present value of the defined benefit obligation at the end of the reporting period is not recognised as an asset since the Company does not have any right to the benefits either in the form of refunds from the Plan or by way of lower contribution to the Plan.

The defined benefit obligation is calculated annually by the actuary using the Projected Unit Credit Method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss or included in the carrying amount of an asset if another standard permits such inclusion.

Remeasurement gains (except in the case of Provident Fund Scheme) and losses arising from experience adjustments and changes in actuarial assumptions are recognised directly in Other Comprehensive Income in the period in which they occur and are included in retained earnings in the Statement of Changes in Equity.

iv) Other long-term employee benefits

Benefits under the Company's leave encashment scheme constitute other long term employee benefits.

NHPC LIMITED
FARIDABAD

The Company's net obligation in respect of long-term employee benefits is the amount of future benefits that employees have earned in return for their service in the current and prior periods. The benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The discount rate is based on the prevailing market yields of Indian government securities as at the reporting date that have maturity dates approximating the terms of the Company's obligations. The calculation is performed using the Projected Unit Credit Method. Contributions to the scheme and actuarial gains or losses are recognised in the Statement of Profit and Loss or included in the carrying amount of an asset if another standard permits such inclusion in the period in which they arise.

v) Termination benefits

The expenses incurred on terminal benefits in the form of ex-gratia payments and notice pay on voluntary retirement schemes are charged to the Statement of Profit and Loss in the year of incurrence of such expenses.

17.0 Borrowing costs

Borrowing costs consist of (a) interest expense calculated using the effective interest method as described in Ind AS 109 – 'Financial Instruments' (b) finance charges in respect of finance leases recognized in accordance with Ind AS 116– 'Leases' and(c) exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs.

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets are capitalised as part of the cost of such asset until such time the assets are substantially ready for their intended use. Qualifying assets are assets which necessarily take substantial period of time to get ready for their intended use or sale. All other borrowing costs are expensed in the period in which they occur.

When the Company borrows funds specifically for the purpose of obtaining a qualifying asset, the borrowing costs incurred are capitalised. When the Company borrows funds generally and uses them for the purpose of obtaining a qualifying asset, the capitalisation of the borrowing costs is computed based on the weighted average cost of all borrowings that are outstanding during the period and used for the acquisition, construction/exploration or erection of the qualifying asset. However, borrowing costs applicable to borrowings made specifically for the purpose of obtaining a qualifying asset are excluded from this calculation, until substantially all the activities necessary to prepare that asset for its intended use or sale are complete.

Income earned on temporary investment of the borrowings pending their expenditure on the qualifying assets is deducted from the borrowing costs eligible for capitalisation.

Capitalisation of borrowing cost ceases when substantially all the activities necessary to prepare the qualifying assets for their intended use are complete.

Other borrowing costs are recognized as an expense in the year in which they are incurred.

18.0 Depreciation and amortization

a) Depreciation on additions to /deductions from Property, Plant & Equipment (PPE) during the year is charged on pro-rata basis from / up to the date on which the asset is available for use / disposal.

b) (i) Depreciation on Property, Plant and Equipment of Operating Units of the Company capitalized till five years before the end of the useful life of the Power Station is charged to the Statement of Profit & Loss on straight-line method following the rates and methodology notified by CERC for the fixation of tariff except for assets specified in Policy No. 18.0(d).

NHPC LIMITED FARIDABAD

(ii) Depreciation on Property, Plant and Equipment capitalized during the last five years of the useful life of a Power Station is charged on straight-line method for the period of extended life as per CERC Tariff Regulations/Orders, from the date on which such asset becomes available for use.

(iii) Where the life and / or efficiency of a Power Station is increased due to renovation and modernization, the expenditure thereon along with its unamortized depreciable amount is charged prospectively on straight-line method over the revised / remaining useful life.

c) i) Depreciation on Property, Plant and Equipment (except old and used) of other than Operating Units of the Company is charged to the extent of 90% of the cost of the asset following the rates notified by CERC for the fixation of tariff except for assets specified in Policy No. 18.0(d).

ii) Depreciation on old and used items of PPE of other than Operating Units is charged on straight-line method to the extent of 90% of the cost of the asset over estimated useful life determined on the basis of technical assessment.

d) i) Depreciation in respect of following items of PPE is provided on straight line method based on the useful life and residual value (5%) given in the Schedule II of the Companies Act, 2013:

- Construction Plant and Machinery

- Computer and Peripherals

ii) Based on technical assessment, depreciation on Mobile Phones is provided on straight line basis over a period of three years with residual value of Re 1.

iii) Based on technical assessment, depreciation on Roof Top Solar Power System / Equipment is provided on straight line basis over a period of twenty five years with residual value of 10%.

(iv) Based on technical assessment, depreciation on furniture & other equipment provided at residential office of employees is charged on straight line basis over a period of five years with residual value of 10%.

e) Temporary erections are depreciated fully (100%) in the year of acquisition /capitalization by retaining Re. 1/- as WDV.

f) All assets valuing Rs. 5000/- or less but more than Rs. 750/- are fully depreciated/amortised during the year in which the asset becomes available for use with WDV of Re. 1/- for tangible assets ~~as WDV~~ and NIL for Intangible Assets.

g) Low value items, which are in the nature of assets (excluding immovable assets) and valuing up to Rs. 750/- are not capitalized and charged off to expenditure in the year of use.

h) Leasehold Land of operating units is amortized over the period of lease or over the life of the Power Plant (40 years in case of Hydro Projects and 25 years in case of Solar & Wind Projects) whichever is lower, following the rates and methodology notified vide CERC tariff regulations.

i) Leasehold Land and buildings of units other than operating units, is amortized over the period of lease or over the life of the Power Plant (40 years in case of Hydro Projects and 25 years in case of Solar & Wind Projects), whichever is lower.

j) PPE created on leasehold land are depreciated to the extent of 90% of original cost over the balance available lease period of respective land from the date such asset is available for use or at the applicable depreciation rates & methodology notified by CERC tariff regulations for such assets, whichever is higher.

NHPC LIMITED
एनएचपीसी
N·H·P·C
FARIDABAD

k) Land-Right of Use is amortized over a period of 30 years from the date of commercial operation of the project in line with CERC tariff regulations notified for tariff fixation.

l) Cost of software recognized as 'Intangible Assets' is amortized on straight line method over a period of legal right to use or three financial years, whichever is earlier, starting from the year in which it is acquired. Other intangible assets are amortized on straight line method over the period of legal right to use or life of the related plant, whichever is less. The period and method of amortization of intangible assets with finite useful life is reviewed at each financial year end and adjusted prospectively, wherever required.

m) Where the cost of depreciable assets has undergone a change during the year due to increase/decrease in long term liabilities on account of exchange fluctuation, price adjustment, settlement of arbitration/court cases, change in duties or similar factors, the unamortized balance of such assets is depreciated prospectively over the residual life of such assets at the rate of depreciation and methodology notified by CERC tariff regulations.

n) Spare parts procured along with the Plant and Machinery or subsequently which are capitalized and added in the carrying amount of such item are depreciated over the residual useful life of the related plant and machinery at the rates and methodology notified by CERC.

o) Useful life, method of depreciation and residual value of assets where depreciation is charged as per management assessment are reviewed at the end of each financial year and adjusted prospectively over the balance useful life of the asset, wherever required.

19.0 Impairment of non-financial assets other than inventories

a) The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets of the Company. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. The resulting impairment loss is recognised in the Statement of Profit and Loss.

b) In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators. Fair value less costs of disposal is determined only in case carrying amount of an asset or cash-generating unit (CGU) exceeds the value in use.

c) In case of expenditure on survey & investigation of projects, if it is decided to abandon such a project, expenditure incurred thereon is charged to the Statement of Profit and Loss in the year in which such decision is taken.

d) In case a project under survey and Investigation remains in abeyance by the order of appropriate authority/ by injunction of court order, any expenditure incurred on such projects from the date of order/ injunction of court is provided in the books from the date of such order till the period project is kept in abeyance by such order/ injunction. Provision so made is however reversed on the revocation of aforesaid order/ injunction.

NHPC LIMITED
FARIDABAD

e) Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

20.0 Income Taxes

Income tax expense comprises current and deferred tax. Tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised directly in equity or other comprehensive income, in which case the tax is also recognised directly in equity or in other comprehensive income.

a) Current tax

Current tax is the expected tax payable on the taxable income for the year on the basis of the tax laws applicable at the reporting date and any adjustments to tax payable in previous years. Taxable profit differs from profit as reported in the Statement of Profit and Loss because it excludes items of income or expense that are taxable or deductible in other years (temporary differences) and it further excludes items that are never taxable or deductible (permanent differences).

b) Deferred tax

i) Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Company's financial statements and the corresponding tax bases used in the computation of taxable profit and are accounted for using the Balance Sheet method. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are generally recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that future taxable profits will be available against which those deductible temporary differences, unused tax losses and unused tax credits can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of an asset or liability in a transaction that at the time of the transaction affects neither the taxable profit or loss nor the accounting profit or loss.

ii) The carrying amount of deferred tax assets is reviewed at each Balance Sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available against which the temporary differences can be utilised.

iii) Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the Balance Sheet date. The measurement of deferred tax liabilities and assets reflects the tax consequences that would flow in the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

iv) Deferred tax is recognised in the Statement of Profit and Loss except to the extent that it relates to items recognised directly in other comprehensive income or equity, in which case it is recognised in Other Comprehensive Income or Equity.

v) Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities, and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

NHPC LIMITED
एन एच पी सी
NHPC
FARIDABAD

vi) Deferred tax recovery adjustment account is credited/ debited to the extent the deferred tax for the current period forms part of current tax in the subsequent periods and affects the computation of return on equity (ROE), a component of tariff.

vii) When there is uncertainty regarding income tax treatments, the Company assesses whether a tax authority is likely to accept an uncertain tax treatment. If it concludes that the tax authority is unlikely to accept an uncertain tax treatment, the effect of the uncertainty on taxable income, tax bases and unused tax losses and unused tax credits is recognised. The effect of the uncertainty is recognised using the method that, in each case, best reflects the outcome of the uncertainty: the most likely outcome or the expected value. For each case, the Company evaluates whether to consider each uncertain tax treatment separately, or in conjunction with another or several other uncertain tax treatments, based on the approach that best prefixes the resolution of uncertainty.

21.0 Compensation from third parties

Impairments or losses of items, related claims for payments of compensation from third parties including insurance companies and any subsequent purchase or construction of assets/inventory are separate economic events and are accounted for separately.

Compensation from third parties including from insurance companies for items of property, plant and equipment or for other items that were impaired, lost or given up is included in the Statement of Profit and Loss when the compensation becomes receivable. Insurance claims for loss of profit are accounted for based on certainty of realisation.

22.0 Segment Reporting

a) In accordance with Ind AS 108 – Operating Segment, the operating segments used to present segment information are identified on the basis of internal reports used by the Company's Management to allocate resources to the segments and assess their performance. The Board of Directors is collectively the Company's "Chief Operating Decision Maker" or "CODM" within the meaning of Ind AS 108.

b) Electricity generation is the principal business activity of the Company. Other operations viz., Contracts, Project Management, Consultancy works and Trading of Power do not form a reportable segment as per the Ind AS -108.

23.0 Leases

The Company assesses whether a contract is or contains a lease at the inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether the contract involves the use of an identified asset, whether the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of lease and whether the Company has the right to direct the use of the asset. If the supplier has a substantive substitution right, then the asset is not identified. Where the decision about how and for what purpose the asset is used is predetermined, the Company has the right to direct the use of the asset if it has the right to operate the asset, or the Company designed the asset in a way that predetermines how and for what purpose it will be used.

At inception or on reassessment of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for the leases of land and buildings in which it is a lessee, the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

NHPC LIMITED एनएचपीसी NHPC FARIDABAD

13

i. Company as a lessee

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

Land taken for use from State Government (without transfer of title) and expenses on relief and rehabilitation as also on creation of alternate facilities for land evacuees or in lieu of existing facilities coming under submergence and where construction of such alternate facilities is a specific pre-condition for the acquisition of the land for the purpose of the project, are accounted for as Right of Use Assets.

Right-of-use assets are depreciated/amortized from the commencement date to the end of the useful life of the underlying asset, if the lease transfers ownership of the underlying asset by the end of lease term or if the cost of right-of-use assets reflects that the purchase option will be exercised. Otherwise, Right-of-use assets are depreciated/ amortized from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment.

Right-of-use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less costs of disposal and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

The lease liability is initially measured at the present value of the future lease payments, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the incremental borrowing rate. Future lease payments comprise of the fixed payments, including in-substance fixed payments, variable lease payments that depend on an index or a rate, amounts expected to be payable under a residual value guarantee and the exercise price under a purchase option that the Company is reasonably certain to exercise or the penalty for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or when a lease contract is modified, and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in the Statement of Profit and Loss if the carrying amount of the right-of-use asset has been reduced to zero.

Right-of-use assets are presented as a separate line item on the face of the Balance Sheet.

The Company has elected not to recognise right-of-use assets and lease liabilities in respect of short-term leases that have a lease term of 12 months or less and leases where the underlying asset is of low-value. The lease payments associated with these leases are recognized as an expense on a straight-line basis over the lease term.

NHPC LIMITED
एनएचपीसी
NHPC
FARIDABAD

ii. Company as a lessor

When the Company acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset.

Where the Company determines a long term Power Purchase Agreement (PPA) to be or to contain a lease and where the off taker has the principal risk and rewards of ownership of the power plant through its contractual arrangements with the Company, the arrangement is considered a finance lease. For embedded leases in the nature of a Finance Lease, the investment in the power station is recognised as a Lease Receivable. The minimum lease receipts are identified by segregating the embedded lease receipts from the contract amounts (including Advance Against Depreciation (AAD) recognised in accordance with CERC Tariff regulations 2004-09 up to 31st March 2009 and considered as deferred income). Each lease receipt is allocated between the receivable and finance lease income (forming part of revenue from operations) so as to achieve a constant rate of return on the Lease Receivable outstanding.

Subsequent to initial recognition, the Company regularly reviews the estimated unguaranteed residual value and applies the impairment requirements of Ind AS 109- Financial Instruments for recognising an allowance for expected credit losses on the lease receivables.

Finance lease income is calculated with reference to the gross carrying amount of the lease receivables, except for credit-impaired financial assets for which interest income is calculated with reference to their amortised cost (i.e. after a deduction of the loss allowance).

If an arrangement contains lease and non-lease components, the Company applies Ind AS 115- *Revenue from Contracts with Customers* to allocate the consideration in the contract.

In the case of Operating Leases or embedded operating leases, the lease income from the operating lease is recognised in revenue over the lease term to reflect the pattern of use benefit derived from the leased asset. The respective leased assets are included in the Balance Sheet based on their nature and depreciated over its economic life.

24.0 Business combinations

(i) Business combinations are accounted for using the acquisition accounting method as at the date of the acquisition, which is the date at which control is transferred to the Company. The consideration transferred in the acquisition and the identifiable assets acquired and liabilities assumed are recognized at fair values on their acquisition date. Goodwill is initially measured at cost, being the excess of the consideration transferred over the net identifiable assets acquired and liabilities assumed. Where the fair value of net identifiable assets acquired and liabilities assumed exceed the consideration transferred, after reassessing the fair values of the net assets and contingent liabilities, the excess is recognized as capital reserve. Acquisition related costs are expensed as incurred.

(ii) Business combinations involving entities that are controlled by the Company are accounted for using the pooling of interests method wherein the assets and liabilities of the combining entities are reflected at their carrying amounts and no adjustments are made to reflect fair values, or recognise any new assets or liabilities. The only adjustments that are made are to harmonise accounting policies.

The financial information in the financial statements in respect of prior periods is restated as if the business combination had occurred from the beginning of the preceding period in the financial statements, irrespective of the actual date of the combination. However, where the business combination had occurred after that date, the prior period information is restated only from that date.

NHPC LIMITED FARIDABAD

The balance of the retained earnings appearing in the financial statements of the transferor is aggregated with the corresponding balance appearing in the financial statements of the transferee. The identity of the reserves is preserved and the reserves of the transferor become the reserves of the transferee. The difference, if any, between the amounts recorded as share capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital of the transferor is transferred to capital reserve and is presented separately from other capital reserves.

25.0 Material prior period errors

Material prior period errors are corrected retrospectively by restating the comparative amounts for the prior periods presented in which the error occurred. If the error occurred before the earliest period presented, the opening balances of assets, liabilities and equity for the earliest period presented, are restated unless it is impracticable, in which case, the comparative information is adjusted to apply the new accounting policy prospectively from the earliest date practicable.

26.0 Earnings per share

a) Basic earnings per equity share is computed by dividing the net profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the financial year.

b) Diluted earnings per equity share is computed by dividing the net profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

c) Basic and diluted earnings per equity share are also presented using the earnings amounts excluding the movements in regulatory deferral account balances.

27.0 Statement of Cash Flows

a) **Cash and Cash Equivalents:**

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. However, for Balance Sheet presentation, Bank overdrafts are shown within "Borrowings" under Current Liabilities.

b) Statement of cash flows is prepared in accordance with the indirect method prescribed in Ind AS 7- 'Statement of Cash Flows'.

28.0 Current versus non-current classification

The Company presents assets and liabilities in the Balance Sheet based on current/non-current classification.

a) An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

b) A liability is current when:

- It is expected to be settled in the normal operating cycle

NHPC LIMITED FARIDABAD

- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

c) Deferred tax assets /liabilities are classified as non-current assets / liabilities.

29.0 Non -Current Assets Classified as Held for Sale

The Company classifies non-current assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale rather than through continuing use and a sale is considered highly probable. Indicators in this regard include whether management is committed to the sale, whether such sale is expected to be completed within one year from the date of classification as held for sale and whether the actions required to complete the plan of sale indicates that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn. Non-Current Assets held for sale and disposal groups are measured at the lower of their carrying amount and their fair value. Cost of disposal is deducted from the recognized value, if significant. Property, plant and equipment and intangible assets once classified as held for sale are not depreciated or amortized.

30.0 Miscellaneous

a) Each material class of similar items is presented separately in the financial statements. Items of a dissimilar nature or function are presented separately unless they are immaterial.

b) Liabilities for Goods in transit/Capital works executed but not certified are not provided for, pending transfer of ownership, inspection and acceptance by the Company.

2.4.1 Amounts recognised in the Statement of Profit and Loss for investment property

(Amount in ₹)

	For the Year ended 31st March, 2024	For the Year ended 31st March, 2023
Rental income	-	-
Direct operating expenses from property that generated rental income	-	-
Direct operating expenses from property that did not generate rental income	-	-
	As at 31.03.2024	As at 31.03.2023

2.4.2 Fair Value of investment property

2.4.3 Investment property comprise of freehold land which was bought for normal business requirements of the Company. However, due to change in business plans, the Company is in the process of finalising the future use of the property. IND AS 40, Investment Property, provides by way of example that land held for a currently undetermined future use is to be regarded as held for capital appreciation and hence to be classified as Investment Property. Accordingly such land has been classified as Investment Property.

2.4.4 Valuation process

The above land is carried in the financial statements at cost. However, the fair value of investment property has been arrived on the basis of market value as per valuation report and considered to be level-II of fair valuation hierarchy

7.2.6 Due to the short-term nature of the current receivables, their carrying amount is assumed to be the same as their fair value

7.2.7 Trade Receivables amounting to ₹ (Previous Year ₹) liquidated by way of discounting of bills from various banks have not been derecognised in view of terms of the bill discounting agreement as per which the Company guarantees to compensate the banks for credit losses that may occur in case of default by the respective beneficiaries. Refer Note 20.1.2 with regard to liability recognised in respect of discounted bills **(For Corporate Office only)**

7.2.8 Central Electricity Regulatory Commission(CERC) in its order dated 05.02.2020 in petition no. 281/GT/2018 allowed NAPAF of 90% for the period 2010-14 against 80% as allowed in its earlier order dated 06.09.2010 in petition No. 57/2010 with the stipulation that recovery of Incentive shall be allowed beyond 90% instead of beyond 80%. Since the said stipulation is ultra vires to the Tariff Regulations 2009-14, appeal has been filed with the Hon'ble Appellate Tribunal for Electricity (APTEL) against the review order dated 05.02.2020. Pending decision of APTEL, unbilled revenue booked in FY 2021-2022 against the incentive in respect of NAPAF beyond 80% and upto 90%, has not been reversed

7.2.9 Refer Note 34(13) of the Financial Statements with regard to confirmation of balances

18.3 Pursuant to the provisions of Section 115BAA of the Income Tax Act 1961 announced by Tax Laws (amended) Ordinance 2019 and promulgated as Taxation Laws (amendment) Act 2019 enacted on 11th December 2019 applicable with effect from 1st April 2019, Domestic Companies have options to pay Income Tax at concessional rates by foregoing certain exemptions/ deductions (the new tax regime) as specified in the said section. The Company has Minimum Alternate Tax (MAT) credit of ₹ (including unrecognised amount of MAT Credit of ₹) lying unutilized as on 31st March 2024 [Previous year ₹ (including unrecognised amount of MAT Credit of ₹)] and is availing tax deductions in respect of its profit from generation of power from certain power stations. In view of the same, it has been decided to continue with existing tax structure for Current and Deferred Tax recognition. Necessary decision for exercising the option under section 115BAA will be taken once tax deductions are not available and MAT credit is substantially exhausted **(Refer Note 30.1.5)-Applicable for CO Only**.

18.4 Refer Note 14(2) and 34(22) of Financial Statements for RDA (Credit) balances created against MAT Credit recognised

Net Trading margin	-	-

24.1.5 Power Purchase Agreement (PPA) in respect of 50 MW Wind Power Project, Jaisalmer with Jodhpur Vidyut Vitran Nigam Limited (JdVVNL) is pending for renewal/ extension w.e.f. 01.04.2019. However, power is being supplied to the beneficiary being a must run power plant. The matter regarding renewal/ extension of PPA is sub-judice in Hon'ble High Court of Rajasthan, Jaipur since tariff of Rs. 2.44 per KwH offered by the Rajasthan Renewable Energy Corporation Limited was not acceptable to the Company. Pending decision of the Hon'ble High Court, net revenue from sale of power from the plant w.e.f. 01.04.2019 is being recognized at the pooled cost of power determined by the Rajasthan Electricity Regulatory Commission (RERC) which is Rs. 3.14 per kWh.

NHPC LIMITED FARIDABAD

B) FAIR VALUATION MEASUREMENT

(i) Fair Value Hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair value are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the company has classified its financial instruments into the following three levels prescribed under Ind AS-113 "Fair Value Measurements"

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments and traded bonds that have quoted price. The fair value of all equity instruments including bonds which are traded in the recognised Stock Exchange and money markets are valued using the closing prices as at the reporting date.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.The fair value of financial assets and liabilities included in level 3 is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes of similar instruments. This includes derivative security deposits/ retention money and loans at lower than market rates of interest.

(a) Financial Assets/Liabilities Measured at Fair Value-Recurring Fair Value Measurement:

Total Financial Liabilities		**36,13,832**	**37,91,810**	**18,97,055**	**19,18,775**

Note:-

1. The Carrying amounts of current investments, Trade and other receivables (Current), Cash and cash equivalents, Short-term loans and advances, Short Term Borrowings, Trade payables and other current financial liabilities are considered to be the same as their fair values due to their short term nature.

-For financial assets and financial liabilities measured at fair value, the carrying amounts are equal to the fair value

(d) Valuation techniques and process used to determine fair values

(1) The Company values financial assets or financial liabilities using the best and most relevant data available. Specific valuation techniques used to determine fair value of financial instruments includes:

- Use of Quoted market price or dealer quotes for similar instruments.
- Fair value of remaining financial instruments is determined using discounted cash flow analysis.

(2) The discount rate used to fair value financial instruments classified at Level -3 is based on the Weighted Average Rate of company's outstanding borrowings except subordinate debts and foreign currency borrowings.

(3) Financial liabilities that are subsequently measured at amortised cost are recognised initially at fair value minus transaction costs using the effective interest method where such transaction costs incurred on long term borrowings are material

NHPC LIMITED FARIDABAD

(2)Financial Risk Management

(A) Financial risk factors

The Company's activities expose it to a variety of financial risks.These are summarized as below:-

Risk	Exposure arising from	Measurement	Management
Credit risk	Cash & Cash equivalents, Other Bank Balances ,Trade receivables and financial assets measured at amortised cost, Lease Receivable.	Ageing analysis, credit rating.	Diversification of bank deposits, letter of credit for selected customers.
Liquidity Risk	Borrowings and other facilities.	Rolling cash flow forecasts & Budgets	Availability of committed credit lines and borrowing facilities.
Market Risk- Interest rate	Long term borrowings at variable rates	Sensitivity Analysis	1. Diversification of fixed rate and floating rates 2. Refinancing 3. Actual Interest is recovered through tariff as per CERC Regulation
Market Risk- security prices	Investment in equity and debt securities	Sensitivity Analysis	Portfolio diversification
Market Risk- foreign exchange	Recognised financial liabilities not denominated in INR.	Sensitivity Analysis	Foreign exchange rate variation is recovered through tariff as per CERC Regulation. Call spread option and coupon only swap

Risk management framework

The Company's activities make it susceptible to various risks. The Company has taken adequate measures to address such concerns by developing adequate systems and practices. Company has a well-defined risk management policy to provide overall framework for risk management in the Company. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

The Company is exposed to the following risks from its use of financial instruments:

i) Credit risk

Credit risk is the risk that a counter party will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The company is exposed to credit risk from its operating activities (primarily trade receivables/leased assets) and from its financing activities including deposits with banks and financial institutions.

ii) Liquidity risk.

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses.

iii) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise of three types of risk: currency rate risk, interest rate risk and other price risks, such as equity and debt price risk. Financial instruments affected by market risk include loans and borrowings, deposits and investments. Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The company operates in a regulated environment. Tariff of the company is fixed by the Central Electricity Regulatory Commission (CERC) through Annual Fixed Charges (AFC) comprising of the following five components:
1. Return on Equity (RoE), 2. Depreciation, 3. Interest on Loans, 4. Operation & Maintenance Expenses and 5. Interest on Working Capital Loans. In addition to the above, Foreign Exchange rate variations and Taxes are also recoverable from Beneficiaries in terms of the Tariff Regulations. Hence variation in interest rate, currency exchange rate variations and other price risk variations are recoverable from tariff and do not impact the profitability of the company. Further, the company also hedges its medium term foreign currency borrowings by way of interest rate hedge and currency swaps.

(B) Credit Risk

The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and other financial instruments.

Trade Receivables, unbilled revenue and lease receivables :-

The Company extends credit to customers in normal course of business. The Company monitors the payment track record of the customers. Outstanding receivables are regularly monitored. In the case of the Company, the concentration of risk with respect to trade receivables is low, as its customers are mainly state government companies/DISCOMS and operate in largely independent markets. Unbilled revenue primarily relates to the Company's right to consideration for work completed but not billed at the reporting date and have substantially the same risk characteristics as trade receivables for the same type of contracts.

Lease receivables of the company are with regard to Power Purchase Agreements classified as finance lease as per Ind AS 116- 'Leases' as referred to in Note No. 34. The power purchase agreements are for sale of power to single beneficiary and recoverability of interest income and principal on leased assets i.e. PPE of the power stations are assessed on the same basis as applied for trade receivables.

Financial assets at amortised cost :-

Employee Loans: The Company has given loans to employees at concessional rates as per the Company's policy which have been measured at amortised cost at Balance Sheet date. The recovery of the loan is on fixed instalment basis from the monthly salary of the employees. Long term loans for acquisition of assets are secured by way of mortgage/hypothecation of the assets for which such loans are given. Management has assessed the past data and does not envisage any probability of default on these loans.

Loans to Government of Arunanchal Pradesh : The Company has given loan to Government of Arunachal Pradesh at 9% rate of interest (compounded annually) as per the terms and conditions of Memorandum of understanding signed between the Company and Government of Arunachal Pradesh for construction of hydroelectric projects in the state. The loan has been measured at amortised cost and is recoverable from the share of free power of the state government from the first hydroelectric project to be commissioned in the state. Management does not envisage any probability of default on the loan.

Financial instruments and cash deposits :-

The Company considers factors such as track record, size of the bank, market reputation and service standards to select banks with which balances and deposits are maintained. Generally, the balances are maintained with banks with which the Company has also availed borrowings. The Company invests surplus cash in short term deposits with scheduled banks. The company has balances and deposits with banks which are well diversified across private and public sector banks with limited exposure to any single bank.

Corporate Guarantee issued by the Company: -

The Company has issued following Irrevocable and unconditional Corporate Guarantees to Subsidiary Companies of NHPC Limited for a Guarantee Fee of 1.20% plus applicable GST. Exposure of the Company from the Guarantee shall be the principal outstanding under the said credit facility including any interest, commission, charges etc. payable to the Bank by subsidiaries.

(a) The Company has issued Corporate Guarantee in favour of HDFC Bank Limited for Term Loan Facility for Bundelkhand Saur Urja Ltd (BSUL) amounting to Rs. 213.25 Crores . The outstanding balance of said term loan is Rs. ..... Crore including interest as on 31.03.2024

(b) The Company has issued Corporate Guarantee in favour of J&K Bank Limited and Bank of Baroda Limited for Term Loan Facility for Lanco Teesta Hydro Power Limited (LTHPL) amounting to Rs. 200 Crore and Rs. 350 Crore respectively. The outstanding balance of said term loan is Rs. ..... Crore and Rs. .....Crore respectively (Including interest) as on 31.03.2024

(c) The Company has issued Corporate Guarantee in favour of J&K Bank Limited for Term Loan Facility for Jal Power Corporation Limited amounting to Rs. 313.00 Crores. The outstanding balance of said term loan is Rs. ..... Including interest as on 31.03.2024

However, on the reporting date management does not envisage any probability of the default by the Subsidiary Company.

(i) Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date is as under:

(Amount in ')

Particulars	As at 31st March, 2024	As at 31st March, 2023

(ii) Provision for expected credit losses :-

(a) Financial assets for which loss allowance is measured using 12 month expected credit losses

The Company assesses outstanding receivables on an ongoing basis considering changes in payment behaviour and provides for expected credit loss on case-to-case basis.

(b) Financial assets for which loss allowance is measured using life time expected credit losses

A default in recovery of financial assets occurs when in there is no significant possibility of recovery of receivables after considering all available options for recovery as per assessment of the management. As the power stations and beneficiaries of the company are spread over various states of India, geographically there is no concentration of credit risk.

The Company primarily sells electricity to bulk customers comprising mainly of state utilities owned by State Governments. The Company has a robust payment security mechanism in the form of Letters of Credit (LC) backed by the Tri-Partite Agreements (TPA) signed among the Govt. of India, RBI and the individual State Governments subsequent to the issuance of the One Time Settlement Scheme of SEBs dues during 2001-02 by the GOI, which was valid till October 2016. Government of India has approved the extension of these TPAs for another period of 10 years and the same has been signed by most of the States. As per the provisions of the TPA and Power Purchase Agreements (PPA), the customers are required to open LCs covering 105% of the average monthly billing of the Company for last 12 months. The TPA also provides that if there is any default in payment of current dues by any State Utility, the outstanding dues can be deducted from the Central Plan Assistance of the State and paid to the concerned CPSU. Also, Electricity (Late Payment Surcharge & Related Matters) Rules, 2022 provides for regulation of power by the Company in a gradual manner in case of non-payment of dues beyond 30 days of the due date, i.e. when payment is not made by any beneficiary even after 75 days (being due period of 45 days plus 30 days) from the date of presentation of the bill.

CERC Tariff Regulations 2019-24 allow the Company to raise bills on beneficiaries for late-payment surcharge, which adequately compensates the Company for time value of money due to delay in payment. Further, the fact that beneficiaries are primarily State Governments/ State Discoms and considering the historical credit loss experience for trade receivables, the Company does not envisage either impairment in the value of receivables from beneficiaries or loss due to time value of money due to delay in realization of trade receivables. However, the Company assesses outstanding trade receivables on an ongoing basis considering changes in operating results and payment behaviour and provides for expected credit loss on case-to-case basis. As at the reporting date company does not envisage any default risk on account of non-realization of trade receivables.

(iii) Reconciliation of impairment loss provisions

The movement in the allowance for impairment in respect of financial assets during the year was as follows:

(Amount in ₹)

	Trade Receivables	Investments	Claim Recoverable	Loans	Total
Balance as at 1.4.2022	-	-	5,85,33,964	-	5,85,33,964
Changes in Loss Allowances	-	-	-	-	-
Balance as at 1.4.2023	-	-	5,85,33,964	-	5,85,33,964
Changes in Loss Allowances	-	-	-	-	-
Balance as at 31.03.2024	-	-	5,85,33,964	-	5,85,33,964

Based on historical default rates, the company believes that no impairment allowance is necessary in respect of any other financial assets as the amounts of such allowances are not significant.

NHPC LIMITED FARIDABAD

(C) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due.

i) The Company's objective is to maintain optimum levels of liquidity at all times to meet its cash and collateral requirements. The Company relies on a mix of borrowings and excess operating cash flows to meet its need for funds. The current committed lines of credit and internal accruals are sufficient to meet its short to medium term expansion needs. The Company monitors rolling forecasts of its liquidity requirements to ensure that it has sufficient cash to meet capital expenditure and operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the borrowing limits or covenants (where applicable) are not breached on any of its borrowing facilities.

The company had access to the following undrawn borrowing facilities at the end of the reporting year:

(Amount in `)

Particulars	As at 31st March, 2024	As at 31st March, 2023
At Floating Rate		
Fixed rate		
Total	-	-

ii) Maturities of Financial Liabilities:

The amounts disclosed in the table below are the contractual undiscounted cash flows. Balances due within 1 year is equal to their carrying balances as the impact of discounting is not significant.

As at 31st March, 2024

(Amount in `)

Contractual maturities of financial liabilities	Note No.	Outstanding Debt as on 31.03.2024	Within 1 Year	More than 1 Year & Less than 3 Years	More than 3 Year & Less than 5 Years	More than 5 Year

NHPC LIMITED FARIDABAD

(D) Market Risk:

The sensitivity analysis excludes the impact of movements in market variables on the carrying value of post-employment benefit obligation provisions and on the non-financial assets and liabilities. The sensitivity of the relevant item of the Statement of Profit and Loss is the effect of the assumed changes in the respective market risks. The Company's activities expose it to a variety of financial risks, including the effects of changes in interest rates.

(i) Interest rate risk and sensitivity

The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long term debt obligations with floating interest rates. Company's policy is to maintain most of its borrowings at fixed rate. Company's fixed rate borrowings are carried at amortised cost and are not subject to interest rate risk. Further the company refinances these debts as and when favourable terms are available. The company is also compensated for variability in floating rate through recovery by way of tariff adjustments under CERC tariff regulations.

The exposure of the company's borrowing to interest rate changes at the end of the reporting year are as follows:

(Amount in `)

Particulars	As at 31st March, 2024	As at 31st March, 2024	As at 31st March, 2023	As at 31st March, 2023
	weighted average interest rate (%)		weighted average interest rate (%)	
Floating Rate Borrowings (INR)				
Floating Rate Borrowings (FC)				
Fixed Rate Borrowings (INR)				
Fixed Rate Borrowings (FC)				
Total		-		-

Interest Rate Sensitivity Analysis

Profit or loss is sensitive to higher/lower interest expense from borrowings as a result of change in interest rates. The majority of the borrowings of the company are at fixed interest rate. In case of floating rate borrowings there is no impact on Statement of Profit and Loss of the company due to increase/decrease in interest rates, as the same is recoverable from beneficiaries through tariff.

(ii) Interest Rate Benchmark reform rate:

During the Financial Year 2021-22, the Company has transitioned the outstanding Foreign Currency (JPY) Loan amounting to Rs. 688.75 Crore repayable in one instalment bullet on 25.07.2024 from floating rate of 6 month (LIBOR+ 0.75 %) to Compounded Reference Rate (i.e. TONA+CAS) +0.75%.

Contractual terms of the Company's bank borrowings stands amended as a direct consequence of the change in interest rate benchmark reform and the new basis for determining the contractual cash flows is economically equivalent to the basis immediately preceding the change.

The Company has opted for the practical expedient in Ind AS 109 i.e. Changes to cash flow flows that are directly required by the reform, to be treated as changes to a floating interest rate, equivalent to a movement in a market rate of interest.

The total outstanding amount of exposure that is directly affected by the Interest rate benchmark reform (IBOR) is Rs. 688.75 Crore. Further, the total amount of exposure on account of principal and Interest is hedged by derivative instruments.

Accordingly, there is no material impact on the Statement of Profit and Loss of the Company due to interest rate benchmark reforms.

(ii) Price Risk:

(a) Exposure

The company's exposure to price risk arises from investment in equity shares and debt instruments classified in the financial statements as Fair Value Through OCI. Company's investment in equity shares are listed in recognised stock exchange and are publicly traded in the stock exchanges. Company's investment in debt instruments comprise quoted Government Securities and Public Sector Bonds and are publicly traded in the market. The investment has been classified under current / non-current investment in Balance Sheet.

At a reporting date, the exposure to equity and debt instruments are as under:-

(Amount in `)

Particulars	As at 31st March, 2024	As at 31st March, 2023
Equity Instruments	-	-
Debt Instruments	-	-

NHPC LIMITED FARIDABAD

(b) Price Risk Sensitivity

For Investment in Equity Instruments (Investment in equity shares of PTC)

The table below summarises the impact of increase/decrease in the market price of investment in equity instruments on the company's equity for the year:

(Amount in ')

Particulars	As at 31st March, 2024		As at 31st March, 2023	
Investment in Equity shares of :	% change	Impact on other components of equity	% change	Impact on other components of equity
PTC India Ltd				

Sensitivity has been worked out based on the previous 3 years average of six monthly fluctuations in the share price as quoted on the National Stock Exchange (NSE).

For Investment in Debt Instruments (Investments in Government and Public Sector Undertaking Bonds)

The table below summarises the impact of increase/decrease of the market value of the debt instruments on company's equity for the year:

(Amount in ')

Particulars	As at 31st March, 2024		As at 31st March, 2023	
	% change	Impact on other components of equity	% change	Impact on other components of equity
Government Securities				
Public Sector Undertaking Tax Free Bonds				

(iii)Foreign Currency Risk

The company is compensated for variability in foreign currency exchange rate through recovery by way of tariff adjustments under the CERC Tariff Regulations.

(a) Foreign Currency Exposure:

The company's exposure to foreign currency risk at the end of the reporting yearexpressed in INR are as follows :

(Amount in ')

Particulars	As at 31st March, 2024	As at 31st March, 2023
Financial Liabilities:		
Foreign Currency Loans		
Japan International Corporation LTD (JPY)		
MUFG BANK (JPY)		
Other Financial Liabilities	-	-
Net Exposure to foreign currency (liabilities)	0	0

Out of the above, loan from MUFG bank is hedged through call spread options and coupon only swaps. For balance exposure gain/(loss) on account of exchange variation is recoverable from beneficiaries as per Tariff Regulation 2019-24. Therefore, currency risk in respect of such exposure would not be significant.

(b) Sensitivity Analysis

There is no impact of foreign currency fluctuations on the profit of the company as these are either adjusted to the carrying cost of respective fixed asset/Capital Work-in-Progress or recovered through tariff as per CERC Tariff Regulation.Accordingly, sensivity analysis for currency risk is not disclosed.

NHPC LIMITED FARIDABAD

(3) Capital Management

(a) Capital Risk Management

The primary objective of the Company's capital management is to maximize the shareholder value. CERC Tariff Regulations prescribe Debt : Equity ratio of 70:30 for the purpose of fixation of tariff of Power Projects. Accordingly, the company manages its capital structure to maintain the normative capital structure prescribed by the CERC.

The Company monitors capital using Debt : Equity ratio, which is total debt divided by total capital. The Debt : Equity ratio are as follows:

(Amount in `)

Statement of Gearing Ratio		
Particulars	**As at 31st March, 2024**	**As at 31st March, 2023**
(a) Total Debt	-	-
(b) Total Capital	47,01,02,567	3,57,64,18,897
Gearing Ratio (a/b)	0.00	0.00

Note: For the purpose of the Company's capital management, capital includes issued capital and reserves. Total debt includes Long term debts and Lease Liabilities including current maturities thereof, Short term Borrowings and Payable towards Bonds fully serviced by Government of India.

(b) Loan Covenants:

Under the terms of the major borrowing facilities, the company is required to comply with the following financial covenants:-

1. Maintain AAA credit rating and if rating comes down, rate of interest shall be increased by 25 basis point for each notch below AAA rating .
2. Debt to net worth should not exceed 2:1
3. Interest coverage ratio should be more than 2 times and should be calculated as ((Net Profit+Non Cash Expenditures+Interest Payable-Non Cash Income)/Interest Payable))
4. The gross Debt Service Coverage Ratio of the Company will no time be less than 1.25 during the currency of loan.
5. The Government of India holding in the company not to fall below 51%.
6. First Charge on Assets with 1:1.33 coverage on pari paasu basis.

During the year, the company has complied with the above loan covenants.

NOTE NO. 34:

1 **Disclosures relating to Contingent Liabilities:**

Contingent Liabilities to the extent not provided for -

a) **Claims against the Company not acknowledged as debts in respect of:**

(i)

Capital works	(Amount in Rs.)	
Particulars	**31.03.2024**	**31.03.2023**
Claim of Contractors (Aggregated amount): Contractors have lodged claims against the Company on account of rate and quantity deviation, cost relating to extension of time, idling charges due to stoppage of work/delays in handing over the site etc. These claims are being contested by the company as being not admissible in terms of provisions of the respective contracts or are lying at arbitration tribunal/other forums/under examination with the Company	5,81,08,46,025.00	8,47,54,79,207.00
Arbitration awards including updated interest thereon, against the Company, which have been challenged/decided to be challenged in the Court of Law included in the claim:	5,70,16,06,263.00	8,37,01,96,753.00
Provisions created against above claims: Management has assessed the above claims and recognized a provision based on probability of outflow of resources embodying economic benefits.	46,02,67,362.00	46,02,67,362.00
Amount of contingent liability i.e. amounts for which Company may be held contingently liable	**5,35,05,78,663.00**	**8,01,52,11,845.00**
Decrease of contingent liability from Opening Balance of Contingent Liability		**2,83,19,21,526.00**
In respect of such estimated contingent claims either the outflow of resources embodying economic benefits is not probable or a reliable estimate of the amount required for settling the obligation cannot be made. In respect of the rest of the claims/obligations, possibility of any outflow in settlement is considered as remote.		

(ii)

Land Compensation cases	(Amount in Rs.)	
Particulars	**31.03.2024**	**31.03.2023**
Claim of erstwhile Land Holders: In respect of land acquired for the projects, some of the erstwhile land owners have filed claims for higher compensation before various authorities/courts.	114074869	403255764
Provisions created against above claims: Pending settlement, the Company has assessed and recognise a provision based on probability of outflow of resources embodying economic benefits	0	128800000
Amount of contingent liability i.e. amounts for which Company may be held contingently liable	**114074869**	**274455764**
Decrease of contingent liability from Opening Balance of Contingent Liability	**160380895**	
In respect of such estimated contingent claims either the outflow of resources embodying economic benefits is not probable. In respect of the rest of the claims/obligations, possibility of any outflow in settlement is considered as remote.		

(iii)

Disputed Tax Demands	(Amount in Rs.)	
Particulars	**31.03.2024**	**31.03.2023**
Disputed Income Tax/Sales Tax/Service Tax/ other taxes/duties matters pending before various appellate authorities:	1642796564	251528073
Provisions created against above claims: Pending settlement, the Company has assessed and recognise a provision based on probability of outflow of resources embodying economic benefits	0	0
Amount of contingent liability i.e. amounts for which Company may be held contingently liable	**1642796564**	**251528073**
Decrease of contingent liability from Opening Balance of Contingent Liability	**0**	
In respect of such estimated contingent claims either the outflow of resources embodying economic benefits is not probable. In respect of the rest of the claims/obligations, possibility of any outflow in settlement is considered as remote.		

(iv)

Others	(Amount in Rs.)	
Particulars	**31.03.2024**	**31.03.2023**
Claims on account of other miscellaneous matters pending before various forums	1748984	1200597
Provisions created against above claims: Pending settlement, the Company has assessed and recognise a provision based on probability of outflow of resources embodying economic benefits	0	0
Amount of contingent liability i.e. amounts for which Company may be held contingently liable	1748984	1200597
Decrease of contingent liability from Opening Balance of Contingent Liability	**0**	
In respect of such estimated contingent claims either the outflow of resources embodying economic benefits is not probable. In respect of the rest of the claims/obligations, possibility of any outflow in settlement is considered as remote.		

The above is summarized as below:

(Amount in Rs.)

Sl. No.	Particulars	Claims as on 31.03.2024	up to date Provision against the claims	Contingent liability as on 31.03.2024	Contingent liability as on 31.03.2023	Addition/	Decrease of contingent liability from Opening Balance as on 01.04.2023
(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)=(v)-(vi)	(viii)
1	Capital Works	5810846025	460267362	5350578663	8015211845	-2664633182	2831921526
2	Land Compen-sation cases	114074869	0	114074869	274455764	-160380895	160380895

(D) Other notes to related party transactions:

Terms and conditions of transactions with the related parties:

Transactions with the state governments and entities controlled by the Government of India are carried out at market terms on arms- length basis (except subordinate debts received from Central Government at concessional rate) through a transparent price discovery process against open tenders, except in a few cases of procurement of spares/services from Original Equipment Manufacturers (OEMs) for proprietary items on single tender basis due to urgency, compatibility or other reasons. Such single tender procurements are also done through a process of negotiation with prices benchmarked against available price data of same/similar items.

8 **Particulars of Security: The same shall be made in the Standalone accounts of the Company: (Provided at CO level)**

9 **Disclosures Under Ind AS-19 " Employee Benefits": (Provided at CO level)**

	Principal (Refer Note 20.4)	2590372	14604767
	-Interest		
(ii)	The amount of interest paid by the buyer in terms of Section 16 of the Micro, Small and Medium Enterprises Development Act, 2006, along with the amount of the payment made to the supplier beyond the appointed day during the year.		
(iii)	The amount of interest due and payable for the year of delay in making payment (which have been paid but beyond the appointed day during the year) but without adding the interest specified under the Micro, Small and Medium Enterprises Development Act, 2006;		
(iv)	The amount of interest accrued and remaining unpaid as on Balance Sheet date.		
(v)	The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues above are actually paid to the small enterprise, for the purpose of disallowance of a deductible expenditure under section 23 of the Micro, Small and Medium Enterprises Development Act, 2006.		

NHPC LIMITED FARIDABAD

15 **Disclosures regarding leases as per IND AS -116 "Leases":**

A) **Company as Lessee:**

(i) Treatment of Leases as per Ind AS 116 :

The Company assesses whether a contract is or contains a lease, at the inception of the contract. The Company recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (such as tablets and personal computers, small items of office furniture and telephones). For these leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Company uses its incremental borrowing rate.

The Company has applied the following practical expedients on initial application of Ind AS 116:

(a) Applied a single discount rate to a portfolio of leases of similar assets in similar economic environment with a similar end date.

(b) Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term on the date of initial application.

(c) Excluded the initial direct costs, if any from the measurement of the right-of-use asset at the date of recognition of right-of-use asset.

(d) Used hindsight when determining the lease term if the contract contains options to extend or terminate the lease.

The weighted average incremental borrowing rate applied to leases recognised during FY 2023-24 is 7.67%.

(ii) Nature of lease: The Company's significant leasing arrangements are in respect of the following assets:

(a) Premises under cancellable lease arrangements for residential use of employees ranging from 3-4 months to three years.

(b) Premises for offices, guest houses & transit camps on lease which are not non-cancellable and are usually renewable on mutually agreeable terms.

(c) Land obtained on lease for construction of projects and / or administrative offices.

(d) Vehicles on operating leases generally for a period of 1 to 2 years and such leases are not non-cancellable.

(iii) **Amount recognised in the Statement of Profit and Loss / Expenditure Attributable to Construction in respect of short term, low value and variable lease during the year ended 31.03.2024: :**

Description	31.03.2024	31.03.2023
Expenditure on short-term leases (Refer Note 26.3 and 29.4)	19414402	20028717
Expenditure on lease of low-value assets (Refer Note 29.4)		
Variable lease payments not included in the measurement of lease liabilities (Refer Note 29.4)		

(iv) **Other Disclosures:**

Description	31.03.2024	31.03.2023
Commitment for Short Term Leases		

(v) **The following is the movement in lease liabilities**(Refer Note 16.2.2):

Particulars	31.03.2024	31.03.2023
OPening Balance at 01.04.2023

Total					
Income recognised in respect of "Business Interruption Loss" during the year is ₹ NIL. (Cumulative as on 31.03.2024 is ₹ Nil).					

20 **Nature and details of provisions (refer Note No. 17 and 22)**

(i) **General**

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a Finance Cost.

NHPC LIMITED एन एच पी सी N.H.P.C FARIDABAD

(ii) **Provision for employee benefits (Other than provisions for defined contribution and defined benefit plans which have been disclosed as per Ind AS-19 at Corporate Office):**

a) **Provision for Performance Related Pay/Incentive:**
Short-term Provision has been recognised in the accounts towards Performance Related Pay/ incentive to employees on the basis of Management estimates as per company's rules in this regard which are based on the guidelines of the Department of Public Enterprises, Government of India.

b) **Provision For Wage Revision as per 3rd Pay Revision Committee (PRC):**
Short term provision for wage revision of the employees of the company was recognised earlier as per notification of the Department of Public Enterprises, Government of India.

(iii) **Other Provisions:**

a) **Provision For Tariff Adjustment:**
Provision for tariff adjustment is made on estimated basis against probable refund to beneficiaries on reassessment of tariff billed, pending approval of Tariff/truing up for the Year 2014-19/2019-24 by Central Electricity Regulatory Commission (CERC).

b) **Provision for Livelihood Assistance:**
Provision has been recognised at discounted value adjusted for average inflation in the accounts towards special financial package finalised in consultation with the State Government and approved by the Board of Directors of NHPC for livelihood assistance of the project affected families (PAFs) in Parbati-II and Parbati-III. As per the package, pending finalisation of modalities of payment, one eligible person from each PAF shall be provided livelihood assistance equivalent to minimum wage of unskilled category as per the Government of Himachal Pradesh/ Central Government whichever is higher, on monthly instalment basis, for the Years as under:

i) Till the date of superannuation for PAFs eligible for employment.
ii) For 2000 days to those PAFs left with zero balance land but excluded for employment.
iii) For 1000 days to all remaining PAFs.

c) **Provision for Committed Capital Expenditure:**
Provision has been recognised at discounted value in case of non- current amount for Capital Expenditure to be incurred towards environment, compensatory afforestation, local area development, etc. which was a pre-condition for granting approval for construction of the project and expenditure towards which had not been completed till commissioning of the project. Such provisions are adjusted against the incurrence of actual expenditure as per demand raised by the concerned State Government Authorities.

d) **Provision for restoration expenses of insured assets:**
Provision has been recognised in the accounts based on Management Estimates for restoration of damaged assets insured under Mega and Construction Plant and Machinery Policy. Utilization of the provision is to be made against incurrence of actual expenditure towards restoration of the assets.

e) **Provisions for expenditure in respect of Arbitration Award/Court cases:**
This includes provisions created on the basis of management assessment as to probable outflow in respect of contractors claims against which arbitration award/Court decision have been received and which have been further challenged in a Court of Law. Utilization/outflow of the provision is to be made on the outcome of the case.

f) Provisions- Others: This includes provisions towards:-
(i) Contractor claims, Land compensation cases, disputed tax demands and other cases created on the basis of management assessment towards probable outflow. Utilization/outflow of the provision is to be made on the outcome of the case.

(ii) Wage revision of Central Government Employees whose services are utilised by the company.

(iii) Provision for interest to beneficiaries on excess tariff recovered in terms of Tariff Regulations for the Year 2014-19 where the capital cost considered for fixation of tariff by the CERC on the basis of projected capital cost as on Commercial Operation Date or the projected additional capital expenditure exceeds the actual capital cost incurred.

(iv) Upfront provision for rebate towards interest on House Building Advance provided to employees based on the historical trend of rebate allowed.

(v) Upfront provision for rebate to customers for sale of power based on the historical trend of rebate allowed.

21 Unit/Project specific notes :

(i) Dhauliganga power station in r/o Dhauliganga Intermediate Project:

a) Implementation of Dhauliganga Intermediate, Chungar Chal and Kharmoli Lumti Tulli Hydroelectric Projects has been temporarily put on hold. Pending final decision to hand over these projects to the Government of Uttarakhand, the expenditure incurred upto 31.03.2024 amounting to ₹ ..... (previous year ₹ .....) have been carried forward as Capital Work in Progress. However, as an abundant precaution, provision for ₹ ..... (previous year .....) has been made in the books of accounts.

b) Measures to reduce capital cost and optimise tariff of Goriganga IIIA Project are being explored. Pending decision on the same, the expenditure incurred upto 31.03.2024 amounting to ₹ ..... (previous year ₹ .....) have been carried forward as Capital Work in Progress. However, as an abundant precaution, provision for ₹ ..... (previous year Rs .....) has been made in the books of accounts.

ii) Wind Power Project, Jaisalmer:

24 Disclosures relating to creation of Regulatory Deferral Account (RDA)balances as per Ind AS 114 : (Disclosures relating to creation of Regulatory Deferral Account (RDA)balances as per Ind AS 114 are given in **Appendix V.**The units having RDA balances should copy the content pertaining to their unit & paste here under)

Regulatory Deferral Account balances on account of Interest payment on settlement of Court/Arbitration cases (Under Vivad Se Viswas Scheme)

Vide Office Memorandum dated 29.05.2023, the Ministry of Finance, Government of India has notified the "Vivad se Viswas II (Contractual Disputes) Scheme" (the Scheme) for settlement of contractual disputes between, inter alia CPSEs (the 'Procurer') and the counter-party to the dispute (the 'Contractor'). Disputes where the award by Court/ Arbitral Tribunal (AT) is only for monetary value are eligible for settlement under this scheme. Cases where the award stipulates specific performance of contract (either fully or partially) shall not be eligible for settlement through this scheme.

As per regulation 24, 25 & 26 of CERC Tariff Regulations, 2019-24, any expenditure incurred (principal amount of award) to meet award of arbitration or for compliance of order or directions of any Statutory Authority, or Order or decree of any Court of Law is allowed through tariff in the form of additional capitalization. Further, expenditure towards interest is allowed as reimbursement by CERC as per the approach adopted by CERC in their order dated 30.11.2022 in Petition no 145/GT/2020 in respect of Chamera-I Power Station.

Further as per Regulation 91 of CERC Tariff Regulations, 2024-29, in cases where there is a liability with respect to capital works on account of award of arbitration having principal amount along with interest payment, the principal amount actually paid shall be capitalised. Provided that any interest amount associated with the arbitration award and actually paid shall be recovered in instalments.

Since, expenditure towards interest in case of award of arbitration or for compliance of order or directions of any Statutory Authority, or Order or decree of any Court of Law was allowed as reimbursement by CERC during tariff period 2019-24 and tariff regulation 2024-29 also allows for recovery of interest expenditure on arbitration award, the same has been charged to the Statement of Profit and Loss. Further,keeping in view the provisions of Ind AS 114- "Regulatory Deferral Accounts Debit Balance", interest amount associated with the arbitration award, to the extent charged to the Statement of Profit and Loss till 31st March 2024, amounting to Rs. 107,07,41,259/- have been recognized as 'Regulatory Deferral Account balances'.

Summary of total RDA Debit balances recognized and adjusted till 31.03.2023 in the financial statement are as under:

Particulars	Regulatory Deferral Account Balances (Rs)
Opening balance as on 01.04.2023	0
Addition during the year (assets (+)/ liability (-))	1355146534
Amount collected (-)/refunded (+) during the year	0
Regulatory income/(expense) recognized in the Statement of Profit and Loss (B-C)	1355146534
Closing balance as on 31.03.2024 (A+D)	1355146534

Recoverability of the Regulatory Deferral account balances is however, subject to Demand Risk since recovery/payment of the regulatory deferral debit/credit balance shall be by way of billing to the beneficiaries. Accordingly, the same is affected by the normal risks and uncertainties impacting sale of electricity in India like difficulty in signing of long term PPAs, etc.

NHPC LIMITED FARIDABAD

9	111_S Notice 7_61	Notice dated 30.04.2019 from Customs Department, Kolkata for payment of interest on Custom Duty of Rs. 24,60,74,458/- upto 30.04.2019 (interest upto 31.03.2019 - Rs. 24,43,30,860/-) in respect of audit cum inquiry in exercise of powers conferred under Sec.4 (3)(a) Customs (Import of Goods at Concessional Rate of Duty) Rules, 1996	Customs Department Kolkata	Central Govt	07232000028	7815488478				7815488478							25152607		3896488478			NHPC attorney has opined that the order in Appeal dated 24.03.2021 and hence it is challenged before CESTAT by way of an appeal	NHPC, has engaged legal consultant M/s Laxmikumaran & Sridharan Attorneys, New Delhi for their opinion in this case. As per the opinion, the Power Station has already deposited the Custom Duty amounting to Rs. 12,51,53,000/- under protection till 04.08.2018, after approval of Competent Authority. Power Station has also captioned the principal amount of Custom Duty Demand of Rs. 12,51,53,000/- in the FY 2018-19. NHPC once again appointed M/s Laxmikumaran & Sridharan Attorneys, New Delhi for preparation of reply of show cause notice, representation before Deputy Commissioner of Customs (Port), Kolkata, incorporating counter reply regarding levy of interest of Rs. 24,60,74,458/-. Consultant has opined that in the present case the differential duty stands paid by the Licensee (NHPC) before finalization of assessment of the impugned bills of entry. Therefore, the provisions of Section 18 (2) of the Customs Act are not applicable to the facts of the present case, consequently, no liability for payment of interest arises. Accordingly, advice has been incorporated in the reply of Show Cause Notice submitted by NHPC to the Custom Department. Consultant has further opined that the demand of interest to the extent of Rs. 20,03,19,219/- in respect of the bills of entry assessed provisionally prior to 13.07.2006 is not sustainable in law, as there was no charging section for such levy of interest, stating the said period. M/s Laxmikumaran & Sridharan Attorneys, New Delhi has been appointed by E.A. to appeal against the order of Deputy Commissioner of Customs, Kolkata, against levy of interest amounting to Rs. 24,60,74,458.00 upto 30.04.2018 before Appellate Authority and appeal has been filed before Appellate Authority. Appeal has been filed with Commissioner of Custom (Appeals) at Kolkata on 23rd January 2020. After filing of appeal, due to Covid-19 pandemic and continuous lockdown various government offices was not doing work in their full capability. A virtual hearing before Appellate Authority, i.e., Commissioner of Customs (Appeals), Kolkata was done on 08.02.2021.The copy of order in appeal No. KOL/CUS/PORT/APP/635/2021 Dated 24.03.2021(Numbered as Customs/75/2020/21) passed by Commissioner of Customs (Appeal), Kolkata has been obtained by NHPC Attorney M/s Laxmikumaran & Sridharan on 24.06.2021.NHPC attorney has pursued the Order-in-Appeal dated 24.03.2021 and find that the same is erroneous and bad in law. As per the view of the attorney, there is a strong case in favour of NHPC and it is opined that such order must be challenged before the Hon'ble CESTAT Kolkata by way of an appeal. NHPC Teesta V Power Station has filed appeal before Hon'ble CESTAT Kolkata against the order of Commissioner Customs (Appeal) on 12.08.2021 through Attorney M/s Laxmikumaran & Sridharan Delhi/Kolkata. As informed due to huge pendency, there is delay in hearing. The amount of the interest has been shown in the contingent liability. Since differential amount of custom duty has been deposited on 14.08.2018, therefore, interest amount has been worked out upto14.08.2018. Further, Power Station has already captioned the principal amount of Custom		
10		Water usage charges	WCC &JS (SECRETARY) FORESTS & E and Chief Secretary T AND WILD LIFE WEST BENGAL Additional ST SECRETARY OF STATE OF SIKKIM	State Govt	1784263491		1321284491			1321284491								4861284491	1321284491		3497284994	Also the Divisional High Court of Himachal Pradesh Power Projects are solely recognised by the courts has been reversed and decision in favour of NHPC	Himachal High Court of Himachal Pradesh inter alia held that (i) the provisions of the Himachal Pradesh Water Cess on Hydropower Electricity Generation Act,2023 are declared to be beyond the legislative competence of the State Government in terms of Article 246 and 265 of the Constitution of India and thus ultra vires the constitution. (ii)Consequently, the Himachal Pradesh Water Cess on Hydropower Electricity Generation Rules,2023 are also quashed and set aside. Case related to Teesta V Power Station is pending at Sikkim High Court where next date of hearing is scheduled on 03.05.2024.

(Lot-3 Tunnel works)	469184408	109230121	0	578414529	578414529	0	578414529	Arbitration Tribunal awarded the claim on 01.06.16 amounting to Rs 51.63 Crores (Principal) + Rs. 48.56 Crore (Interest) in favour of contractor. After award of AT, the case was sub-judice at District court , Faridabad. Later case was transfered to Special Commercial Court, Gurugram. Then the case disposed off by Special Commercial Court, Gurugram on 20.03.2018 on the point of jurisdiction without discussion the merit of the case. Again the case was transferred from High Court of Punjab & Haryana to special Commercial Court, Gurugram. Thereafter, Special Commercial Court,Gurugram has dismissed the petition filed by the NHPC u/s 34 on 25.01.2019 and upheld the decision of Tribunal. In responce, NHPC has filed the petition and appeal for stay against the judgement of Lower Court in High Court of Punjab & Haryana, Chandigarh on 25.03.2019. On 02.04.2019, High Court has granted the stay upto 15.05.2019 on the decision of Lower Court. Earlier the Board Agenda Note was put up to the BOD on 285th meeting held on 29.06.15 regarding ammicable settlement and the agenda was withdrawn as per decision of BOD. In Board Agenda Note, COD has recommended as full & final payment in the instant claim of Rs 9.33 crore as principal component. An amount of 73.86 Crore has been paid on 10/11.10.2018 and Rs. 7.46 Crore on 30.01.2019 totalling to Rs. 81.33 Crores (including interest) i.e. 75% of claim appearing on 30.09.2017 to M/s GECPL as per directive of NITI Aayog. On 15.05.2019, High Court ordered that an amount of Rs. 19.03 Crs is required to be deposited with Special Commercial Court, Gurugram within 01 month. In compliance to the said order, NHPC has deposited Rs. 19.03 Crs with Special Commercial Court, Gurugram on 02.07.2019 which was released by court to M/s GECPL after submission of BG in court. The same is booked under Advance to contractor. As per Point 3.3 & 3.4 of Escrow Account Agreement Accrued Interest on deposit is updated upto Mar 2024. (As the rate of interest has not mentioned it is taken @12% as per Arbitration Award) Last hearing was listed on 05.03.2024 and next date of hearing is on 23.05.2024

(Lot-3 Tunnel works)	69372648	20916376	0	90289024	90289024	0	90289024	Arbitration Tribunal awarded the case on 18.01.2018 amounting to Rs 29.53 Crores (Principal)+ Rs. 28.99 Crore (Interest) in favour of contractor. NHPC and M/s GECPL has filed the application u/s 33 for computation error before AT on 16.02.18 . AT corrected the award on 13.04.2018 amounting to Rs 30.39 Crores (Principal)+ Rs. 29.83 Crore (Interest) . Further the Board Agenda Note was put up to the BOD on 385th meeting held on 29.06.15 regarding ammicable settlement and the agenda was withdrawn as per decision of BOD. In Board Agenda Note, COD has recommended as full & final payment in the instant claim of Rs 31.54 crore as principal component. Since the amount has determined by COD, provision for the same is made in books of accounts . However, the Contingent Liability and Provision is shown as per Circular No. A/cs-547 dt. 22.03.2019. An amount of 48.97 Crore has been paid on 06.12.2019 i.e. 75% of claim (including interest) appearing on 30.09.2018 to M/s GECPL as per directive of NITI Aayog. The same is booked under Advance to contractor. As per Point 3.3 & 3.4 of Escrow Account Agreement Accrued Interest on deposit is updated upto Mar 2024. (As the rate of interest has not mentioned it is taken @12% as per Arbitration Award). Last hearing was listed on 19.01.2024 and next date of hearing is on 13.05.2024.
3	Revision of minimum wages in Sikkim	Jai Prakash Associates Ltd.(Lot-TT4,PH works)	97328932	14625310	0	111954242	111954242	0	111954242	Hon'ble District Court Faridabad on dated 26.03.14 set aside the Arbitration award dated 22.08.2010 . Contractor filed the case in High Court of Punjab and Hayana at Chandigarh.The case has been awarded by the High Court on 29.03.16 in favour of contractor.Now SLP is filed by NHPC in Supreme Court of India. Hon'ble Supreme court of India vide its order daterd 12.08.16 has directed NHPC for depositing principal amount of Rs 36,56,32,750 in the Registry of Supreme Court of India and NHPC has deposited the same. As per Assistant Registrar's order the FDR is matured to Rs. 39,70,25,909/- as on 27.09.2018. Such deposits including interest accrued thereon shall depend on the settlement of the case in favour of the Company. In view of uncertainties as to ultimate realization of the deposited amount, interest on such deposits is at best a contingent asset till the case is disposed off by the Court or the concerned authorities. Accordingly, interest accrued on such deposits is disclosed as Contingent Assets in the Financial Statements of the Company in line with the instructions issued vide Circular No. IND AS/28 dated 28.02.2017. The updated interest amount upto Mar 2024 is shown as Contingent Asset in terms of Circular No. A/cs-577 dated 18.09.2020. At the present juncture, the case is sub-judice at the Supreme Court of India. Last hearing was listed on 31.08.2023. Next hearing dale is not fixed. (As the rate of interest has not mentioned in the matured FDR, prevailing average rate of interest on FDR is taken @4% for calculation of Contingent Asset)

Appendix-V to Note-34

Disclosures relating to creation of Regulatory Deferral Account (RDA)balances as per Ind AS 114

1 Subansiri Lower Project

The Company is principally engaged in the construction and operation of hydroelectric power projects. The price (tariff) to be charged by the company for electricity sold to its customers is determined by Central Electricity Regulatory Commission (CERC) under applicable CERC (terms & conditions of tariff) Regulations. The said price (tariff) is based on allowable costs like interest costs, depreciation, operation and maintenance charges plus a stipulated return. This form of rate regulation is known as cost-of-service regulations. The basic objective of such regulations is to give the entity the opportunity to recover its costs of providing the goods or services plus a fair return.

For the purpose, the Company is required to make an application to CERC based on capital expenditure incurred duly certified by the Auditors or already admitted by CERC or projected to be incurred upto the date of commercial operation and additional capital expenditure duly certified by the Auditor or projected to be incurred during tariff year. The tariff determined by CERC is recovered from the customers (beneficiaries) on whom the same is binding.

The above rate regulation results in creation of right (asset) or an obligation (liability) as envisaged in the accounting framework which is not the case in other industries. Guidance Note on Accounting for Rate Regulated Activities (Previous GAAP) issued by the ICAI is applicable to entities that provide goods or services whose prices are subject to cost-of-service regulations and the tariff determined by the regulator is binding on the customers (beneficiaries). As per guidance note, a regulatory asset is recognized when it is probable (a reasonable assurance) that the future economic benefits associated with it will flow to the entity as a result of the actual or expected actions of the regulator under applicable regulatory framework and the amount can be measured reliably.

The guidance note also provides that in some cases, a regulator permits an entity to include in the rate base, as part of the cost of self-constructed (tangible) fixed assets or internally generated intangible assets, amounts that would otherwise be recognized as expense in the statement of profit and loss in accordance with Accounting Standards.

With effect from 01.04.2016, such rate regulated items are to be accounted for as per Ind AS 114 'Regulatory Deferral Accounts.' Ind AS 114 allows an entity to continue to apply previous GAAP accounting policies for the recognition, measurement, impairment and derecognition of regulatory deferral account balances. For this purpose, Guidance Note of the ICAI on 'Accounting for Rate Regulated Activities' shall be considered to be the Previous GAAP.

Construction activities at site of Subansiri Lower Project were interrupted w.e.f. 16.12.2011 and the matter was pending before National Green Tribunal. Technical and administrative work at the project was however continued.

Vide order dated 31st July 2019, the Hon'ble NGT has held that there is no justification in the petitions of the applicants pleading bias in the constitution of the Expert Committee by the MoEF & CC and accordingly, the cases against Subansiri Lower Project pending with the NGT have been dismissed. Active construction work at the project has been resumed from October-2019.

In line with the opinion of Expert Advisory Committee (EAC) of the Institute of Chartered Accountants of India (ICAI), borrowing cost of ₹ 2735.61 Crore (upto Previous year₹ 2735.61 Crore), employee benefits expense, depreciation and other expense of ₹ 1427.67 crore (upto Previous year ₹ 1427.67 Crore), net of other income of ₹ 322.60 Crore (upto Previous year ₹ 322.60 Crore) incurred till 30th September2019 has been charged to the Statement of Profit and Loss.

As active construction work at the project has been resumed during FY 2019-20, borrowing cost, employee benefits expense, depreciation and other expense (net of other income) incurred with effect from 01.10.2019 has been capitalized as Expenditure attributable to Construction.

During financial year 2014-15, the company had adopted the accounting as per Guidance Note on Rate Regulated Activities issued by the ICAI which allows recognition of 'Regulatory Asset' and corresponding 'Regulatory Income' of the right to recover such expense which are not allowed to be capitalized as part of cost of relevant fixed asset in accordance with the Accounting Standards, but are nevertheless permitted by Central Electricity Regulatory Commission (CERC), the regulator, to be recovered from the beneficiaries in future through tariff.

Since Ind AS 114 'Regulatory Deferral Accounts' allows an entity to continue to apply previous GAAP accounting policies for the recognition, measurement, impairment and derecognition of regulatory deferral account balances and recognizes the Guidance Note of the ICAI on 'Accounting for Rate Regulated Activities' as the previous GAAP, the company has continued with the accounting policy for regulatory deferral account balances.

The total Regulatory Deferral Account Debit balances recognised in respect of Subansiri Lower Project for and upto the year ended 31.03.2022 are as under:

Regulatory asset created in relation to:	Upto 31.03.2023 (Rs)	During the year (Rs)	Upto 31.03.2024(Rs)
Borrowing Costs			
Employee Benefit expense			
Depreciation			
Other Expense			
Other Income			
Total			

Further, no regulatory deferral account balances has been recognized during the year 2023-24.

As per management assessment, there is no impairment in the carrying amount of ₹ .....included under Capital Work in Progress of the Project including the regulatory deferral account balances recognized therein.

After Commercial Operation Date (COD) of the Project, amount recognized as Regulatory Deferral Account balances in respect of Subansiri Lower Project shall be amortized/ liquidated in proportion to depreciation following the rates and methodology notified under CERC Tariff Regulations over the life of the Project, i.e. 40 years.

Tariff Regulations for the period 2019-2024 have been notified by the CERC. In addition to the existing Tariff Regulations (2014-19) authorizing capitalisation of borrowing and other attributable costs incurred due to uncontrollable factors including force majeure events like blockade/ embargo as per Tariff Regulations 2014-19, the new regulations also include delay in obtaining statutory approval for projects as one of the force majeure events. Accordingly, Management considers that adverse changes in Tariff Regulations are not likely to be a significant area of risk for the future recovery of RDA balances recognized in respect of Subansiri Lower Project.

Risks and uncertainties that might affect the future recovery of the Regulatory Deferral Account balances being created in respect of Subansiri Lower Project are:

a) Demand Risk: Recovery of the Regulatory Deferral Account Balances shall be by way of depreciation through tariff. Accordingly, the same is affected by the normal risks and uncertainties impacting sale of electricity in India like difficulty in signing of long term Power Purchase Agreements (PPAs), at the rate covering the cost and required return ensuring the viability of the Project.

b) Regulatory Risk: Tariff regulations further provide that if the delay is not attributable to the generating company but is due to uncontrollable factors, IEDC may be allowed after due prudence check. Any disallowance of expenditure after prudence check can affect the quantum of regulatory deferral account balances to be recovered from beneficiaries.

2 Regulatory Deferral Account balances due to moderation of tariff of Kishanganga Power Station:

As per CERC Tariff Regulations 2014-19/2019-24, depreciation on capital cost of a Power Station forms one of the components of tariff. Depreciation is charged in the books as per the rates provided in the Tariff Regulations 2014-19/2019-24 in the initial operating period of 12 years and thereafter the balance depreciation is spread over equally in the remaining 23/28 years so as to recover 90 percent of the capital cost of the Power Station by way of depreciation. As per Tariff regulations 2019-24, the operating life of a hydro-power station is 40 years.

As per CERC Tariff Regulations, 2019-24, tariff for sale of electricity by the generating company may also be determined in deviation of the norms specified in the Regulations provided the levelised tariff over the useful life of the project on the basis of the norms in deviation does not exceed the levelised tariff calculated on the basis of the norms specified in the Regulations. Similar provisions exist in the Tariff Regulations for the period 2019-2024 notified by the CERC.

In the case of Kishanganga Power Station (Commercial Operation Date: 17th May, 2018), the Company has made moderation in tariff of Kishanganga Power Station by fixing lower tariff in the initial ten years and then fixing higher tariff in the remaining 25 years by way of charging 1.5% depreciation from the 1st to the 10th year and 2.5% depreciation from 11th to the 40th year, thus aggregating 90 percent of the Capital Cost of the Power Station. This moderation, with the intent to reduce tariff in the initial years of operation, has been duly approved by the CERC.

Moderation of depreciation rates for tariff determination in Kishanganga Power Station gives rise to a significant mismatch by way of higher depreciation charged in the books (as per CERC Tariff Regulations, 2019-24) during the first 12 years of commercial operation and recovery by way of tariff as per Tariff Order of the Power Station approved by the CERC. The lower recovery during the first 12 years would, however, be compensated over the balance period of the operational life of the Power Station by way of higher recovery of depreciation through tariff than that charged in the books. This deferment of recovery of costs with the intent to reduce tariff in the initial years and its recovery in subsequent years demonstrates that an asset exists by way of the right to recover current costs in future through tariff and such right is enforceable.

Keeping in view the provisions of Ind AS 114- "Regulatory Deferral Accounts", difference between depreciation charged to the Statement of Profit and Loss Account as per Tariff Regulations 2019-24 and the depreciation allowed by way of tariff and which is recoverable from the beneficiaries in subsequent periods is being recognized as 'Regulatory Deferral Account balances' with effect from Commercial Operation Date of the Power Station. RDA balances created during the first 12 years of commercial operation shall be recovered from beneficiaries by way of higher depreciation as a component of tariff over the balance useful life of the Power Station, i.e. over a period of 28 years.

The regulated assets (+)/liability (-) recognized in the books to be recovered from or payable to beneficiaries in future periods are as follows:

Particulars	**Regulatory Deferral Account Balances (Rs)**
Opening balance as on 01.04.2023	
Addition during the year (assets (+)/ liability (-))	
Amount collected (-)/refunded (+) during the year	
Regulatory income/(expense) recognized in the Statement of Profit and Loss (B-C)	
Closing balance as on 31.03.2024 (A+D)	

The Company has long term Power Purchase Agreements in respect of Kishanganga Power Station. Since the proposal for moderation of tariff already stands approved by the CERC, the Company does not envisage any significant risk as regards recoverability of the Regulatory Deferral Account balances created in respect of Kishanganga Power Station.

However, as depreciation charge in the books and recovery thereof through tariff are dependent on the Capital Cost of the Power Station as allowed by CERC, recovery of the regulatory deferral account balances in respect of Kishanganga Power Station would be subject to Regulatory Risk. Approval of actual capital expenditure on the Power Station including expenditure on account of time and cost overruns etc. are subject to prudence check by the CERC. Any disallowance of expenditure after prudence check can affect the quantum of regulatory deferral account balances to be recovered from beneficiaries.

NHPC LIMITED
FARIDABAD

3 Regulatory Deferral Account balances in respect of exchange differences on Foreign Currency Monetary items:

As per Ind AS 23- "Borrowing Costs", borrowing cost on foreign currency loans to the extent treated as an adjustment to interest costs is allowed to be capitalised during construction period. Further, Ind AS 21-"The Effects of Changes in Foreign Exchange Rates" provides that exchange differences arising on settlement or translation of monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements shall be recognized in the Profit and Loss in the period in which they arise.

Para D13AA of Ind AS 101- "First Time Adoption of Ind AS" provides that a first-time adopter may continue the existing accounting policy adopted for accounting of exchange differences arising from translation of long-term foreign currency monetary items. Accordingly, for periods beginning on or after 01.04.2016, all exchange differences arising on translation/ settlement of monetary items other than exchange difference on borrowings to the extent treated as an adjustment to interest cost during construction period are to be charged to the Statement of Profit and Loss.

As per the CERC Tariff Regulations 2014-19, any gain or loss on account of exchange risk variation shall be recoverable as part of capital cost for calculation of tariff on Commercial Operation Date (COD) of a project and on actual payment basis during Operation and Maintenance (O&M) period. Further, CERC in previous tariff orders has allowed exchange differences incurred during the construction period as a part of capital cost.

Keeping in view the provisions of Ind AS 114- "Regulatory Deferral Accounts" as regards recognition and CERC Tariff Regulations 2014-19 as regards recoverability, exchange differences arising on translation/ settlement of foreign currency monetary items to the extent charged to the Statement of Profit and Loss are being recognized as 'Regulatory Deferral Account balances' with effect from(with effect from.) 01.04.2016. These balances are adjusted from the year in which the same become recoverable from or payable to the beneficiaries after Commercial Operation Date (COD) of the Project.

The regulated assets (+)/liability (-) recognized in the books to be recovered from or payable to beneficiaries in future periods are as follows:

Particulars	Regulatory Deferral Account Balances (Rs)
Opening balance as on 01.04.2023	
Addition during the year (assets (+)/ liability (-))	
Amount collected (-)/refunded (+) during the year	
Regulatory income/(expense) recognized in the Statement of Profit and Loss (B-C)	
Closing balance as on 31.03.2024 (A+D)	

Tariff Regulations for the period 2019-2024 have been notified by the CERC. Regulations regarding recoverability of Foreign Exchange rate Variation (FERV) as part of capital cost for calculation of tariff on Commercial Operation Date (COD) of a project and on actual payment basis during O&M period of a Power Station as per Tariff Regulations 2014-19 have been continued for the tariff period 2019-24 also. Accordingly, Management considers that adverse changes in Tariff Regulations are not likely to be a significant area of risk for the future recovery of RDA balances recognized in respect of exchange differences on Foreign Currency Monetary items.

Recoverability of the Regulatory Deferral account balances is however, subject to Demand Risk since recovery/payment of the regulatory deferral debit/credit balance shall be by way of billing to the beneficiaries. Accordingly, the same is affected by the normal risks and uncertainties impacting sale of electricity in India like difficulty in signing of long term PPAs, etc.

4 Regulatory Deferral Account balances on account of Interest payment on settlement of Court/Arbitration cases (Under Vivad Se Viswas Scheme)

Vide Office Memorandum dated 29.05.2023, the Ministry of Finance, Government of India has notified the "Vivad se Viswas II (Contractual Disputes) Scheme" (the Scheme) for settlement of contractual disputes between, inter alia CPSEs (the 'Procurer') and the counter-party to the dispute (the 'Contractor'). Disputes where the award by Court/ Arbitral Tribunal (AT) is only for monetary value are eligible for settlement under this scheme. Cases where the award stipulates specific performance of contract (either fully or partially) shall not be eligible for settlement through this scheme.

As per regulation 24, 25 & 26 of CERC Tariff Regulations, 2019-24, any expenditure incurred (principal amount of award) to meet award of arbitration or for compliance of order or directions of any Statutory Authority, or Order or decree of any Court of Law is allowed through tariff in the form of additional capitalization. Further, expenditure towards interest is allowed as reimbursement by CERC as per the approach adopted by CERC in their order dated 30.11.2022 in Petition no 145/GT/2020 in respect of Chamera-I Power Station.

Further as per Regulation 91 of CERC Tariff Regulations, 2024-29, in cases where there is a liability with respect to capital works on account of award of arbitration having principal amount along with interest payment, the principal amount actually paid shall be capitalised. Provided that any interest amount associated with the arbitration award and actually paid shall be recovered in instalments.

Since, expenditure towards interest in case of award of arbitration or for compliance of order or directions of any Statutory Authority, or Order or decree of any Court of Law was allowed as reimbursement by CERC during tariff period 2019-24 and tariff regulation 2024-29 also allows for recovery of interest expenditure on arbitration award, the same has been charged to the Statement of Profit and Loss. Further,keeping in view the provisions of Ind AS 114- "Regulatory Deferral Accounts Debit Balance", interest amount associated with the arbitration award, to the extent charged to the Statement of Profit and Loss till 31st March 2024, amounting to Rs. 107,07,41,259/- have been recognized as 'Regulatory Deferral Account balances'.

Summary of total RDA Debit balances recognized and adjusted till 31.03.2023 in the financial statement are as under:

Particulars	Regulatory Deferral Account Balances (Rs)
Opening balance as on 01.04.2023	**0**
Addition during the year (assets (+)/ liability (-))	1355146534
Amount collected (-)/refunded (+) during the year	0
Regulatory income/(expense) recognized in the Statement of Profit and Loss (B-C)	**1355146534**
Closing balance as on 31.03.2024 (A+D)	**1355146534**

NHPC LIMITED FARIDABAD

1304

Recoverability of the Regulatory Deferral account balances is however, subject to Demand Risk since recovery/payment of the regulatory deferral debit/credit balance shall be by way of billing to the beneficiaries. Accordingly, the same is affected by the normal risks and uncertainties impacting sale of electricity in India like difficulty in signing of long term PPAs, etc.

Information regarding matters to be included in Auditor's Report as per Companies (Auditor's Report) Order, 2020.

1. (a) A) whether the company is maintaining proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment;

Reply: The Company has maintained proper records showing full particulars, including quantitative details and situations of Property, Plant and Equipment.

B) whether the company is maintaining proper records showing full particulars of intangible assets;

Reply: The Company has maintained proper records showing full particulars of Intangible Assets.

(b) Whether these Property, Plant and Equipment have been physically verified by the management at reasonable intervals; whether any material discrepancies were noticed on such verification and if so, whether the same have been properly dealt with in the books of account.

Reply:
Aspertheinformationandexplanationsgiventousandonthebasisofourexaminationoftherecordsof theCompany,theProperty, Plantand EquipmentexceptLandincertainUnits,havebeenphysicallyverifiedby the management/ outside agencies, in a phased manner, which in our opinion is reasonable,having regard to the size of Company and nature of its business. The reconciliation of physicallyverified assets with the book records in certain cases is in progress. Discrepancies noticed on thephysical verification and consequential adjustments are carried out on completion of reconciliation.According to information and explanations given by the management and in our opinion, the samearenot material.

(c) Whether the title deeds of all the immovable properties (other than properties where the company is the lessee and the lease agreements are duly executed in favour of the lessee) disclosed in the financial statements are held in the name of the company, if not, provide the details thereof in the format below.

Reply: According to the information and explanations given to us, the records examined by us and based on the Title deeds provided to us, we report that, the title deeds, comprising all the immovable properties (including leased assets where the Company is a lessee) of land and building, are held in the name of the Company as on the balance sheet date except for the following where the title deeds are not in the name of the Company:

Relevent Line Item in balance Sheet	Description of Item of Property	Gross carrying value (Gross Block at deemed cost as at 31.03.2024) (Amount in Rs)	Area in Hectare	Title Deeds held in the name of	Whether title deed holder is a promoter, director or relative of Promoter/ director or employee of promoter/director	Property held since which date	Reason for not being held in the name of the Company

NHPC LIMITED FARIDABAD

Property Plant and Equipment	Land - Freehold	63267839	4.689	Different Parties	NO	10.04.2008	Mutation awaited
Right Of Use Assets	Land-Lease Hold						

Note-Above details must be same as disclosed under of Note 2.1 and Note 2.3 of Balance sheet.

(d) Whether the Company has revalued its Property, Plant and Equipment (including Right of Use assets) or intangible assets or both during the year and, if so, whether the revaluation is based on the valuation by a Registered Valuer; specify the amount of change, if change is 10% or more in the aggregate of the net carrying value of each class of Property, Plant and Equipment or intangible assets.

Reply: According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not revalued its Property, plant and equipment (including Right-of-use assets) or Intangible assets or both during the year.

(e) Whether any proceedings have been initiated or are pending against the company for holding any Benami property under the "Benami Transactions (Prohibition) Act, 1988 and Rules made thereunder; if so, whether the Company has appropriately disclosed the details in its financial statements.

Reply: According to the information and explanations given to us and on the basis of our examination of the records of the Company, there are no proceedings initiated or pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 and rules made thereunder.

2. whether physical verification of inventory has been conducted at reasonable intervals by the management and whether, in the opinion of the auditor, the coverage and procedure of such verification by the management is appropriate; whether any discrepancies of 10% or more in the aggregate for each class of inventory were noticed and if so, whether they have been properly dealt with in the books of account.

Reply: As informed, the inventories of the Company except for inventories in transit, have been physically verified by the management/ outside agencies during the year. In our opinion and according to the information and explanations given to us, the frequency of such verification is reasonable and procedures and coverage as followed by management were appropriate. No discrepancies were noticed on verification between the physical stocks and the book records that were 10% or more in the aggregate for each class of inventory. Minor discrepancies noticed during physical verification were properly dealt within the books of account

3. Whether the company is regular in depositing undisputed statutory dues including Goods and Services Tax, provident fund, employees' state insurance, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities and if not, the extent of the arrears of outstanding statutory dues as on the last day of the financial year concerned for a period of more than six months from the date they became payable, shall be indicated;

Reply: According to the information and explanations given to us, during the year, the Company has generally been regular in depositing with appropriate authorities undisputed statutory dues including Goods and Services Tax, Provident Fund, Employees' State Insurance, Income Tax, Sales Tax, Service tax, Custom Duty, Excise Duty, Value Added Tax, Cess and other material statutory dues as applicable to it.

AGENDA NOTE FOR THE BOARD OF DIRECTORS

ITEM No 485.2.3.....

Sub: Approval for Projected Add-Cap Expenditure of Power Stations for the Tariff Period 2024-29.

1.0 INTRODUCTION

1.1. Central Electricity Regulatory Commission (CERC) allows tariff of Power Stations based on the capital cost, as on the beginning of the tariff period and projected capital expenditure for the next five years/end of that tariff period.

1.2. CERC vide Notification dated 15th March' 2024 has issued the 'Terms and Conditions of Tariff, Regulations 2024 applicable for the period 2024-29.

1.3. Accordingly, tariff petition in respect of NHPC Power Stations for the period 2024-29 is to be filed.

1.4. In terms of Clause 18(2) of above regulations, resolution of the 'Board' of the Company is required in support of the proposed capital expenditure for the generating stations, from its internal resources.

1.5. The projected Capital Expenditure of 20 Power Stations is accordingly submitted herein for appraisal/approval of Board, for inclusion in the tariff petitions for the period 2024-29.

2.0. BACKGROUND

2.1. Approval for the projected Additional Capital Expenditure in respect of 20 Power Stations for the tariff period 2019-24 amounting to ₹ 939.58 crore was accorded by the Board in its 427th meeting vide Item No 427.2.3 Tariff Petitions for these Power Stations were filed with CERC, based on the Projected Add-Cap Expenditure approved by the Board.

NHPC LIMITED एन एच पी सी N.H.P.C FARIDABAD

2.2. CERC Tariff Regulation 2024-29, Clause 25(2) provides as under:

> ***"Provided that any claim of additional capitalization with respect to the replacement of assets under the original scope and on account of obsolescence of technology, less than Rs. 20 lakhs shall not be considered as part of Capital cost and shall be met through normative O&M expenses".***

Also, vide Clause (55) of the Tariff Regulations 2024-29, restriction has been provided on the value of spares, to be qualified as O&M expenses, as under:

> ***"Operation and Maintenance Expenses' or 'O&M expenses' means the expenditure incurred for operation and maintenance of the project, or part thereof, and includes the expenditure on manpower, maintenance, repairs and maintenance spares, other spares of capital nature valuing up to Rs. 10 lakhs, additional capital expenditure of an individual asset costing less than Rs. 20 lakhs, consumables, insurance and overheads and fuel other than used for generation of electricity".***

The Tariff Regulations 2024-29, Clause 26(1)(i), has been introduced which provides for claiming Additional Capitalization beyond the original scope, required for efficiency improvement, as under:

NHPC LIMITED एन एच पी सी N.H.P.C FARIDABAD

(i) Any additional capital expenditure which has become necessary for efficient operation of generating station or transmission system as the case may be, including the works required towards projects acquired through NCLT process. The claim shall be substantiated with the technical justification and cost benefit analysis.

The provision for additional capital expenses for efficiency improvement was not available in Tariff Regulation 2019-24, however, the same has been provided in the Tariff Regulations 2024-29. This provision shall be very helpful to claim the items, which are not under original scope, however, the items are required for improvement in efficiency at power stations.

2.3. Presently, NHPC is having 20 Hydro Power Stations in operation. Therefore, the projected additional capital expenses for the period 2024-29 have been prepared for these 20 power stations based the provisions of Tariff Regulations 2024-29.

3.0. PROPOSAL

3.1. The projected additional capital expenditure for tariff period 2024-29, proposed by Power Stations, have been examined in O&M Division and Commercial Division and is finalized as ₹ 1197.01 Crore. The details of Projected Add Cap expenditure for tariff period 2024-29 against each power station is attached as Annexure-1.

3.2. The year wise projected additional capital expenditure projected for the tariff period 2024-29, against all the Power Stations is summarized as under:

NHPC LIMITED FARIDABAD

NHPC LIMITED FARIDABAD

3.3. The proposed capital expenditure will be incurred by the respective Power Stations only after obtaining required approval of competent authority as per Delegation of Power and approved budget.

3.4. Tariff petitions for the period 2024-29 are to be filed with CERC, including the add-cap expenditure proposed above. The proposed add-cap expenditure shall be reviewed after the issue of CERC Orders determining the tariff of Power Stations for the period 2024-29.

3.5. As per Clause 10 (3) of CERC Regulations 2024, If the information furnished in the petition is in accordance with these regulations, the Commission may consider granting an interim tariff of up to ninety per cent (90%) of the tariff claimed in the case of a new generating station or unit thereof or transmission system, or element thereof during the first hearing of the application for billing purposes till the final tariff is determined by the Commission: Provided that in case the final tariff determined by the Commission is lower than the interim tariff by more than 10%, the generating company or transmission licensee shall return the excess amount recovered from the beneficiaries or long term customers, as the case may be, with simple interest at 1.20 times of the rate worked out on the basis of 1 year SBI MCLR plus 100 basis points prevailing as on 1st April of the financial year in which such excess recovery was made.

3.6. Further, Clause 10(6) of Tariff Regulation 2024 states that Subject to Sub-Clause (7) below, the difference between the tariff determined in accordance with clauses (3) and (5) above and clauses (4) and (5) above, shall be recovered from or refunded to, the beneficiaries or the long term customers, as the case may be, with simple interest at the rate equal to the 1 year SBI MCLR plus 100 basis points prevailing as on 1st April of the respective year of the tariff period, in a maximum of six equal monthly instalments; Provided that the bills to recover or refund shall be raised by the generating company or the transmission licensees within 45 days from the issuance of the Order. Provided further that such interest, including that

determined as per sub-clause (7) of this regulation shall be payable till the date of issuance of the Order and no interest shall be allowed or levied during the period of six-monthly instalments. Provided further that in case where money is to be refunded and there is a delay in the raising of bills by the generating company or transmission licensees beyond 45 days from the issuance of the Order, it shall attract a late payment surcharge as applicable in accordance with these regulations.

3.7. Further as per Clause 10(7) of CERC Tariff Regulations 2024, Where the capital cost approved by the Commission on the basis of projected additional capital expenditure exceeds the actual trued up additional capital expenditure incurred on a year to year basis by more than 10%, the generating company or the transmission licensee shall refund to the beneficiaries or the long term customers as the case may be, the tariff recovered corresponding to the additional capital expenditure not incurred, as approved by the Commission, along with simple interest at 1.20 times of the rate worked out on the basis of 1 year SBI MCLR plus 100 basis points as prevalent on 1st April of the respective year.

3.8. As per clause 13(4) of Tariff Regulation 2024, if the actual additional capital expenditure falls short of the projected additional capital expenditure allowed under provisions of Chapter 7 of these regulations or reduction of tariff on account of change in the rate of interest on loan or income tax rate, the generating company or the transmission licensee, as the case may be, shall not be required to file any interim true up petition for this purpose and shall refund to the beneficiaries or the long term customers, as the case may be, the excess tariff recovered corresponding to the projected additional capital expenditure not incurred or on account of change in the rate of interest on loan or income tax rate, in the same manner as specified in Regulation 10(6) and 10(7) of these regulations, as the case may be under intimation to the Commission:

NHPC LIMITED FARIDABAD

Provided further that the generating company or the transmission licensee shall submit the complete details along with the calculations of the refunds made to the beneficiaries or the long-term customers, as the case may be, at the time of true up.

4.0. JUSTIFICATION

The projected additional capital expenditure of ₹ 1197.01 Crore for tariff period 2024-29, submitted by Power Stations have been examined in O&M Division and Commercial Division and same have been finalized taking into account the operational requirement of the Power Stations and the provisions contained under the CERC Tariff Regulations 2024-29.

5.0. MANAGEMENT RECOMMENDATIONS:

The above proposal bears the recommendation of the Management.

6.0. RESOLUTIONS:

The Board may consider passing the following resolutions with or without modifications:

I. RESOLVED that the projected Additional Capital Expenditure of 20 Power stations amounting to ₹ 1197.01 Crore for the tariff period 2024-29 and is hereby approved.

II. RESOLVED FURTHER THAT CMD is authorized to modify the projected Additional Capital Expenditure based on the admissibility as per applicable CERC regulations/requirement at site.

DIRECTOR (TECHNICAL)

NHPC LIMITED FARIDABAD

EXTRACTS OF THE MINUTES OF THE 485TH MEETING OF THE BOARD OF DIRECTORS OF NHPC LIMITED HELD ON 16TH OCTOBER, 2024

XXXXX

ITEM NO.

485.2.3: APPROVAL FOR PROJECTED ADD-CAP EXPENDITURE OF POWER STATIONS FOR THE TARIFF PERIOD 2024-29:

1. The Board considered the agenda note. A presentation was given by Shri S.K. Mishra, GM (Electrical). During the presentation, the Board was informed that as per CERC Tariff Regulations, 2024 applicable for the period 2024-29, Board resolution was required in support of the proposed capital expenditure for the generating stations, from its internal resources.

2. The Board was apprised that the provision for additional capital expenses for efficiency improvement was not available in Tariff Regulation 2019-24, however, the same has been provided in the Tariff Regulations 2024-29. Board was further apprised about the year-wise projected additional capital expenditure of Rs.1197.01 Crore for 20 Power Stations of the Company for tariff period 2024-29, as summarized at para 3.2 & para 3.2.1 of the agenda note. It was informed that the projected additional capital expenditure had been finalized taking into account the operational requirement of the Power Stations and the provisions contained under the CERC Tariff Regulations 2024-29. The proposed add-cap expenditure would be reviewed after issue of CERC Orders determining the tariff of Power Stations for the period 2024-29.

3. The Board after discussion approved the proposal and passed the following resolutions:

NHPC LIMITED FARIDABAD

"**RESOLVED THAT** the projected Additional Capital Expenditure of 20 Power stations amounting to Rs.1197.01 Crore for the tariff period 2024-29 be and is hereby approved."

"**RESOLVED FURTHER THAT** CMD be and is hereby authorized to modify the projected Additional Capital Expenditure based on the admissibility as per applicable CERC regulations/ requirement at site."

7.9 Auxiliary Equipment and Other Structures.

7.9.1 Emergency Generators.

7.9.1.1 The installation and operation of emergency generators should be in accordance with NFPA 37, *Standard for the Installation and Use of Stationary Combustion Engines and Gas Turbines.*

7.9.1.2 Fire Protection.

7.9.1.2.1 Emergency generators located within main plant structures should be protected by automatic sprinkler, water spray, foam-water sprinkler, compressed air foam, or gaseous-type extinguishing systems. Sprinkler and water spray protection systems should be designed for a 0.25 gpm/ft² (10.2 mm/min) density over the fire area. Compressed air foam systems should be designed and installed in accordance with NFPA 11, *Standard for Low-, Medium-, and High-Expansion Foam*, and their listing for the specific hazards and protection objectives specified in the listing.

7.9.1.2.2 Where gaseous suppression systems are used on combustion engines that can be required to operate during the system discharges, consideration should be given to the supply of engine combustion air and outside air for equipment cooling.

7.9.2 Storage Rooms, Offices, and Shops. Automatic sprinklers should be provided for storage rooms, offices, and shops containing combustible materials that present an exposure to surrounding areas that are critical to plant operations. *(For oil storage rooms, see 7.7.4.5.)*

7.9.3 Warehouses. Automatic sprinklers should be provided for warehouses that contain high-value equipment and combustible materials that are critical to power generation or that constitute a fire exposure to other important buildings.

7.9.4 Fire Pumps. Rooms housing diesel-driven fire pumps should be protected by automatic sprinkler, water spray, foam-water sprinkler, or compressed air foam systems. If sprinkler and water spray protection systems are provided for fire pump houses, they should be designed for a density of 0.25 gpm/ft² (10.2 mm/min) over the fire area. Compressed air foam systems should be designed and installed in accordance with NFPA 11, *Standard for Low-, Medium-, and High-Expansion Foam*, and their listing for the specific hazards and protection objectives specified in the listing.

7.9.5 Cooling Towers. Cooling towers of combustible construction that are essential to continued plant operations should be protected by automatic sprinkler or water spray systems in accordance with NFPA 214, *Standard on Water-Cooling Towers.*

7.9.6 Auxiliary Boilers.

7.9.6.1 Auxiliary boiler-furnaces, their fuel burning systems, combustion products removal systems, and related control equipment should be designed, installed, and operated in accordance with Section 7.5.

7.9.6.2 Oil-fueled auxiliary boilers installed within main plant structures should be protected by automatic sprinkler, water spray, foam-water sprinkler systems, or compressed air foam systems. A sprinkler system is preferred throughout the auxiliary boiler room on a 0.25 gpm/ft² (10.2 mm/min) density. As a minimum, sprinkler or water spray protection should be provided as outlined in 7.5.1. Compressed air foam systems should be designed and installed in accordance with NFPA 11, *Standard for Low-, Medium-, and High-Expansion Foam*, and their listing for the specific hazards and protection objectives specified in the listing.

7.9.7 Vehicle repair facilities should meet the requirements of NFPA 30A, *Code for Motor Fuel Dispensing Facilities and Repair Garages.*

Chapter 8 Identification and Protection of Hazards for Combustion Turbines and Internal Combustion Engines

8.1 General.

8.1.1 Chapter 8 identifies fire and explosion hazards of combustion turbine (CT) and internal combustion engine (ICE) electric generating units and specifies recommended protection criteria.

8.1.2 It should be recognized that some CT generating facilities consist of manufactured modules wherein construction consists of siting these modules, providing fuel supply, essential services, and interconnections to the electric system, while other facilities consist of buildings specifically designed and built or modified for the CT generator and its auxiliaries. Therefore, some recommendations might be more suitable for one type of plant than another.

8.1.3* Modern ICE generating equipment is typically provided as a complete package requiring only a fuel source and electrical connections to the system to be powered. The installations should be either fixed, permanent or installed as a portable, temporary power source. The recommendations of this chapter should be applied to fixed nonresidential installations only.

8.2 Application of Chapters 4 through 7, 15, and 16. The recommendations contained in Chapters 4 through 7, 15, and 16 can apply to combustion turbine electric generating units. The Fire Protection Design Basis will determine which recommendations apply to any specific CT and ICE electric generating units. This determination is done by evaluating the specific hazards that exist in the facility and evaluating the level of acceptable risk for the facility. For large CT units or combined cycle plants, it is expected that most of the recommendations will apply, whereas for individual packaged CT and ICE units, many of the recommendations will not apply since the hazards described might not exist (e.g., small units might not have a cable spreading room or a warehouse).

8.3 General Design and Equipment Arrangement.

8.3.1 Adequate separation should be provided, in accordance with the Fire Protection Design Basis, between the following:

(1) Adjacent CT and ICE units
(2) Adjacent structures or exposures
(3) Adjacent properties (e.g., tank farms or natural gas facilities that could present a severe exposure)

8.3.2 Consideration should be given to equipment layout that is adjacent to CTs and ICEs and in line with planes of turbine and compressor disks that have a higher potential for damage from flying debris.

8.3.3 Compressors and regulating stations installed on-site should be protected in accordance with the recommendations of Chapter 8.

Licensed by agreement, for individual use and single download on June 3, 2013 to SENTRY DEPRESSURIZATION SYSTEM for designated use WILLIAM KENDRICK. No other reproduction or transmission in any form permitted without written permission of NFPA. For inquires or to report unauthorized use, contact licensing@nfpa.org.

7.4.4 Cable raceways not terminating in the control room should not be routed through the control room.

7.5 Cable Concentrations.

7.5.1 Consideration should be given to the use of fire-retardant cable insulation such as the types that pass the flame propagation test of the Institute of Electrical and Electronics Engineers, IEEE 383, *Standard for Type Test of Class IE Electric Cables, Field Splices, and Connections for Nuclear Power Generating Stations.*

7.5.2 Areas with significant concentrations of combustible cable jacketing or oil-filled cable should be protected with automatic sprinkler or water spray systems. However, if water-type systems cannot be used, foam or gaseous extinguishing systems should be provided.

7.5.3 Sprinkler or water spray systems should be designed for a density of 0.30 gpm/ft^2 (12.2 mm/min) over 2500 ft^2 (232 m^2). This coverage is for area protection. Individual cable tray tier coverage could be required based on the fire risk evaluation.

7.5.4 Cable with Fire-Retardant Coatings.

7.5.4.1 A suitable alternative for combustible jacket cable automatic protection would be cable with fire-retardant coatings. The method of protection should be based on the fire risk evaluation.

7.5.4.2 Care should be exercised in selection of fire-retardant coatings to ensure that derating of the cable is considered. Consideration should also be given to the ability to add or remove cables and to make repairs to cables protected with fire-retardant coatings.

7.5.5 Grouped electrical cables should be routed away from exposure hazards or protected as required by the fire risk evaluation. In particular, care should be taken to avoid routing cable trays near sources of ignition or flammable or combustible liquids. Where such routing is unavoidable, cable trays should be designed and arranged to prevent the spread of fire.

7.6 Cable Tunnels.

7.6.1 Where protection is required by the fire risk evaluation, cable tunnels should be protected by automatic water spray, automatic wet pipe sprinkler, or foam-water spray systems. Automatic sprinkler systems should be designed for a density of 0.30 gpm/ft^2 (12.2 mm/min) over 2500 ft^2 (232 m^2) or the most remote 100 linear ft (30.5 m) of cable tunnel up to 2500 ft^2 (232 m^2).

7.6.2 Portable high-expansion foam generators can be permitted to be used to supplement fixed fire protection system(s). *(See NFPA 1901, Standard for Automotive Fire Apparatus.)*

7.6.3 Ventilation and drainage should be provided for these areas in accordance with Chapter 5.

7.7 Transformers. Oil-filled main, station service, and startup transformers not meeting separation or fire barrier recommendations in 5.1.2 or as determined by the fire risk evaluation should be protected with automatic water spray, foam-water spray, or compressed air foam systems.

7.8 Indoor Oil-Filled Electrical Equipment. Automatic sprinkler, foam-water spray, water spray, and compressed air foam systems should be considered for oil-filled electrical equipment. Where the hazard is not great enough to warrant a fixed fire suppression system, automatic fire detection should be considered. *(See 6.8.2.)*

7.9 Battery Rooms. Battery rooms should be provided with ventilation to limit the concentration of hydrogen to 1 percent by volume. For further information, refer to IEEE 484, *Recommended Practice for Installation Design and Installation of Large Lead Storage Batteries for Generating Stations and Substations.*

7.10 Switchgear and Relay Rooms. Switchgear rooms and relay rooms should be provided with smoke detection systems.

7.11 Emergency Generators.

7.11.1 The installation and operation of emergency generators should be in accordance with NFPA 37, *Standard for the Installation and Use of Stationary Combustion Engines and Gas Turbines.*

7.11.2 Emergency generators located within main plant structures should be protected by automatic sprinkler, water spray, foam-water sprinkler, compressed air foam, or gaseous-type extinguishing systems. Sprinkler and water spray protection systems should be designed for a 0.25 gpm/ft^2 (10.2 mm/min) density over the fire area. Compressed air foam systems should be designed and installed in accordance with NFPA 11, *Standard for Low-, Medium-, and High-Expansion Foam*, and their listing for the specific hazards and protection objectives specified in the listing.

7.11.3 Where gaseous suppression systems are used on combustion engines, which can be required to operate during the system discharges, consideration should be given to the supply of engine combustion air and outside air for equipment cooling.

7.12 Air Compressors. Automatic sprinkler protection designed for a density of 0.25 gpm/ft^2 (10.2 mm/min) over the postulated oil spill or compressed air foam should be considered for air compressors containing a large quantity of oil. Compressed air foam systems should be designed and installed in accordance with NFPA 11, *Standard for Low-, Medium-, and High-Expansion Foam*, and their listing for the specific hazards and protection objectives specified in the listing. Where the hazard is not great enough to warrant a fixed fire suppression system, automatic fire detection should be considered. *(See 6.8.2.)*

7.13 Hydraulic Systems for Gate and Valve Operators. Hydraulic control systems should use a listed fire-resistant fluid. Automatic sprinkler protection designed for a density of 0.25 gpm/ft^2 (10.2 mm/min) over the fire area or compressed air foam systems should be considered for hydraulic systems not using a listed fire-resistant fluid. Compressed air foam systems should be designed and installed in accordance with NFPA 11, *Standard for Low-, Medium-, and High-Expansion Foam*, and their listing for the specific hazards and protection objectives specified in the listing. Where the hazard is not great enough to warrant a fixed fire suppression system, automatic fire detection should be considered. *(See 6.8.2.)*

7.14 Fire Pumps. Rooms housing diesel-driven fire pumps should be protected by automatic sprinkler, water spray, foam-water sprinkler, or compressed air foam systems. If sprinkler and water spray protection systems are provided, they should be designed for a density of 0.25 gpm/ft^2 (10.2 mm/min) over the fire area. For automatic foam-water sprinkler systems, a density of 0.16 gpm/ft^2 (6.5 mm/min) should be provided. Compressed air foam systems should be designed and installed in accordance with NFPA 11, *Standard for Low-, Medium-, and High-Expansion Foam*, and their listing for the specific hazards and protection objectives specified in the listing.

7.15 Storage Rooms, Offices, and Shops. Automatic sprinklers should be provided for storage rooms, offices, and shops

Sub.: **Maintenance of RTUs installed under ULDC Projects for Central Sector Generating Stations**

Dear Sir,

This is with reference to your letter ref. no. NH/O&M/GMC/IT-A/2016/3376 dated 03/10/2016 regarding maintenance of RTUs installed under ULDC Projects for Central Sector Generating Stations.

As indicated in our earlier letter ref. C-LDC-ULDC-RTU Mtc dated 25/07/2016 (copy enclosed), POWERGRID shall continue the maintenance of the RTUs till completion of 15 years since DOCO for the respective Regions. The DOCO of ULDC Projects of various Regions is as follows :

Name of the Region	DOCO Date
Northern Region	01.08.2002
North-Eastern Region	01.08.2003
Eastern Region	01.09.2005

The commissioning dates of RTUs at various stations of NHPC are staggered because of non-availability of front (Generating Station came up late). Further, new RTUs were installed at Salal, Uri and Bairasiul under O&M head as already informed by our letter dated 07.10.2016(Copy attached) and their maintenance is also till DOCO.

Hope, the above clarifies the issue of maintenance of RTUs installed under ULDC Schemes. Accordingly, NHPC may take suitable action for maintenance/replacement of RTUs installed at their Generating Stations under ULDC Projects beyond 15 years from DOCO date for respective Region.

Thanking you,

Yours faithfully,

(Sunil Agrawal)
Executive Director (LD&C)

Sub: Maintenance of RTUs installed under ULDC Projects for Central Sector Generating Stations.

Ref: C-LDC-ULDC-RTU Mtc dated 25.07.2016

Sir,

Reference is invited to the RTUs installed and maintained by POWERGRID under ULDC projects at NHPC power stations. As indicated through your letter under reference, POWERGRID shall continue the maintenance of the RTUs till the completion of 15 years since DOCO for the respective regions. It has also been mentioned that ULDC projects were commissioned progressively from July 2002 to February 2006 in Southern, Northern, North-Eastern, Eastern & Western regions.

As per our Power Stations records, RTUs were installed/commissioned by Power Grid at most of our Power Stations during the period from 1999 to 2008 and installation of new Husky RTUs at Salal, Bairasiul and Chamera-I Power Stations during 2012-2013 (Please refer Annexure-A).

As per CERC regulations, the recovery period of the capital cost and the useful service life of the RTU is 15 Years. We understand that POWERGRID would have taken appropriate action for recovery of the capital cost towards investment through tariff in 15 years since DOCO of respective RTU and accordingly POWERGRID will continue their maintenance services till 15 years from commissioning of respective RTU. NHPC shall take up necessary action appropriately for replacement/maintenance of these RTUs on completion of useful life of 15 years.

Thanking You,

Yours faithfully,

(Balraj Joshi)

Sub:**Maintenance of RTUs installed under ULDC Projects for Central Sector Generating Stations**

Dear Sir,

As you may be aware that Unified Load Dispatch & Communication Projects (ULDC) were established on Regional basis for providing EMS/SCADA and Communication System for Management of Regional Power Grids as per GoI mandate and agreement signed with Constituents. These ULDC Projects were commissioned progressively from July 2002 to February 2006 in Southern, Northern, North-Eastern, Eastern & Western regions.

As part of ULDC Projects, Remote Terminal Units (RTUs) which are backbone element for data acquisition of existing EMS/SCADA system were installed/commissioned at various Generating plants/stations & EHV substations under State sector as well as Central Sector. These RTUs commissioned at various Generating plants/stations of NTPC, NHPC, NPC etc are presently maintained by POWERGRID. As per CERC regulations for ULDC Projects, the recovery period of the capital cost towards investment by POWERGRID through tariff is 15 years and accordingly, POWERGRID will continue the maintenance of the RTUs installed in these stations till the completion of 15 years since DOCO for the respective regions. Any maintenance required for the above referred RTUs beyond this period has to be carried out by the concerned Generating Companies/Utilities. On completion of the useful service life of 15 years, these RTUs are to be replaced / upgraded by individual concerned utilities for ensuring it's reporting of data to the respective RLDCs.

As per Indian Electricity Grid Code (IEGC) 2010, Principle regulations referred at clause 4.6.2, "All Users, STUs and CTU shall provide Systems to telemeter power system parameter such as flow, voltage and status of switches/ transformer taps etc. in line with interface requirements and other guideline made available by RLDC. The associated communication system to facilitate data flow up to appropriate data collection point on CTU's system shall also be established by the concerned User or STU as specified by CTU in the Connection Agreement. All Users/STUs in coordination with CTU shall provide the required facilities at their respective ends as specified in the Connection Agreement."

2 AUG 2016 1979

...Contd.

पंजीकृत कार्यालय: बी–9, कुतब इंस्टीट्यूशनल एरिया, कटवारिया सराय, नई दिल्ली–110016 दूरभाष: 011-26560112, 26560121, 26564812, 26564892, फैक्स: 011-26601081

सर्वहित एवं राष्ट्रहित में ऊर्जा बचाएं
Save Energy for Benefit of Self and Nation

Considering this, all the concerned Generating Companies/Utilities are requested to take necessary action for maintenance / replacement of the aforesaid existing RTU installed in their respective Power plants/Generating stations after the completion of useful life of 15 years from DOCO to ensure continuous reporting of data to respective RLDCs.

Looking for your support & needful co-operation in the matter please.

Thanking you,

Yours faithfully,

(R. P. Sasmal)
Director (Operations)

Subject: Requirements for Automatic Generation Control (AGC) Connecting Equipment at Power Plants

Sir / Madam,

Hon'ble Central Electricity Regulatory Commission (CERC) in the matter of Automatic Generation Control (AGC) implementation in India has issued the direction that all thermal ISGS stations with installed capacity of 200 MW and above and all hydro stations having capacity exceeding 25 MW excluding the Run-of-River Hydro Projects irrespective of size of the generating station and whose tariff is determined or adopted by CERC are directed to install equipment at the unit control rooms for transferring the required data for AGC as per the requirement to be notified by the National Load Despatch Centre (NLDC). The CERC Order 319/RC/2018 dated 28th August 2019 is available at http://www.cercind.gov.in/2019/orders/319-RC-2018.pdf

In this regard, the minimum requirements for AGC connecting equipment at power plants based on the experience of the AGC Pilot Project are hereby being issued by NLDC and is attached as **Annexe-1**. The list of plants identified for monitoring by NLDC as per CERC Order is attached as **Annexe-2**.

All the power plants are hereby requested to provide the infrastructure for meeting the specified requirements. Also, all the power plants are requested to take necessary action for arranging the communication (through redundant and alternate paths) from the existing nearest wideband communication node to the unit control room (where remote terminal unit would be located) through redundant fibre optic cables, in coordination with Central Transmission Utility (CTU).

It may please be noted that all the ISGS stations whose tariff is determined or adopted by CERC should be AGC-enabled **before 28th February 2020 as per the Order of the Hon'ble Commission**. Therefore, it is requested that the arrangements may kindly be completed by the power plants before **31st January 2020.**

Any queries may please be emailed to agcnldc@posoco.in

NHPC LIMITED FARIDABAD

Annexe-1

General Requirements for Automatic Generation Control (AGC) Connecting Equipment at Power Plants

The following signals would be handled as a minimum in AGC. Apart from the below mentioned signals, some other power plant specific signals also might be needed on case to case basis. Hence, provision for expansion and spares may be included.

A) Analog Input data required per generating unit

1. Unit Load Set Point (ULSP)
2. Actual Generation MW
3. Unit Capability
4. RGMO/FGMO/Governor input to governor
5. Delta P (Acknowledgement/ feedback) = AGC Set Point – ULSP
6. Reactive Power Actual MVAR
7. AVR Voltage Set Point
8. Low Voltage (LV) side Actual Voltage
9. Generator Transformer (GT) Tap Position
10. Distribution Factor (fraction for distribution of AGC DeltaP in between the units of the power plant)

Additional Analog inputs from Hydro power plants

11. Minimum load at which unit can stably run after synchronization – Unit wise (P1) (in MW)
12. Forbidden zones or high cavitation zones - Unit-wise (From MW to MW) - P2 to P3
13. Maximum loading possible on unit (continuous) (P4)
14. Declared Energy for the day
15. Schedule Energy (Cumulative)
16. Water gross head (m)

Additional Analog inputs from Gas power plants

17. Reference exhaust gas temperature
18. Actual exhaust gas temperature

B) Digital Input data required per generating unit

1. Circuit Breaker Status on/off
2. Governor status on/off
3. AGC Local/Remote

Additional Digital inputs from Hydro power plants

4. Pumping Status on/off

C) Analog Output data required per generating unit

1. AGC Set Point
2. AGC Suspend Status – Digital/Analog Output per unit
3. SCED schedule

D) Hardware Specifications

Main CPU Card, Communication Card with communication controller, DB 9 serial interface ports (101), minimum two Ethernet ports (104) interface Tx / Rx. Firmware of communication protocol should be loaded.

The following hardware/software is needed as a minimum at the plant per unit:

a) Analog input card: 32-bit processor with at least 32 analog inputs /outputs per generating unit, with scope for expansion.

b) Analog output card: 32-bit processor at least 16 analog outputs per generating unit, with scope for expansion.

c) Digital input card: 32-bit processor with at least 8 digital inputs per generating unit, with scope for expansion.

d) Digital output card: 32-bit processor with at least 4 digital output signals per generating unit, with scope for expansion. (Provision can be useful for connecting digital devices in future)

e) Shall be capable of communicating over IEC 60870-5-104 protocol with RLDC/NLDC. Should be capable of reporting to multiple masters (at least 4) simultaneously over IEC 104.

f) Shall have the capability of programing /parametrization, performing microprocessor level calculations and accepting logic. RAM/ flash memory may be capable of handling complex codes. (Arithmetic and logical operations like +, -, *, /, if, else, while, do, OR, AND, NOT etc. would be needed)

g) Shall have the capability to acquire analog inputs of standard 4-20 mA current and 0-5 Vdc etc. or raise /lower command signals from AGC server / transducer etc.

h) Shall have GPS clock synchronisation facility as per the standard protocols.

i) Shall operate over the Standard DC input voltage of 24-60 V DC. Shall have the capability of automatic start up following restoration of power after an outage. Internal battery backup to hold data, date/time in SOE buffer memory is needed.

j) All Sequence of Events (SOE) shall be reported to RLDCs/NLDC.

k) Shall be capable of storing data on an external memory device.

l) Shall have communication interfaces via insert- able serial interface modules for Ethernet.

m) The associated system at power plants end shall be able to log / record the AGC signal / command from NLDC / RLDC (for the station before bifurcation) at an appropriate interval (say 2 sec or configurable) and shall integrate the AGC command over a period of 1 min, 5 min and 15 min period or user configurable period. The integrated value of AGC command will be stored in the data base with GPS time stamping.

NHPC LIMITED
एनएचपीसी
N·H·P·C
FARIDABAD

n) Shall demonstrate capabilities to Plant/NLDC with an example setup.

E) Other associated hardware /cabling requirement

a) Line interface units (LIU), network switch along with ethernet ports, router cum firewall and patch cards as per the assessment & requirement.

b) Optical fibre cabling (through redundant and alternate paths) from the nearest wideband node up to the unit /plant control room. Shall ensure necessary equipment at wide band node switch yard for interfacing with the available ports of CTU/POWERGRID. Shall include necessary accessories to achieve communication redundancy at RTU and switchyard.

c) GPS clock with standard communication protocol for synchronisation.

d) PC and related software for entering distribution factor as well as storing /logging the data as mentioned in Sl. No. D (I).

F) Basic logics to be implemented at the power plant RTU

The basic logics given below may be implemented for safe operation. Apart from these, some other logics may need to be implemented on case to case basis.

a) DeltaP analog is calculated as, DeltaP = AGC Set Point – ULSP
b) For Distribution Factor Analog Input of 'n'units, check $\sum_1^n(Distribution\ Factor) = 1$
c) Scheduled Energy (Cumulative MWh) for Hydro is calculated as $\sum_{t=1}^{96}(Scheduled\ MW/4)$
d) To detect communication failure and convert DeltaP analog output to zero
e) To detect AGC Suspend status and convert DeltaP analog output to zero
f) To detect AGC Local status and convert DeltaP analog output to zero

NHPC LIMITED FARIDABAD

W.P. (PIL) No. 04/2017
In Re : Release of Water from Dikchu Hydel Power Project

BEFORE
MR. JUSTICE SATISH K. AGNIHOTRI, CJ &
MR. JUSTICE BHASKAR RAJ PRADHAN, J.

14.09.17 Present : Mr. N. Rai, Sr. Advocate with Ms. Tamanna Chhetri Advocate as Amici Curiae.
(Agnihotri, CJ)

Mr. Karma Thinlay, Sr. Govt. Advocate with Mr. Santosh Kr. Chettri and Ms. Pollin Rai, Asstt. Govt. Advocates for State-respondents 1 to 3.

Mr. T.W. Barfungpa, Advocate for Respondent No. 4.

Ms. Aruna Chhetri, Ms. Hemlata Sharma and Mr. Kawong Bhutia, Advocates for Respondent No. 5.

Mr. Rahul Rathi and Ms. Phurba Diki Sherpa, Advocates for Dans Energy Pvt. Ltd. and Shiga Energy Pvt. Ltd.

Ms. Sonam W. Dorjee and Mr. Sudhir Prasad, Advocates for Chuzachen Hydro Electric Project and Rongli Dam, Rongli.

Mr. Ankur Gupta, Ms. Sabina Chettri and Ms. Saroja Chettri, Advocates for Teesta Urja Ltd.

Mr. G. Ramakrishna, President of Teesta Urja Ltd. in-person.

.....

The affidavits have been filed by all the Projects operating in the State of Sikkim. The concerned District Collectors are directed to examine the affidavits and on site inspection of the ground reality, submit the response on the concerned project, having the territorial jurisdiction, within two weeks.

NHPC LIMITED
FARIDABAD
1379

Learned Amici Curiae are also advised to examine the affidavits and submit their response.

On perusal of the affidavit filed by the Manager, Teesta Stage-V, Hydro Power Project at Balutar, P.O. & P.S. Singtam, it is revealed that a sum of Rs.10.00 lakh was deposited with the District Collector, North Sikkim. In the covering letter, it is indicated that the amount is for procurement of motorized raft boats and other equipments, however, in the affidavit, it is stated that the amount is deposited with him to meet with any emergency/ unforeseen situation/circumstances, in addition to purchase and operation of motor boats. This averment requires clarification.

It is not for the District Collector to purchase the motor raft boats and other equipments. Accordingly, the Teesta Stage-V, Hydro Power Project is directed to purchase motor raft boats and other equipments before the next date of hearing, as required under the guidelines and the money so deposited may be utilized to meet the emergency/ unforeseen situation/circumstances.

Call on 11.10.2017.

DAM SAFETY INSPECTION REPORT

TEESTA-V POWER STATION (510 MW)

(Pre-Monsoon Dam Safety Inspection May-2020)

The pre- monsoon dam safety inspection of Concrete Gravity Dam and appurtenant structures, Adits, Surge shaft area and Power house complex of Teesta-V PowerStation was carried out during 26.05.2020 to 28.05.2020. Inspection team comprising of the following officers duly constituted by HOP, Teesta-V Power Station visited and inspected the concrete gravity Dam & appurtenant structures and Power House complex in presence of officials from Power Station:

1. Sh. Rajappan K, General Manager (C), Teesta-V Power Station.
2. Sh. Rajesh Ranjan, Dy. General Manager (HM), Teesta-VI HE Project.
3. Sh. Bhaira Ram Godara, Senior Manager (Geology), Teesta-VI HE Project
4. Sh. Amarendra Kumar Singh, Senior Manager (Civil), Teesta-VI HE Project.
5. Sh. Sonam Dadul Bhutia, Senior Manager (Civil), Teesta-V PowerStation.

Dam complex & Power house complex was inspected by the above team. Inspection and observations were followed by discussion with Sh. Sahadev Khatua, GM (I/C), Teesta-V Power Station.

The power station has been functioning satisfactorily since its commissioning during year 2008.

The status of observations raised during previous Post-monsoon dam safety inspection report was also reviewed by dam safety inspection team. The point-wise status is given at **Annexure-I**. Detailed observations and findings of DSI team are as under:

1. GENERAL

The Dam Safety Inspection was carried out as per CWC dam safety procedure and Guidelines. Copies of EAP, DMP, Data Book, Instrumentation Manual, Reservoir Operation and Silt flushing guidelines (Rev-03) and Guidelines for Repair and Rehabilitation of Civil structures are available with the Power Station. Power station is further requested to follow the *Guidelines for Repair and Rehabilitation of Civil structures of Hydroelectric Power stations for technical specifications issued by D&E div.* during Nov, 2016 for repair and restoration of various components.

NHPC LIMITED FARIDABAD

1382

Following information was provided by the Power Station/ observed during inspection by the DSI team:-

1.	Reservoir level on the day of inspection	:	**EL.571.50 m**	On 26.05.2020 at 12.00 Hrs
2.	Outflow from the reservoir on the day of inspection	:	**543 cumec**	On 26.05.2020
3.	Max. Reservoir level recorded during preceding monsoon (from 26.10.2019 to till date)	:	**EL.574.20 m**	On 16.02.2020
4.	Min. Reservoir level recorded during preceding monsoon (from 26.10.2019 to till date)	:	**EL.568.20 m**	On 01.01.2020
5.	Maximum Spillage through Spillway Radial Gates:	:		
	SRG-I	:	**NIL**	
	SRG-II	:	**644.10 Cumec**	On 23.05.2020
	SRG-III	:	**411.00Cumec**	On 25.05.2020
	SRG-IV		**144 Cumec**	On 25.05.2020
	SRG-V		**NIL**	
6.	Radial gates last operated on	:	**SRG-1** on 25.09.2019 **SRG-2** on 25.05.2020 **SRG-3** on 25.05.2020 **SRG-4** on 25.05.2019 **SRG-5** on 25.09.2019	
7.	Max. Seepage observed in the Dam gallery	:	**9.70 lps**	Measured by V-notch in Gallery-C at EL.529.22 m. date: 09.11.2019. 12.00 Hrs, reservoir level: 572.10m
8.	Min. Seepage observed in the Dam gallery	:	**1.8 lps**	Measured by V-notch in Gallery-D at EL499.40 m, date: 20.02.2020. 10.17 Hrs, reservoir level: 569.10 m.
9.	Seepage observed on the Day of inspection on 26.05.2020. During the time of inspection, the sump was half filled. No overflow from sump was observed.	:	**2.35 lps**	Measured by V-notch Gallery-C at EL529.22 m.

NHPC LIMITED FARIDABAD

NHPC LIMITED FARIDABAD

10.	Latest Chemical Analysis for reactive and corrosive properties of water		Chemical Analysis of water sample from dam gallery and reservoir on 27.12.2019 has been done by Power station and test result received from NTH, Kolkata

2. CIVIL COMPONENTS
DAMCOMPLEX

2.1 GENERAL OPERATION, ACESS AND COMMUNICATION

- Round the clock monitoring & operation of Dam is being done as per monsoon schedule. Reservoir regulation is being done as per Operation manual available with In-charge of Dam Control Room. Dam operation crew is aware of the danger situation arise after landslide occurred on 13th August 2016 in upstream of Mantam village. Stipulated manual/ operating procedure were available at site during inspection visit. Discharge & water level are maintained & recorded in the log books by PS. About 273 cumecs spillage was from reservoir was observed on the day of inspection. Reservoir level was at +EL.571.50 m.

- Access Road to Dam top has been restored and made accessible for vehicle movement. Dam elevator was in working condition on the day of inspection and galleries were accessible by elevator & stair shaft. DSI team also visited the tail end of reservoir near Phidang Bridge and confluence of Dikchu Nallah & River Teesta.

- Dam control room has mobile and VSAT phone facility for voice communication with Power house/ designated incident controllers. EPABX facility is being used for tele-communication within dam complex. The VSAT communication is being used for access to web services. Independent wireless system within power station area is recommended for reliable communication during adverse condition especially during monsoon.

- Resident villagers of right bank have access through Dam top road. Security measures through restricted entry/ access control should be made mandatory to avoid any chance of vandalism. Gates for entry to dam gallery should remain closed except during maintenance/observation of instrument.

- The damaged access road near the entrance gate has been repaired/ restored by placing wire crate and by filling mucks; however side drain need to be constructed if possible. The cracks in the concrete top of road near the entrance gate of dam and towards intake area were found sealed by cement grout.

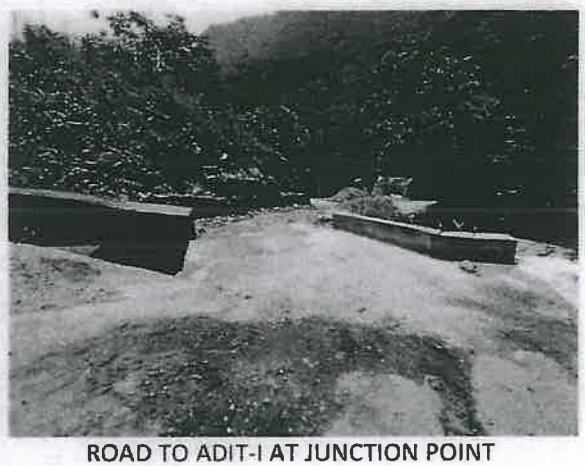
- Alternate road to Dam top on upstream of Intake constructed by power station was also inspected by DSI team. Minor slides were observed at two locations, power station is advised to keep the road motarable during monsoon as an emergency approach.

NHPC LIMITED FARIDABAD

2.2 LEFT BANK SLOPE PROTECTION FROM RD 2400m to 2460m Near RD 220m FROM DAM AXIS

- The left bank slope from RD 2400m to 2460m was damaged and slided during the monsoon season last year has been protected by placing wire crates/concrete wall and dam top road has been made accessible for vehicular movement, however wearing course and side drain need to be constructed if possible. Power station is being advised to clean/maintain the catch water drains to avoid any ingress of surface water in this area.
- Drill holes to find out the anticipated rock line in the area is still to be completed by the power station.
- The slided area near Adit-1 road junction has been restored/ protected by power station and water has also been channelized by step drains through culvert.

APPROACH ROAD TO DAM TOP AT
RD ±(2400 to 2460M)



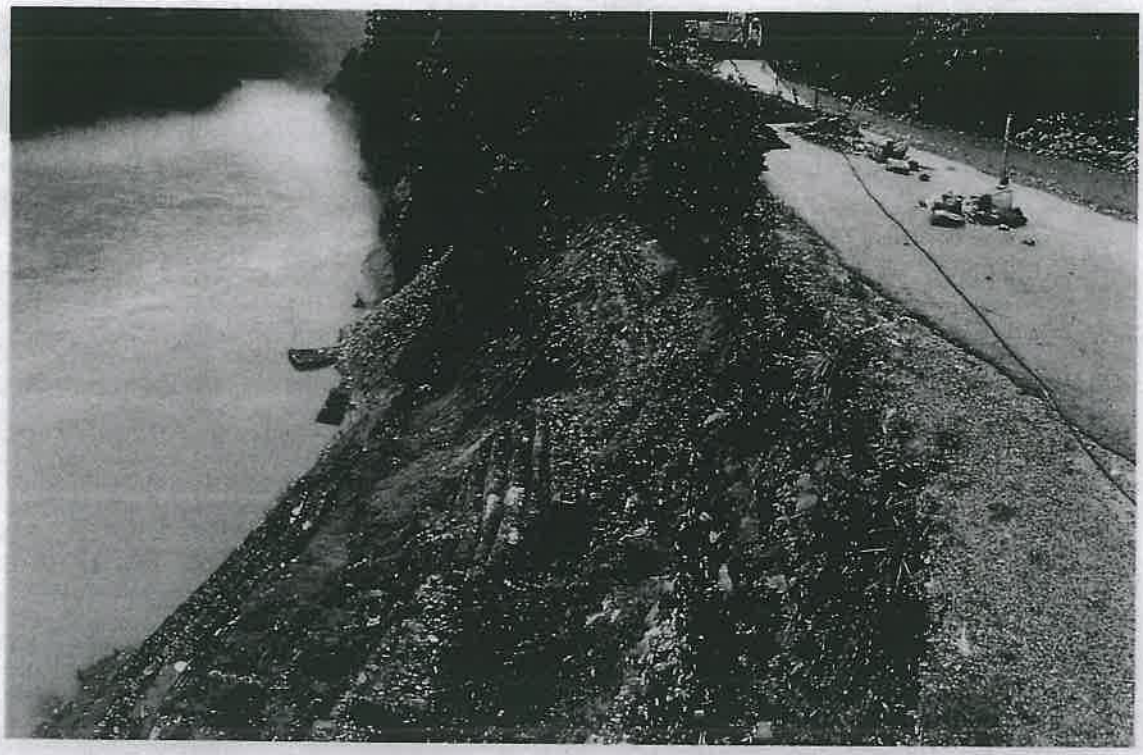
ROAD TO ADIT-I AT JUNCTION POINT

2.3 DAMAGE OF LEFT BANK SLOPE NEAR DIKCHU BRIDGE

- Left bank slope near Dikchu Bridge was damaged /slided during the monsoon season, which has caused the reduction in road width at some places and scouring at bottom levels. During inspection it was observed that the protection work to stabilise the slided area was in progress by providing wire crates and PP rope gabions. It was informed that about 25% work has been completed and progress of the work was hampered due to nationwide lockdown to prevent COVID-19.

NHPC LIMITED
FARIDABAD

- Power Station is advised to give urgent attention to the repair / protection of the slope upto El.580m to avoid any further progression and complete the work as early as possible.



PROTECTION WORK NEAR DIKCHU BRIDGE

2.4 NON-OVERFLOW BLOCKS

- The upstream face of the dam was found in satisfactory condition above reservoir level. Downstream face of the dam (Breast wall) was inspected from access at trunion beam at EL. 554.0 m and found in satisfactory condition.

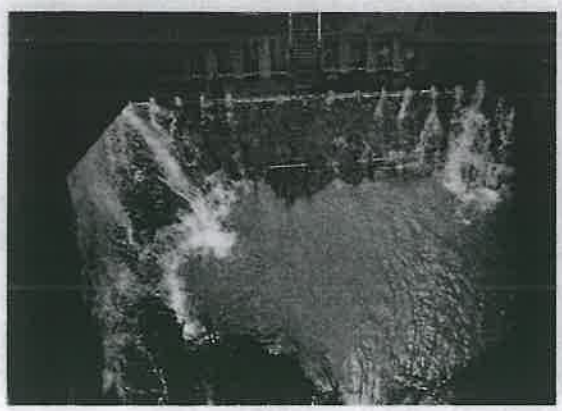
- Seepage observed in the left abutment at 40m d/s at about ±EL 565.0 m is being monitored through a V-notch installed at lowermost point. The seepage was about 5.20 lps at Reservoir El. 572.00 m. PS was requested to monitor the seepage regularly and intimate to D&E Div. for any significant variation in the quantity of seepage.

2.5 OVERFLOW BLOCKS / SPILLWAYS

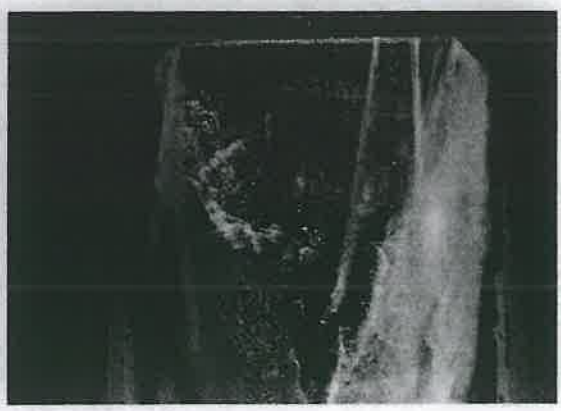
- Stoplogs in spillway bay No. 5 was found lowered down into the grooves for the work of laying of steel liner upto 10m downstream from the radial sill beam and maintenance of radial gate. The work for laying of steel liner alongwith grouting has been completed.

NHPC LIMITED FARIDABAD

- It was intimated that the repair of spillway glacis of bay S-2 by laying of steel liner upto 10m downstream from the radial sill beam was completed in May 2019 however, the glacis could not be inspected as radial gate in this bay was open at the day of inspection.
- Damages were observed in spillway glacis and side walls of bay S1, S3 and S4 downstream from radial gate sill beam. The bucket portion of these bays could not be inspected due to high tail water level. It was intimated that the repair of these bays by laying of steel liner and HPC has already been awarded but due to local problem created by the villagers of Aap Dara and further due to declaration of nationwide lockdown due to COVID-19 and its consequences, the repair work in these bays could not be taken up. It was also informed that the repair work for the above mentioned bays will be taken after the monsoon 2020.
- The cementitious mortar applied on pier faces were also seen damaged and chipped away at various locations of bay S1, S2, S3 and S4.
- Hair line cracks were observed at crown of R1/S1 trunion gallery. PS is advised to monitor the cracks by providing tell-tale and any further distress may be reported to D&E Division.
- It was observed by DSI team during the post monsoon visit that the gate operation in monsoon season maximum flood discharge is passed mainly by opening of one or two bay only. The matter was discussed in detail with the officers at Dam and observed that the sequences of gate operation is being done, keeping in view, reservoir operation manual, damages in glacis/gates & accessories and also considering the vulnerability of left bank stability while other bays should also be opened as per reservoir operation manual.



DAMAGES IN SPILLWAY GLACIS BAY NO. S-1



DAMAGES IN SPILLWAY GLACIS BAY NO. S-3

DAMAGES IN SPILLWAY GLACIS BAY NO. S-4

SPILLWAY GLACIS BAY NO. S-5

2.6 POWER INTAKE AREA

- PS has installed tell-tales to monitor the cracks at protection wall between Dam and Intake area, which were inspected during the visit. It is being advised that these should be monitored on regular basis and any distress if observed the same may be reported to D&E Division. Further, survey targets/topographical marker should also be installed for better monitoring.

- During last dam safety inspection visit, PS was advised to complete the backfilling of any cavity by concrete below intake raft during flushing of the reservoir by timely planning the activities. It was informed that during the last reservoir flushing, the cavity was filled with concrete. However, the same could not be inspected as the reservoir was charged at the day of inspection.

- The automatic water level recorders in the gauge wells has still not restored for data to be matched with the water level recorders installed in dam area at piers. The water level recorders need to be restored as early as possible.

2.7 DAM FOUNDATION GALLERIES AND SHAFTS

- Minor seepage was observed at R/B grouting gallery at interface between R-1 block and rock at EL 529.22 M & quantity was 1.75 lps on the inspection day on 26.05.2020. The seepage water was being measured by installing a V-notch and record is being maintained.
- Significant seepage has been observed in the left bank drift (C-gallery) at EL 529.22m since commissioning of dam. Seepage of 0.60 lps was observed on the inspection day on 26.05.2020. However, during the inspection seepage from left bank drift could not be measured as the seepage water was being stored in sump.
- During post monsoon visit, it was advised to mark the details of the seepage points on the geological plan of the drifts for working out the seepage controlling measures in the drifts. PS is advised to provide the same at the earliest so that necessary measure shall be advised by D&E Division.

NHPC LIMITED FARIDABAD

- Cleaning/drilling of choked porous drains/pressure relief holes in the dam/foundation galleries should be expedited as advised by DSI team in their earlier visit. However, it was informed that the said work is in the stage of approval for award.
- The lighting and cleaning of the galleries were found to be satisfactory. However, cleaning of side drains is essential from time to time for proper drainage of seepage water.
- Fresh water sample with dissolved leaching compound from dam gallery as well as water sample from reservoir was sent to National Test House, Kolkata in the month of December 2019 for the chemical analysis. It was informed that the test reports have been received and forwarded to D&E Division.
- The suggested grouting in foundation gallery at block S3, where clayey material was observed needs to be expedited by PS.

2.9. STATUS OF INSTRUMENTATION IN DAM

- All the pendulums (direct and inverted) are reported to be functional. Some of MPBX has been reported non functional as well as fluctuating in readings which need to be fixed up by consulting vendor/manufacturer.
- PS is again being advised to repair /restore the malfunctioning uplift measuring stand pipes in consultation with manufacturers. Few perimetric joint meters also giving fluctuating reading to be fixed up by consulting vendor/manufacturer.
- Most of the instruments are in working condition and readings are taken regularly. The present status of the instruments is enclosed herewith as Annexure-II.

3. ADITS TO DESILTING CHAMBER/SFT

- Oozing of water observed in the cross bottom drains near SFT-3 is being regularly observed by PS and no increase in oozing was reported. This need to be kept under regular observation.

- Cracks in some of Tell-tales installed on floor concrete between gate grooves of emergency and service gate of GOC-DC were observed. PS was advised to install fresh dated Tell-tales in adjacent location and any further distress if observed may be reported to D&E Division.

- Inspection shaft to DC and DC gate shafts has been secured by railing as advised earlier.
- Seepage water in SFT outlet channel could not be inspected as the gates were opened during the time of inspection. However, no increase in seepage was reported.

4. ADITS TO HRT / PENSTOCK ERECTION GALLERY (PEG)

- Minor to moderate quantum of water was observed through crack/holes of roof near plug of Adit-3 and Minor seepage of water was observed from the overt at the interface of rib and rock portion at distance of 50 m from plug in Adit-III. Seepage water needs to be channelized through V-notch to measure the quantum of seepage on regular basis.
- No further loose fall has been noticed/reported around RD 135m from portal in Adit II. PS is suggested for regular monitoring of this area and if further loose fall occurs, the same has to be intimated to D&E division for suggestion/support measures.

- Seepage of water was noticed from holes/ pipe in right side wall few meters away from concrete plug face in Adit II. The same need to be monitored on regular basis.

- Seepage water was observed coming through two holes in plug roof in the ADIT-IV and minor seepage was noticed from the crown at the interface of ribs and rock portion at some intervals in the Adit-IV. Further, it was also observed that water/silt was accumulated in front of the portal gate. Power Station is being advised to clear the area and drains to make the entrance accessible.

- ATPS/Adit to PEG could not be inspected due to accumulation of water near plug and upper bend of pressure shaft. Seepage was noticed from the crown end of the ATPS. Proper dewatering and illumination is required in this area to enable the inspection.

- It was observed that the seepage water is not flowing through the installed V-notch at ADIT-IV, which needs to be channelized to ensure the proper monitoring of seepage. PS was advised to explore the possibility of injecting chemicals into holes/cracks by specialized agency for controlling the seepage, which is still pending.

5. SURGE SHAFT AREA

- PCC flooring of 2 to 3 m radius has been laid around the surge shaft on overburden for proper draining of the water away from the surge shaft. It is suggested to construct side drains along the adjoining hill to channelize the surface water.
- The painting of the underside of walkway around the shaft and grating cover on the shaft is still pending. It was informed that the work has been awarded. PS is advised to complete the work at the earliest possible.
- The work for fixing of hand railing in the stairs was in progress. The stair needs to be cleaned periodically for easy access.
- It was informed that the instruments installed in surge shaft are being monitored on regular basis. Growth of vegetation all over the contour drains was observed and PS was advised to clear/clean the drains periodically.

NHPC LIMITED FARIDABAD

6. POWER HOUSE COMPLEX

- Overt of the Power house cavern was inspected and found satisfactory. Dripping and leaching at few places was observed in crown leading to rusting of few frames and PVC sheets. Few sheets have been found painted but there are still few sheets which still need to be replaced and painted. PS is advised to inspect the same periodically and replace/paint the rusted sheets.
- During inspection of upstream drainage gallery of the powerhouse silt and other materials were observed in drains and stairs leading to drainage gallery. PS is suggested to keep it clean. A V-notch has been installed near sump well to measure the amount of seepage.
- Seepage observed earlier by DSI team on the wall of approach staircase leading to drainage gallery needs to be channelized properly in the gallery and leaching material be removed periodically.
- All instrumentation provided in the PH cavern be periodically monitored, record maintained and data be forwarded to Design Division for record/analysis.
- Hairline cracks were observed in Unit-I column near stair case at generator floor. PS is suggested to install dated glass tell-tale to monitor the cracks.
- Tell-tales in MIV floor installed on cracks on cavern upstream wall (Hill slide) near Inlet valve III & II found intact. No further cracks have been observed in the tell-tales provided.
- Tell-tales installed on hairline cracks in Turbine and generator barrel of unit-I, II & III were found intact. Additional glass tell-tales may be installed over the crack so that variation/enlargement of cracks can be monitored.
- All the existing weep holes provided in the downstream wall near unit 1 & 2 and below the turbine floor as well as MIV floor area be cleaned from time to time properly for effective drainage and if required some additional weep hole be provided and water channelized properly.
- Tell-tales provided on crack on the upstream wall of transformer cavern remains unbroken. No further manifestation is noticed.
- Minor seepage was seen near zone-8, at junction of cable tunnel and exit approach towards GIS/VT portal. This should be drained out safely and keep watch on it.

RUSTED/DAMAGED ROOF OF POWER HOUSE

POWER HOUSE DRAINAGE GALLERY

STAIRS LEADING TO DRAINAGE GALLERY

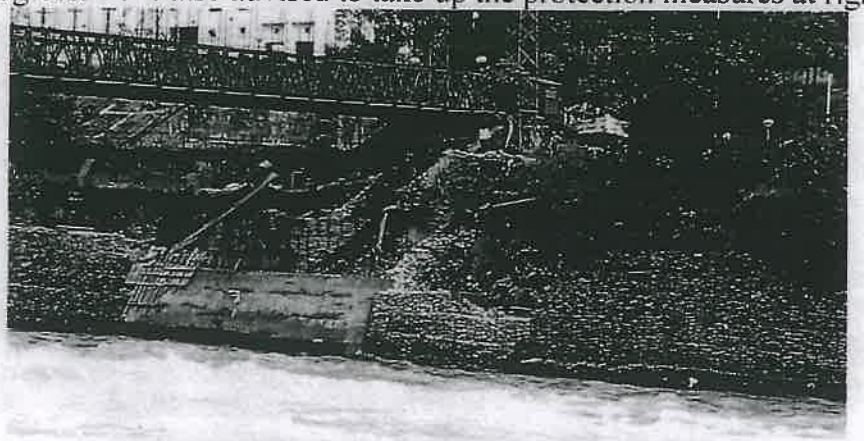
7. TRT OUTLET

- TRT apron could not be inspected as all the three machines were in operation. It was informed that few concrete blocks has been casted but could not be placed due to COVID-19 lockdown and the same will be placed during the next lean period as

suggested in post monsoon DSI report.

- The cavity near the transmission tower in the river side was found filled by PP rope gabions and wire crates.

- During inspection, it was observed that protection measures at left bank steel bridge foundation in form of PP rope gabions / boulder wire crates and RCC concrete wall was in progress. PS is also advised to take up the protection measures at right bank.



PROTECTION WORK AT LEFT BANK STEEL BRIDGE

8. RESERVOIR FLUSHING

- Power station intimated that last reservoir flushing was carried out on 25.9.2019. PS is suggested to carry out the reservoir flushing as per reservoir operation manual and silt flushing guidelines. Further as suggested by DSI team during earlier visit reservoir flushing operation at Teesta-V and Teesta-III PS should be done in tandem.

- Power station is requested to strictly adhere the reservoir flushing guide lines and closely watch the structures during flushing.

9. DSRP RECOMMENDATIONS

a.) Drilling of new formed /Porous drains

- The work for drilling porous drains and cleaning of the pressure relief holes in dam gallery is yet to be awarded.
- Drilling of porous drains, pressure relief holes is a very critical work and needs to be given proper attention and planning for successful execution to avoid the any misalignment of the holes during drilling due to upstream reservoir.

b.) Seepage in unlined curtain grouting drifts

- The geological mapping of the drifts with marking of seepage points is required to be done.

c.) Concreting of S3 pendulum shaft

- The work is yet to be taken up by Power Station.

NHPC LIMITED FARIDABAD

fitted in Radial gates needs to be calibrated.

- All Hydraulic cylinders and power packs of Radial Gates need to be cleaned/ Painted. Regular cleaning of hydraulic trenches needs to be done. Proper bunching of cables around Power pack room needs to be done.

- Gate operation could not be done with Gasoline engine operated portable power pack. The same needs to be rectified and made operational. (April 2019 DSI observation)

Spillway Radial Gate no 1

- Considerable leakage was observed from both bottom of side seal & bottom seal. Minor leakage was observed from top corner, top seal and left side seal (top). Power station intimated that the work for replacement of damaged anti jet seal and to arrest leakage through seal has been awarded but could not be taken up due to COVID-19 lockdown and is likely to be taken up after lockdown. (Oct. 2018 DSI observation).

- Glacis concrete downstream of radial gate sill beam was found damaged. The same needs to be repaired to avoid progressive damage of concrete towards radial gate sill beam.

- Power Station intimated that the boulder was stuck in stoplog gate groove and prevents the lowering of stoplog unit in the groove. Power station is advised to take appropriate action of its removal in consultation with O& M Division and make bay available for annual maintenance of gate and civil works.

Spillway Radial Gate no 2

- Leakage was observed from bottom seal. Minor leakage was observed from left top corner and left side seal (bottom). The same needs to be attended.

Spillway Radial Gate no 3

- In the Pre Monsoon 2019 report, damaged has been observed in upstream wall plates and sill beam which has not been repaired. During inspection, the bottom of both SS wall plates (downstream side) was found eroded/ damaged. Power Station is advised to restore the damaged/ eroded wall plates and sill beam. However it is reported that bottom rubber seal with top corners has been replaced. Minor leakage observed from bottom corners and top corner LH.

- During inspection the adjacent concrete to wall plate and sill beam was found eroded/ damaged. Power station is requested to fill the gap with appropriate material in consultation with Civil Design.

Spillway radial gate no 4

No appreciable leakage form rubber seals observed

NHPC LIMITED FARIDABAD

d.) Raising of 1.5 m high parapet wall

- The feasibility of raising of 1.5 m high parapet wall is still required to be done.

e.) Steel Liners in all Spillway bays

- The work in bay S2 and S5 has been completed and it has been informed that the work for the remaining bays shall be taken up after the monsoon 2020.

10. HYDROLOGICAL ASPECTS

- It was observed that radar type AWLR has been installed at the following locations:
  i. Upstream of Teesta-V Dam at Phidang bridge.
  ii. Spillway glacis of bay S1
  iii. Approx 300m downstream of Dam axis at right bank.

- It was advised to observe daily sediment data at SFT outlet (when in operation) and send the data in approved IMS format to Hydrology unit on a monthly basis.

- Power station is advised to observe sediment data at draft tube outlet when machines are operated and data be sent in hard and soft copy to Hydrology Unit.

- Discharge through machines should be given as per flow meter and mentioning the same in the hourly discharge data which would be made available to hydrology unit, D & E division in IMS format no. IMS/DED/F-08.

- Power station needs to nominate a nodal officer for coordination of reservoir operation and hydro meteorological data observation, and intimate the same to Hydrology Unit, D&E Division.

11. HYDRO-MECHANICAL OBSERVATIONS

Spillway Radial Gates

- Dam was visited on 26.05.2020. During visit, Radial Gate No. 2 was in operation remaining radial gates were found in closed position.

- One set of stoplog units were placed in bay no 5 for annual maintenance of gate and civil maintenance work while other set of stoplog units were placed at dam top.

- Test operation of radial gates # 2, 3 & 4 was carried out and found to be working satisfactorily. Radial Gate No. 1 was not operated due to problem in Anti-Jet seal

- Test operation of radial gate 5 could not be done as stoplog unit was placed for maintenance work.
- All Low vacuum dehydration & degasification units and oil purification units were operated to clean the hydraulic oil of all radial gates and working satisfactorily.

- The interconnection of SRG # 4 & 5 and SRG # 2 & 3 have been completed.

- Radial gate operation was being done through SCADA in DCR. However Digital meters

Spillway Radial Gate No. 5

- One set of stoplog units were placed in bay no 5 for annual maintenance of gate and civil maintenance work and testing of replaced rubber seals is under progress.

Spillway Stop log and gantry crane

- One set of stoplog units were placed in bay no 5 for annual maintenance of gate and civil maintenance work and another set of stoplog units were placed at dam top.

- Gantry crane control panel has been rectified and found to be working satisfactorily. LT and CT operation of gantry crane was carried out and found to be working satisfactorily. Old lifting beam was used for lowering of stoplog units.

- Power Station is requested for testing and commissioning of new lifting beam by M/s TREL (OEM) and make the same available for operation as soon as possible.(Oct. 2018 DSI observation).

- Lifting beam hook pin (both) was found laterally displaced. The same needs to be restored.

Intake Gates and Stoplog

- The intake gates #1, 2 and 3 were found dogged in their respective grooves and working satisfactorily.

- Intake gate # 3 SMPS (switch mode power supply) was not working. The same needs to be made functional.

- Water level sensors of differential pressure measurement across intake trash racks need to be calibrated. Power station is advised to display the water level in dam control room & integrate it with powerhouse SCADA system interlocking unit operation with permissible water level in WCS. (Oct. 2018 DSI observation).

Dam Control Room

- SCADA control system for radial gate is functional and SCADA control system of intake gates in DCR to be made functional on priority. (Oct. 2018 DSI observation).

Trash Rack Cleaning Machine (TRCM) cum Gantry Crane

- Grappler function non-operational due to breakdown of Motor.

- Power station is advised to conduct a survey of rail track and attend the misalignment in the rail track/ wheel alignment for smooth LT operation of TRCM as advised vides IOM एनएच/डीडी/एचएम/तीस्ता-V/520 दिनांक 06.09.2017 and IOM NH/D&E/D-I/2017/25 dated 12.04.2017.

- Power Station is advised to check stability of TRCM with grappler by placing stoplog

NHPC LIMITED FARIDABAD

unit on the downstream side as suggested vide IOM no. NH/D&E/HM/Teesta-V/2017/247 dated 09.06.2017 and send the report to D&E division.

Desilting Chamber gates and EOT Crane

- DC gate was found dogged between gate groove.3
- Control panel of EOT was not functional and needs to be restored. Power Station intimated that the work could not be taken up due to COVID-19 lockdown. (March 2018 DSI observation).
- Railing on gate grooves of desilting gates fixed and fixing of rope grating is under progress. (Oct. 2018 DSI observation).

Silt Flushing Gates

- Considerable leakage was observed from SFT outlet.
- Emergency gate #1 and service gate # 2 and 3 was found in partly open position. Test operation of Emergency gate #1 service gate # 2 & 3 was carried and found to be working satisfactorily.
- Leakage of SFT #1, 2 and 3 from service gate needs to be attended. Power Station intimated that the work for service gates could not be taken up due to COVID-19 lockdown (Oct. 2018 DSI observation).
- Gate positioning reading displayed in local control panel of SFT #1, 2 & 3 (service and emergency gates) need to be calibrated.

Ecological water Pipe Valves

- Both valves were operated and found to be working satisfactorily.

Adit Gate # 1, 3, & 5

- No leakage was observed from audit gates.

Surge Shaft Gates

- All three surge shaft gates were found dogged above their respective grooves. Surge Shaft gate # 1, 2 and 3 was test operated and found to be working satisfactorily.
- Power station reported that in surge Shaft gate # 2 case for rectification of laterally displaced intermediate shaft is being processed. (Oct. 2018 DSI observation).
- Power station is also advised to check the alignment of intermediate shaft in Gate no. 1 & 3.

NHPC LIMITED FARIDABAD

- Power Station intimated that work for supporting main supply cable from transformer to control panel on vertical post, fastening of cable from main supply panel to control panel and illumination of hoist platform shall be taken up after COVID-19 Lockdown (March 2018 DSI observation)

TRT Gates and Hoists

- All TRT gates were found dogged above their respective grooves. Power Station intimated that all gates and their hoists were operated during flushing of reservoir and working satisfactorily. Test operation of gates was not allowed as the Generating units were under operation.

- Top seal of all TRT gates have been replaced. However Grease was found applied on all the rubber seals which needs to be removed and cleaned thoroughly immediately.

DG sets

- One DG set (500 KVA) at Dam top is under breakdown and has gone for repair. One DG set (500 KVA) was reported running satisfactorily.
-

Pending Issue (Shall be taken up during shut down)

- Power station is advised to install modified sill beam for spillway stoplog in bay no 1&2. (Oct 2014 DSI observation).

- Power station is advised to repair the damaged SS spring track and replace the same with new one as per issued drawing in bay no 2 of spillway stoplog. (March 2017 DSI observation).

- Power Station is advised to attend leakage of SFT #1, 2 and 3 from emergency gate. (March 2017 and Oct. 2018 DSI observation).

- Gate position indicator shaft of emergency gate #1 was detached from gate. The same needs to be restored.

General- HM works

- Identification plates showing main characteristics data of respective HM equipment e.g. name, size & serial no. of gate, type & capacity of hoisting arrangement, hoisting speed and total lift of gate etc shall be fixed at any clearly visible location. (Oct. 2016 DSI observation).

- Spare parts i.e modified sill beam of spillway stoplog, lintel beam and Clamps etc. were kept uncovered in open at intake deck slab and Adit-I. Power Station is requested to build store for storing spare parts. (Oct. 2018 DSI observation).

- Power station is advised to ensure compliance of Inspection and Maintenance protocol issued vide IOM no NH/DD/HM/124 dated 29.05.2017 and send status report on regular basis.

12. CONCLUSION:-

General health conditions of various components of power station and power station as a whole are good and in satisfactory condition except as given below observations / points which require immediate attention:-

- Teesta-V PS is advised to complete the repair work of the damages in glacis and piers of spillway bays S1, S3 &S4 with steel liner and HPC.

- Power station to complete the repair / protection measures of the left bank slope near Dikchu bridge using PP rope gabions, boulder wire crates and articulated bags (geo-bags) upto El.580 m to avoid further damages.

- Replacement of stop log modified sill beam is yet to be installed in bay no 1& 2.Teesta-V power station to plan the replacement of stop log gate sill beams.

- Power station to take up the repair of the damaged portion of the TRT apron with concrete blocks after seeing its effectiveness and cavity as early as possible to avoid further retrogression.

- Power station to take up the cleaning or re-drilling of pressure relief holes, uplift measuring stand pipes after making them properly in the foundation gallery.

- Power station to clean the chocked porous drains/ inform the plan of drilling of new holes between the choked holes.

- Power station to provide the geological mapping of the unlined curtain grouting drifts and marking of the seepage points for planning the feasibility of treatment measures for controlling seepage specially in the left bank drift.
- Rectification of water level sensor at intake and display the water level in dam control room & integrate it with powerhouse SCADA system interlocking unit operation with permissible water level in WCS.
- Arresting leakage from gate bottom seal of SRG # 1, 2.
- Testing and commissioning of new lifting beam of spillway stoplog.

ARRANGEMENT OF SECTIONS

CHAPTER I
PRELIMINARY

SECTIONS

1. Short title, extent and commencement.

2. Interpretation.

3. References to time of day.

4. Power to declare different departments to be separate factories or two or more factories to be a single factory.

5. Power to exempt during public emergency.

6. Approval, licensing and registration of factories.

7. Notice by occupier.

CHAPTER II
THE INSPECTING STAFF

7A. General duties of the occupier.

7B. General duties of manufacturers, etc., as regards articles and substances for use in factories.

8. Inspectors.

9. Powers of Inspectors.

10. Certifying surgeons.

CHAPTER III
HEALTH

11. Cleanliness.

12. Disposal of wastes and effluents.

13. Ventilation and temperature.

14. Dust and fume.

15. Artificial humidification.

16. Overcrowding.

17. Lighting.

18. Drinking water.

19. Latrines and urinals.

20. Spittoons.

CHAPTER IV
SAFETY

21. Fencing of machinery.

22. Work on or near machinery in motion.

NHPC LIMITED
FARIDABAD

SECTIONS

23. Employment of young persons on dangerous machines.

24. Striking gear and devices for cutting off power.

25. Self-acting machines.

26. Casing of new machinery.

27. Prohibition of employment of women and children near cotton-openers.

28. Hoists and lifts.

29. Lifting machines, chains, ropes and lifting tackles.

30. Revolving machinery.

31. Pressure plant.

32. Floors, stairs and means of access.

33. Pits, sumps openings in floors, etc.

34. Excessive weights.

35. Protection of eyes.

36. Precautions against dangerous fumes, gases, etc.

36A. Precautions regarding the use of portable electric light.

37. Explosive or inflammable dust, gas, etc.

38. Precautions in case of fire.

39. Power to require specifications of defective parts or tests of stability.

40. Safety of buildings and machinery.

40A. Maintenance of buildings.

40B. Safety officers.

41. Power to make rules to supplement this Chapter.

CHAPTER IVA

PROVISIONS RELATING TO HAZARDOUS PROCESSES

41A. Constitution of Site Appraisal Committee.

41B. Compulsory disclosure of information by the occupier.

41C. Specific responsibility of the occupier in relation to hazardous processes.

41D. Power of Central Government to appoint Inquiry Committee.

41E. Emergency standards.

41F. Permissible limits of exposure of chemical and toxic substances.

41G. Workers' participation in safety management.

41H. Right of workers to warn about imminent danger.

CHAPTER V

WELFARE

42. Washing facilities.

43. Facilities for storing and drying clothing.

NHPC LIMITED
FARIDABAD

SECTIONS

44. Facilities for sitting.

45. First-aid appliances.

46. Canteens.

47. Shelters, rest rooms and lunch rooms.

48. Creches.

49. Welfare officers.

50. Power to make rules to supplement this Chapter.

CHAPTER VI

WORKING HOURS OF ADULTS

51. Weekly hours.

52. Weekly holidays.

53. Compensatory holidays.

54. Daily hours.

55. Intervals for rest.

56. Spread over.

57. Night shifts.

58. Prohibition of overlapping shifts.

59. Extra wages for overtime.

60. Restriction on double employment.

61. Notice of periods of work for adults.

62. Register of adult workers.

63. Hours of work to correspond with notice under section 61 and register under section 62.

64. Power to make exempting rules.

65. Power to make exempting orders.

66. Further restrictions on employment of women.

CHAPTER VII

EMPLOYMENT OF YOUNG PERSONS

67. Prohibition of employment of young children.

68. Non-adult workers to carry tokens.

69. Certificates of fitness.

70. Effect of certificate of fitness granted to adolescent.

71. Working hours for children.

72. Notice of periods of work for children.

73. Register of child workers.

74. Hours of work to correspond with notice under section 72 and register under section 73.

75. Power to require medical examination.

76. Power to make rules.

77. Certain other provisions of law not barred.

NHPC LIMITED

CHAPTER VIII

ANNUAL LEAVE WITH WAGES

SECTIONS

78. Application of Chapter.

79. Annual leave with wages.

80. Wages during leave period.

81. Payment in advance in certain cases.

82. Mode of recovery of unpaid wages.

83. Power to make rules.

84. Power to exempt factories.

CHAPTER IX

SPECIAL PROVISIONS

85. Power to apply the Act to certain premises.

86. Power to exempt public institutions.

87. Dangerous operations.

87A. Power to prohibit employment on account of serious hazard.

88. Notice of certain accidents.

88A. Notice of certain dangerous occurrences.

89. Notice of certain diseases.

90. Power to direct enquiry into cases of accident or disease.

91. Power to take samples.

91A. Safety and occupational health surveys.

CHAPTER X

PENALTIES AND PROCEDURE

92. General penalty for offences.

93. Liability of owner of premises in certain circumstances.

94. Enhanced penalty after previous conviction.

95. Penalty for obstructing Inspector.

96. Penalty for wrongfully disclosing results of analysis under section 91.

96A. Penalty for contravention of the provisions of sections 41B, 41C and 41H.

97. Offences by workers.

98. Penalty for using false certificate of fitness.

99. Penalty for permitting double employment of child.

100. [*Repealed.*]

101. Exemption of occupier or manager from liability in certain cases.

102. Power of Court to make orders.

103. Presumption as to employment.

104. Onus as to age.

NHPC LIMITED
FARIDABAD

SECTIONS

104A. Onus of proving limits of what is practicable, etc.

105. Cognizance of offences.

106. Limitation of prosecutions.

106A. Jurisdiction of a court for entertaining proceedings, etc., for offence.

CHAPTER XI

SUPPLEMENTAL

107. Appeals.

108. Display of notices.

109. Service of notices.

110. Returns.

111. Obligations of workers.

111A. Right of workers, etc.

112. General power to make rules.

113. Powers of Centre to give directions.

114. No charge for facilities and conveniences.

115. Publication of rules.

116. Application of Act to Government factories.

117. Protection to persons acting under this Act.

118. Restrictions on disclosure of information.

118A. Restriction on disclosure of information.

119. Act to have effect notwithstanding anything contained in Act 37 of 1970.

120. Repeal and savings.

THE FACTORIES ACT, 1948

ACT NO. 63 OF 1948[1]

[23*rd September,* 1948.]

An Act to consolidate and amend the law regulating labour in factories.

WHEREAS it is expedient to consolidate and amend the law regulating labour in factories;

It is hereby enacted as follows:—

CHAPTER I

PRELIMINARY

1. Short title, extent and commencement.—(*1*) This Act may be called the Factories Act, 1948.

[2][(*2*) It extends to the whole of India [3]***.]

(*3*) It shall come into force on the 1st day of April 1949.

2. Interpretation.—In this Act, unless there is anything repugnant in the subject or context,—

(*a*) "adult" means a person who has completed his eighteenth year of age;

(*b*) "adolescent" means a person who has completed his fifteenth year of age but has not completed his eighteenth year;

[4][(*bb*) "calendar year" means the period of twelve months beginning with the first day of January in any year;]

(*c*) "child" means a person who has not completed his fifteenth year of age;

[5][(*ca*) "competent person", in relation to any provision of this Act, means a person or an institution recognised as such by the Chief Inspector for the purposes of carrying out tests, examinations and inspections required to be done in a factory under the provisions of this Act having regard to—

(*i*) the qualifications and experience of the person and facilities available at his disposal; or

(*ii*) the qualifications and experience of the persons employed in such institution and facilities available therein,

with regard to the conduct of such tests, examinations and inspections, and more than one person or institution can be recognised as a competent person in relation to a factory;

(*cb*) "hazardous process" means any process or activity in relation to an industry specified in the First Schedule where, unless special care is taken, raw materials used therein or the intermediate or finished products, bye-products, wastes or effluents thereof would—

(*i*) cause material impairment to the health of the persons engaged in or connected therewith, or

(*ii*) result in the pollution or the general environment:

Provided that the State Government may, by notification in the Official Gazette, amend the First Schedule by way of addition, omission or variation of any industry specified in the said Schedule;]

(*d*) "young person" means a person who is either a child or an adolescent;

---

1. The Act has been extended to Dadra and Nagar Haveli by Reg. 6 of 1963, s. 2 and the First Schedule; Pondicherry by Reg. 7 of 1963, s. 3 and the First Schedule, Goa, Daman and Diu by Reg. 11 of 1963, s. 3 and the Schedule and Laccadive, Minicoy and Amindivi Islands by Reg. 8 of 1965, s. 3 and the Schedule.
2. Subs. by the A.O. 1950, for sub-section (*2*).
3. The words "except the state of Jammu and Kashmir" omitted by Act 51 of 1970, s. 2 and the Schedule (w.e.f. 1-9-1971).
4. Ins. by Act 25 of 1954, s. 2 (w.e.f. 7-5-1954).
5. Ins. by Act 20 of 1987, s. 2 (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

(*e*) "day" means a period of twenty-four hours beginning at midnight;

(*f*) "week" means a period of seven days beginning at midnight on Saturday night or such other night as may be approved in writing for a particular area by the Chief Inspector of Factories;

(*g*) "power" means electrical energy, or any other form of energy which is mechanically transmitted and is not generated by human or animal agency;

(*h*) "prime mover" means any engine, motor or other appliance which generates or otherwise provides power;

(*i*) "transmission machinery" means any shaft, wheel, drum, pulley, system of pulleys, coupling, clutch, driving belt or other appliance or device by which the motion of a prime mover is transmitted to or received by any machinery or appliance;

(*j*) "machinery" includes prime movers, transmission machinery and all other appliances whereby power is generated, transformed, transmitted or applied;

(*k*) "manufacturing process" means any process for—

(*i*) making, altering, repairing, ornamenting, finishing, packing, oiling, washing, cleaning, breaking up, demolishing, or otherwise treating or adapting any article or substance with a view to its use, sale, transport, delivery or disposal; or

[1][(*ii*) pumping oil, water, sewage or any other substance; or]

(*iii*) generating, transforming or transmitting power; or

[2][(*iv*) composing types for printing, printing by letter press, lithography, photogravure or other similar process or book binding; [3][or]]

(*v*) constructing, reconstructing, repairing, refitting, finishing or breaking up ships or vessels; [3][or]

[3][(*vi*) preserving or storing any article in cold storage;]

(*l*) "worker" means a person [4][employed, directly or by or through any agency (including a contractor) with or without the knowledge of the principal employer, whether for remuneration or not], in any manufacturing process, or in cleaning any part of the machinery or premises used for a manufacturing process, or in any other kind of work incidental to, or connected with, the manufacturing process, or the subject of the manufacturing process [3][but does not include any member of the armed forces of the Union];

(*m*) "factory" means any premises including the precincts thereof—

(*i*) whereon ten or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power, or is ordinarily so carried on, or

(*ii*) whereon twenty or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on without the aid of power, or is ordinarily so carried on,—

but does not include a mine subject to the operation of [5][the Mines Act, 1952 (35 of 1952)], or [6][a mobile mobile unit belonging to the armed forces of the Union, railway running shed or a hotel, restaurant or eating place].

---

1. Subs. by Act 94 of 1976, s. 2, for sub-clause (*ii*) (w.e.f. 26-10-1976).
2. Subs. by Act 25 of 1954, s. 2, for sub-clause (*iv*) (w.e.f. 7-5-1954).
3. Ins. by Act 94 of 1976, s. 2 (w.e.f. 26-10-1976).
4. Subs. by s. 2, *ibid.*, for "employed, directly or through any agency, whether for wages or not" (w.e.f. 26-10-1976).
5. Subs. by Act 25 of 1954, s. 2, for "the Indian Mines Act, 1923 (4 of 1923)" (w.e.f. 7-5-1954).
6. Subs. by Act 94 of 1976, s. 2, for "a railway running shed" (w.e.f. 26-10-1976).

HPC LIMITED FARIDABAD

[1][*Explanation* [2][I]—For computing the number of workers for the purposes of this clause all the workers in [3][different groups and relays] in a day shall be taken into account;]

[4][*Explanation* II.—For the purposes of this clause, the mere fact that an Electronic Data Processing Unit or a Computer Unit is installed in any premises or part thereof, shall not be construed to make it a factory if no manufacturing process is being carried on in such premises or part thereof;]

(*n*) "occupier" of a factory means the person who has ultimate control over the affairs of the factory [5]***.

[4][Provided that—

(*i*) in the case of a firm or other association of individuals, any one of the individual partners or members thereof shall be deemed to be the occupier;

(*ii*) in the case of a company, any one of the directors shall be deemed to be the occupier;

(*iii*) in the case of a factory owned or controlled by the Central Government or any State Government, or any local authority, the person or persons appointed to manage the affairs of the factory by the Central Government, the Stale Government or the local authority, as the case may be, shall be deemed to be the occupier:]

[1][[6][Provided further that] in the case of a ship which is being repaired, or on which maintenance work is being carried out, in a dry dock which is available for hire,—

(*1*) the owner of the dock shall be deemed to be the occupier for the purposes of any matter provided for by or under—

(*a*) section 6, section 7, [4][section 7A, section 7B,] section 11 or section 12;

(*b*) section 17, in so far as it relates to the providing and maintenance of sufficient and suitable lighting in or around the dock;

(*c*) section 18, section 19, section 42, section 46, section 47 or section 49, in relation to the workers employed on such repair or maintenance;

(*2*) the owner of the ship or his agent or master or other officer-in-charge of the ship or any person who contracts with such owner, agent or master or other officer-in-charge to carry out the repair or maintenance work shall be deemed to be the occupier for the purposes of any matter provided for by or under section 13, section 14, section 16 or section 17 (save as otherwise provided in this proviso) or Chapter IV (except section 27) or section 43, section 44 or section 45, Chapter VI, Chapter VII, Chapter VIII or Chapter IX or section 108, section 109 or section 110, in relation to—

(*a*) the workers employed directly by him, or by or through any agency; and

(*b*) the machinery, plant or premises in use for the purpose of carrying out such repair or maintenance work by such owner, agent, master or other officer-in-charge or person;

[7]* * * * *

(*p*) "prescribed" means prescribed by rules made by the State Government under this Act;

[8]* * * * *

(*r*) where work of the same kind is carried out by two or more sets of workers working during different periods of the day, each of such sets is called a [9]["group" or "relay"] and each of such periods is called a "shift".

---

1. Ins. by Act 94 of 1976, s. 2 (w.e.f. 26-10-1976).
2. The *Explanation* renumbered as *Explanation* I by Act 20 of 1987, s. 2 (w.e.f. 1-12-1987).
3. Subs. by s. 2, *ibid.*, for "different relays" (w.e.f. 1-12-1987).
4. Ins. by s. 2, *ibid.* (w.e.f. 1-12-1987).
5. Certain words omitted by s. 2, *ibid.* (w.e.f. 1-12-1987).
6. Subs. by s. 2, *ibid.*, for "Provided that" (w.e.f. 1-12-1987).
7. Omitted by s. 2, *ibid.* (w.e.f. 1-12-1987).
8. Omitted by the A. O. 1950.
9. Subs. by Act 20 of 1987, s. 2, for "relay" (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

3. References to time of day.—In this Act references to time of day are references to Indian Standard Time, being five and a half hours ahead of Greenwich Mean Time:

Provided that for any area in which Indian Standard Time is not ordinarily observed the State Government may make rules—

(*a*) specifying the area,

(*b*) defining the local mean time ordinarily observed therein, and

(*c*) permitting such time to be observed in all or any of the factories situated in the area.

[1][**4. Power to declare different departments to be separate factories or two or more factories to be a single factory.**—The State Government may, [2][on its own or] on an application made in this behalf by an occupier, direct, by an order in writing [2][and subject to such conditions as it may deem fit that for all or any of the purposes of this Act different departments or branches of a factory of the occupier specified in the application shall be treated as separate factories or that two or more factories of the occupier specified in the application shall be treated as a single factory:]

[3][Provided that no order under this section shall be made by the State Government on its own motion unless an opportunity of being heard is given to the occupier.]

5. Power to exempt during public emergency.—In any case of public emergency the State Government may, by notification in the Official Gazette, exempt any factory or class or description of factories from all or any of the provisions of this Act [4][except section 67] for such period and subject to such conditions as it may think fit:

Provided that no such notification shall be made for a period exceeding three months at a time.

[5][*Explanation.*—For the purposes of this section "public emergency" means a grave emergency whereby the security of India or of any part of the territory thereof is threatened, whether by war or external aggression or internal disturbance.]

6. Approval, licensing and registration of factories.—(*1*) The State Government may make rules—

[6][(*a*) requiring, for the purposes of this Act, the submission of plans of any class or description of factories to the Chief Inspector or the State Government;]

[7][(*aa*)] requiring, the previous permission in writing of the State Government or the Chief Inspector to be obtained for the site on which the factory is to be situated and for the construction or extension of any factory or class or description of factories;

(*b*) requiring for the purpose of considering applications for such permission the submission of plans and specifications;

(*c*) prescribing the nature of such plans and specifications and by whom they shall be certified;

(*d*) requiring the registration and licensing of factories or any class or description of factories, and prescribing the fees payable for such registration and licensing and for the renewal of licences;

(*e*) requiring that no licence shall be granted or renewed unless the notice specified in section 7 has been given.

(*2*) If on an application for permission referred to in [8][clause (*aa*)] of sub-section (*1*) accompanied by the plans and specifications required by the rules made under clause (*b*) of that sub-section, sent to the State Government or Chief Inspector by registered post, no order is communicated to the applicant within three months from the date on which it is so sent, the permission applied for in the said application shall be deemed to have been granted.

---

1. Subs. by Act 25 of 1954, s. 3, for section 4 (w.e.f. 7-5-1954).
2. Ins. by Act 20 of 1987, s. 3 (w.e.f. 1-12-1987).
3. Added by s. 3, *ibid.* (w.e.f. 1-12-1987).

5. Ins. by Act 94 of 1976, s. 3 (w.e.f. 26-10-1976).
6. Ins. by s. 4, *ibid.* (w.e.f. 26-10-1976).
7. Clause (*a*) re-lettered as clause (*aa*) by s. 4, *ibid.* (w.e.f. 26-10-1976).
8. Subs. by s. 4, *ibid.*, for "clause (*a*)" (w.e.f. 26-10-1976).

NHPC LIMITED FARIDABAD

(*3*) Where a State Government or a Chief Inspector refuses to grant permission to the site, construction or extension of a factory or to the registration and licensing of a factory, the applicant may within thirty days of the date of such refusal appeal to the Central Government if the decision appealed from was of the State Government and to the State Government in any other case.

Explanation.—A factory shall not be deemed to be extended within the meaning of this section by reason only of the replacement of any plant or machinery, or within such limits as may be prescribed, of the addition of any plant or machinery [1][if such replacement or addition does not reduce the minimum clear space required for safe working around the plant or machinery or adversely affect the environmental conditions from the evolution or emission of steam, heat or dust or fumes injurious to health].

7. Notice by occupier.—(*1*) The occupier shall, at least fifteen days before he begins to occupy or use any premises as a factory, send to the Chief Inspector a written notice containing—

(*a*) the name and situation of the factory;

(*b*) the name and address of the occupier;

[2][(*bb*) the name and address of the owner of the premises or building (including the precincts thereof) referred to in section 93;]

(*c*) the address to which communications relating to the factory may be sent;

(*d*) the nature of the manufacturing process—

(*i*) carried on in the factory during the last twelve months in the case of factories in existence on the date of the commencement of this Act; and

(*ii*) to be carried on in the factory during the next twelve months in the case of all factories;

[3][(*e*) the total rated horse power installed or to be installed in the factory, which shall not include the rated horse power of any separate stand-by plant;]

(*f*) the name of the manager of the factory for the purposes of this Act;

(*g*) the number of workers likely to be employed in the factory;

(*h*) the average number of workers per day employed during the last twelve months in the case of a factory in existence on the date of the commencement of this Act;

(*i*) such other particulars as may be prescribed.

(*2*) In respect of all establishments which come within the scope of the Act for the first time, the occupier shall send a written notice to the Chief Inspector containing the particulars specified in sub-section (*1*) within thirty days from the date of the commencement of this Act.

(*3*) Before a factory engaged in a manufacturing process which is ordinarily carried on for less than one hundred and eighty working days in the year resumes working, the occupier shall send a written notice to the Chief Inspector containing the particulars specified in sub-section (*1*) [4][at least thirty days] before the date of the commencement of work.

(*4*) Whenever a new manager is appointed, the occupier shall send to the [5][Inspector a written notice and to the Chief Inspector a copy thereof] within seven days from the date on which such person takes over charge.

(*5*) During any period for which no person has been designated as manager of a factory or during which the person designated does not manage the factory, any person found acting as manager, or if no such person is found, the occupier himself, shall be deemed to be the manager of the factory for the purposes of this Act.

---

1. Ins. by Act 94 of 1976, s. 4 (w.e.f. 26-10-1976).
2. Ins. by Act 25 of 1954, s. 4 (w.e.f. 7-5-1954).
3. Subs. by Act 94 of 1976, s. 5, for clause (*e*) (w.e.f. 26-10-1976).
4. Subs. by Act 40 of 1949, s. 3 and the Second Schedule, for "within thirty days" (w.e.f. 1-5-1949).
5. Subs. by Act 25 of 1954, s. 4, for "Chief Inspector a written notice" (w.e.f. 7-5-1954).

NHPC LIMITED FARIDABAD

CHAPTER II

THE INSPECTING STAFF

[1][**7A. General duties of the occupier.**—(*1*) Every occupier shall ensure, so far as is reasonably practicable, the health, safety and welfare of all workers while they are at work in the factory.

(*2*) Without prejudice to the generality of the provisions of sub-section (*1*), the matters to which such duty extends, shall include—

(*a*) the provision and maintenance of plant and systems of work in the factory that are safe and without risks to health;

(*b*) the arrangements in the factory for ensuring safety and absence of risks to health in connection with the use, handling, storage and transport of articles and substances;

(*c*) the provisions of such information, instruction, training and supervision as are necessary to ensure the health and safety of all workers at work;

(*d*) the maintenance of all places of work in the factory in a condition that is safe and without risks to health and the provision and maintenance of such means of access to, and egress from, such places as are safe and without such risks;

(*e*) the provision, maintenance or monitoring of such working environment in the factory for the workers that is safe, without risks to health and adequate as regards facilities and arrangements for their welfare at work.

(*3*) Except in such cases as may be prescribed, every occupier shall prepare, and, as often as may be appropriate, revise, a written statement of his general policy with respect to the health and safety of the workers at work and the organisation and arrangements for the time being in force for carrying out that policy, and to bring the statement and any revision thereof to the notice of all the workers in such manner as may be prescribed.

***7B. General duties of manufacturers, etc., as regards articles and substances for use in factories.**—(*1*) Every person who designs, manufactures, imports or supplies any article for use in any factory, shall—

(*a*) ensure, so far as is reasonably practicable, that the article is so designed and constructed as to be safe and without risks to the health of the workers when properly used;

(*b*) carry out or arrange for the carrying out of such tests and examination as may be considered necessary for the effective implementation of the provisions of clause (*a*);

(*c*) take such steps as may be necessary to ensure that adequate information will be available—

(*i*) in connection with the use of the article in any factory;

(*ii*) about the use for which it is designed and tested; and

(*iii*) about any conditions necessary to ensure that the article, when put to such use, will be safe, and without risks to the health of the workers:

Provided that where an article is designed or manufactured outside India, it shall be obligatory on the part of the importer to see—

(*a*) that the article conforms to the same standards if such article is manufactured in India, or

(*b*) if the standards adopted in the country outside for the manufacture of such article is above the standards adopted in India, that the article conforms to such standards.

(*2*) Every person, who undertakes to design or manufacture any article for use in any factory, may carry out or arrange for the carrying out of necessary research with a view to the discovery and, so far as is reasonably practicable, the elimination or minimisation of any risks to the health or safety of the workers to which the design or article may give rise.

---

1. Ins. by Act 20 of 1987, s. 4 (w.e.f. 1-12-1987).

*. Ins. by s. 4, *ibid.* (w.e.f. 1-6-1988).

NHPC LIMITED FARIDABAD

(*3*) Nothing contained in sub-sections (*1*) and (*2*) shall be construed to require a person to repeat the testing, examination or research which has been carried out otherwise than by him or at his instance in so far as it is reasonable for him to rely on the results thereof for the purposes of the said sub-sections.

(*4*) Any duty imposed on any person by sub-sections (*1*) and (*2*) shall extend only to things done in the course of business carried on by him and to matters within his control.

(*5*) Where a person designs, manufactures, imports or supplies an article on the basis of a written undertaking by the user of such article to take the steps specified in such undertaking to ensure, so far as is reasonably practicable, that the article will be safe and without risks to the health of the workers when properly used, the undertaking shall have the effect of relieving the person designing, manufacturing, importing or supplying the article from the duty imposed by clause (*a*) of sub-section (*1*) to such extent as is reasonable having regard to the terms of the undertaking.

(*6*) For the purposes of this section, an article is not to be regarded as properly used if it is used without regard to any information or advice relating to its use which has been made available by the person who has designed, manufactured, imported or supplied the article.

Explanation.—For the purposes of this section, "article" shall include plant and machinery.]

8. Inspectors.—(*1*) The State Government may, by notification in the Official Gazette, appoint such persons as possess the prescribed qualification to be Inspectors for the purposes of this Act and may assign to them such local limits as it may think fit.

(*2*) The State Government may, by notification in the Official Gazette, appoint any person to be a Chief Inspector who shall, in addition to the powers conferred on a Chief Inspector under this Act, exercise the powers of an Inspector throughout the State.

[1][(*2A*) The State Government may, by notification in the Official Gazette, appoint as many Additional Chief Inspectors, Joint Chief Inspectors and Deputy Chief Inspectors and as many other officers as it thinks fit to assist the Chief Inspector and to exercise such of the powers of the Chief Inspector as may be specified in such notification.

(*2B*) Every Additional Chief Inspector, Joint Chief Inspector, Deputy Chief Inspector and every other officer appointed under sub-section (*2A*) shall, in addition to the powers of a Chief Inspector specified in the notification by which he is appointed, exercise the power of an Inspector throughout the State.]

(*3*) No person shall be appointed under sub-section (*1*), sub-section (*2*) [1][, sub-section (*2A*)] or sub-section (*5*) or, having been so appointed, shall continue to hold office, who is or becomes directly or indirectly interested in a factory or in any process or business carried on therein or in any patent or machinery connected therewith.

(*4*) Every District Magistrate shall be an Inspector for his district.

(*5*) The State Government may also, by notification as aforesaid, appoint such public officers as it thinks fit to be additional Inspectors for all or any of the purposes of this Act, within such local limits as it may assign to them respectively.

(*6*) In any area where there are more Inspectors than one the State Government may, by notification as aforesaid, declare the powers, which such Inspectors shall respectively exercise and the Inspector to whom the prescribed notices are to be sent.

(*7*) [2][Every Chief Inspector, Additional Chief Inspector, Joint Chief Inspector, Deputy Chief Inspector, Inspector and every other officer appointed under this section] shall be deemed to be a public servant within the meaning of the Indian Penal Code (45 of 1860), and shall be officially subordinate to such authority as the State Government may specify in this behalf.

---

1. Ins. by Act 94 of 1976, s. 6 (w.e.f. 26-10-1976).
2. Subs. by s. 6, *ibid.*, for "every Chief Inspector and Inspector" (w.e.f. 26-10-1976).

NHPC LIMITED
FARIDABAD

9. Powers of Inspectors.—Subject to any rules made in this behalf, an Inspector may, within the local limits for which he is appointed,—

(*a*) enter, with such assistants, being persons in the service of the Government, or any local or other public authority, [1][or with an expert] as he thinks fit, any place which is used, or which he has reason to believe is used, as a factory;

[2][(*b*) make examination of the premises, plant, machinery, article or substance;

(*c*) inquire into any accident or dangerous occurrence, whether resulting in bodily injury, disability or not, and take on the spot or otherwise statements of any person which he may consider necessary for such inquiry;

(*d*) require the production of any prescribed register or any other document relating to the factory;

(*e*) seize, or take copies of, any register, record or other document or any portion thereof, as he may consider necessary in respect of any offence under this Act, which he has reason to believe, has been committed;

(*f*) direct the occupier that any premises or any part thereof, or anything lying therein, shall be left undisturbed (whether generally or in particular respects) for so long as is necessary for the purpose of any examination under clause (*b*);

(*g*) take measurements and photographs and make such recordings as he considers necessary for the purpose of any examination under clause (*b*), taking with him any necessary instrument or equipment;

(*h*) in case of any article or substance found in any premises, being an article or substance which appears to him as having caused or is likely to cause danger to the health or safety of the workers, direct it to be dismantled or subject it to any process or test (but not so as to damage or destroy it unless the same is, in the circumstances necessary, for carrying out the purposes of this Act), and take possession of any such article or substance or a part thereof, and detain it for so long as is necessary for such examination;

(*i*) exercise such other powers as may be prescribed.]

10. Certifying surgeons.—(*1*) The State Government may appoint qualified medical practitioners to be certifying surgeons for the purposes of this Act within such local limits or for such factory or class or description of factories as it may assign to them respectively.

(*2*) A certifying surgeon may, with the approval of the State Government, authorise any qualified medical practitioner to exercise any of his powers under this Act for such period as the certifying surgeon may specify and subject to such conditions as the State Government may think fit to impose, and references in this Act to a certifying surgeon shall be deemed to include references to any qualified medical practitioner when so authorised.

(*3*) No person shall be appointed to be, or authorised to exercise the powers of, a certifying surgeon, or having been so appointed or authorised, continue to exercise such powers, who is or becomes the occupier of a factory or is or becomes directly or indirectly interested therein or in any process or business carried on therein on in any patent or machinery connected therewith or is otherwise in the employ of the factory:

[3][Provided that the State Government may, by order in writing and subject to such conditions as may be specified in the order, exempt any person or class of persons from the provisions of this sub-section in respect of any factory or class or description of factories.]

(*4*) The certifying surgeon shall carry out such duties as may be prescribed in connection with—

(*a*) the examination and certification of young persons under this Act;

---

1. Ins. by Act 20 of 1987, s. 5 (w.e.f. 1-12-1987).
2. Subs. by s. 5, *ibid.*, for clauses (*b*) and (*c*) (w.e.f. 1-12-1987).
3. Ins. by Act 94 of 1976, s. 7 (w.e.f. 26-10-1976).

NHPC LIMITED FARIDABAD

(*b*) the examination of persons engaged in factories in such dangerous occupations or processes as may be prescribed;

(*c*) the exercising of such medical supervision as may be prescribed for any factory or class or description of factories where—

(*i*) cases of illness have occurred which it is reasonable to believe are due to the nature of the manufacturing process carried on, or other conditions of work prevailing, therein;

(*ii*) by reason of any change in the manufacturing process carried on or in the substances used therein or by reason of the adoption of any new manufacturing process or of any new substance for use in a manufacturing process, there is a likelihood of injury to the health of workers employed in that manufacturing process;

(*iii*) young persons are, or are about to be, employed in any work which is likely to cause injury to their health.

Explanation.—In this section "qualified medical practitioner" means a person holding a qualification granted by an authority specified in the Schedule to the Indian Medical Degrees Act, 1916 (7 of 1916), or in the Schedules to the Indian Medical Council Act, 1933 (27 of 1933)[1].

CHAPTER III

HEALTH

11. Cleanliness.—(*1*) Every factory shall be kept clean and free from effluvia arising from any drain, privy or other nuisance, and in particular—

(*a*) accumulation of dirt and refuse shall be removed daily by sweeping or by any other effective method from the floors and benches of workrooms and from staircases and passages, and disposed of in a suitable manner;

(*b*) the floor of every workroom shall be cleaned at least once in every week by washing, using disinfectant, where necessary, or by some other effective method;

(*c*) where a floor is liable to become wet in the course of any manufacturing process to such extent as is capable of being drained, effective means of drainage shall be provided and maintained;

(*d*) all inside walls and partitions, all ceilings or tops of rooms and all walls, sides and tops of passages and staircases shall—

(*i*) where they are [2][painted otherwise than with washable water-paint] or varnished, be repainted or revarnished at least once in every period of five years;

[3][(*ia*) where they are painted with washable water-paint, be repainted with at least one coat of such paint at least once in every period of three years and washed at least once in every period of six months;]

(*ii*) where they are painted or varnished or where they have smooth impervious surfaces, be cleaned at least once in every period of fourteen months by such method as may be prescribed;

(*iii*) in any other case, be kept whitewashed, or colourwashed, and the whitewashing or colourwashing shall be carried out at least once in every period of fourteen months;

[3][(*dd*) all doors and window frames and other wooden or metallic framework and shutters shall be kept painted or varnished and the painting or varnishing shall be carried out at least once in every period of five years;]

(*e*) the dates on which the processes required by clause (*d*) are carried out shall be entered in the prescribed register.

---

1. *See now* the Indian Medical Council Act, 1956 (102 of 1956).
2. Subs. by Act 94 of 1976, s. 8, for "painted" (w.e.f. 26-10-1976).
3. Ins. by s. 8, *ibid.* (w.e.f. 26-10-1976).

NHPC LIMITED FARIDABAD

(*2*) If, in view of the nature of the operations carried on [1][in a factory or class or description of factories or any part of a factory or class or description of factories], it is not possible for the occupier to comply with all or any of the provisions of subsection (*1*), the State Government may by order exempt such factory or class or description of factories [2][or part] from any of the provisions of that sub-section and specify alternative methods for keeping the factory in a clean stale.

12. Disposal of wastes and effluents.—[3][(*1*) Effective arrangements shall be made in every factory for the treatment of wastes and effluents due to the manufacturing process carried on therein, so as to render them innocuous, and for their disposal.]

(*2*) The State Government may make rules prescribing the arrangements to be made under sub-section (*1*) or requiring that the arrangements made in accordance with sub-section (*1*) shall be approved by such authority as may be prescribed.

13. Ventilation and temperature.—(*1*) Effective and suitable provision shall be made in ever factory for securing and maintaining in every workroom—

(*a*) adequate ventilation by the circulation of fresh air, and

(*b*) such a temperature as will secure to workers therein reasonable conditions of comfort and prevent injury to health;

and in particular,—

(*i*) walls and roofs shall be of such material and so designed that such temperature shall not be exceeded bill kept as tow as practicable;

(*ii*) where the nature of the work carried on in the factory involves, or is likely to involve the production of excessively high temperatures, such adequate measures as are practicable shall be taken to protect the workers therefrom, by separating the process which produces such temperatures from the workroom, by insulating the hot parts or by other effective means.

(*2*) The State Government may prescribe a standard of adequate ventilation and reasonable temperature for any factory or class or description of factories or parts thereof and direct that [4][proper measuring instruments, at such places and in such position as may be specified, shall be provided and such records, as may be prescribed, shall be maintained.]

[5][(*3*) If it appears to the Chief Inspector that excessively high temperatures in any factory can be reduced by the adoption of suitable measures, he may, without prejudice to the rules made under sub-section (*2*), serve on the occupier, an order in writing specifying the measures which, in his opinion, should be adopted, and requiring them to be carried out before a specified date.]

14. Dust and fume.—(*1*) In every factory in which, by reason of the manufacturing process carried on, there is given off any dust or fume or other impurity of such a nature and to such an extent as is likely to be injurious or offensive to the workers employed therein, or any dust in substantial quantities, effective measures shall be taken to prevent its inhalation and accumulation in any workroom, and if any exhaust appliance is necessary for this purpose, it shall be applied as near as possible to the point of origin of the dust, fume or other impurity, and such point shall be enclosed so far as possible.

(*2*) In any factory no stationary internal combustion engine shall be operated unless the exhaust is conducted into the open air, and no other internal combustion engine shall be operated in any room unless effective measures have been taken to prevent such accumulation of fumes therefrom as are likely to be injurious to workers employed in the room.

---

1. Subs. by Act 94 of 1976, s. 8, for "in a factory" (w.e.f. 26-10-1976).
2. Ins. by s. 8, *ibid.* (w.e.f. 26-10-1976).
3. Subs. by s. 9, *ibid.*, for sub-section (*1*) (w.e.f. 26-10-1976).
4. Subs. by Act 20 of 1987, s. 6, for certain words (w.e.f. 1-12-1987).
5. Subs. by s. 6, *ibid.*, for sub-section (*3*) (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

15. Artificial humidification.—(*1*) In respect of all factories in which the humidity of the air is artificially increased, the State Government may make rules,—

(*a*) prescribing standards of humidification;

(*b*) regulating the methods used for artificially increasing the humidity of the air;

(*c*) directing prescribed tests for determining the humidity of the air to be correctly carried out and recorded;

(*d*) prescribing methods to be adopted for securing adequate ventilation and cooling of the air in the workrooms.

(*2*) In any factory in which the humidity of the air is artificially increased, the water used for the purpose shall be taken from a public supply, or other source of drinking water, or shall be effectively purified before it is so used.

(*3*) If it appears to an Inspector that the water used in a factory for increasing humidity which is required to be effectively purified under sub-section (*2*) is not effectively purified he may serve on the manager of the factory an order in writing, specifying the measures which in his opinion should be adopted, and requiring them to be carried out before specified date.

16. Overcrowding.—(*1*) No room in any factory shall be overcrowded to an extent injurious to the health of the workers employed therein.

(*2*) Without prejudice to the generality of sub-section (*1*) there shall be in every workroom of a factory in existence on the date of the commencement of this Act at least [1][9.9 cubic metres] and of a factory built after the commencement of this Act at least [2][14.2 cubic metres] of space for every worker employed therein, and for the purposes of this sub-section no account shall be taken of any space which is more than [3][4.2 metres] above the level of the floor of the room.

(*3*) If the Chief Inspector by order in writing so requires, there shall be posted in each workroom of a factory a notice specifying the maximum number of workers who may, in compliance with the provisions of this section, be employed in the room.

(*4*) The Chief Inspector may by order in writing exempt, subject to such conditions, if any, as he may think fit to impose, any workroom from the provisions of this section, if he is satisfied that compliance therewith in respect of the room is unnecessary in the interest of the health of the workers employed therein.

17. Lighting.—(*1*) In every part of a factory where workers are working of passing there shall be provided and maintained sufficient and suitable lighting, natural or artificial, or both.

(*2*) In every factory all glazed windows and skylights used for the lighting of the workrooms shall be kept clean on both the inner and outer surfaces and, so far as compliance with the provisions of any rules made under sub-section (*3*) of section 13 will allow, free from obstruction.

(*3*) In every factory effective provision shall, so far as is practicable, be made for the prevention of—

(*a*) glare, either directly from a source of light or by reflection from a smooth or polished surface:

(*b*) the formation of shadows to such an extent as to cause eye-strain or the risk of accident to any worker.

(*4*) The State Government may prescribe standards of sufficient and suitable lighting for factories or for any class or description of factories or for any manufacturing process.

18. Drinking water.—(*1*) In every factory effective arrangements shall be made to provide and maintain at suitable points conveniently situated for all workers employed therein a sufficient supply of wholesome drinking water.

---

1. Subs. by Act 20 of 1987, s. 7, for "three hundred and fifty cubic feet" (w.e.f. 1-12-1987).
2. Subs. by s. 7, *ibid.*, for "five hundred cubic feet" (w.e.f. 1-12-1987).
3. Subs. by s. 7, *ibid.*, for "fourteen feet" (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

(*2*) All such points shall be legibly marked "drinking water" in a language understood by a majority of the workers employed in the factory, and no such point shall be situated within [1][six metres of any washing place, urinal, latrine, spittoon, open drain carrying sullage or effluent or any other source of contamination] unless a shorter distance is approved in writing by the Chief Inspector.

(*3*) In every factory wherein more than two hundred and fifty workers are ordinarily employed, provision shall be made for cool drinking water during hot weather by effective means and for distribution thereof.

(*4*) In respect of all factories or any class or description of factories the State Government may make rules for securing compliance with the provisions of sub-sections (*1*), (*2*) and (*3*) and for the examination by prescribed authorities of the supply and distribution of drinking water in factories.

19. Latrines and urinals.—(*1*) In every factory—

(*a*) sufficient latrine and urinal accommodation of prescribed types shall be provided conveniently situated and accessible to workers at all times while they are at factory;

(*b*) separate enclosed accommodation shall be provided for male and female workers;

(*c*) such accommodation shall be adequately lighted and ventilated, and no latrine or urinal shall, unless specially exempted in writing by the Chief Inspector, communicate with any work room except through an intervening open space or ventilated passage;

(*d*) all such accommodation shall be maintained in a clean and sanitary condition at all times;

(*e*) sweepers shall be employed whose primary duty it would be to keep clean latrines, urinals and washing places.

(*2*) In every factory wherein more than two hundred and fifty workers are ordinarily employed—

(*a*) all latrine and urinal accommodation shall be of prescribed sanitary types;

(*b*) the floors and internal walls, up to a height of [2][ninety centimetres], of the latrines and urinals and the sanitary blocks shall be laid in glazed tiles or otherwise finished to provide a smooth polished impervious surface;

(*c*) without prejudice to the provisions of clauses (*d*) and (*e*) of sub-section (*1*), the floors, portions of the walls and blocks so laid or finished and the sanitary pans of latrines and urinals shall be thoroughly washed and cleaned at least once in every seven days with suitable detergents or disinfectants or with both.

(*3*) The State Government may prescribe the number of latrines and urinals to be provided in any factory in proportion to the numbers of male and female workers ordinarily employed therein, and provide for such further mailers in respect of sanitation in factories, including the obligation of workers in this regard, as it considers necessary in the interest of the health of the workers employed therein.

20. Spittoons.—(*1*) In every factory there shall be provided a sufficient number of spittoons in convenient places and they shall be maintained in a clean and hygienic condition.

(*2*) The State Government may make rules prescribing the type and the number of spittoons to be provided and their location in any factory and provide for such further matters relating to their maintenance in a clean and hygienic condition.

1. Subs. by Act 20 of 1987, s. 8, for "twenty feet of any washing place, urinal or latrine" (w.e.f. 1-12-1987).
2. Subs. by s. 9, *ibid.*, for "three feet" (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

(*3*) No person shall spit within the premises of a factory except in the spittoons provided for the purpose and a notice containing this provision and the penalty for its violation shall be prominently displayed at suitable places in the premises.

(*4*) Whoever spits in contravention of sub-section (*3*) shall be punishable with fine not exceeding five rupees.

CHAPTER IV

SAFETY

21. Fencing of machinery.—(*1*) In every factory the following, namely:—

(*i*) every moving part of a prime mover and every flywheel connected to a prime mover, whether the prime mover or flywheel is in the engine house or not;

(*ii*) the headrace and tailrace of every water-wheel and water turbine:

(*iii*) any part of a stock-bar which projects beyond the head stock of a lathe; and

(*iv*) unless they are in such position or of such construction as to be safe to every person employed in the factory as they would be if they were securely fenced, the following, namely:—

(*a*) every part of an electric generator, a motor or rotary converter;

(*b*) every part of transmission machinery; and

(*c*) every dangerous part of any other machinery;

shall be securely fenced by safeguards of substantial construction which [1][shall be constantly maintained and kept in position] while the parts of machinery the y are fencing are in motion or in use:

[2][Provided that for the purpose of determining whether any part of machinery is in such position or is of such construction as to be safe as aforesaid, account shall not be taken of any occasion when—

(*i*) it is necessary to make an examination of any part of the machinery aforesaid while it is in motion or, a s a result of such examination, to carry out lubrication or other adjusting operation while the machinery is in motion, being an examination or operation which it is necessary to be carried out while that part of the machinery is in motion, or

(*ii*) in the case of any part of a transmission machinery used in such process as may be prescribed (being a process of a continuous nature the carrying on of which shall be, or is likely to be, substantially interfered with by the stoppage of that part of the machinery), it is necessary to make an examination of such part of the machinery while it is in motion or, as a result of such examination, to carry out any mounting or shipping of belts or lubrication or other adjusting operation while the machinery is in motion,

and such examination or operation is made or carried out in accordance with the provisions of sub-section (*1*) of section 22.]

(*2*) The State Government may by rules prescribe such further precautions as it may consider necessary in respect of any particular machinery or part thereof, or exempt, subject to such condition as may be prescribed, for securing the safety of the workers, any particular machinery or part thereof from the provisions of this section.

22. Work on or near machinery in motion.—(*1*) [3][Where in any factory it becomes necessary to examine any part of machinery referred to in section 21, while the machinery is in motion, or, as a result of such examination, to carry out—

(*a*) in a case referred to in clause (*i*) of the proviso to sub-section (*1*) of section 21, lubrication or other adjusting operation; or

---

1. Subs. by Act 94 of 1976, s. 10, for "shall be kept in position" (w.e.f. 26-10-1976).
2. Subs. by s. 10, *ibid.*, for the proviso (w.e.f. 26-10-1976).
3. Subs. by s. 11, *ibid.*, for the opening paragraph and clause (*a*) (w.e.f. 26-10-1976).

NHPC LIMITED FARIDABAD

(*b*) in a case referred to in clause (*ii*) of the proviso aforesaid, any mounting or shipping of belts or lubrication or other adjusting operation,

while the machinery is in motion, such examination or operation shall be made or carried out only by a specially trained adult male worker wearing tight fitting clothing (which shall be supplied by the occupier) whose name has been recorded in the register prescribed in this behalf and who has been furnished with a certificate of this appointment, and while he is so engaged,—

(*a*) such worker shall not handle a belt at a moving pulley unless—

(*i*) the belt is not more than fifteen centimetres in width;

(*ii*) the pulley is normally for the purpose of drive and not merely a fly-wheel or balance wheel (in which case a belt is not permissible);

(*iii*) the belt joint is either laced or flush with the belt;

(*iv*) the belt, including the joint and the pulley rim, are in good repair;

(*v*) there is reasonable clearance between the pulley and any fixed plant or structure;

(*vi*) secure foothold and, where necessary, secure handhold, are provided for the operator; and

(*vii*) any ladder in use for carrying out any examination or operation aforesaid is securely fixed or lashed or is firmly held by a second person;]

(*b*) without prejudice to any other provision of this Act relating to the fencing of machinery, every set screw, bolt and key on any revolving shaft, spindle, wheel or pinion, and all spur, worm and other toothed or friction gearing in motion with which such worker would otherwise be liable to come into contact, shall be securely fenced to prevent such contact.

[1][(*2*) No woman or young person shall be allowed to clean, lubricate or adjust any part of a prime mover or of any transmission machinery while the prime mover or transmission machinery is in motion, or to clean, lubricate or adjust any part of any machine if the cleaning, lubrication or adjustment thereof would expose the woman or young person to risk of injury from any moving part either of that machine or of any adjacent machinery.]

(*3*) The State Government may, by notification in the Official Gazette, prohibit, in any specified factory or class or description of factories, the cleaning, lubricating or adjusting by any person of specified parts of machinery when those parts are in motion.

23. Employment of young persons on dangerous machines.—(*1*) No young person [2][shall be required or allowed to work] at any machine to which this section applies, unless he has been fully instructed as to the dangers arising in connection with the machine and the precautions to be observed and—

(*a*) has received sufficient training in work at the machine, or

(*b*) is under adequate supervision by a person who has a thorough knowledge and experience of the machine.

(*2*) Sub-section (*1*) shall apply to such machines as may be prescribed by the State Government, being machines which in its opinion are of such a dangerous character that young persons ought not to work at them unless the foregoing requirements are complied with.

24. Striking gear and devices for cutting off power.—(*1*) In every factory—

(*a*) suitable striking gear or other efficient mechanical appliance shall be provided and maintained and used to move driving belts to and from fast and loose pulleys which form part of the transmission machinery, and such gear or appliances shall be so constructed, placed and maintained as to prevent the belt from creeping back on the fast pulley;

(*b*) driving belts when not in use shall not be allowed to rest or ride upon shafting in motion.

---

1. Subs. by Act 25 of 1954, s. 6, for sub-section (*2*) (w.e.f. 7-5-1954).
2. Subs. by Act 20 of 1987, s. 10, for "shall work" (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

(*2*) In every factory suitable devices for cutting off power in emergencies from running machinery shall be provided and maintained in every workroom:

Provided that in respect of factories in operation before the commencement of this Act, the provisions of this sub-section shall apply only to workrooms in which electricity is used as power.

[1][(*3*) When a device, which can inadvertently shift from "off" to "on" position, is provided in a factory to cut off power, arrangements shall be provided for locking the device in safe position to prevent accidental starting of the transmission machinery or other machines to which the device is fitted].

25. Self-acting machines.—No traversing part of a self-acting machine in any factory and no material carried thereon shall, if the space over which it runs is a space over which any person is liable to pass, whether in the course of his employment or otherwise, be allowed to run on its outward or inward traverse within a distance of [2][forty-five centimetres] from any fixed structure which is not part of the machine:

Provided that the Chief Inspector may permit the continued use of a machine installed before the commencement of this Act which does not comply with the requirements of this section on such conditions for ensuring safety as he may think fit to impose.

26. Casing of new machinery.—(*1*) In all machinery driven by power and installed in any factory after the commencement of this Act,—

(*a*) every set screw, bolt or key on any revolving shaft, spindle, wheel or pinion shall be so sunk, encased or otherwise effectively guarded as to prevent danger;

(*b*) all spur, worm and other toothed or friction gearing which does not require frequent adjustment while in motion shall be completely encased, unless it is so situated as to be as safe as it would be if it were completely encased.

(*2*) Whoever sells or lets on hire or, as agent of a seller or hirer, causes or procures to be sold or let on hire, for use in a factory any machinery driven by power which does not comply with the provisions of [3][sub-section (*1*) or any rules made under sub-section (*3*)], shall be punishable with imprisonment for a term which may extend to three months or with fine which may extend to five hundred rupees or with both.

[4][(*3*) The State Government may make rules specifying further safeguards to be provided in respect of any other dangerous part of any particular machine or class or description of machines.]

27. Prohibition of employment of women and children near cotton-openers.—No woman or child shall be employed in any part of a factory for pressing cotton in which a cotton opener is at work:

Provided that if the feed-end of a cotton-opener is in a room separated from the delivery end by a partition extending to the roof or to such height as the Inspector may in any particular case specify in writing, women and children may be employed on the side of the partition where the feed-end is situated.

28. Hoists and lifts.—(*1*) In every factory—

(*a*) every hoist and lift shall be—

(*i*) of good mechanical construction, sound material and adequate strength;

(*ii*) properly maintained, and shall be thoroughly examined by a competent person at least once in every period of six months, and a register shall be kept containing the prescribed particulars of very such examination;

---

1. Ins. by Act 94 of 1976, s. 12 (w.e.f. 26-10-1976).
2. Subs. by Act 20 of 1987, s. 11, for "eighteen inches" (w.e.f. 1-12-1987).
3. Subs. by Act 25 of 1954, s. 7, for "sub-section (*1*)" (w.e.f. 7-5-1954).
4. Subs. by s. 7, *ibid.*, for sub-section (*3*) (w.e.f. 7-5-1954).

NHPC LIMITED FARIDABAD

(*b*) every hoist way and lift way shall be sufficiently protected by an enclosure fitted with gates, and the hoist or lift and every such enclosure shall be so constructed as to prevent any person or thing from being trapped between any part of the hoist or lift and any fixed structure or moving part;

(*c*) the maximum safe working load shall be plainly marked on every hoist or lift, and no load greater than such load shall be carried thereon;

(*d*) the cage of every hoist or lift used for carrying persons shall be fitted with a gate on each side from which access is afforded to a landing;

(*e*) every gate referred to in clause (*b*) or clause (*d*) shall be fitted with interlocking or other efficient device to secure that the gate cannot be opened except when the cage is at the landing and that the cage cannot be moved unless the gate is closed.

(*2*) The following additional requirement shall apply to hoists and lifts used for carrying persons and installed or reconstructed in a factory after the commencement of this Act, namely:—

(*a*) where the cage is supported by rope or chain, there shall be at least two ropes of chains separately connected with the cage and balance weight, and each rope or chain with its attachments shall be capable of carrying the whole weight of the cage together with its maximum load;

(*b*) efficient devices shall be provided and maintained capable of supporting the cage together with its maximum load in the event of breakage of the ropes, chains or attachments;

(*c*) an efficient automatic device shall be provided and maintained to prevent the cage from over-running.

(*3*) The Chief Inspector may permit the continued, use of a hoist of lift installed in a factory before the commencement of this Act which does not fully comply with the provisions of sub-section (*1*) upon such conditions for ensuring safely as he may think fit to impose.

(*4*) The State Government may, if in respect of any class or description of hoist or lift, it is of opinion that it would be unreasonable to enforce any requirement of sub-sections (*1*) and (*2*), by order direct that such requirement shall not apply to such class or description of hoist or lift.

[1][*Explanation.*—For the purposes of this section, no lifting machine or appliance shall be deemed to be a hoist or lift unless it has a platform or cage, the direction or movement of which is restricted by a guide or guides.]

[2][**29. Lifting machines, chains, ropes and lifting tackles.**—(*1*) In any factory the following provisions shall be complied with in respect of every lifting machine (other than a hoist and lift) and every chain, rope and lifting tackle for the purpose of raising or lowering persons, goods or materials:—

(*a*) all parts, including the working gear, whether fixed or movable, of every lifting machine and every chain, rope or lifting tackle shall be—

(*i*) of good construction, sound material and adequate strength and free from defects;

(*ii*) properly maintained; and

(*iii*) thoroughly examined by a competent person at least once in every period of twelve months, or at such intervals as the Chief Inspector may specify in writing; and a register shall be kept containing the prescribed particulars of every such examination;

(*b*) no lifting machine and no chain, rope or lifting tackle shall, except for the purpose of test be loaded beyond the safe working load which shall be plainly marked thereon together with an identification mark and duly entered in the prescribed register; and where this is not practicable, a table showing the safe working loads of every kind and size of lifting machine or chain, rope or lifting tackle in use shall be displayed in prominent positions on the premises;

---

1. Ins. by Act 20 of 1987, s. 12 (w.e.f. 1-12-1987).
2. Subs. by Act 25 of 1954, s. 8, for section 29 (w.e.f. 7-5-1954).

NHPC LIMITED FARIDABAD

(*c*) while any person is employed or working on or near the wheel track of a travelling crane in any place where he would be liable to be struck by the crane, effective measures shall be taken to ensure that the crane does not approach within [1][six metres] of that place.

(*2*) The State Government may make rules in respect of any lifting machine or any chain, rope or lifting tackle used in factories—

(*a*) prescribing further requirements to be complied with in addition to those set out in this section;

(*b*) providing for exemption from compliance with all or any of the requirements of this section, where in its opinion, such compliance is unnecessary or impracticable.

(*3*) For the purposes of this section a lifting machine or a chain, rope or lifting tackle shall be deemed to have been thoroughly examined if a visual examination supplemented, if necessary, by other means and by the dismantling of parts of the gear, has been carried out as carefully as the conditions permit in order to arrive at a reliable conclusion as to the safely of the parts examined.

Explanation.—In this section.—

(*a*) "lifting machine" means a crane, crab, winch, teagle, pulley block, gin wheel, transporter or runway;

[2][(*b*) "lifting tackle" means any chain sling, rope sling, hook, shackle, swivel, coupling, socket, clamp, tray or similar appliance, whether fixed or movable, used in connection with the raising or lowering of persons, or loads by use of lifting machines.]

30. Revolving machinery.—(*1*) [3][In every factory] in which the process of grinding is carried on there shall be permanently affixed to or placed near each machine in use a notice indicating the maximum safe working peripheral speed of every grindstone or abrasive wheel, the speed of the shaft or spindle upon which the wheel is mounted, and the diameter of the pulley upon such shaft or spindle necessary to secure such safe working peripheral speed.

(*2*) The speeds indicated in notices under sub-section (*1*) shall not be exceeded.

(*3*) Effective measures shall be taken in every factory to ensure that the safe working peripheral speed of every revolving vessel, cage, basket, fly-wheel, pulley, disc or similar appliance driven by power is not exceeded.

31. Pressure plant.—[4][(*1*) If in any factory, any plant or machinery or any part thereof is operated at a pressure above atmospheric pressure, effective measures shall be taken to ensure that the safe working pressure of such plant or machinery or part is not exceeded.]

(*2*) The State Government may make rules providing for the examination and testing of any plant or machinery such as is referred to in sub-section (*1*) and prescribing such other safety measures in relation thereto as may in its opinion be necessary in any factory or class or description of factories.

[5][(*3*) The State Government may, by rules, exempt, subject to such conditions as may be specified therein, any part of any plant or machinery referred to in sub-section (*1*) from the provisions of this section.]

32. Floors, stairs and means of access.—In every factory—

(*a*) all floors, steps, stairs, passages and gangways shall be of sound construction and properly maintained [6][and shall be kept free from obstructions and substances likely to cause persons to slip], and where it is necessary to ensure safety, steps, stairs, passages and gangways shall be provided with substantial handrails;

---

1. Subs. by Act 20 of 1987, s. 13, for "twenty feet" (w.e.f. 1-12-1987).
2. Subs. by s. 13, *ibid.*, for clause (*b*) (w.e.f. 1-12-1987).
3. Subs. by s. 14, *ibid.*, for "in every room in a factory" (w.e.f. 1-12-1987).
4. Subs. by s. 15, *ibid.*, for sub-section (*1*) (w.e.f. 1-12-1987).
5. Ins. by Act 94 of 1976, s. 13 (w.e.f. 26-10-1976).
6. Ins. by s. 14, *ibid.* (w.e.f. 26-10-1976).

NHPC LIMITED FARIDABAD

(*b*) there shall, so far as is reasonably practicable, be provided and maintained safe means of access to every place at which any person is at any time required to work.

[1][(*c*) when any person has to work at a height from where he is likely to fall, provision shall be made, so far as is reasonably practicable, by fencing or otherwise, to ensure the safety of the person so working.]

33. Pits, sumps openings in floors, etc.—(*1*) In every factory every fixed vessel, sump, tank, pit or opening in the ground or in a floor which, by reason of its depth, situation, construction or contents, is or may be a source of danger, shall be either securely covered or securely fenced.

(*2*) The State Government may, by order in writing, exempt, subject to such conditions as may be prescribed, any factory or class or description of factories in respect of any vessel, sump, tank, pit or opening from compliance with the provisions of this section.

34. Excessive weights.—(*1*) No person shall be employed in any factory to lift, carry or move any load so heavy as to be likely to cause him injury.

(*2*) The State Government may make rules prescribing the maximum weights which may be lifted, carried or moved by adult men, adult women, adolescents and children employed in factories or in any class or description of factories or in carrying or any specified process.

35. Protection of eyes.—In respect of any such manufacturing process carried on in any factory as may be prescribed, being a process which involves—

(*a*) risk of injury to the eyes from particles or fragments thrown off in the course of the process, or

(*b*) risk to the eyes by reason of exposure to excessive light, the State Government may by rules require that effective screens or suitable goggles shall be provided for the protection of persons employed on, or in the immediate vicinity of, the process.

[2][**36. Precautions against dangerous fumes, gases, etc.**—(*1*) No person shall be required or allowed to enter any chamber, tank, vat, pit, pipe, flue or other confined space in any factory in which any gas, fume vapour or dust is likely to be present to such an extent as to involve risk to persons being overcome thereby, unless it is provided with a manhole of adequate size or other effective means of egress.

(*2*) No person shall be required or allowed to enter any confined space as is referred to in sub-section (*1*), until all practicable measures have been taken to remove any gas, fume, vapour or dust, which may be present so as to bring its level within the permissible limits and to prevent any ingress of such gas, fume, vapour or dust and unless—

(*a*) a certificate in writing has been given by a competent person, based on a test carried out by himself that the space is reasonably free from dangerous gas, fume, vapour or dust; or

(*b*) such person is wearing suitable breathing apparatus and a belt securely attached to a rope the free end of which is held by a person outside the confined space.]

[3][**36A. Precautions regarding the use of portable electric light.**—In any factory—

(*a*) no portable electric light or any other electric appliance of voltage exceeding twenty-four volts shall be permitted for use inside any chamber, tank, vat, pit, pipe, flue or other confined space [4][unless adequate safety devices are provided]; and

(*b*) if any inflammable gas, fume or dust is likely to be present in such chamber, tank, vat, pit, pipe, flue or other confined space, no lamp or light other than that flame-proof construction shall be permitted to be used therein.]

---

1. Subs. by Act 20 of 1987, s. 16, for clause (*c*) (w.e.f. 1-12-1987).
2. Subs. by s. 17, *ibid.*, for section 36 (w.e.f. 1-12-1987).
3. Ins. by Act 94 of 1976, s. 16 (w.e.f. 26-10-1976).
4. Ins. by Act 20 of 1987, s. 18 (w.e.f. 1-12-1987).

NHPC LIMITED
FARIDABAD

37. Explosive or inflammable dust, gas, etc.—(*1*) Where in any factory any manufacturing process produces dust, gas, fume or vapour of such character and to such extent as to be likely to explode on ignition, all practicable measure shall be taken to prevent any such explosion by—

(*a*) effective enclosure of the plant or machinery used in the process;

(*b*) removal or prevention of the accumulation of such dust, gas, fume or vapour;

(*c*) exclusion or effective enclosure of all possible sources of ignition.

(*2*) Where in any factory the plant or machinery used in a process such as is referred to in sub-section (*1*) is not so constructed as to withstand the probable pressure which such an explosion as aforesaid would produce, all practicable measures shall be taken to restrict the spread and effects of the explosion by the provision in the plant or machinery of chokes, baffles, vents or other effective appliances.

(*3*) Where any part of the plant or machinery in a factory contains any explosive or inflammable gas or vapour under pressure greater than atmospheric pressure, that part shall not be opened except in accordance with the following provisions, namely:—

(*a*) before the fastening of any joint of any pipe connected with the part or the fastening of the cover of any opening into the part is loosened, any flow of the gas or vapour into the part of any such pipe shall be effectively stopped by a stop-valve or other means;

(*b*) before any such fastening as aforesaid is removed, all practicable measures shall be taken to reduce the pressure of the gas or vapour in the part or pipe to atmospheric pressure;

(*c*) where any such fastening as aforesaid has been loosened or removed effective measures shall be taken or prevent any explosive or inflammable gas or vapour from entering the part or pipe until the fastening has been secured, or the case may be, securely replaced;

Provided that the provisions of this sub-section shall not apply in the case of plant or machinery installed in the open air.

(*4*) No plant, tank or vessel which contains or has contained any explosive or inflammable substance shall be subjected in any factory to any welding, brazing, soldering or cutting operation which involves the application of heat unless adequate measures have first been taken to remove such substance and any fumes arising therefrom or to render such substance and fumes non-explosive or non-inflammable, and no such substance shall be allowed to enter such plant, tank or vessel after any such operation until the metal has cooled sufficiently to prevent any risk of igniting the substance.

(*5*) The State Government may by rules exempt, subject to such conditions as may be prescribed, any factory or class or description of factories from compliance with all or any of the provisions of this section.

[1][**38. Precautions in case of fire.**—(*1*) In every factory, all practicable measures shall he taken to prevent outbreak of fire and its spread, both internally and externally, and to provide and maintain—

(*a*) safe means of escape for all persons in the event of a fire, and

(*b*) the necessary equipment and facilities for extinguishing fire.

(*2*) Effective measures shall be taken to ensure that in every factory all the workers are familiar with the means of escape in case of fire and have been adequately trained in the routine to be followed in such cases.

(*3*) The State Government may make rules, in respect of any factory or class or description of factories, requiring the measures to be adopted to give effect to the provisions of sub-sections (*1*) and (*2*).

1. Subs. by Act 20 of 1987, s. 19, for section 38 (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

(*4*) Notwithstanding anything contained in clause (*a*) of sub-section (*1*) or sub-section (*2*), if the Chief Inspector, having regard to the nature of the work carried on in any factory, the construction of such factory, special risk to life or safety, or any other circumstances, is of the opinion that the measures provided in the factory, whether as prescribed or not, for the purposes of clause (*a*) of sub-section (*1*) or sub-section (*2*), are inadequate, he may, by order in writing, require that such additional measures as he may consider reasonable and necessary, be provided in the factory before such date as is specified in the order.]

39. Power to require specifications of defective parts or tests of stability.—If it appears to the Inspector that any building or part of a building or any part of the ways, machinery or plant in a factory is in such a condition that it may be dangerous to human life or safety, he may serve on [1][the occupier or manger or both] of the factory an order in writing requiring him before a specified date—

(*a*) to furnish such drawings, specifications and other particulars as may be necessary to determine whether such building, ways, machinery or plant can be used with safety, or

(*b*) to carry out such tests in such manner as may be specified in the order, and to inform the Inspector of the results thereof.

40. Safety of buildings and machinery.—(*1*) If it appears to the Inspector that any building or part of a building or any part of the ways, machinery or plant in a factory is in such a condition that it is dangerous to human life or safety, he may serve on [1][the occupier or manager or both] of the factory an order in writing specifying the measures which in his opinion should be adopted, and requiring them to be carried out before a specified date.

(*2*) If it appears to the Inspector that the use of any building or part of a building or any part of the ways, machinery or plant in a factory involves imminent danger to human life or safety, he may serve on [1][the occupier or manager or both] of the factory an order in writing prohibiting its use until it has been properly repaired or altered.

[2][**40A. Maintenance of buildings.**—If it appears to the Inspector that any building or part of a building in a factory is in such a state of disrepair as is likely to lead to conditions detrimental to the health and welfare of the workers, he may serve on the occupier or manager or both of the factory an order in writing specifying the measures which in his opinion should be taken and requiring the same to be carried out before such date as is specified in the order.]

40B. Safety Officers.—(*1*) In every factory—

(*i*) wherein one thousand or more workers are ordinarily employed, or

(*ii*) wherein, in the opinion of the State Government, any manufacturing process or operation is carried on, which process or operation involves any risk of bodily injury, poisoning or disease, or any other hazard to health, to the persons employed in the factory,

the occupier shall, if so, required by the State Government by notification in the Official Gazette, employ such number of Safety Officers as may be specified in that notification.

(*2*) The duties, qualifications and conditions of service of Safety Officers shall be such as may be prescribed by the State Government.]

41. Power to make rules to supplement this Chapter.—The State Government may make rules requiring the provision in any factory or in any class or description of factories of such further [3][devices and measures] for securing the safety of persons employed therein as it may deem necessary.

---

1. Subs. by Act 94 of 1976, s. 18, for "the manager" (w.e.f. 26-10-1976).
2. Ins. by s. 19, *ibid.* (w.e.f. 26-10-1976).
3. Subs. by s. 20, *ibid.*, for "devices" (w.e.f. 26-10-1976).

NHPC LIMITED FARIDABAD

[1][CHAPTER IVA

PROVISIONS RELATING TO HAZARDOUS PROCESSES

41A. Constitution of Site Appraisal Committee.—(*1*) The State Government may, for purposes of advising it to consider applications for grant of permission for the initial location of a factory involving a hazardous process or for the expansion of an such factory, appoint a Site Appraisal Committee consisting of—

(*a*) the Chief Inspector of the State who shall be its Chairman;

(*b*) a representative of the Central Board for the Prevention and Control of Water Pollution appointed by the Central Government under section 3 of the Water (Prevention and Control of Pollution) Act, 1974 (6 of 1974);

(*c*) a representative of the Central Board for the Prevention and Control of Air Pollution referred to in section 3 of the Air (Prevention and Control of Pollution) Act, 1981 (14 of 1981);

(*d*) a representative of the State Board appointed under section 4 of the Water (Prevention and Control of Pollution) Act, 1974 (6 of 1974);

(*e*) a representative of the State Board for the Prevention and Control of Air Pollution referred to in section 5 of the Air (Prevention and Control of Pollution) Act, 1981 (14 of 1981);

(*f*) a representative of the Department of Environment in the State;

(*g*) a representative of the Meteorological Department of the Government of India;

(*h*) an expert in the field of occupational health; and

(*i*) a representative of the Town Planning Department of the State Government,

and not more than five other members who may be co-opted by the State Government who shall be—

(*i*) a scientist having specialised knowledge of the hazardous process which will be involved in the factory,

(*ii*) a representative of the local authority within whose jurisdiction the factory is to be established, and

(*iii*) not more than three other persons as deemed fit by the State Government.

(*2*) The Site Appraisal Committee shall examine an application for the establishment of a factory involving hazardous process and make its recommendation to the State Government within a period of ninety days of the receipt of such application in the prescribed form.

(*3*) Where any process relates to a factory owned or controlled by the Central Government or to a corporation or a company owned or controlled by the Central Government, the State Government shall co-opt in the Site Appraisal Committee a representative nominated by the Central Government as a member of that Committee.

(*4*) The Site Appraisal Committee shall have power to call for any information from the person making an application for the establishment or expansion of a factory involving a hazardous process.

(*5*) Where the State Government has granted approval to an application for the establishment or expansion of a factory involving a hazardous process, it shall not be necessary for an applicant to obtain a further approval from the Central Board or the State Board established under the Water (Prevention and Control of Pollution) Act, 1974 (6 of 1974) and the Air (Prevention and Control of Pollution) Act, 1981 (14 of 1981).

1. Ins. by Act 20 of 1987, s. 20 (w.e.f. 1-12-1987).

NHPC LIMITED
FARIDABAD

41B. Compulsory disclosure of information by the occupier.—(*1*) The occupier of every factory involving a hazardous process shall disclose in the manner prescribed all information regarding dangers, including health hazards and the measures to overcome such hazards arising from the exposure to or handling of the materials or substances in the manufactures, transportation, storage and other processes, to the workers employed in the factory, the Chief Inspector, the local authority within whose jurisdiction the factory is situate and the general public in the vicinity.

(*2*) The occupier shall, at the time of registering the factory involving a hazardous process, lay down a detailed policy with respect to the health and safety of the workers employed therein and intimate such policy to the Chief Inspector and the local authority and, thereafter, at such intervals as may be prescribed, inform the Chief Inspector and the local authority of any change made in the said policy.

(*3*) The information furnished under sub-section (*1*) shall include accurate information as to the quantity, specification and other characteristics of wastes and the manner of their disposal.

(*4*) Every occupier shall, with the approval of the Chief Inspector, draw up an on-site emergency plan and detailed disaster control measures for his factory and make known to the workers employed therein and to the general public living in the vicinity of the factory the safety measures required to be taken in the event of an accident taking place.

(*5*) Every occupier of a factory shall,—

(*a*) if such factory engaged in a hazardous process on the commencement of the Factories (Amendment) Act, 1987 (20 of 1987), within a period of thirty days of such commencement; and

(*b*) if such factory proposes to engaged in a hazardous process at any time after such commencement, within a period of thirty days before the commencement of such process,

inform the Chief Inspector of the nature and details of the process in such form and in such manner as may be prescribed.

(*6*) Where any occupier of a factory contravenes the provisions of sub-section (*5*), the licence issued under section 6 to such factory shall, notwithstanding any penalty to which the occupier or factory shall be subjected to under the provisions of this Act, be liable for cancellation.

(*7*) The occupier of a factory involving a hazardous process shall, with the previous approval of the Chief Inspector, lay down measures for the handling, usage, transportation and storage of hazardous substances inside the factory premises and the disposal of such substances outside the factory premises and publicise them in the manner prescribed among the workers and the general public living in the vicinity.

41C. Specific responsibility of the occupier in relation to hazardous processes.—Every occupier of a factory involving any hazardous process shall—

(*a*) maintain accurate and up-to-date health records or, as the case may be, medical records, of the workers in the factory who are exposed to any chemical, toxic or any other harmful substances which are manufactured, stored, handled or transported and such records shall be accessible to the workers subject to such conditions as may be prescribed;

(*b*) appoint persons who possess qualifications and experience in handling hazardous substances and are competent to supervise such handling within the factory and to provide at the working place all the necessary facilities for protecting the workers in the manner prescribed:

Provided that where any question arises as to the qualifications and experience of a person so appointed, the decision of the Chief Inspector shall be final;

(*c*) provide for medical examination of every worker—

(*a*) before such worker is assigned to a job involving the handling of, or working with, a hazardous substance, and

(*b*) while continuing in such job, and after he has ceased to work in such job, at intervals not exceeding twelve months, in such manner as may be prescribed.

NHPC LIMITED FARIDABAD

41D. Power of Central Government to appoint Inquiry Committee.—(*1*) The Central Government may, in the event of the occurrence of an extraordinary situation involving a factory engaged in a hazardous process, appoint an Inquiry Committee to inquire into the standards of health and safety observed in the factory with a view to finding out the causes of any failure or neglect in the adoption of any measures or standards prescribed for the health and safety of the workers employed in the factory or the general public affected, or likely to be affected, due to such failure or neglect and for the prevention and recurrence of such extraordinary situations in future in such factory or elsewhere.

(*2*) The Committee appointed under sub-section (*1*) shall consist of a Chairman and two other members and the terms of reference of the Committee and the tenure of office of its members shall be such as may be determined by the Central Government according to the requirements of the situation.

(*3*) The recommendations of the Committee shall be advisory in nature.

41E. Emergency standards.—(*1*) Where the Central Government is satisfied that no standards of safety have been prescribed in respect of a hazardous process or class of hazardous processes, or where the standards so prescribed are inadequate, it may direct the Director-General of Factory Advice Service and Labour Institutes or any institution specialised in matters relating to standards of safety in hazardous processes, to lay down emergency standards for enforcement of suitable standards in respect of such hazardous processes.

(*2*) The emergency standards laid down under sub-section (*1*) shall, until they are incorporated in the rules made under this Act, be enforceable and have the same effect as if they had been incorporated in the rules made under this Act.

***41F. Permissible limits of exposure of chemical and toxic substances.**—(*1*) The maximum permissible threshold limits of exposure of chemical and toxic substances in manufacturing processes (whether hazardous or otherwise) in any factory shall be of the value indicated in the Second Schedule.

(*2*) The Central Government may, at any time, for the purpose of giving effect to any scientific proof obtained from specialised institutions or experts in the field by notification in the Official Gazette, make suitable changes in the said Schedule.

41G. Workers' participation in safety management.—(*1*) The occupier shall, in every factory where a hazardous process takes place, or where hazardous substances are used or handled, set up a Safety Committee consisting of equal number of representatives of workers and management to promote co-operation between the workers and the management in maintaining proper safety and health at work and to review periodical the measures taken in that behalf:

Provided that the State Government may, by order in writing and for reasons to be recorded exempt the occupier of any factory or class of factories from setting up such Committee.

(*2*) The composition of the Safety Committee, the tenure of office of its members and their rights and duties shall be such as may be prescribed.

41H. Right of workers to warn about imminent danger.—(*1*) Where the workers employed in any factory engaged in a hazardous process have reasonable apprehension that there is a likelihood of imminent danger to their lives or health due to any accident, they may bring the same to the notice of the occupier, agent, manager or any other person who is in charge of the factory or the process concerned directly or through their representatives in the Safety Committee and simultaneously bring the same to the notice of the Inspector.

(*2*) It shall be the duty of such occupier, agent, manager or the person in charge of the factory or process to take immediate remedial action if he is satisfied about the existence of such imminent danger and send a report forthwith of the action taken to the nearest Inspector.

(*3*) If the occupier, agent, manager or the person in charge referred to in sub-section (*2*) is not satisfied about the existence of any imminent danger as apprehended by the workers, he shall, nevertheless, refer the matter forthwith to the nearest Inspector whose decision on the question of the existence of such imminent danger shall be final.]

* Ins. by Act 20 of 1987, s. 20 (w.e.f. 1-6-1988).

CHAPTER V

WELFARE

42. Washing facilities.—(*1*) In every factory—

(*a*) adequate and suitable facilities for washing shall be provided and maintained for the use of the workers therein;

(*b*) separate and adequately screened facilities shall be provided for the use of male and female workers;

(*c*) such facilities shall be conveniently accessible and shall be kept clean.

(*2*) The State Government may, in respect of any factory or class or description of factories or of any manufacturing process, prescribe standards of adequate and suitable facilities for washing.

43. Facilities for storing and drying clothing.—The State Government may, in respect of any factory or class or description of factories, make rules requiring the provision therein of suitable places for keeping clothing not worn daring working hours and for the drying of wet clothing.

44. Facilities for sitting.—(*1*) In every factory suitable arrangements for sitting shall be provided and maintained for all workers obliged to work in a standing position, in order that they may take advantage of any opportunities for rest which may occur in the course of their work.

(*2*) If, in the opinion of the Chief Inspector, the workers in any factory engaged in a particular manufacturing process or working in a particular room are able to do their work efficiently in a sitting position, he may, by order in writing, require the occupier of the factory to provide before a specified date such seating arrangements as may be practicable for all workers so engaged or working.

(*3*) The State Government may, by notification in the Official Gazette, declare that the provisions of sub-section (*1*) shall not apply to any specified factory or class or description of factories or to any specified manufacturing process.

45. First-aid appliances.—(*1*) There shall in every factory be provided and maintained so as to be readily accessible during all working hours first-aid boxes or cupboards equipped with the prescribed contents, and the number of such boxes or cupboards to be provided and maintained shall not be less than one for every one hundred and fifty workers ordinarily employed [1][at any one time] in the factory.

[2][(*2*) Nothing except the prescribed contents shall be kept in a first-aid box or cupboard.

(*3*) Each first-aid box or cupboard shall be kept in the charge of a separate responsible person [3][who holds a certificate in first-aid treatment recognised by the State Government] and who shall always be readily available during the working hours of the factory.]

[4][(*4*)] In every factory wherein more than five hundred workers are [5][ordinarily employed] there shall be provided and maintained an ambulance room of the prescribed size, containing the prescribed equipment and in the charge of such medical and nursing staff as may be prescribed [6][and those facilities shall always be made readily available during the working hours of the factory].

46. Canteens.—(*1*) The State Government may make rules requiring that in any specified factory wherein more than two hundred and fifty workers are ordinarily employed, a canteen or canteens shall be provided and maintained by the occupier for the use of the workers.]

(*2*) Without prejudice to the generality of the foregoing power, such rules may provide for—

(*a*) the date by which such canteen shall be provided;

---

1. Ins. by Act 25 of 1954, s. 9 (w.e.f. 7-5-1954).
2. Subs. by s. 9, *ibid.*, for sub-section (*2*) (w.e.f. 7-5-1954).
3. Subs. by Act 94 of 1976, s. 21, for "who is trained in first-aid treatment" (w.e.f. 26-10-1976).
4. Sub-section (*3*) renumbered as sub-section (*4*) by Act 25 of 1954, s. 9 (w.e.f. 7-5-1954).
5. Subs. by Act 94 of 1976, s. 21, for "employed" (w.e.f. 26-10-1976).
6. Ins. by s. 21, *ibid.* (w.e.f. 26-10-1976).

NHPC LIMITED FARIDABAD

(*b*) the standards in respect of construction, accommodation, furniture and other equipment of the canteen;

(*c*) the foodstuffs to be served therein and the charges which may be made therefor;

(*d*) the constitution of a managing committee for the canteen and representation of the workers in the management of the canteen;

[1][(*dd*) the items of expenditure in the running of the canteen which are not to be taken into account in fixing the cost of foodstuffs and which shall be borne by the employer;]

(*e*) the delegation to the Chief Inspector, subject to such conditions as may be prescribed, of the power to make rules under clause (*c*).

47. Shelters, rest rooms and lunch rooms.—(*1*) In every factory wherein more than one hundred and fifty workers are ordinarily employed, adequate and suitable shelters or rest rooms and a suitable lunch room, with provision for drinking water, where workers can eat meals brought by them, shall be provided and maintained for the use of the workers:

Provided that any canteen maintained in accordance with the provisions of section 46 shall be regarded as part of the requirements of this sub-section:

Provided further that where a lunch room exists no worker shall eat any food in the work room.

(*2*) The shelters or rest rooms or lunch rooms to be provided under sub-section (*1*) shall be sufficiently lighted aid ventilated and shall be maintained in a cool and clean condition.

(*3*) The State Government may—

(*a*) prescribe the standards in respect of construction, accommodation, furniture and other equipment of shelters, rest rooms and lunch rooms to be provided under this section;

(*b*) by notification in the Official Gazette, exempt any factory or class or description of factories from the requirements of this section.

48. Creches.—(*1*) In every factory wherein more than [2][thirty women workers] are ordinarily employed there shall be provided and maintained a suitable room or rooms for the use of children under the age of six years of such women.

(*2*) Such rooms shall provide adequate accommodation, shall be adequately lighted and ventilated, shall be maintained in a clean and sanitary condition and shall be under the charge of women trained in the care of children and infants.

(*3*) The State Government may make rules—

(*a*) prescribing the location and the standards in respect of construction, accommodation, furniture and other equipment of rooms to be provided under this section;

(*b*) requiring the provision in factories to which this section applies of additional facilities for the care of children belonging to women workers, including suitable provision of facilities for washing and changing their clothing;

(*c*) requiring the provision in any factory of free milk or refreshment or both for such children;

(*d*) requiring that facilities shall be given in any factory for the mothers of such children to feed them at the necessary intervals.

49. Welfare officers.—(*1*) In every factory wherein five hundred or more workers are ordinarily employed the occupier shall employ in the factory such number of welfare officers as may be prescribed.

(*2*) The State Government may prescribe the duties, qualifications and conditions of service of officers employed under sub-section (*1*).

1. Ins. by Act 94 of 1976, s. 22 (w.e.f. 26-10-1976).
2. Subs. by s. 23, *ibid.*, for "fifty women workers" (w.e.f. 26-10-1976).

50. Power to make rules to supplement this Chapter.—The State Government may make rules—

(*a*) exempting, subject to compliance with such alternative arrangements for the welfare of workers as may be prescribed, any factory or class or description of factories from compliance with any of the provisions of this Chapter;

(*b*) requiring in any factory or class or description of factories that representatives of the workers employed in the factory shall be associated with the management of the welfare arrangements of the workers.

CHAPTER VI

WORKING HOURS OF ADULTS

51. Weekly hours.—No adult worker shall be required or allowed to work in a factory for more than forty-eight hours in any week.

52. Weekly holidays.—(*1*) No adult worker shall be required or allowed to work in a factory on the first day of the week (hereinafter referred to as the said day), unless—

(*a*) he has or will have a holiday for a whole day on one of the three days immediately before or after the said day, and

(*b*) the manager of the factory has, before the said day or the substituted day under clause (*a*), whichever is earlier,—

(*i*) delivered a notice at the office of the Inspector of his intention to require the worker to work on the said day and of the day which is to be substituted, and

(*ii*) displayed a notice to that effect in the factory:

Provided that no substitution shall be made which will result in any worker working for more than ten days consecutively without a holiday for a whole day.

(*2*) Notices given under sub-section (*1*) may be cancelled by a notice delivered at the office of the Inspector and a notice displayed in the factory not later than the day before the said day or the holiday to be cancelled, whichever is earlier.

(*3*) Where, in accordance with the provisions of sub-section (*1*), any worker works on the said day and has had a holiday on one of the three days immediately before it, that said day shall, for the purpose of calculating his weekly hours of work, be included in the preceding week.

53. Compensatory holidays.—(*1*) Where, as a result of the passing of an order or the making of a rule under the provisions of this Act exempting a factory or the workers therein from the provisions of section 52, a worker is deprived of any of the weekly holidays for which provision is made in sub-section (*1*) of that section, he shall be allowed, within the month in which the holidays were due to him or within the two months immediately following that month, compensatory holidays of equal number to the holidays so lost.

(*2*) The State Government may prescribe the manner in which the holidays for which provision is made in sub-section (*1*) shall be allowed.

54. Daily hours.—Subject to the provisions of section 51, not adult worker shall be required or allowed to work in a factory for more than nine hours in any day:

[1][Provided that, subject to the previous approval of the Chief Inspector, the daily maximum specified in this section may be exceeded in order to facilitate the change of shifts.]

55. Intervals for rest.—[2][(*1*)] [3][The periods of work] of adult workers in a factory each day shall be so fixed that no period shall exceed five hours and that no worker shall work for more than five hours before he has had an interval for rest of at least half an hour.

---

1. Added by Act 25 of 1954, s. 10 (w.e.f. 7-5-1954).
2. Section 55 renumbered as sub-section (*1*) of that section by s. 11, *ibid.* (w.e.f. 7-5-1954).
3. Subs. by Act 40 of 1949, s. 3 and the Second Schedule, for "The period" (w.e.f. 1-5-1949).

NHPC LIMITED FARIDABAD

[1][(2) The State Government or, subject to the control of the State Government, the Chief Inspector, may, by written order and for the reasons specified therein, exempt any factory from the provisions of sub-section (1) so, however, that the total number of hours worked by a worker without an interval does not exceed six.]

56. Spread over.—The periods of work of an adult worker in a factory shall be so arranged that inclusive of his intervals for rest under section 55, they shall not spread over more than ten and a half hours in any day:

Provided that the Chief Inspector may, for reasons to be specified in writing increase the [2][spread over up to twelve hours].

57. Night shifts.—Where a worker in a factory works on a shift which extends beyond midnight,—

(*a*) for the purposes of sections 52 and 53, a holiday for a whole day shall mean in his case a period of twenty-four consecutive hours beginning when his shift ends;

(*b*) the following day for him shall be deemed to be the period of twenty-four hours beginning when such shift ends, and the hours he has worked after midnight shall be counted in the previous day.

58. Prohibition of overlapping shifts.—(*1*) Work shall not be carried on in any factory by means of system of shifts so arranged that more than one relay of workers is engaged in work of the same kind at the same time.

[3][(2) The State Government or subject to the control of the State Government, the Chief Inspector, may, by written order and for the reasons specified therein, exempt on such conditions as may be deemed expedient, any factory or class or description of factories or any department or section of a factory or any category or description of workers therein from the provisions of sub-section (*1*).]

59. Extra wages for overtime.—(*1*) Where a worker works in a factory for more than nine hours in any day or for more than forty-eight hours in any week, he shall, in respect of overtime work, be entitled to wages at the rate of twice his ordinary rate of wages.

[4][(2) For the purposes of sub-section (*1*), "ordinary rate of wages" means the basic wages plus such allowances, including the cash equivalent of the advantage accruing through the concessional sale to workers of foodgrains and other articles, as the worker is for the time being entitled to, but does not include a bonus and wages for overtime work.

(*3*) Where any workers in a factory are paid on a piece rate basis, the time rate shall be deemed to be equivalent to the daily average of their full-time earnings for the days on which they actually worked on the same or identical job during the month immediately preceding the calendar month during which the overtime work was done, and such time rates shall be deemed to be ordinary rates of wages of those workers:

Provided that in the case of a worker who has not worked in the immediately preceding calendar month on the same or identical job, the time rate shall be deemed to be equivalent to the daily average of the earning of the worker for the days on which he actually worked in the week in which the overtime work was done.

Explanation.—For the purposes of this sub-section in computing the earnings for the days on which the worker actually worked such allowances, including the cash equivalent of the advantage accruing through the concessional sale to workers of foodgrains and other articles, as the worker is for the time being entitled to, shall be included but any bonus or wages for overtime work payable in relation to the period with reference to which the earnings are being computed shall be excluded.]

---

1. Added by Act 25 of 1954, s. 11 (w.e.f. 7-5-1954).
2. Subs. by Act 94 of 1976, s. 24, for "spread over to twelve hours" (w.e.f. 26-10-1976).
3. Subs. by Act 25 of 1954, s. 12, for sub-section (*2*) (w.e.f. 7-5-1954).
4. Subs. by Act 94 of 1976, s. 25, for sub-sections (*2*) and (*3*) (w.e.f. 26-10-1976).

NHPC LIMITED
FARIDABAD

[1][(*4*) The cash equivalent of the advantage accruing through the concessional sale to a worker of foodgrains and other articles shall be computed as often as may be prescribed on the basis of the maximum quantity of foodgrains and other articles admissible to a standard family.

Explanation 1.—"Standard family" means a family consisting of the worker, his or her spouse and two children below the age of fourteen years requiring in all three adult consumption units.

Explanation 2.—"Adult consumption unit" means the consumption unit of a male above the age of fourteen years; and the consumption unit of a female above the age of fourteen years and that of a child below the age of fourteen years shall be calculated at the rates of 8 and 6 respectively of one adult consumption unit.

(*5*) The State Government may make rules prescribing—

(*a*) the manner in which the cash equivalent of the advantage accruing through the concessional sale to a worker of foodgrains and other articles shall be computed; and

(*b*) the registers that shall be maintained in a factory for the purpose of securing compliance with the provisions of this section.]

60. Restriction on double employment.—No adult worker shall be required or allowed to work in any factory on any day on which he has already been working in any other factory, save in such circumstances as may be prescribed.

61. Notice of periods of work for adults.—(*1*) There shall be displayed and correctly maintained in every factory in accordance with the provisions of sub-section (*2*) of section 108, a notice of periods of work for adults, showing clearly for every day the periods during which adult workers may be required to work.

(*2*) The periods shown in the notice required by sub-section (*1*) shall be fixed beforehand in accordance with the following provisions of this section, and shall be such that workers working for those periods would not be working in contravention of any of the provisions of sections 51, 52, 54, [2][55, 56 and 58].

(*3*) Where all the adult workers in a factory are required to work during the same periods, the manager of the factory shall fix those periods for such workers generally.

(*4*) Where all the adult workers in a factory are not required to work during the same periods, the manager of the factory shall classify them into groups according to the nature of their work indicating the number of workers in each group.

(*5*) For each group which is not required to work on a system of shifts, the manager of the factory shall fix the periods during which the group may be required to work.

(*6*) Where any group is required to work on a system of shifts and the relays are not to be subject to predetermined periodical changes of shifts, the manager of the factory shall fix the periods during which each relay of the group may be required to work.

(*7*) Where any group is to work on a system of shifts and the relays are to be subject to predetermined periodical changes of shifts, the manager of the factory shall draw up a scheme of shifts where under the periods during which any relay of the group may be required to work and the relay which will be working at any time of the day shall be known for any day.

(*8*) The State Government may prescribe forms of the notice required by sub-section (*1*) and the manner in which it shall be maintained.

(*9*) In the case of a factory beginning work after the commencement of this Act, a copy of the notice referred to in sub-section (*1*) shall be sent in duplicate to the Inspector before the day on which work is begun in the factory.

---

1. Subs. by Act 25 of 1954, s. 13, for sub-section (*4*) (w.e.f. 7-5-1954).
2. Subs. by s. 14, *ibid.*, for "55 and 56" (w.e.f. 7-5-1954).

NHPC LIMITED
एन एच पी सी
NHPC
FARIDABAD

(*10*) Any proposed change in the system of work in any factory which will necessitate a change in the notice referred to in sub-section (*1*) shall be notified to the Inspector in duplicate before the change is made, and except with the previous sanction of the Inspector, no such change shall be made until one week has elapsed since the last change.

62. Register of adult workers.—(*1*) The manager of every factory shall maintain a register of adult workers, to be available to the Inspector at all times during working hours, or when any work is being carried on in the factory, showing—

(*a*) the name of each adult worker in the factory;

(*b*) the nature of his work;

(*c*) the group, if any, in which he is included;

(*d*) where his group works on shifts, the relay to which he is allotted;

(*e*) such other particulars as may be prescribed:

Provided that, if the Inspector is of opinion that any muster roll or register maintained as part of the routine of a factory gives in respect of any or all the workers in the factory the particulars required under this section, he may, by order in writing, direct that such muster roll or register shall to the corresponding extent be maintained in place of, and be treated as the register of adult workers in that factory.

[1][(*1A*) No adult worker shall be required or allowed to work in any factory unless his name and other particulars have been entered in the register of adult workers.]

(*2*) The State Government may prescribe the form of the register of adult workers, the manner in which it shall be maintained and the period for which it shall be preserved.

63. Hours of work to correspond with notice under section 61 and register under section 62.—No adult worker shall be required or allowed to work in any factory otherwise than in accordance with the notice of periods of work for adults displayed in the factory and the entries made beforehand against his name in the register of adult workers of the factory.

64. Power to make exempting rules.—(*1*) The State Government may make rules defining the persons who hold positions of supervision or management or are employed in a confidential position in a factory [2][or empowering the Chief Inspector to declare any person, other than a person defined by such rules, as a person holding position of supervision or management or employed in a confidential position in a factory if, in the opinion of the Chief Inspector, such person holds such position or is so employed], and the provisions of this Chapter, other than the provisions of clause (*b*) of sub-section (*1*) of section 66 and of the proviso to that sub-section, shall not apply to any person so defined [2][or declared]:

[2][Provided that any person so defined or declared shall, where the ordinary rate of wages of such person [3][does not exceed the wage limit specified in sub-section (*6*) of section 1 of the Payment of Wages Act, 1936 (4 of 1936), as amended from time to time], be entitled to extra wages in respect of overtime work under section 59.]

(*2*) The State Government may make rules in respect of adult workers in factories providing for the exemption, to such extent and subject to such conditions as may be prescribed—

(*a*) of workers engaged on urgent repairs, from the provisions of sections 51, 52, 54, 55 and 56;

(*b*) of workers engaged in work in the nature of preparatory or complementary work which must necessarily be carried on outside the limits laid down for the general working of the factory, from the provisions of sections 51, 54, 55 and 56;

(*c*) of workers engaged in work which is necessarily so intermittent that the intervals during which they do not work while on duty ordinarily amount to more than the intervals for rest required by or under section 55, from the provisions of sections 51, 54, 55 and 56;

---

1. Ins. by Act 94 of 1976, s. 26 (w.e.f. 26-10-1976).
2. Ins. by s. 27, *ibid.* (w.e.f. 26-10-1976).
3. Subs. by Act 20 of 1987, s. 21, for "does not exceed rupees seven hundred and fifty per month" (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

(*d*) of workers engaged in any work which for technical reasons must be carried on continuously [1]*** from the provisions of sections 51, 52, 54, 55 and 56;

(*e*) of workers engaged in making or supplying articles of prime necessity which must be made or supplied every day, from the provisions of [2][section 51 and section 52];

(*f*) of workers engaged in a manufacturing process which cannot be carried on except during fixed seasons, from the provisions of [2][section 51, section 52 and section 54];

(*g*) of workers engaged in a manufacturing process which cannot be carried on except at times dependent on the irregular action of natural forces, from the provisions of sections 52 and 55;

(*h*) of workers engaged in engine-rooms or boiler-houses or in attending to power-plant or transmission machinery, from the provisions of [2][section 51 and section 52];

[3][(*i*) of workers engaged in the printing of newspapers, who are held up on account of the breakdown of machinery, from the provisions of sections 51, 54 and 56.

Explanation.—In this clause the expression "newspapers" has the meaning assigned to it in the Press and Registration of Books Act, 1867 (25 of 1867);

(*j*) of workers engaged in the loading or unloading of railway wagons, [4][or lorries or truck] from the provisions of sections 51, 52, 54, 55 and 56];

[4][(*k*) of workers engaged in any work, which is notified by the State Government in the Official Gazette as a work of national importance, from the provisions of section 51, section 52, section 54, section 55 and section 56.]

(*3*) Rules made under sub-section (*2*) providing for any exemption may also provide for any consequential exemption from the provisions of section 61 which the State Government may deem to be expedient, subject to such conditions as it may prescribe.

[5][(*4*) In making rules under this section, the State Government shall not exceed, except in respect of exemption under clause (*a*) of sub-section (*2*), the following limits of work inclusive of overtime:—

(*i*) the total number of hours of work in any day shall not exceed ten;

(*ii*) the spread over, inclusive of intervals for rest, shall not exceed twelve hours in any one day:

Provided that the State Government may, in respect of any or all of the categories of workers referred to in clause (*d*) of sub-section (*2*), make rules prescribing the circumstances in which, and the conditions subject to which, the restrictions imposed by clause (*i*) and clause (*ii*) shall not apply in order to enable a shift worker to work the whole or part of a subsequent shift in the absence of a worker who has failed to report for duty;

[4][(*iii*) the total number of hours of work in a week, including overtime, shall not exceed sixty;]

[6][(*iv*)] the total number of hours of overtime shall not exceed fifty for any one quarter.

Explanation.—"Quarter" means a period of three consecutive months beginning on the 1st of January, the 1st of April, the 1st of July or the 1st of October.]

(*5*) Rules made under this section shall remain in force for not more than [7][five years].

65. Power to make exempting orders.—(*1*) Where the State Government is satisfied that, owing to the nature of the work carried on or to other circumstances, it is unreasonable to require that the periods of work of any adult workers in any factory or class or description of factories should be fixed beforehand, it

NHPC LIMITED
FARIDABAD

may, by written order, relax or modify the provisions of section 61 in respect of such workers therein, to such extent and in such manner as it may think fit, and subject to such conditions as it may deem expedient to ensure control over periods of work.

(*2*) The State Government or, subject to the control of the Stale Government, the Chief Inspector may by written order exempt, on such conditions as it or he may deem expedient, any or all of the adult workers in any factory or group or class or description of factories from any or all of the provisions of sections 51, 52, 54 and 56 on the ground that the exemption is required to enable the factory or factories to deal with an exceptional press of work.

[1][(*3*) Any exemption granted under sub-section (*2*) shall be subject to the following conditions, namely:—

(*i*) the total number of hours of work in any day shall not exceed twelve;

(*ii*) the spread over, inclusive of intervals for rest, shall not exceed thirteen hours in any one day;

(*iii*) the total number of hours of work in any week, including overtime, shall not exceed sixty;

(*iv*) no worker shall be allowed to work overtime, for more than seven days at a stretch and the total number of hours of overtime work in any quarter shall not exceed seventy-five.

Explanation.—In this sub-section "quarter" has the same meaning as in sub-section (*4*) of section 64.]

[2]* * * * *

66. Further restrictions on employment of women.—(*1*) The provisions of this Chapter shall, in their application to women in factories, be supplemented by the following further restrictions, namely:—

(*a*) no exemption from the provisions of section 54 may be granted in respect of any woman;

(*b*) no woman shall be [3][required or allowed to work in any factory] except between the hours of 6 A.M. and 7 P.M.:

Provided that the State Government may, by notification in the Official Gazette, in respect of [4][any factory or group or class or description of factories,] very the limits laid down in clause (*b*), but so that no such variation shall authorise the employment of any woman between the hours of 10 P.M. and 5 A.M.:

[5][(*c*) there shall be no change of shifts except after a weekly holiday or any other holiday.]

(*2*) The State Government may make rules providing for the exemption from the restrictions set out in sub-section (*1*), to such extent and subject to such conditions as it may prescribe, of women working in fish-curing or fish-canning factories, where the employment of women beyond the hours specified in the said restrictions is necessary to prevent damage to, or deterioration in, any raw material.

(*3*) The rules made under sub-section (*2*) shall remain in force for not more than three years at a time.

CHAPTER VII
EMPLOYMENT OF YOUNG PERSONS

67. Prohibition of employment of young children.—No child who has not completed his fourteenth year shall be required or allowed to work in any factory.

68. Non-adult workers to carry tokens.—A child who has completed his fourteenth year or an adolescent shall not be required or allowed to work in any factory unless—

(*a*) a certificate of fitness granted with reference to him under section 69 is in the custody of the manager of the factory, and

---

1. Subs. by Act 94 of 1976, s. 28, for sub-section (*3*) (w.e.f. 26-10-1976).
2. Omitted by s. 28, *ibid.* (w.e.f. 26-10-1976).
3. Subs. by s. 29, *ibid.*, for "employed in any factory" (w.e.f. 26-10-1976).
4. Subs. by s. 29, *ibid.*, for "any class or description of factories" (w.e.f. 26-10-1976).
5. Ins. by Act 25 of 1954, s. 17 (w.e.f. 7-5-1954).

NHPC LIMITED FARIDABAD

(*b*) such child or adolescent carries while he is at work a token giving a reference to such certificate.

69. Certificates of fitness.—(*1*) A certifying surgeon shall, on the application of any young person or his parent or guardian accompanied by a document signed by the manager of a factory that such person will be employed therein if certified to be fit for work in a factory, or on the application of the manager of the factory in which any young person wishes to work, examine such person and ascertain his fitness for work in a factory.

(*2*) The certifying surgeon, after examination, may grant to such young person, in the prescribed form, or may renew—

(*a*) a certificate of fitness to work in a factory as a child, if he is satisfied that the young person has completed his fourteenth year, that he has attained the prescribed physical standards and that he is fit for such work;

(*b*) a certificate of fitness to work in a factory as an adult, if he is satisfied that the young person has completed his fifteenth year, and is fit for a full day's work in a factory:

Provided that unless the certifying surgeon has personal knowledge of the place where the young person proposes to work and of the manufacturing process in which he will be employed, he shall not grant or renew a certificate under this sub-section until he has examined such place.

(*3*) A certificate of fitness granted or renewed under sub-section (*2*)—

(*a*) shall be valid only for a period of twelve months from the date thereof:

(*b*) may be made subject to conditions in regard to the nature of the work in which the young person may be employed, or requiring re-examination of the young person before the expiry of the period of twelve months.

(*4*) A certifying surgeon shall revoke any certificate granted or renewed under sub-section (*2*) if in his opinion the holder of it is no longer fit to work in the capacity stated therein in a factory.

(*5*) Where a certifying surgeon refuses to grant or renew a certificate or a certificate of the kind requested or revokes a certificate, he shall, if so requested by any person who could have applied for the certificate or the renewal thereof, state his reasons in writing for so doing.

(*6*) Where a certificate under this section with reference to any young person is granted or renewed subject to such conditions as are referred to in clause (*b*) of sub-section (*3*), the young person shall not be required or allowed to work in any factory except in accordance with those conditions.

(*7*) Any fee payable for a certificate under this section shall be paid by the occupier and shall not be recoverable from the young person, his parents or guardian.

70. Effect of certificate of fitness granted to adolescent.—(*1*) An adolescent who has been granted a certificate of fitness to work in a factory as an adult under clause (*b*) of sub-section (*2*) of section 69, and who while at work in a factory carries a token giving reference to the certificate, shall be deemed to be an adult for all the purposes of Chapter VI and VIII.

[1]* * * * *

[2][(*1A*) No female adolescent or a male adolescent who has not attained the age of seventeen years but who has been granted a certificate of fitness to work in a factory as an adult, shall be required or allowed to work in any factory except between 6 A.M. and 7 P.M.:

Provided that the State Government may, by notification in the Official Gazelle, in respect of any factory or group or class or description of factories,—

(*i*) vary the limits laid down in this sub-section so, however, that no such section shall authorise the employment of any female adolescent between 10 P.M. and 5 A.M.

1. The proviso and the *Explanation* omitted by Act 20 of 1987, s. 22 (w.e.f. 1-12-1987).
2. Ins. by s. 22, *ibid.* (w.e.f. 1-12-1987).

(*ii*) grant exemption from the provisions of this sub-section in case of serious emergency where national interest is involved.]

(*2*) An adolescent who has not been granted a certificate of fitness to work in a factory as an adult under the aforesaid clause (*b*) shall, notwithstanding his age, be deemed to be a child for all the purposes of this Act.

71. Working hours for children.—(*1*) No child shall be employed or permitted to work, in any factory—

(*a*) for more than four and a half hours in any day;

[1][(*b*) during the night.

Explanation.—For the purpose of this sub-section "night" shall mean a period of at least twelve consecutive hours which shall include the interval between 10 P.M. and 6 A.M.]

(*2*) The period of work of all children employed in a factory shall be limited to two shifts which shall not overlap or spread over more than five hours each; and each child shall be employed in only one of the relays which shall not, except with the previous permission in writing of the Chief Inspector, be changed more frequently than once in a period of thirty days.

(*3*) The provisions of section 52 shall apply also to child workers and no exemption from the provisions of that section may be granted in respect of any child.

(*4*) No child shall be required or allowed to work in any factory on any day on which he has already been working in another factory.

[2][(*5*) No female child shall be required or allowed to work in any factory except between 8 A.M. and 7 P.M.]

72. Notice of periods of work for children.—(*1*) There shall be displayed and correctly maintained in every factory in which children are employed, in accordance with the provisions of sub-section (*2*) of section 108 a notice of periods of work for children, showing clearly for every day the periods during which children may be required or allowed to work.

(*2*) The periods shown in the notice required by sub-section (*1*) shall be fixed beforehand in accordance with the method laid down for adult workers in section 61, and shall be such that children working for those periods would not be working in contravention of any of the provisions of section 71.

(*3*) The provisions of sub-sections (*8*), (*9*) and (*10*) of section 61 shall apply also to the notice required by sub-section (*1*) of this section.

73. Register of child workers.—(*1*) The manager of every factory in which children are employed shall maintain a register of child workers, to be available to the Inspector at all times during working hours or when any work is being carried on in a factory, showing—

(*a*) the name of each child worker in the factory,

(*b*) the nature of his work,

(*c*) the group, if any, in which he is included,

(*d*) where his group works on shifts, the relay to which he is allotted, and

(*e*) the number of his certificate of fitness granted under section 69.

[3][(*1A*) No child worker shall be required or allowed to work in any factory unless his name and other particulars have been entered in the register of child workers.]

(*2*) The State Government may prescribe the form of the register of child workers, the manner in which it shall be maintained and the period for which it shall be preserved.

---

1. Subs. by Act 25 of 1954, s. 19, for clause (*b*) (w.e.f. 7-5-1954).
2. Ins. by Act 20 of 1987, s. 23 (w.e.f. 1-12-1987).
3. Ins. by Act 94 of 1976, s. 30 (w.e.f. 26-10-1976).

NHPC LIMITED
FARIDABAD

74. Hours of work to correspond with notice under section 72 and register under section 73.—No child worker shall be employed in any factory otherwise than in accordance with the notice of periods of work for children displayed in the factory and the entries made beforehand against his name in the register of child workers of the factory.

75. Power to require medical examination.—Where an Inspector is of opinion—

(*a*) that any person working in a factory without a certificate of fitness is a young person, or

(*b*) that a young person working in a factory with a certificate of fitness is no longer fit to work in the capacity stated therein,

he may serve on the manager of the factory a notice requiring that such person or young person, as the case may be, shall be examined by a certifying surgeon, and such person or young person shall not, if the Inspector so directs, be employed, or permitted to work, in any factory until he has been so examined and has been granted a certificate of fitness or a fresh certificate of fitness, as the case may be, under section 69, or has been certified by the certifying surgeon examining him not to be a young person.

76. Power to make rules.—The State Government may make rules—

(*a*) prescribing the forms of certificates of fitness to be granted under section 69, providing for the grant of duplicates in the event of loss of the original certificates, and fixing the fees which may be charged for such certificates and renewals thereof and such duplicates;

(*b*) prescribing the physical standards to be attained by children and adolescents working in factories;

(*c*) regulating the procedure of certifying surgeons under this Chapter;

(*d*) specifying other duties which certifying surgeons may be required to perform in connection with the employment of young persons in factories, and fixing the fees which may be charged for such duties and the persons by whom they shall be payable.

77. Certain other provisions of law not barred.—The provisions of this Chapter shall be in addition to, and not in derogation of, the provisions of the Employment of Children Act, 1938 (26 of 1938).

[1][CHAPTER VIII

ANNUAL LEAVE WITH WAGES

78. Application of Chapter.—(*1*) The provisions of this Chapter shall not operate to the prejudice of any right to which a worker may be entitled under any other law or under the terms of any award, [2][agreement (including settlement)] or contract of service:

[3][Provided that if such award, agreement (including settlement) or contract of service provides for a longer annual leave with wages than provided in this Chapter, the quantum of leave, which the worker shall be entitled to, shall be in accordance with such award, agreement or contract of service, but in relation to matters not provided for in such award, agreement or contract of service or matters which are provided for less favourably therein, the provisions of sections 79 to 82, so far as may be, shall apply.]

(*2*) The provisions of this Chapter shall not apply to workers [4][in any factory] of any railway administered by the Government, who are governed by leave rules approved by the Central Government.

79. Annual leave with wages.—(*1*) Every worker who has worked for a period of 240 days or more in a factory during a calendar year shall be allowed during the subsequent calendar year, leave with wages for a number of days calculated at the rate of—

(*i*) if an adult, one day for every twenty days of work performed by him during the previous calendar year;

---

1. Subs. by Act 25 of 1954, s. 20 for Chapter VIII (w.e.f. 7-5-1954).
2. Subs. by Act 94 of 1976, s. 31, for "agreement" (w.e.f. 26-10-1976).
3. Subs. by s. 31, *ibid.*, for the proviso (w.e.f. 26-10-1976).
4. Subs. by s. 31, *ibid.*, for "in any workshop" (w.e.f. 26-10-1976).

NHPC LIMITED FARIDABAD

(*ii*) if a child, one day for every fifteen days of work performed by him during the previous calendar year.

Explanation 1.—For the purpose of this sub-section—

(*a*) any days of lay off, by agreement or contract or as permissible under the standing orders;

(*b*) in the case of a female worker, maternity leave for any number of days not exceeding twelve weeks; and

(*c*) the leave earned in the year prior to that in which the leave is enjoyed,

shall be deemed to be days on which the worker has worked in a factory for the purpose of computation of the period of 240 days or more, but he shall not earn leave for these days.

Explanation 2.—The leave admissible under this sub-section shall be exclusive of all holidays whether occurring during or at either end of the period of leave.

(*2*) A worker whose service commences otherwise than on the first day of January shall be entitled to leave with wages at the rate laid down in clause (*i*) or, as the case may be, clause (*ii*) of sub-section (*1*) if he has worked for two-thirds of the total number of days in the remainder of the calendar year.

[1][(*3*) If a worker is discharged or dismissed from service or quits his employment or is superannuated or dies while in service, during the course of the calendar year, he or his heir or nominee, as the case may be, shall be entitled to wages in lieu of the quantum of leave to which he was entitled immediately before his discharge, dismissal, quitting of employment, superannuation or death calculated at the rates specified in sub-section (*1*), even if he had not worked for the entire period specified in sub-section (*1*) or sub-section (*2*) making him eligible to avail of such leave, and such payment shall be made—

(*i*) where the worker is discharged or dismissed or quits employment, before the expiry of the second working day from the date of such discharge, dismissal or quitting; and

(*ii*) where the worker is superannuated or dies while in service, before the expiry of two months from the date of such superannuation or death.]

(*4*) In calculating leave under this section, fraction of leave of half a day or more shall be treated as one full day's leave, and fraction of less than half a day shall be omitted.

(*5*) If a worker does not in any one calendar year take the whole of the leave allowed to him under sub-section (*1*) or sub-section (*2*), as the case may be, any leave not taken by him shall be added to the leave to be allowed to him in the succeeding calendar year:

Provided that the total number of days of leave that may be carried forward to a succeeding year shall not exceed thirty in the case of an adult or forty in the case of a child:

Provided further that a worker, who has applied for leave with wages but has not been given such leave in accordance with any scheme laid down in sub-sections (*8*) and (*9*) [2][or in contravention of sub-section (*10*)] shall be entitled to carry forward the [3][leave refused] without any limit.

(*6*) A worker may at any time apply in writing to the manager of a factory not less than fifteen days before the date on which he wishes his leave to begin, to take all the leave or any portion thereof allowable to him during the calendar year:

Provided that the application shall be made not less than thirty days before the date on which the worker wishes his leave to begin, if he is employed in a public utility service as defined in clause (*ii*) of section 2 of the Industrial Disputes Act. 1947 (14 of 1947):

Provided further that the number of times in which leave may be taken during any year shall not exceed three.

---

1. Subs. by Act 94 of 1976, s. 32, for sub-section (*3*) (w.e.f. 26-10-1976).
2. Ins. by s. 32, *ibid.* (w.e.f. 26-10-1976).
3. Subs. by s. 32, *ibid.*, for "unavailed leave" (w.e.f. 26-10-1976).

NHPC LIMITED
FARIDABAD

(*7*) If a worker wants to avail himself of the leave with wages due to him to cover a period of illness, he shall be granted such leave even if the application for leave is not made within the time specified in sub-section (*6*); and in such a case wages as admissible under section 81 shall be paid not later than fifteen days, or in the case of a public utility service not later than thirty days from the date of the application for leave.

(*8*) For the purpose of ensuring the continuity of work, the occupier or manager of the factory, in agreement with the Works Committee of the factory constituted under section 3 of the Industrial Disputes Act, 1947 (14 of 1947), or a similar Committee constituted under any other Act or if there is no such Works Committee or a similar Committee in the factory, in agreement with the representatives of the workers therein chosen in the prescribed manner, may lodge with the Chief Inspector a scheme in writing whereby the grant of leave allowable under this section may be regulated.

(*9*) A scheme lodged under sub-section (*8*) shall be displayed at some conspicuous and convenient places in the factory and shall be in force for a period of twelve months from the date on which it comes into force, and may thereafter be renewed with or without modification for a further period of twelve months at a time, by the manager in agreement with the Works Committee or a similar Committee, or as the case may be, in agreement with the representatives of the workers as specified in sub-section (*8*), and a notice of renewal shall be sent to the Chief Inspector before it is renewed.

(*10*) An application for leave which does not contravene the provisions of sub-section (*6*) shall not be refused, unless refusal is in accordance with the scheme for the time being in operation under sub-sections (*8*) and (*9*).

(*11*) If the employment of a worker who is entitled to leave under sub-section (*1*) or sub-section (*2*), as the case may be, is terminated by the occupier before he has taken the entire leave to which he is entitled, or if having applied for and having not been granted such leave, the worker quits his employment, before he has taken the leave, the occupier of the factory shall pay him the amount payable under section 80 in respect of the leave not taken, and such payment shall be made, where the employment of the worker is terminated by the occupier, before the expiry of the second working day after such termination, and where a worker who quits his employment, on or before the next pay day.

(*12*) The unavailed leave of a worker shall not be taken into consideration in computing the period of any notice required to be given before discharge or dismissal.

80. Wages during leave period.—(*1*) For the leave allowed to him under [1][section 78 or section 79, as the case may be,] a worker [2][shall be entitled to wages] at a rate equal to the daily average of his total full time earnings for the days on which [3][he actually worked] during the month immediately preceding his leave, exclusive of any overtime and bonus but inclusive of dearness allowance and the cash equivalent of the advantage accruing through the concessional sale to the worker of food grains and other articles:

[4][Provided that in the case of a worker who has not worked on any day during the calendar month immediately preceding his leave, he shall be paid at a rate equal to the daily average of his total full time earnings for the days on which he actually worked during the last calendar month preceding his leave, in which he actually worked, exclusive of any overtime and bonus but inclusive of dearness allowance and the cash equivalent of the advantage accruing through the concessional sale to the workers of food grains and other articles.]

(*2*) The cash equivalent of the advantage accruing through the concessional sale to the worker of food grains and other articles shall be computed as often as may be prescribed, on the basis of the maximum quantity of food grains and other articles admissible to a standard family.

Explanation 1.—"Standard family" means a family consisting of a worker, his or her spouse and two children below the age of fourteen years requiring in all three adult consumption units.

---

1. Subs. by Act 94 of 1976, s. 33, for "section 79" (w.e.f. 26-10-1976).
2. Subs. by Act 20 of 1987, s. 24, for "shall be paid" (w.e.f. 1-12-1987).
3. Subs. by Act 94 of 1976, s. 33, for "he worked" (w.e.f. 26-10-1976).
4. Ins. by Act 20 of 1987, s. 24 (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

Explanation 2.—"Adult consumption unit" means the consumption unit of a male above the age of fourteen years; and the consumption unit of a female above the age of fourteen years and that of a child below the age of fourteen years shall be calculated at the rates of 8 and 6 respectively of one adult consumption unit.

(*3*) The State Government may make rules prescribing—

(*a*) the manner in which the cash equivalent of the advantage accruing through the concessional sale to a worker of food grains and other articles shall be computed; and

(*b*) the registers that shall be maintained in a factory for the purpose of securing compliance with the provisions of this section.

81. Payment in advance in certain cases.—A worker who has been allowed leave for not less than four days, in the case of an adult, and five days, in the case of a child, shall, before his leave begins be paid the wages due for the period of the leave allowed.

82. Mode of recovery of unpaid wages.—Any sum required to be paid by an employer, under his Chapter but not paid by him shall be recoverable as delayed wages under the provisions of the Payment of Wages Act, 1936 (4 of 1936).

83. Power to make rules.—The State Government may make rules directing managers of factories to keep registers containing such particulars as may be prescribed and requiring the registers to be made available for examination by Inspectors.

84. Power to exempt factories.—Where the State Government is satisfied that the leave rules applicable to workers in a factory provide benefits which in its opinion are not less favourable than those for which this Chapter makes provision it may, by written order; exempt the factory from all or any of the provisions of this Chapter subject to such conditions as may be specified in the order.]

[1][*Explanation.*—For the purposes of this section, in deciding whether the benefits which are provided for by any leave rules are less favourable than those for which this Chapter makes provision, or not, the totality of the benefits shall be taken into account.]

CHAPTER IX

SPECIAL PROVISIONS

85. Power to apply the act to certain premises.—(*1*) The State Government may, by notification in the Official Gazette, declare that all or any of the provisions of this Act shall apply to any place wherein a manufacturing process is carried on with or without the aid of power or is so ordinarily carried on, notwithstanding that—

(*i*) the number of persons employed therein is less than ten, if working with the aid of power and less than twenty if working without the aid of power, or

(*ii*) the persons working therein are not employed by the owner thereof but are working with the permission of, or under agreement with, such owner:

Provided that the manufacturing process is not being carried on by the owner only with the aid of his family.

(*2*) After a place is so declared, it shall be deemed to be a factory for the purposes of this Act, and the owner shall be deemed to be the occupier, and any person working therein, a worker.

Explanation.—For the purposes of this section, "owner" shall include a lessee or mortgage with possession of the premises.

86. Power to exempt public institutions.—The State Government may exempt, subject to such conditions as it may consider necessary, any workshop or workplace where a manufacturing process is carried on and which is attached to a public institution maintained for the purposes of education, [2][training, research] or reformation, from all or any of the provisions of this Act:

1. Ins. by Act 94 of 1976, s. 34 (w.e.f. 26-10-1976).
2. Subs. by s. 35, *ibid.*, for "training" (w.e.f. 26-10-1976).

NHPC LIMITED
FARIDABAD

Provided that no exemption shall be granted from the provisions relating to hours of work and holidays, unless the persons having the control of the institution submit, for the approval of the State Government, a scheme for the regulation of the hours of employment, intervals for meals, and holidays of the persons employed in or attending the institution or who are inmates of the institution, and the State Government is satisfied that the provisions of the scheme are not less favourable than the corresponding provisions of this Act.

87. Dangerous operations.—Where the State Government is of opinion that any [1][manufacturing process or operation] carried on in a factory exposes any persons employed in it to a serious risk of bodily injury, poisoning or disease, it may make rules applicable to any factory or class or description of factories in which the [1][manufacturing process or operation] is carried on—

(*a*) specifying the [1][manufacturing process or operation] and declaring it to be dangerous;

(*b*) prohibiting or restricting the employment of women, adolescents or children in the [1][manufacturing process or operation];

(*c*) providing for the periodical medical examination of persons employed, or seeking to be employed, in the [1][manufacturing process or operation], and prohibiting the employment or persons not certified as fit for such employment [2][and requiring the payment by the occupier of the factory of fees for such medical examination];

(*d*) providing for the protection of all persons employed in the [1][manufacturing process or operation] or in the vicinity of the places where it is carried on;

(*e*) prohibiting, restricting or controlling the use of any specified materials or processes in connection with the [1][manufacturing process or operation];

[2][(*f*) requiring the provision of additional welfare amenities and sanitary facilities and the supply of protective equipment and clothing, and laying down the standards thereof, having regard to the dangerous nature of the manufacturing process or operation.

[3]* * * * *

[4][**87A. Power to prohibit employment on account of serious hazard.**—(*1*) Where it appears to the Inspector that conditions in a factory or part thereof are such that they may cause serious hazard by way of injury or death to the persons employed therein or to the general public in the vicinity, he may, by order in writing to the occupier of the factory, state the particulars in respect of which he considers the factory or part thereof to be the cause of such serious hazard and prohibit such occupier from employing any person in the factory or any part thereof other than the minimum number of persons necessary to attend to the minimum tasks till the hazard is removed.

(*2*) Any order issued by the Inspector under sub-section (*1*) shall have effect for a period of three days until extended by the Chief Inspector by a subsequent order.

(*3*) Any person aggrieved by an order of the Inspector under sub-section (*1*), and the Chief Inspector under sub-section (*2*), shall have the right to appeal to the High Court.

(*4*) Any person whose employment has been affected by an order issued under sub-section (*1*), shall be entitled to wages and other benefits and it shall be the duty of the occupier to provide alternative employment to him wherever possible and in the manner prescribed.

(*5*) The provisions of sub-section (*4*) shall be without prejudice to the rights of the parties under the Industrial Disputes Act, 1947 (14 of 1947).]

---

1. Subs. by Act 94 of 1976, s. 36, for "operation" (w.e.f. 26-10-1976).
2. Ins. by s. 36, *ibid.* (w.e.f. 26-10-1976).
3. Omitted by Act 20 of 1987, s. 25 (w.e.f. 1-12-1987).
4. Ins. by s. 26, *ibid.* (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

88. Notice of certain accidents.—[1][(*1*)] Where in any factory an accident occurs which causes death, or which causes any bodily injury by reason of which the person injured is prevented from working for a period of forty-eight hours or more immediately following the accident, or which is of such nature as may be prescribed in this behalf, the manager of the factory shall send notice thereof to such authorities, and in such form and within such time, as may be prescribed.

[2][(*2*) Where a notice given under sub-section (*1*) relates to an accident causing death, the authority to whom the notice is sent shall make an inquiry into the occurrence within one month of the receipt of the notice or, if such authority is not the Inspector, cause the Inspector to make an inquiry within the said period.

(*3*) The State Government may make rules for regulating the procedure at inquiries under this section.]

[3][**88A. Notice of certain dangerous occurrences.**—Where in a factory any dangerous occurrence of such nature as may be prescribed occurs, whether causing any bodily injury or disability or not, the manager of the factory shall send notice thereof to such authorities, and in such form and within such time, as may be prescribed.]

89. Notice of certain diseases.—(*1*) Where any worker in a factory contracts any disease specified in [4][the Third Schedule], the manager of the factory shall send notice thereof to such authorities, and in such form and within such time, as may be prescribed.

(*2*) If any medical practitioner attends on a person who is or has been employed in a factory, and who is, or is believed by the medical practitioner to be, suffering from any disease specified in [4][the Third Schedule], the medical practitioner shall without delay send a report in writing to the office of the Chief Inspector stating—

(*a*) the name and full postal address of the patient,

(*b*) the disease from which he believes the patient to be suffering, and

(*c*) the name and address of the factory in which the patient is, or was last, employed.

(*3*) Where the report under sub-section (*2*) is confirmed to the satisfaction of the Chief Inspector, by the certificate of a certifying surgeon or otherwise, that the person is suffering from a disease specified in [4][the Third Schedule], he shall pay to the medical practitioner such fee as may be prescribed, and the fee so paid shall be recoverable as an arrear of land-revenue from the occupier of the factory in which the person contracted the disease.

(*4*) If any medical practitioner fails to comply with the provisions of sub-section (*2*), he shall be punishable with fine which may extend to [5][one thousand rupees].

[6][(*5*) The Central Government may, by notification in the Official Gazette, add to or alter the Third Schedule and any such addition or alteration shall have effect as if it had been made by this Act.]

90. Power to direct enquiry into cases of accident or disease.—(*1*) The State Government may, if it considers it expedient so to do, appoint a competent person to inquire into the causes of any accident occurring in a factory or into any case where a disease specified in [7][the Third Schedule] has been, or is suspected to have been contracted in a factory, and may also appoint one or more persons possessing legal or special knowledge to act as assessors in such inquiry.

---

1. Section 88 re-numbered as sub-section (*1*) thereof by Act 94 of 1976, s. 37 (w.e.f. 26-10-1976).
2. Ins. by s. 37, *ibid.* (w.e.f. 26-10-1976).
3. Ins. by s. 38, *ibid.* (w.e.f. 26-10-1976).
4. Subs. by Act 20 of 1987, s. 27, for "the Schedule" (w.e.f. 1-12-1987).
5. Subs. by s. 27, *ibid.*, for "fifty rupees" (w.e.f. 1-12-1987).
6. Added by s. 27, *ibid.* (w.e.f. 1-12-1987).
7. Subs. by s. 28, *ibid.*, for "the Schedule" (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

(*2*) The person appointed to hold an inquiry under this section shall have all the powers of a Civil Court under the Code of Civil Procedure, 1908 (5 of 1908), for the purposes of enforcing the attendance of witnesses and compelling the production of documents and material objects, and may also, so far as may be necessary for the purposes of the inquiry, exercise any of the powers of an Inspector under this Act; and every person required by the person making the inquiry to furnish any information shall be deemed to be legally bound so to do within the meaning of section 176 of the Indian Penal Code (45 of 1860).

(*3*) The person holding an inquiry under this section shall make a report to the State Government stating the causes of the accident, or as the case may be, disease, and any attendant circumstances, and addition any observations which he or any of the assessors may think fit to make.

(*4*) The State Government may, if it thinks fit, cause to be published any report made under this section or any extracts therefrom.

(*5*) The State Government may make rules for regulating the procedure at inquiries under this section.

91. Power to take samples.—(*1*) An Inspector may at any time during the normal working hours of a factory, after informing the occupier or manager of the factory or other person for the time being purporting to be in charge of the factory, take in the manner hereinafter provided a sufficient sample of any substances used or intended to be used in the factory, such use being—

(*a*) in the belief of the Inspector in contravention of any of the provisions of this Act or the rules made thereunder, or

(*b*) in the opinion of the Inspector likely to cause bodily injury to, or injury to the health of, workers in the factory.

(*2*) Where the Inspector takes a sample under sub-section (*1*), he shall, in the presence of the person informed under that sub-section unless such person wilfully absents himself, divide the sample into three portions and effectively seal and suitably mark them, and shall permit such person to add his own seal and mark thereto.

(*3*) The person informed as aforesaid shall, if the Inspector so requires, provide the appliances for dividing, sealing and marking the sample taken under this section.

(*4*) The Inspector shall—

(*a*) forthwith give one portion of the sample to the person informed under sub-section (*1*);

(*b*) forthwith send the second portion to a Government Analyst for analysis and report thereon;

(*c*) retain the third portion for production to the Court before which proceedings, if any, are instituted in respect of the substance.

(*5*) Any document purporting to be a report under the hand of any Government Analyst upon any substance submitted to him for analysis and report under this section, may be used as evidence in any proceedings instituted in respect of the substance.

[1][**91A. Safety and occupational health surveys.**—(*1*) The Chief Inspector, or the Director General of Factory Advice Service and Labour Institutes, or the Director General of Health Services, to the Government of India, or such other officer as may be authorised in this behalf by the State Government or the Chief Inspector or the Director General of Factory Advice Service and Labour Institutes or the Director General of Health Services may, at any time during the normal working hours of a factory, or at any other time as is found by him to be necessary, after giving notice in writing to the occupier or manager of the factory or any other person who for the time being purports to be in charge of the factory, undertake safety and occupational health surveys, and such occupier or manager or other person shall afford all facilities for such survey, including facilities for the examination and testing of plant and machinery and collection of samples and other data relevant to the survey.

1. Ins. by Act 94 of 1976, s. 39 (w.e.f. 26-10-1976).

NHPC LIMITED FARIDABAD

(*2*) For the purpose of facilitating surveys under sub-section (*1*) every worker shall, if so required by the person conducting the survey, present himself to undergo such medical examination as may be considered necessary by such person and furnish all information in his possession and relevant to the survey.

(*3*) Any time spent by a worker for undergoing medical examination or furnishing information under sub-section (*2*) shall, for the purpose of calculating wages and extra wages for overtime work, be deemed to be time during which such worker worked in the factory.]

[1][*Explanation.*—For the purposes of this section, the report, if any, submitted to the State Government by the person conducting the survey under sub-section (*1*) shall be deemed to be a report submitted by an Inspector under this Act.]

CHAPTER X

PENALTIES AND PROCEDURE

92. General penalty for offences.—Save as is otherwise expressly provided in this Act and subject to the provisions of section 93 , if in, or in respect of, any factory there is any contravention of any of the provisions of this Act or of any rules made thereunder or of any order in writing given thereunder, the occupier and manager of the factory shall each be guilty of an offence and punishable with imprisonment for a term which may extend to [2][two years] or with fine which may extend to [3][one lakh rupees] or with both, and if the contravention is continued after conviction, with a further fine which may extend to [4][one thousand rupees] for each day on which the contravention is so continued:

[5][Provided that where contravention of any of the provisions of Chapter IV or any rule made thereunder or under section 87 has resulted in an accident causing death or serious bodily injury, the fine shall not be less than [6][twenty-five thousand rupees] in the case of an accident causing death, and [7][five thousand rupees] in the case of an accident causing serious bodily injury.

Explanation.—In this section and in section 94 "serious bodily injury" means an injury which involves, or in all probability will involve, the permanent loss of the use of, or permanent injury to, any limb or the permanent loss of, or injury to, sight or hearing, or the fracture of any bone, but shall not include, the fracture of bone or joint (not being fracture of more than one bone or joint) of any phalanges of the hand or foot.]

[8][**93. Liability of owner of premises in certain circumstances.**—(*1*) Where in any premises separate buildings are leased to different occupiers for use as separate factories, the owner of the premises shall be responsible for the provision and maintenance of common facilities and services, such as approach roads, drainage, water supply, lighting and sanitation.

(*2*) The Chief Inspector shall have, subject to the control of the State Government, power to issue orders to the owner of the premises in respect of the carrying out of the provisions of sub-section (*1*).

(*3*) Where is any premises, independent or self-containted, floors or flats are leased to different occupiers for use as separate factories, the owner of the premises shall be liable as if he were the occupier or manager of a factory, for any contravention of the provisions of this Act in respect of—

(*i*) latrines, urinals and washing facilities in so far as the maintenance of the common supply of water for these purposes is concerned;

(*ii*) fencing of machinery and plant belonging to the owner and not specifically entrusted to the custody or use of an occupier;

---

1. Ins. by Act 20 of 1987, s. 29 (w.e.f. 1-12-1987).
2. Subs. by s. 30, *ibid.*, for "three months" (w.e.f. 1-12-1987).
3. Subs. by s. 30, *ibid.*, for "two thousand rupees" (w.e.f. 1-12-1987).
4. Subs. by s. 30, *ibid.*, for "seventy-five rupees" (w.e.f. 1-12-1987).
5. Ins. by Act 94 of 1976, s. 40 (w.e.f. 26-10-1976).
6. Subs. by Act 20 of 1987, s. 30, for "one thousand rupees" (w.e.f. 1-12-1987).
7. Subs. by s. 30, *ibid.*, for "five hundred rupees" (w.e.f. 1-12-1987).
8. Subs. by Act 25 of 1954, s. 21, for section 93 (w.e.f. 7-5-1954).

NHPC LIMITED FARIDABAD

(*iii*) safe means of access to the floors or flats and maintenance and cleanliness of staircases and common passages;

(*iv*) precautions in case of fire;

(*v*) maintenance of hoists and lifts; and

(*vi*) maintenance of any other common facilities provided in the premises.

(*4*) The Chief Inspector shall have, subject to the control of the State Government, power to issue orders to the owner of the premises in respect of the carrying out the provisions of sub-section (*3*).

(*5*) The provisions of sub-section (*3*) relating to the liability of the owner shall apply where in any premises independent rooms with common latrines, urinals and washing facilities are leased to different occupiers for use as separate factories:

Provided that the owner shall be responsible also for complying with the requirements relating to the provision and maintenance of latrines, urinals and washing facilities.

(*6*) The Chief Inspector shall have, subject to the control of the State Government, the power to issue orders to the owner of the premises referred to in sub-section (*5*) in respect of the carrying out of the provisions of section 46 or section 48.

(*7*) Where in any premises portions of a room or a shed are leased to different occupiers for use as separate factories, the owner of the premises shall be liable for any contravention of the provisions of—

(*i*) Chapter III, except sections 14 and 15;

(*ii*) Chapter IV, except sections 22, 23, 27, 34, 35 and 36:

Provided that in respect of the provisions of sections 21, 24 and 32 the owner's liability shall be only in so far as such provisions relate to things under his control:

Provided further that the occupier shall be responsible for complying with the provisions of Chapter IV in respect of plant and machinery belonging to or supplied by him;

(*iii*) section 42.

(*8*) The Chief Inspector shall have, subject to the control of the State Government, power to issue orders to the owner of the premises in respect of the carrying out the provisions of sub-section (*7*).

(*9*) In respect of sub-sections (*5*) and (*7*), while computing for the purposes of any of the provisions of this Act the total number of workers employed, the whole of the premises shall be deemed to be a single factory.]

94. Enhanced penalty after previous conviction.—[1][(*1*)] If any person who has been convicted of any offence punishable under section 92 is again guilty of an offence involving a contravention of the same provision, he shall be punishable on a subsequent conviction with imprisonment for a term which may extend to [2][three years] or with fine [3][which shall not be less than [4][ten thousand rupees] but which may extend to [5][two lakh rupees]] or with both:

[6][Provided that the court may, for any adequate and special reasons to be mentioned in the judgment, impose a fine of less than [4][ten thousand rupees]:

---

1. Section 94 renumbered as sub-section (*1*) thereof by Act 94 of 1976, s. 41 (w.e.f. 26-10-1976).
2. Subs. by Act 20 of 1987, s. 31, for "six months" (w.e.f. 1-12-1987).
3. Subs. by Act 94 of 1976, s. 41, for "which may extend to one thousand rupees" (w.e.f. 26-10-1976).
4. Subs. by Act 20 of 1987, s. 31, for "two hundred rupees" (w.e.f. 1-12-1987).
5. Subs. by s. 31, *ibid.*, for "five thousand rupees" (w.e.f. 1-12-1987).
6. Subs. by Act 94 of 1976, s. 41, for the proviso (w.e.f. 26-10-1976).

NHPC LIMITED FARIDABAD

Provided further that where contravention of any of the provisions of Chapter IV or any rule made thereunder or under section 87 has resulted in an accident causing death or serious bodily injury, the fine shall not be less than [1][thirty-five thousand rupees] in the case of an accident causing death and [2][ten thousand rupees] in the case of an accident causing serious bodily injury.]

[3][(*2*) For the purposes of sub-section (*1*), no cognizance shall be taken of any conviction made more than two years before the commission or the offence for which the person is subsequently being convicted.]

95. Penalty for obstructing Inspector.—Whoever wilfully obstructs an Inspector in the exercise of any power conferred on him by or under this Act, or fails to produce on demand by an Inspector any registers or other documents in his custody kept in pursuance of this Act or of any rules made thereunder, or conceals or prevents any worker in a factory from appearing before, or being examined by, an Inspector, shall be punishable with imprisonment for a term which may extend to [4][six months] or with fine which may extend to [5][ten thousand rupees] or with both.

96. Penalty for wrongfully disclosing results of analysis under section 91.—Whoever, except in so far as it may be necessary for the purposes of a prosecution for any offence punishable under this Act, publishes or discloses to any person the results of an analysis made under section 91, shall be punishable with imprisonment for a term which may extend to [6][six months] or with fine which may extend to [7][ten thousand rupees] or with both.

[8][**96A. Penalty for contravention of the provisions of sections 41B, 41 C and 41 H.**—(*1*) Whoever Whoever fails to comply with or contravenes any of the provisions of section 41B , 41 C or 41 H or the rules made thereunder, shall, in respect of such failure or contravention, be punishable with imprisonment for a term which may extend to seven years and with fine which may extend to two lakh rupees, and in case the failure or contravention continues, with additional fine which may extend to five thousand rupees for every day during which such failure or contravention continues after the conviction for the first such failure or contravention.

(*2*) If the failure or contravention referred to in sub-section (*1*) continues beyond a period of one year after the date of conviction, the offender shall be punishable with imprisonment for a term which may extend to ten years.]

97. Offences by workers.—(*1*) Subject to the provisions of section 111, if any worker employed in a factory contravenes any provision of this Act or any rules or orders made thereunder, imposing any duty or liability on workers, he shall be punishable with fine which may extend to [9][five hundred rupees].

(*2*) Where a worker is convicted of an offence punishable under sub-section (*1*) the occupier or manager of the factory shall not be deemed to be guilty of an offence in respect of that contravention, unless it is proved that he failed to take all reasonable measures for its prevention.

98. Penalty for using false certificate of fitness.—Whoever knowingly uses or attempts to use, as a certificate of fitness granted to himself under section 70 , a certificate granted to another person under that section, or who, having procured such a certificate, knowingly allows it to be used, or an attempt to use it to be made, by another person, shall be punishable with imprisonment for a term which may extend to [10][two months] or with fine which may extend to [11][one thousand rupees] or with both.

---

1. Subs. by Act 20 of 1987, s. 31, for "two thousand rupess" (w.e.f. 1-12-1987).
2. Subs. by s. 31, *ibid.*, for "one thousand rupees" (w.e.f. 1-12-1987).
3. Ins. by Act 94 of 1976, s. 41 (w.e.f. 26-10-1976).
4. Subs. by Act 20 of 1987, s. 32, for "three months" (w.e.f. 1-12-1987).
5. Subs. by s. 32, *ibid.*, for "five hundred rupees" (w.e.f. 1-12-1987).
6. Subs. by s. 33, *ibid.*, for "three months" (w.e.f. 1-12-1987).
7. Subs. by s. 33, *ibid.*, for "five hundred rupees" (w.e.f. 1-12-1987).
8. Ins. by s. 34, *ibid.* (w.e.f. 1-12-1987).
9. Subs. by s. 35, *ibid.*, for "twenty rupees" (w.e.f. 1-12-1987).
10. Subs. by s. 36, *ibid.*, for "one month" (w.e.f. 1-12-1987).
11. Subs. by s. 36, *ibid.*, for "fifty rupees" (w.e.f. 1-12-1987).

NHPC LIMITED
FARIDABAD

99. Penalty for permitting double employment of child.—If a child works in a factory on any day on which he has already been working in another factory, the parent or guardian of the child or the person having custody of or control over him or obtaining any direct benefit from his wages, shall be punishable with fine which may extend to [1][one thousand rupees], unless it appears to the Court that the child so worked without the consent or connivance of such parent, guardian or person.

100. [*Determination of occupier in certain cases.*] *Rep. by the Factories (Amendment) Act,* 1987 (20 *of* 1987), s. 38 (*w.e.f.* 1-12-1987).

101. Exemption of occupier or manager from liability in certain cases.—Where the occupier or manager of a factory is charged with an offence punishable under this Act, he shall be entitled, upon complaint duly made by him and on giving to the prosecutor not less than three clear days' notice in writing of his intention so to do, to have any other person whom he charges as the actual offender brought before the Court at time appointed for hearing the charge; and if, after the commission of the offence has been proved, the occupier or manager of the factory, as the case may be, proves to the satisfaction of the Court—

(*a*) that he has used due diligence to enforce the execution of this Act, and

(*b*) that the said other person committed the offence in question without his knowledge, consent or connivance,

that other person shall be convicted of the offence and shall be liable to the like punishment as if he were the occupier or manager of the factory, and the occupier or manager, as the case may be, shall be discharged from any liability under this Act in respect of such offence:

Provided that in seeking to prove as aforesaid, the occupier or manager of the factory, as the case may be, may be examined on oath, and his evidence and that of any witness whom he calls in his support shall be subject to cross-examination on behalf of the person he charges as the actual offender and by the prosecutor:

Provided further that, if the person charged as the actual offender by the occupier or manager cannot be brought before the Court at the time appointed for hearing the charge, the Court shall adjourn the hearing from time to time for a period not exceeding three months and if by the end of the said period the person charged as the actual offenders cannot still be brought before the Court, the Court shall proceed to hear the charge against the occupier or manager and shall, if the offence be proved, convict the occupier or manager.

102. Power of Court to make orders.—(*1*) Where the occupier or manager of a factory is convicted of an offence punishable under this Act the Court may, in addition to awarding any punishment, by order in writing require him, within a period specified in the order (which the court may, if it thinks fit and on application in such behalf, from time to time extend) to take such measures as may be so specified for remedying the matters in respect of which the offence was committed.

(*2*) Where an order is made under sub-section (*1*) the occupier or manager of the factory, as the case may be, shall not be liable under this Act in respect of the continuation of the offence during the period, or extended period, if any, allowed by the Court, but if, on the expiry of such period or extended period, as the case may be, the order or the Court has not been fully complied with, the occupier or manager, as the case may be, shall be deemed to have committed a further offence, and may be sentenced therefore by the Court to undergo imprisonment for a term which may extend to six months or to pay a fine which may extend to one hundred rupees for every day after such expiry on which the order has not been complied with, or both to undergo such imprisonment and to pay such fine, as aforesaid.

103. Presumption as to employment.—If a person is found in a factory at any time, except during intervals for meals or rest, when work is going on or the machinery is in motion, he shall until the contrary is proved, be deemed for the purposes of this Act and the rules made thereunder to have been at that time employed in the factory.

NHPC LIMITED
FARIDABAD

1. Subs. by Act 20 of 1987, s. 37, for "fifty rupees" (w.e.f. 1-12-1987).

104. Onus as to age.—(*1*) When any act or omission would, if a person were under a certain age, be an offence punishable under this Act, and such person is in the opinion of the Court *prima facie* under such age, the burden shall be on the accused to prove that such person is no under such age.

(*2*) A declaration in writing by a certifying surgeon relating to a worker that he has personally examined him and believes him to be under the age stated is such declaration shall, for the purposes of this Act and the rules made thereunder, be admissible as evidence of the age of that worker.

[1][**104A. Onus of proving limits of what is practicable, etc.**—In any proceeding for an offence for the contravention of any provision of this Act or rules made thereunder consisting of a failure to comply with a duty or requirement to do something, it shall be for the person who is alleged to have failed to comply with such duty or requirement, to prove that it was not reasonably practicable or, as the case may be, all practicable measures were taken to satisfy the duty or requirement.]

105. Cognizance of offences.—(*1*) No Court shall take cognizance of any offence under this Act except on complaint by, or with the previous sanction in writing of, an Inspector.

(*2*) No Court below that of a Presidency Magistrate or of a Magistrate of the first class shall try any offence punishable under this Act.

106. Limitation of prosecutions.—No Court shall take cognizance of any offence punishable under this Act unless complaint thereof is made within three months of the date on which the alleged commission of the offence came to the knowledge of an Inspector:

Provided that where the offence consists of disobeying a written order made by an Inspector, complaint thereof may be made within six months of the date on which the offence is alleged to have been committed.

[2][*Explanation.*—For the purposes of this section,—

(*a*) in the case of a continuing offence, the period of limitation shall be computed with reference to every point of time during which the offence continues;

(*b*) where for the performance of any act time is granted or extended on an application made by the occupier or manager of a factory, the period of limitation shall be computed from the date on which the time so granted or extended expired.]

[3][**106A. Jurisdiction of a court for entertaining proceedings, etc., for offence.**—For the purposes of conferring jurisdiction on any court in relation to an offence under this Act or the rules made thereunder in connection with the operation of any plant, the place where the plant is for the time being situate shall be deemed to be the place where such offence has been committed.]

CHAPTER XI

SUPPLEMENTAL

107. Appeals.—(*1*) The manager of a factory on whom an order in writing by an Inspector has been served under the provisions of this Act or the occupier of the factory may, within thirty days of the service of the order, appeal against it to the prescribed authority, and such authority may, subject to rules made in this behalf by the State Government, confirm, modify or reverse the order.

(*2*) Subject to rules made in this behalf by the State Government (which may prescribe classes of appeals which shall not be heard with the aid of assessors), the appellate authority may, or if so required in the petition of appeal shall, hear the appeal with the aid of assessors, one of whom shall be appointed by the appellate authority and the other by such body representing the industry concerned as may be prescribed:

Provided that if no assessor is appointed by such body before the time fixed for hearing the appeal, or if the assessor so appointed fails to attend the hearing at such time, the appellate authority may, unless satisfied that the failure to attend is due to sufficient cause, proceed to hear the appeal without the aid of such assessor or, if it thinks fit, without the aid of any assessor.

---

1. Ins. by Act 20 of 1987, s. 39 (w.e.f. 1-12-1987).
2. Ins. by Act 94 of 1976, s. 43 (w.e.f. 26-10-1976).
3. Ins. by Act 20 of 1987, s. 40 (w.e.f. 1-12-1987).

NHPC LIMITED
FARIDABAD

(*3*) Subject to such rules as the Stale Government may make in this behalf and subject to such conditions as to partial compliance or the adoption of temporary measures as the appellate authority may in any case think fit to impose, the appellate authority may, if it thinks fit, suspend the order appealed against pending the decision of the appeal.

108. Display of notices.—(*1*) In addition to the notices required to be displayed in any factory by or under this Act, there shall be displayed in every factory a notice containing such abstracts of this Act and of the rules made thereunder as may be prescribed and also the name and address of the Inspector and the certifying surgeon.

(*2*) All notices required by or under this Act to be displayed in a factory shall be in English and in a language understood by the majority of the workers in the factory, and shall be displayed at some conspicuous and convenient place at or near the main entrance to the factory, and shall be maintained in a clean and legible condition.

(*3*) The Chief Inspector may, by order in writing served on the manager of any factory, require that there shall be displayed in the factory any other notice or poster relating to the health, safety or welfare of the workers in the factory.

109. Service of notices.—The State Government may make rules prescribing the manner of the service of orders under this Act on owners, occupiers or managers of factories.

110. Returns.—The State Government may make rules requiring owners, occupiers or managers of factories to submit such returns, occasional or periodical, as may in its opinion be required for the purposes of this Act.

111. Obligations of workers.—(*1*) No worker in a factory—

(*a*) shall wilfully interfere with or misuse any appliance, convenience or other thing provided in a factory for the purposes of securing the health, safety or welfare of the workers therein;

(*b*) shall wilfully and without reasonable cause do anything likely to endanger himself or others; and

(*c*) shall wilfully neglect to make use of any appliance or other thing provided in the factory for the purposes of securing the health or safety of the workers therein.

(*2*) If any worker employed in a factory contravenes any of the provisions of this section or of any rule or order made thereunder, he shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to one hundred rupees, or with both.

[1][**111A. Right of workers, etc.**—Every worker shall have the right to—

(*i*) obtain from the occupier, information relating to workers' health and safety at work,

(*ii*) get trained within the factory wherever possible, or, to get himself sponsored by the occupier for getting trained at a training center or institute, duly approved by the Chief Inspector, where training is imparted for workers' health and safety at work,

(*iii*) represent to the Inspector directly or through his representative in the matter of inadequate provision for protection of his health or safety in the factory.]

112. General power to make rules.—The State Government may make rules providing for any matter which, under any of the provisions of this Act, is to be or may be prescribed or which may be considered expedient in order to give effect to the purposes of this Act.

113. Powers of Centre to give directions.—The Central Government may give directions to a State Government to the carrying into execution of the provisions of this Act.

114. No charge for facilities and conveniences.—Subject to the provisions of section 46 no fee or charge shall be realised from any worker in respect of any arrangements or facilities to be provided, or any equipments or appliances to be supplied by the occupier under the provisions of this Act.

---

1. Ins. by Act 20 of 1987, s. 41 (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

115. Publication of rules.—[1][(*1*)] All rules made under this Act shall be published in the Official Gazette, and shall be subject to the condition of previous publication; and the date to be specified under clause (*3*) of section 23 of the General Clauses Act, 1897 (10 of 1897), shall be not less than [2][forty-five days] from the date on which the draft of the proposed rules was published.

[3][(*2*) Every rule made by the State Government under this Act shall be laid, as soon as may be after it is made, before the State Legislature.]

116. Application of Act to Government factories.—Unless otherwise provided this Act shall apply to factories belonging to the Central or any State Government.

117. Protection to persons acting under this Act.—No suit, prosecution or other legal proceeding shall lie against any person for anything which is in good faith done or intended to be done under this Act.

118. Restrictions on disclosure of information.—(*1*) No Inspector shall, while in service or after leaving the service, disclose otherwise than in connection with the execution, or for the purposes, of this Act any information relating to any manufacturing or commercial business or any working process which may come to his knowledge in the course of his official duties.

(*2*) Nothing in sub-section (*1*) shall apply to any disclosure of information made with the previous consent in writing of the owner of such business or process or for the purposes of any legal proceeding (including arbitration) pursuant to this Act or of any criminal proceeding which may be taken, whether pursuant to this Act or otherwise, or for the purposes of any report of such proceedings as aforesaid.

(*3*) If any Inspector contravenes the provisions of sub-section (*1*) he shall be punishable with imprisonment for a term which may extend to six months, or with fine which may extend to one thousand rupees, or with both.

[4][**118A. Restriction on disclosure of information.**—(*1*) Every Inspector shall treat as confidential the source of any complaint brought to his notice on the breach of any provision of this Act.

(*2*) No inspector shall, while making an inspection under this Act, disclose to the occupier, manager or his representative that the inspection is made in pursuance of the receipt of a complaint:

Provided that nothing in this sub-section shall apply to any case in which the person who has made the complaint has consented to disclose his name.]

[5][**119. Act to have effect notwithstanding anything contained in Act 37 of 1970.**—The provisions of this Act shall have effect notwithstanding anything inconsistent therewith contained in the Contract Labour (Regulation and Abolition) Act, 1970 [6][or any other law for the time being in force.]]

120. Repeal and savings.—The enactments set out in the Table appended to this section are hereby repealed:

Provided that anything done under the said enactments which could have been done under this Act if it had then been in force shall be deemed to have been done under this Act.

TABLE.—[*Enactments repealed.*] *Rep. by the Repealing and Amending Act,* 1950 (35 *of* 1950), s. 2 and the First Schedule (*w.e.f.* 10-4-1950.)

---

1. Section 115 renumbered as sub-section (*1*) thereof by Act 20 of 1987, s. 42 (w.e.f. 1-12-1987).
2. Subs. by s. 42, *ibid.*, for "three months" (w.e.f. 1-12-1987).
3. Ins. by s. 42, *ibid.* (w.e.f. 1-12-1987).
4. Ins. by s. 43, *ibid.* (w.e.f. 1-12-1987).
5. Ins. by Act 94 of 1976, s. 44 (w.e.f. 26-10-1976).
6. Ins. by Act 20 of 1987, s. 44 (w.e.f. 1-12-1987).

NHPC LIMITED FARIDABAD

[1][THE FIRST SCHEDULE]

[*See* section 2 (*cb*)]

LIST OF INDUSTRIES INVOLVING HAZARDOUS PROCESSES

1. Ferrous Metallurgical industries

—Integrated Iron and Steel

—Ferrow-alloys

—Special Steels

2. Non-ferrous Metallurgical Industries

—Primary Metallurgical Industries, namely, size, lead, copper, manganese and aluminium

3. Foundries (ferrous and non-ferrous)

—Castings and forgings including cleaning or smoothening/roughening by sand and shot blasting

4. Coal (including coke) industries

—Coal Lignite, coke, etc.

—Fuel Gases (including Coal Gas, Producer Gas, Water Gas)

5. Power Generating Industries

6. Pulp and paper (including paper products) industries

7. Fertiliser Industries

—Nitrogenous

—Phosphatic

—Mixed

8. Cement Industries

—Portland Cement (including slag cement, puzzolona cement and their products)

9. Petroleum industries

—Oil Refining

—Lubricating Oils and Greases

10. Petro-chemical Industries

11. Drugs and Pharmaceutical Industries

—Narcotics, Drugs and Pharmaceutical

12. Fermentation Industries (Distilleries and Breweries)

13. Rubber (Synthetic Industries)

14. Paints and Pigment Industries

15. Leather Tanning Industries

16. Electroplating Industries

1. Ins. by Act 20 of 1987, s. 45 (w.e.f. 1-12-1987).

17. Chemical Industries

—Coke Oven By-products and Coal tar Distillation products

—Industrial Gases (nitrogen, oxygen, acetylene, argon, carbon dioxide, hydrogen, sulphur dioxide, nitrous oxide halogenated hydrocarbon, ozone, etc.)

—Industrial Carbon

—Alkalies and Acids

—Chromates and dichromates

—Leads and its compounds

—Electro chemicals (metallic sodium, potassium and magnesium, chlorates, perchlorates and peroxides)

—Electro thermal produces (artificial abrasive, calcium carbide)

—Nitrogenous compounds (cyanides, cyanamides, and other nitrogenous compounds)

—Phosphorous and its compounds

—Halogens and Halogenated compounds (Chlorine, Fluorine, Bromine and Iodine)

—Explosives (including industrial explosives and detonators and fuses)

18. Insecticides, Fungicides, Herbicides and other Pesticides Industries

19. Synthetic Resin and Plastics

20. Man-made Fiber (Cellulosic and non-cellulosic) industry

21. Manufacture and repair of electrical accumulators

22. Glass and Ceramics

23. Grinding or glazing of metals

24. Manufacture, handling and processing of asbestos and its products

25. Extraction of oils and fats from vegetable and animal sources

26. Manufacture, handling and use of benzene and substances containing benzene

27. Manufacturing processes and operations involving carbon disulphide

28. Dyes and Dyestuff including their intermediates

29. Highly flammable liquids and gases.

NHPC LIMITED
FARIDABAD

*THE SECOND SCHEDULE

(*See* section 41 F)

PERMISSIBLE LEVELS OF CERTAIN CHEMICAL SUBSTANCES IN WORK ENVIRONMENT

Substance	Permissible limits of exposure			
	Time-weighted average concentration (8 hrs)		Short-term exposure limit (15 min)	
	ppm	Mg/m^3	ppm	Mg/m^3
Acetaldehyde	100	180	150	270

No.F.1/7/2022-PPD
Government of India
Ministry of Finance
Department of Expenditure
Procurement Policy Division
264-C, North Block, New Delhi.
29.05.2023.

Office Memorandum

Subject: Vivad se Vishwas II (Contractual Disputes).

The undersigned is directed to refer to Rule 227A of the General Financial Rules (GFRs), 2017 and Department of Expenditure's (DoE's) "General Instructions on Procurement and Project Management" containing instructions to deal with dispute cases. Para 16.4 of the "General Instructions" is reproduced below:

> *Statistics have shown that in cases where the arbitration award is challenged, a large majority of cases are decided in favour of the contractor. In such cases, the amount becomes payable with interest, at a rate which is often far higher than the Government's cost of funds. This results in huge financial losses to the Government. Hence, in aggregate, it is in public interest to take the risk of paying a substantial part of the award amount subject to the result of the litigation, even if in some rare cases of insolvency etc. recovery of the amount in case of success may become difficult. Instructions have been issued in this matter in the past but have not been fully complied with.*

2. NITI Aayog had also established a Task Force on Conciliation Mechanism, and had circulated the final report of the Task Force. Following excerpt from the final report is highlighted:

> *A consideration of even more importance with respect to contracts between Government and Private entities. The same being critical not only to facilitate an overall pro-business environment but also to attract private investment in the country, to encourage private investors to establish and continue short-term and long-term contractual association with the Government, and not be wary of it.*

3. It is understood, however, that more efforts are required to clear the backlog of old litigation cases. Such cases are holding back fresh investment, reducing the ease of doing business with the Government, tying up scarce working capital and indirectly reducing competition for newly floated tenders. In this context, after due study of the experience in past cases, Government has decided to implement a one time settlement scheme called "**Vivad se Vishwas II (Contractual Disputes)**" to effectively settle pending disputes.

Applicability:

4. The scheme will apply to contractual disputes where one of the parties is either the Government of India and/ or an organisation detailed below. Apart from Ministries/ Departments, attached and subordinate bodies, notwithstanding anything contained in Rule 1 of the GFRs 2017, the scheme shall also be applicable

NHPC LIMITED FARIDABAD

a) to all Autonomous Bodies of the Government of India;

b) to public sector banks and public sector financial institutions;

c) to all Central Public Sector Enterprises;

d) to Union Territories without legislature and all agencies/ undertakings thereof; and

e) to all organisations, like Metro Rail Corporations, where Government of India has shareholding of 50%;however, these organisations can opt out of the scheme at their discretion, with approval of the Board of Directors.

The above mentioned organisations shall hereinafter be referred to as "procuring entities." The other party in dispute with the procuring entity shall be referred to as contractor(s) hereinafter.

5. Disputes where the award by court/ Arbitral Tribunal (AT) is only for monetary value will be eligible for settlement under this scheme. In case the award stipulates specific performance of contract (either fully or partially); such awards will not be eligible for settlement through this scheme.

6. Cases shall satisfy following criteria to be eligible for settlement under this scheme:

Status of dispute	The award shall have been issued upto the following date
Arbitral Award passed	31.01.2023.
Court Award passed	30.04.2023.

7. The scheme will be applicable only to those contractors who wish to participate in the scheme. Central Public Sector Enterprises (CPSEs) etc., who are contractors to the procuring entities as listed above, are also eligible to submit their claims under this scheme.

8. The scheme shall apply only for cases involving domestic arbitration and cases under international arbitration are not eligible to be settled under this scheme.

9. The scheme shall be applicable to all kinds of procurement including procurement of goods, services and works. The scheme is also applicable to all "earning contracts" (i.e. contracts where government receives money in exchange for goods, services, rights, etc.) as well as contracts under Public Private Partnership (PPP) arrangements.

Amount payable under the scheme

10. The settlement amount that shall be offered to Contractors for various categories of disputes is as under:

Sl. No.	**Status of dispute**	**Settlement Amount**
(a)	Court Award passed on or before 30.04.2023. Notes:	85% of the net amount

NHPC LIMITED FARIDABAD

	i. Case may or may not be under further appeal. ii. Court award will include the cases where the parties have approached the courts directly or approached the court subsequent to arbitral award (under any provision of the Indian Arbitration and Conciliation Act, 1996). However, Interim Orders under Section 9 of the Indian Arbitration and Conciliation Act, 1996, shall not be considered as an award eligible for settlement under this scheme.	awarded/ upheld by the court or 85% of the claim amount lodged by the contractor under this scheme, whichever is lower.
(b)	Arbitral Award passed on or before 31.01.2023. Notes: i. Case may or may not be under challenge/ appeal before a Court. ii. Arbitral Award passed by the Micro and Small Enterprises Facilitation Council (MSEFC) or Arbitral Tribunal appointed on reference by MSEFC under the provisions of the Micro, Small and Medium Enterprises Development Act, 2006, shall also be included under this scheme. iii. However, Interim Orders of the Arbitral Tribunal under any provision of the Indian Arbitration and Conciliation Act, 1996, shall not be considered as an award eligible for settlement under this scheme.	65% of the net amount awarded/ upheld by the court or 65% of the claim amount lodged by the contractor under this scheme, whichever is lower.
Notes for both (a) and (b) as above	1. In case, the award directs 'X' to be paid to contractor and 'Y' to be paid to procuring entity by the contractor, then the net amount awarded shall be (X-Y) and the amount payable under this scheme will be 85% or 65%, as the case may be, of (X-Y). 2. In case no payment or only partial payment has been made as per the award within the stipulated time given in the award itself (time should be taken as 30 days in case there is no time stipulated in the award for making payments), simple interest at the rate of 9% per annum will be payable on 85%/ 65% of the net amount awarded, as the case may be, minus the amount already paid, if any, for time period beyond such stipulated period till date of acknowledgement email, as specified in Step 3 of para 14, by the procuring entity. 3. It is further clarified that such 9% interest will be paid only on the net amount payable under this scheme after deducting the payments already made. 4. Even if award mentions any rate of interest (may be	

NHPC LIMITED FARIDABAD

below or above 9%) for payments made after the stipulated period for making such payments, still interest payable under this scheme shall only be 9% simple interest per annum.

Illustration 1:

Award	*Rs. 1,00,000/- in favour of contractor plus interest as indicated below.*
Interest	*Payable as per award:* *i. 10% till date of award, from a date mentioned in the award.* *ii. Payment to be made within 60 days of the award (stipulated period = 60 days from the date of award).* *iii. 12% for the period for which payment is delayed beyond the stipulated period.* *Payments including modalities under this scheme will be as under:* *i. 10% till date of award, from a date mentioned in the award. (i.e. till the date of award calculation of amount payable, including interest, shall be as per the award).* *ii. No interest is to be paid for the period stipulated for making payments in the award (60 days in the current case).* *iii. 9% for the period beyond 60 days in case of delayed payments on 85% of court award i.e. Rs. 85,000/-.*

11. In case the award directs payment of amount to the procuring entity, such awards shall also be eligible to be considered under the scheme, if opted by contractor. To clarify, in such cases, the contractor in order to bring finality to the case, may voluntarily offer to close the dispute on same terms and conditions as laid down in this scheme by paying the amount to the procuring entity, 85% or 65%, of the net award amount, as due under para 10(a) or 10(b) above and notes there-under, whichever may be applicable in the case.

12. Wherever the procuring entity has deposited some amount with a court before filing an appeal/ challenge, the interest payable on the amount due, as per para 10(a) or 10(b), shall be on the amount, payable under this scheme, without any reduction for the amount deposited with the court.

NHPC LIMITED FARIDABAD

It shall be the obligation of the procuring entity to take prompt action to ensure release of such deposited amount at the earliest after the settlement under the scheme is accepted.

13. As per Rule 227A of the General Financial Rules (GFRs), 2017, and earlier guidelines, in case the procuring entities challenge an arbitral award, 75% of the award amount has to be paid to the contractor, against a Bank guarantee (BG) of equivalent amount, before filing of the challenge in the court. Such amounts paid to the contractor shall be adjusted with the amounts due under the present scheme. However, no reimbursement of BG charges will be made to the contractor.

Illustration 2:

Assuming Rs. 10,000 is to be paid to the contractor by the procuring entity as per para 10(a) or 10(b) above, as the case may be.

The BG available with the procuring entity under Rule 227A (equivalent to the value already paid by the procuring entity to the contractor) could be of a value either more or less than Rs. 10,000.

Such cases will be dealt as below:

(a) In case BG available is less than Rs. 10,000/- (say Rs. 6,000/-). In such a case, procuring entity will pay Rs. 10,000 – Rs. 6,000 = Rs. 4,000 to the contractor and BG will be returned to the contractor. It may be noted that 9% interest, as per para 10, will be paid only on Rs. 4,000/-. No reimbursement of BG charges will be paid to the contractor.

(b) In case BG available is more than Rs. 10,000/- (say Rs. 15,000/-). In such a case, contractor will be required to deposit Rs. 15,000 – Rs. 10,000 = Rs. 5,000 with the procuring entity. It may be noted that 9% interest will be paid on Rs. 5,000/- by the contractor. Only thereafter BG will be returned to the contractor. No reimbursement of BG charges will be paid to the contractor.

Submission of claims and Time periods

14. Contractors should submit their claims through Government e-Marketplace (GeM), for which GeM will provide a dedicated link on their portal for implementation of this scheme. The link/ portal will provide functionality to contractors to register their claims through their authorized personnel. For non- GeM contracts of Ministry of Railways, contractors should register their claims on IREPS (www.ireps.gov.in). The information regarding contracts for which claim is to be lodged on IREPS will be provided on GeM as well as IREPS. The broad features of these portals are as under:

Step 1: The registered contractor shall list out the eligible disputes which it is willing to settle under this scheme, on the portal. The list of the procuring entities will be available through drop down menu on the portal. The details of the dispute should contain atleast the following: contract number, procuring entity/ contracting authority, paying authority, net award amount (as detailed in para 10(a) and 10(b)), claim amount with details thereof and the status of the dispute.

NHPC LIMITED FARIDABAD

Step 2: GeM shall intimate (through dashboard) such details to the procuring entities to verify the dispute under this scheme. The procuring entity shall verify the claim details and update the same, if any. Each entry on the portal shall be dispute specific. There can be more than one dispute under same contract, which shall be claimed, under this scheme, separately.

Step 3: The procuring entities shall evaluate the settlement amount due, as per this scheme and offer it to contractor for acceptance normally within two weeks of receipt of claims on the portal. The contractor will be required to accept the offer within the prescribed time period. If the contractor accepts the offer Step 4 shall follow else Step 5 shall follow. Time available for contractor to respond to the offer shall be 30 (thirty) calendar days only (Calendar day ending at midnight). There shall be no option for any relaxation, including claims of GeM portal not working on last day, etc. However, the procuring entity shall have the authority to amend/ withdraw the offer, under this scheme, at any time before the acceptance by the contractor.

Immediately on acceptance of the settlement offer under the scheme, an acknowledgement through email, of the parties reaching such settlement, shall be automatically generated and sent to both the parties by the portal.

Step 4: The contractor will be given 45 days (or longer period if permitted by the procuring entity), from the date of the acknowledgement email as indicated in Step 3 above, to file application for withdrawal of the case before the court. However, only after the contractor uploads the document indicating that court has permitted to withdraw the case, if applicable, should the settlement agreement under this scheme be executed and the payments made by the procuring entities.

In case the procuring entity has to withdraw the case from court, the procuring entity shall also file an application for such withdrawal within 45 days. The settlement agreement shall be executed within 30 days of submission of application of withdrawal of case from the court in such cases, without waiting for formal permission of the court regarding withdrawal of the case.

If the contractor agrees to the settlement under this scheme, a settlement agreement (a model agreement is at Annexure I which the procuring entities are free to appropriately modify, without changing core terms, based on their past experience, local needs etc.) may be digitally signed, preferably in pdf format, by both the parties. The settlement agreement shall have the same meaning and consequence as the settlement agreement consequent to successful conciliation as per The Arbitration and Conciliation Act, 1996. The settlement agreement shall be signed only by the parties without any need for attestation of any conciliator. Stamp duty for the settlement agreement, in all cases under this scheme, shall be paid by the contractor.

NHPC LIMITED FARIDABAD

The settlement agreement shall clearly state that even though the dispute is finally settled, the settlement does not decide on any issue, either of law or of fact, under dispute. Further, it should be clearly stated and implied from the settlement agreement that as a process of settlement the parties shall withdraw all litigation pending related to this dispute, willingly, without duress and after fully understanding the consequences.

The Settlement Agreement shall contain a statement to the effect that each of the persons signing thereto (i) is fully authorized by the respective Party he/ she represents, (ii) has fully understood the contents of the settlement agreement, (iii) is signing on the settlement agreement out of complete free will and consent, without any pressure, undue influence, and (iv) the settlement agreement shall be final and binding on and enforceable against the Party and the persons claiming under/ through him.

The procuring entity or the contractor, as the case may be, shall make payments within 30 days of the execution of the settlement agreement.

Step 5: If the contractor does not accept the offer: the ongoing litigation process may continue.

Other Provisions:

15. The status of dispute shall not change, in case appropriate court passes an award on the dispute after 30.04.2023 and before settlement under this scheme. The only exception to this provision will be the cases discussed in para 16 as below.

Illustration 3:

An arbitral award has been passed in a dispute on 15.02.2022 (a date prior to 31.01.2023). Further, the said award, as on 31.01.2023, is under consideration of the appropriate court, through an appeal or challenge. The court has given/ upheld the same award on 03.05.2023 (a date after 30.04.2023). Even in such cases, only 65% of the award as per Para 10(b) will be payable under the scheme.

16. Procuring entities should continue to closely monitor any court awards, in all cases where claim, under this scheme, has been already lodged by the contractor, even subsequent to 31.01.2023 till the date of issue of acknowledgement email, as specified in Step 3 of para 14, above. Some court awards could be passed between 31.01.2023 and 30.04.2023, in which case status of the case will be as per the court award only.

However, there could be some cases where court awards may be in favour of the procuring entity i.e. net payable amount to the contractor, under this scheme, may decrease, if the court award published after 30.04.2023 is taken into consideration. In all such cases procuring entities should immediately send revised offers to the contractor, as per the same procedure specified in Step 3 of para 14, above. The contractor shall be given 30 days to consider the revised offer (from the date of revised offer) made by the procuring entity. However, in no case, revised offer is to be sent by the procuring entity after issue of the acknowledgement email. In case acknowledgement email has been issued, settlement agreement shall only be in terms of the offer of the procuring entity

already accepted by the contractor and any court order issued subsequent to the date of acknowledgement email shall be ignored.

Illustration 4: (Only for the purpose of principal amount payable under this scheme. The calculation for interest shall apply separately.)

Case A
Net amount payable to contractor under this scheme based on status of case as on relevant cut-off date mentioned in para 6 is Rs. 1 cr. and procuring entity has not yet issued any offer to the contractor.
Amount payable as per the scheme on the basis of court award published on 30.05.2023 is Rs. 50 lakh
In such a case, procuring entity will make an offer of only Rs. 50 lakh to contractor.
Case B
Net amount payable to contractor under this scheme based on status of case as on relevant cut-off date mentioned in para 6 is Rs. 1 cr. and procuring entity has issued an offer to contractor of Rs. 1 cr. However, the contractor has not yet accepted the offer.
Amount payable as per the scheme on the basis of court award published on 30.05.2023 is Rs. 50 lakh
In such a case, procuring entity will modify the offer to Rs. 50 lakh to contractor.
Case C
Net amount payable to contractor under this scheme based on status of case as on relevant cut-off date mentioned in para 6 is Rs. 1 cr. and procuring entity has issued an offer to contractor of Rs. 1 cr. The contractor has accepted the offer resulting in automatic issue of the acknowledgement email by the portal.
Amount payable as per the scheme on the basis of court award published on 30.05.2023 is Rs. 50 lakh
In such a case, procuring entity will not make any changes in the settlement amount of Rs. 1 cr., which has been already agreed by the procuring entity as well as the contractor.

17. The date of commencement of the scheme shall be 15.07.2023 and claims can be submitted by 31.10.2023.

NHPC LIMITED FARIDABAD

18. In all cases where the claim amount is Rs. 500 crore or less, procuring entities will have to accept the claim, if the claim is in compliance with these guidelines.

19. Only in case the claim amount, by the contractor, under this scheme exceeds Rs 500 crore, the procuring entities will have an option not to accept the settlement request of the contractor. Wherever, it is decided by the procuring entities not to accept the claim of contractors, the same should normally be communicated to the contractor within 60 days of receipt of claim on portal (unlike two weeks for evaluation of the settlement amount under Step 3 of para 14 above).

Note: The contractor may, if he so desires, reduce the amount claimed, under this scheme, from the award amount while submitting his dispute for settlement on the portal under this scheme.

Illustration 5:

Net award amount payable to the contractor = Rs. 510 cr.

Claim amount lodged by the contractor under this scheme = Rs. 490 cr.

In such cases procuring entities will have to accept the same, as the claim amount is less than Rs. 500 cr., if the claim is otherwise in compliance with these guidelines and para 19 will not be applicable in such case.

20. However, wherever under paragraph 19, in respect of claims exceeding Rs. 500 crore, it is decided not to accept the request for settlement from the contractor, the reasons for the same shall be recorded on file by the procuring entities and approval of the Secretary concerned in case of Ministries/ Departments or Chief Executive Officer in case of CPSEs etc shall be obtained. The decision not to accept the request for settlement should not be taken in a routine manner but only when the case genuinely merits going for the appeal and there are high chances of winning in the court/ higher court. The decision should be based on success rate of appealing against court/ arbitration awards in the past. A special committee may be set up to review the case, before it is decided not to accept the request for settlement. The committee or other authority deciding on the matter shall clarify that it has considered both legal merits and the practical chances of success and after considering the cost of, and arising through, litigation/ appeal/ further litigation as the case may be, it is satisfied that such litigation/ appeal/ further litigation cost is likely to be financially beneficial compared to accepting the settlement. In this regard para 16 of the General Instructions on Procurement and Project Management, issued by DoE vide OM No. F.1/1/2021-PPD dated 29.10.2021 may be specifically referred.

21. In case settlement could not be achieved for any reason under this scheme, any offer, including reduction of claim amount, by any of the parties during the settlement process under this scheme, shall not be quoted in any further litigation.

22. It may be possible that a Public Authority may have used a procuring entity to make procurement on their behalf. For example, a University (public authority in this case) gets a project executed through Central Public Works Department (procuring entity in this case). In such a case:

NHPC LIMITED FARIDABAD

i. The procuring entity shall be the competent authority to accept the settlement under the scheme including the cases where the award amount is more than Rs. 500 cr (refer paras18 to 20 above)

ii. Budget for meeting the settlement agreement shall be provided by the public authority which got the project executed through procuring entity.

iii. The public authority and the procuring entity may also be the same in some cases.

23. It is clarified that the scheme does not apply to cases where parties, including the procuring entities, have already reached a settlement through conciliation agreement. However, in case conciliation process is underway even after such award, eligible for settlement under this scheme, either by the Arbitral Tribunal or the court, then such conciliation process should be kept in abeyance and the process provided in this scheme can be followed. In case no settlement is reached under this scheme, the conciliation, as prior to the scheme, can continue.

24. DoE may, from time to time, issue such directions or orders under the scheme, as it may deem fit, which may include giving clarifications or further directions/ instructions for implementation of the scheme and to remove difficulties arising in giving effect to the provisions of this scheme.

Tel.No. 2309 3811; email: kanwal.irss@gov.in

To

1. Secretaries of all Ministries/ Departments of Government of India for information and necessary action. They are also requested to inform these provisions to all procuring entities under their administrative control.
2. Secretary, Department of Public Enterprises with a request to reiterate these orders in respect to public enterprises.
3. Secretary, Department of Financial Services with a request to reiterate these orders in respect to public sector financial institutions.
4. Chief Secretaries/ Administrators of Union Territories without legislature.
5. CEO/ GeM.

Copy to: Chief Secretaries of all State Governments and Union Territories (UTs) with legislature with a request to consider adoption of this scheme in their States/ UTs for which GeM will make necessary arrangements, if requested.

NHPC LIMITED
FARIDABAD

Annexure

Settlement Agreement between (procuring entity) and Contractor under section 73(2) of the Arbitration and Conciliation Act, 1996.

This agreement is entered into this (date) day of (year) ("**Settlement Agreement**") between **(procuring entity)** (hereinafter referred to as "**PROCURING ENTITY**" which expression shall, unless, repugnant to the context or meaning thereof, include its legal successor, executors, permitted assignees) of the one part and

M/s.....having its registered office at.....hereinafter referred to as the "**CONTRACTOR**" which expression shall unless repugnant to the context or meaning thereof, include its legal successor, executors, permitted assignees) of the other part.

WHEREAS:

PROCURING ENTITY awarded a contract for.....(hereinafter referred as "Contract").

Dispute arose between PROCURING ENTITY and the CONTRACTOR in the above mentioned contract. The dispute has been considered by _____ Court/ Arbitral Tribunal and the award was issued vide _____ dated _____.Theaward directs as follows:

A. Amounts due from PROCURING ENTITY to CONTRACTOR
   i. (amount), (interest rate), (date of interest)
   ii.

B. Amounts due from CONTRACTOR to PROCURING ENTITY
   i. (amount), (interest rate), (date of interest)
   ii.

NOW THIS SETTLEMENT AGREEMENT WITNESSETH AS BELOW:

1. It is agreed between the parties to this Settlement Agreement that PROCURING ENTITY shall pay Rs...../-(Rupees in words.....) inclusive of taxes, if any to the CONTRACTOR as per full and final settlement of all the disputes mentioned hereinabove pertaining to the above mentioned contract.

   Thus total amount of Rs...../- will be payable by PROCURING ENTITY to the CONTRACTOR within one month from the date of execution of this Settlement Agreement by the Parties towards full and final settlement of the claims and disputes set out hereinabove in reference to the said contract.

2. That both parties hereby agree that all differences arisen out of the said dispute mentioned hereinabove now stand resolved and fully settled on payment of the sum stipulated in **para no. 1** above, and no dispute of any nature whatsoever shall survive. Accordingly, subject to aforesaid both PROCURING ENTITY and CONTRACTOR agree that they shall neither raise any dispute nor they shall initiate any proceedings, legal or otherwise against each other with reference to the aforesaid dispute.

3. That this Settlement Agreement shall continue perpetually and shall be binding upon the parties, their successors and assignees.

NHPC LIMITED FARIDABAD

4. The Settlement Agreement constitutes the entire agreement and supersedes all prior understandings and writings between PROCURING ENTITY and CONTRACTOR hereto concerning the disputes and/or subject matter of this Settlement Agreement.
5. PROCURING ENTITY and CONTRACTOR hereby agree that this Settlement Agreement shall have same status and effect as that of an Arbitral Award on agreed terms upon the substance of the dispute in accordance with Section 74 of the Arbitration and Conciliation Act, 1996 and shall be capable of execution as such.
6. PROCURING ENTITY and CONTRACTOR hereby agree and undertake that in terms of Section 75 of the Arbitration and Conciliation Act, 1996, they shall keep confidential all matters relating to the conciliation proceedings. They also agree that the confidentiality shall extend also to the Settlement Agreement, except where its disclosure is necessary for purposes of implementation and enforcement.
7. The two identical counterparts of the Settlement Agreement are hereby executed by and between PROCURING ENTITY and CONTRACTOR through their authorised signatories and with understanding that each shall be deemed original for all purposes.
8. The parties agree and understand that even though the dispute is finally settled the settlement agreement does not decide on any issue, either of law or of fact, under dispute. This is a settlement agreement under the one time dispute settlement scheme of the Government of India, without consideration of the factual or legal issues at stake.
9. The parties agree and understand that as a process of settlement the parties shall withdraw all litigations/ arbitral proceedings/ conciliation proceedings pending on the matters, willingly, without duress and after fully understanding the consequences.
10. Each of the persons signing this settlement agreement is fully authorized to do so, has fully understood the contents of the same and is signing on the same out of complete free will and consent, without any pressure and undue influence.

IN WITNESS WHEREOF, the parties here to have hereunto set their respective hands the day and year first above written.

Government e-Marketplace

Dear Sir/Madam,

An offer on the settlement request SR-4261698301770112 has been accepted by NHPC/CCW/0603/17 Agreement - Lot -TT-4/2001 of Teesta (Stage-V) H.E. Project on 20-04-2024.

This is a system generated acknowledgement email signifying that the parties listed below have reached to a settlement agreement in a dispute (Arbitration Award No. 02 May 2019 / Court Award No.: NULL) arising out of contract No. NHPC/CCW/0603/17 Agreement - Lot -TT-4/2001 of Teesta (Stage-V) H.E. Project dated 21/03/2021), in terms of the Vivad se Vishwas II (Contractual Disputes) scheme of the Government of India. The claim, under the said scheme, was lodged by Party 1 with the Settlement Request ID: SR-4261698301770112 dated 2023-10-26 on GeM / IRePS portal, against which Party 2 gave an offer for acceptance to Party 1 and which has been willingly accepted by Party 1.

Party 1: M/s Sanjeev Gupta Address Gautam Buddha nagar, UTTAR PRADESH, 201304 having PAN Number AABCB1562A which shall unless repugnant to the context or meaning thereof, include its legal successor, executors, permitted assignees.

Party 2: PROCURING ENTITY

This email is an acknowledgement of the fact that the terms of the settlement agreement have been willingly and finally accepted by both the parties. The dispute has ceased and the formal settlement agreement under section 73(2) of the Arbitration and Conciliation Act, 1996 shall be executed and implemented in due course as per scheme guidelines.

Dispute Details

Dispute Status	Court Order Passed - After Arbitration
Last Court Order pertains to which Court	Lower Court
Title of Dispute	1. Reimbursement of payment withheld on account of foreign Currency exchange rate variation 2. Recovery on account of non use couplers in for splicing of reinforcement bars of 32mm diameter and above 3. Analysed rate of deviated quantity of steel reinforcement (BOQ Item No. A 11.1)
Brief Description of Dispute	1. Reimbursement of payment withheld on account of foreign Currency exchange rate variation 2. Recovery on account of non use couplers in for splicing of reinforcement bars of 32mm diameter and above 3. Analysed rate of deviated quantity of steel reinforcement (BOQ Item No. A 11.1)

Arbitration Order date	29/10/2014
Court Order Date	25/01/2019
Court Order Number	CNR NO.HRGR01-01492-2015
Arbitration Order Number	29TH OCT.2014

Settlement Details

Amount Awarded (as per last order)	54274845
Interest Amount Awarded (as per last order)	57617581
Amount & Intetest (Awarded) Payable to:	Contractor
Applicable settlement rate % (as per scheme guidelines)	85
Applicable Interest rate % (as per scheme guidelines)	9
Applicable Amount for Settlement (as per scheme guidelines)	46133618.25
Applicable Interest Start Date:	29/10/2014
Amount Already Paid	0
Any amount paid by procuring entity against BG?	NO
Net Amount Claimed for Settlement (excluding interest, as per scheme g uidelines)	46133618
Net Amount Payable to	Contractor

विषय : CEA (Cyber Security in Power Sector) Guidelines, 2021.

CEA is mandated to prepare 'Guidelines on Cyber Security' in Power Sector under the provision of regulation (10) of the Central Electricity Authority (Technical Standards for Connectivity to the Grid) (Amendment) Regulations, 2019. Guidelines on Cyber Security in Power Sector incorporating the cardinal principles has been prepared by CEA. In compliance to the provision of the above regulation, **CEA (Cyber Security in Power Sector) Guidelines, 2021** are issued for compliance by all entities listed in the clause 2.3 (Applicability of the Guidelines) of the guidelines.

CEA (Cyber Security in Power Sector) Guidelines, 2021

1.0 Background

1.1 Cyber intrusion attempts and Cyber-attacks in any critical sector are carried out with a malicious intent. In Power Sector it's either to compromise the Power Supply System or to render the grid operation in-secure. Any such compromise, may result in mal-operations of equipments, equipment damages or even in a cascading grid brownout/blackout. The much hyped air gap myth between IT and OT Systems now stands shattered. The artificial air gap created by deploying firewalls between any IT and OT System can be jumped by any insider or an outsider through social engineering. Cyber-attacks are staged through tactics & techniques of Initial Access, Execution, Persistence, Privilege Escalation, Defence Evasion, Command and Control, Exfiltration. After gaining the entry inside the system through privilege escalation, the control of IT network and operations of OT systems can be taken over even remotely by any cyber adversary. The gain of sensitive operational data through such intrusions may help the Nation/State sponsored or non-sponsored adversaries and cyber attackers to design more sinister and advanced cyber-attacks.

1.2 Government of India has set up the Indian Computer Emergency Response Team (CERT-In) for Early Warning and Response to cyber security incidents and to have collaboration at National and International level for information sharing on mitigation of cyber threats. CERT-In regularly issues advisories on safeguarding computer systems and publishes Security Guidelines which are widely circulated for compliances. All Central Government Ministries/ Departments and State/Union Territory Governments have been advised to conduct cyber security audit of their entire Cyber Infrastructure including websites at regular interval through CERT-In empanelled Auditors so as to identify gaps and appropriate corrective actions to be taken in cyber security practices. CERT-In extends supports to enable Responsible Entity in conducting cyber security mock drills and in assessment of their preparation to withstand cyber-attacks. The Responsible Entity must submit Reports of Cyber Audit of cyber security controls, architecture, vulnerability management, network security and periodic cyber security drills to sectoral CERT as well as CERT-In. Team of experts shall review these reports and shortcomings if any in the compliances shall be flagged by them. CERT-In on regular basis also conducts workshops and training programs to enhance Cyber awareness of all Stakeholders.

1.3 Ministry of Power has created 6(six) sectoral CERTs namely Thermal, Hydro, Transmission, Grid Operation, RE and Distribution for ensuring cyber security in Indian Power Sector. Each Sectoral CERT has prepared their sub-sector specific model Cyber Crisis Management Plan(C-CMP) for countering cyber-attacks and cyber terrorism. Each Sectoral CERT has circulated their model C-CMPs for preparation and implementation of organization specific C-CMP by each of their Constituent Utility.

1.4 All Responsible Entities, Service Providers, Equipment Suppliers/Vendors and Consultants engaged in Power Sector are equally responsible for ensuring cyber security of the Indian Power Supply System. They are to act timely upon each threat intelligence.

NHPC LIMITED FARIDABAD

advisories and other inputs received from authenticated sources, for continuous improvement in their cyber security posture.

1.5 In the current Indian scenario though many cyber security directives and guidelines exists, but none of them are power sector specific. Ministry of Power has directed CEA to prepare Regulation on Cyber Security in Power Sector. And as an interim measures CEA has been directed to issue Guideline on Cyber Security in Power Sector, under the provision of Regulation 10 on Cyber Security in the "Central Electricity Authority (Technical Standards for Connectivity to the Grid) (Amendment) Regulations, 2019".

1.6 The Guidelines on Cyber Security, in the form of Articles written below, requires mandatory Compliance by all Responsible Entities. The Guidelines shall come into effect from the date of issue by Central Electricity Authority, New Delhi.

2.0 Hereby the Guidelines on Cyber Security are drawn in the form of Articles for compliance by the Requester as well as User under the following provision of Regulation 10 on Cyber Security, in the "Central Electricity Authority (Technical Standards for Connectivity to the Grid) (Amendment) Regulations, 2019".

"The requester and the user shall comply with cyber security guidelines issued by the Central Government, from time to time, and the technical standards for communication system in Power Sector laid down by the Authority."

2.1 **Objective of issuing Guideline**:

a) Creating cyber security awareness
b) Creating a secure cyber ecosystem,
c) Creating a cyber-assurance framework,
d) Strengthening the regulatory framework,
e) Creating mechanisms for security threat early warning, vulnerability management and response to security threats,
f) Securing remote operations and services,
g) Protection and resilience of critical information infrastructure,
h) Reducing cyber supply chain risks,
i) Encouraging use of open standards,
j) Promotion of research and development in cyber security,
k) Human resource development in the domain of Cyber Security,
l) Developing effective public private partnerships,
m) Information sharing and cooperation
n) Operationalization of the National Cyber Security Policy

2.2 Within the text of these Articles, '**Responsible Entity**' shall mean all:

a) Transmission Utilities as well as Transmission Licensees,
b) Load despatch centres (State, Regional and National),
c) Generation utilities (Hydro, Thermal, Nuclear, RE),
d) Distribution Utilities
e) Generation Aggregators,
f) Trading Exchanges,
g) Regional Power Committees, and
h) Regulatory Commissions.

NHPC LIMITED
FARIDABAD

2.3 **Applicability:**

All Responsible Entities as well as System Integrators, Equipment Manufacturers, Suppliers/Vendors, Service Providers, IT Hardware and Software OEMs engaged in the Indian Power Supply System.

2.4 **Scope:**

2.4.1 **Control Systems for System Operation and Operation Management.**

a) Grid Control and Management Systems,
b) Power Plant Control Systems,
c) Central Systems used to monitor and control of distributed generation and loads e.g. virtual power plants, storage management, central control rooms for hydroelectric plants, photovoltaic/wind power installations,
d) Systems for fault management and work force management,
e) Metering and measurement management systems,
f) Data archiving systems,
g) Parameterisation, configuration and programming systems,
h) Supporting systems required for operation of the above mentioned systems,

2.4.2 **Communication System.**

a) Routers switches and firewalls,
b) Communication technology-related network components,
c) Wireless digital systems.
d) Control Centre to Control Centre Communications for data exchange on ICCP. **(IEC 61850/60850-5/TASE.2/)**

2.4.3 **Secondary, Automation and Tele control technologies**

a) Control and Automation components,
b) Control and field devices,
c) Tele control devices,
d) Programmable logic controllers / Remote Terminal Units, including digital sensor and actuators elements,
e) Protection devices,
f) Safety components,
g) Digital measurement and metering installations,
h) Synchronisation devices,
i) Excitation Systems,

3.0 Definition of Terms:

1. **Access Management**: shall mean set of policies and procedures of the Responsible Entity for allowing Personnel, devices and IoT to securely perform a broad range of operational, maintenance, and asset management tasks either on site or remotely as laid down in Clause 5.2.5 of IS 16335.
2. **Accreditation:** shall mean the process of verifying that an organisation is capable of conducting the tests and assessments against a product/process that are required to be certified.

NHPC LIMITED FARIDABAD

3. **Accreditation Body:** shall mean an organisation that has been accredited to verify the credentials and capabilities of the organisations that wish to become a certification body.
4. **Act:** shall mean the Information Technology Act, 2000 (21 of 2000)
5. **Asset**: shall mean anything that has value to the organization.
6. **Certification:** shall mean the process of verifying that a product has been manufactured in conformance with a set of predefined standards and/or regulations by an organisation, that is accredited to conduct the certification process
7. **Certification Body:** shall mean an organisation that has been accredited by an accreditation body to certify products / process against a certification scheme.
8. **Certification Scheme:** shall mean the processes, paperwork, tools, and documentation that define how a product or manufacturer is certified
9. **Chief Information Security Officer:** shall means the designated employee of Senior management level directly reporting to Managing Director/Chief Executive Officer/Secretary of the Responsible Entity, having knowledge of Information Security and related issues, responsible for cyber security efforts and initiatives including planning, developing, maintaining, reviewing and implementation of Information Security Policies
10. **Critical Assets:** shall mean the facilities, systems and equipment which, if destroyed, degraded or otherwise declared unavailable, would affect the reliability or operability of the Power Supply System.
11. **Critical System:** shall mean cyber assets essential to the reliable operation of critical asset. Critical System consists of those cyber assets that have at least one of the following characteristics:
    a) The cyber asset uses a routable protocol to communicate outside the electronic security perimeter.
    b) The cyber asset uses a routable protocol within a control centre.
    c) The cyber asset is dial-up accessible.
12. **Critical Information Infrastructure:** shall mean Critical Information Infrastructure as defined in explanation of sub-section (1) of Section 70 of the Act.
13. **Cyber Assets**: shall mean the programmable electronic devices, including the hardware, software and data in those devices that are connected over a network, such as LAN, WAN and HAN.
14. **Cyber Crisis Management Plan:** shall mean a framework for dealing with cyber related incidents for a coordinated, multi-disciplinary and broad-based approach for rapid identification, information exchange, swift response and remedial actions to mitigate and recover from malicious cyber related incidents impacting critical processes.
15. **Cyber Security Breach**: shall mean any cyber incident or cyber security violation that results in unauthorized or illegitimate access or use by a person as well as an entity, of data, applications, services, networks and/or devices through bypass of the underlying cyber security protocols, policies and mechanisms resulting in the compromise of the confidentiality, integrity or availability of data/information maintained in a computer resource or cyber asset.
16. **Cyber Security Incident:** shall mean any real or suspected adverse cyber security event that violates, explicitly or implicitly, cyber security policy of Responsible Entity resulting in unauthorized access, denial of service or disruption, unauthorized use of computer resource for processing or storage of information or changes to data or information

NHPC LIMITED FARIDABAD

without authorization, leading to harm to the power grid or its critical sub-sectoral elements Generation, Transmission and Distribution.

17. **Cyber Security Policy:** shall mean documented set of business rules and processes for protecting information, computer resources, networks, devices, Industrial Control Systems and other OT resources.
18. **Electronic Security Perimeter:** shall mean the logical border surrounding a network to which the Cyber Systems of Power Supply System are connected using a routable protocol.
19. **Information Security Division:** shall mean a division accountable for cyber security and protection of the Critical System of the Responsible Entity.
20. **Protected System:** shall mean any computer, computer system or computer network of the Responsible Entity notified under section 70 of the Act, in the official gazette by appropriate Government.
21. **Security Architecture:** shall mean a framework and guidance to implement and operate a system using the appropriate security controls with the goal to maintain the system's quality attributes like confidentiality, integrity, availability, accountability and assurance.
22. **Vulnerability:** shall mean intrinsic properties of something resulting in susceptibility to a risk source that can lead to an event with a consequence
23. **Vulnerability Assessment:** shall mean a process of identifying and quantifying vulnerabilities

4.0 Standards

NHPC LIMITED
FARIDABAD

Article 1. Cyber Security Policy.

a. Cardinal Principles: The Responsible entity will strictly adhere to following cardinal principles while framing cyber security policy:

i. There is hard isolation of their OT Systems from any internet facing IT system.
ii. May keep only one of their IT systems with internet facing at any of their site/location if required which is isolated from all OT zones and kept in a separate room under the security and control of CISO.
iii. Downloading/Uploading of any data/information from their internet facing IT system is done only through an identifiable whitelisted device followed by scanning of both for any vulnerability/malware as per the SOP laid down and for all such activities digital logs are maintained and retained under the custody of CISO for at least 6 months. The log shall be readily to carry out the forensic analysis if asked by investigation agency.
iv. List of whitelisted IP addresses for each firewall is maintained by CISO and each firewall is configured for allowing communication with the whitelisted IP addresses only.
v. Communication between OT equipment/systems is done through the secure channel preferably of POWERTEL through the fibre optic cable. Security configuration of the communication channel is also to be ensured.
vi. All ICT based equipment/system deployed in infrastructure/system mandatorily CII are sourced from the list of the "Trusted Sources" as and when drawn by MoP/CEA.

b. The Responsible Entity shall be ISO/IEC 27001 certified (including sector specific controls as per ISO/IEC 27019).
c. The Responsible Entity shall have a Cyber Security Policy drawn upon the guidelines issued by NCIIPC.
d. The Responsible Entity shall ensure annual review of their Cyber Security Policy by subject matter expert and changes shall be made therein only after obtaining the due approval from Board of Directors.
e. The process of Access Management for all Cyber Assets owned or under control of the Responsible Entity shall be detailed in the Cyber Security Policy.
f. The Cyber Security Policy shall leverage state-of-art cyber security technologies and relevant processes at multiple layers to mitigate the cyber security risks.
g. The Responsible Entity shall be solely responsible to get Cyber Security Policy implemented through its Information Security Division (ISD).
h. The CISO shall record the reason(s) for exemption required, if any, in case, unable to comply with any of the provision(s) of the Cyber Security Policy. Any exception shall be allowed only after an approval of provisions of compensatory control(s) to mitigate residual cyber security risks.

NHPC LIMITED FARIDABAD

i. The CISO shall record the exemptions sought in statement of applicability controls, while getting the ISO 27001 certified. All exemptions and its justification need to be in conformance with Cyber Security Policy of the Responsible Entity.
j. The Responsible Entity shall allocate sufficient Annual budget for enhancing cyber security posture, enhanced year over year.
k. The Responsible Entity shall work in collaboration with other Industry Stakeholders as well as Academia to promote R&D activity in the domain of cyber security.
l. The Responsible Entity shall ensure that cyber security issues are taken up as agenda items in their Board meetings once in every three months.

Article 2 Appointment of CISO.

a) The Responsible Entity shall mandatorily appoint a CISO and shall confirm to qualification, if any, **laid** by Quality Council of India (QCI). In absence, the work of CISO shall be looked upon by Alternate CISO. In case qualification for appointment of Alternate CISO has been relaxed for reasons recorded thereof, Alternate CISO has to mandatorily acquire the minimum required cyber security skill sets within six months from the date of his appointment.
b) The Responsible Entity shall regularly update details of CISO and Alternate CISO, with the Sectoral CERT, as well as on ISAC-Power Portal.
c) Roles and Responsibility of CISOs shall be as laid by CERT-In and ring-fenced to ensure cyber security of the Cyber Assets of the Responsible Entity.

Article 3: Identification of Critical Information Infrastructure (CII).

a) The Responsible Entity shall submit to NCIIPC through Sectoral CERT, details of Cyber Assets which uses a routable protocol to communicate outside the Electronic Security Perimeter drawn by the Responsible Entity or a routable protocol within a control centre and dial-up accessible Cyber Assets, within 30 days from the date of their commissioning in the System.
b) The Responsible Entity shall submit details of Critical Business Processes and underlying information infrastructure along with mapped impact and Risk Profile to NCIIPC and shall get their CIIs identified in consultation with NCIIPC. The process of the notification/declaration by Appropriate Government shall follow thereafter.
c) The Responsible Entity shall review their declared/notified CIIs at least once a year to examine changes if any in the functional dependencies, protocols and technologies or upon any change in security architecture. The Responsible Entity shall review their declared/notified CIIs once in every 6 months, in case if NCIIPC has directed them to constitute an Information Security Steering Committee.
d) The Responsible Entity shall ensure that all cyber assets of their identified/notified CIIs are recorded in the asset register and considered for risk assessment as well as for finalization of controls in statement of applicability.

Article 4. Electronic Security Perimeter

a) The Responsible Entity shall identify and document the Electronic Security Perimeter(s) and all Access Points to the perimeter(s).

NHPC LIMITED FARIDABAD

b) The Responsible Entity shall follow procedure of identifying "Electronic Security Perimeter" in case of distributed and/or hybrid information infrastructure, as per IEC 62443 / IS16335 (as amended from time to time).
c) The Responsible Entity shall ensure that every Critical System resides within an Electronic Security Perimeter.
d) The Responsible Entity shall perform a cyber-Vulnerability Assessment of each electronic Access Points to the Electronic Security Perimeter(s) at least once in every 6 (six) months and/or after any change in Security Architecture.
e) The Responsible Entity shall ensure that all critical, high and medium vulnerabilities identified as a result of cyber Vulnerability Assessment shall be closed and verified for the effective closure.

Article 5. Cyber Security Requirements

a) The Responsible Entity shall have an Information Security Division (ISD), headed by CISO.
b) The Responsible Entity shall ensure that the ISD must be functional on 24x7x365 basis and is manned by sufficient numbers of Engineers having valid certificate of successful completion of course on cyber security of Power Sector from the Training Institutes designated by CEA.
c) The Responsible Entity shall ensure that ISD
   1) has on-boarded Cyber Swachhta Kendra(CSK) of CERT-In, if they have public IPs.
   2) has timely acted upon the advisories, guidelines and directive of NCIIPC, CSK, CERT-In and Sectoral CERTs,
   3) has deployed an Intrusion Detection System and Intrusion Prevention System capable of identifying behavioural anomaly in both IT as well as OT Systems.
   4) shares reports on incident response and targeted malware samples with CERT-In,
   5) updates the firmware/software with the digitally signed OEM validated patches only.
   6) enables only those ports and services that are required for normal operations. In case of any emergency the procedure as laid in Access management be followed.
   7) maintains firewall logs for the last 6 months duration. Firewall logs shall be analysed and all critical and high severity comments shall be addressed for effective closure.
   8) retains document of FAT, SAT test results and report/ certificate of cyber tests carried out for compliance of Government Orders and Cyber Security Audit.*
   9) maintains all cyber logs and cyber forensic records of any incident for at least** 90 days.

   * FAT, SAT must include comprehensive cyber security tests of the component/equipment/system to be delivered/delivered at site.
   ** 90 days from date of the commissioning of the system/recovery from any incident, whichever is later.

d) The Responsible Entity shall routinely audit and test security properties of the Critical System and must act upon, in case if any new vulnerabilities is identified through testing or by the equipment manufacturer.

NPSC LIMITED FARIDABAD

e) The Responsible Entity shall design a secure architecture for control system appropriate for their process control environment*.

f) All State Load Dispatch Centres(SLDCs) shall comply with the directions issued by the National Load Dispatch Centre(NLDC) as well as Regional Load Dispatch Centres(RLDCs) U/s 29 (1) of the Electricity Act, 2003 to ensure stability and cyber security of grid operation and achieve efficiency in the grid operation. In case of any non-compliance, the Head of SLDC shall be responsible and shall be liable for Penalty as per the provision of CERC/SERC.

*There are so many different types of systems in existence and so many possible solutions, it is important that the selection process ensures that the level of protection is commensurate with the business risk and the Responsible Entity shall not rely on one single security measure for its defence. *(Reference IEC/TR62351-10* Edition1.0 2012-10 *Power systems management and associated information exchange –Data and communications security – Part 10: Security architecture guidelines).*

Article 6 Cyber Risk Assessment and Mitigation Plan

a) The Responsible Entity shall document in their Cyber Security Policy a Cyber Risk Assessment and Mitigation Plans drawn upon the best practises being followed in the Power Sector, and the same shall be approved by Board of Directors.

b) The Cyber Risk Assessment and Mitigation Plans shall clearly define the matrix for assessing the cyber risk of both IT and OT environment and risk acceptance criteria.

c) The Cyber Risk Assessment Plan shall be capable to demonstrate that repeated cyber security risk assessment delivers consistent, valid and comparable results.

d) The review of cyber risk assessment shall be carried out at least once in a Quarter. The actionable of risk treatment and mitigation shall be tracked in this review for their effectiveness.

e) The CISO shall be responsible for implementation and regular review, on the basis of internal and external feedbacks, of the Cyber Risk Assessment and Mitigation Plans.

Article 7 Phasing out of Legacy System

a) As the life cycle of the Power System Equipment/System is longer than that of IT Systems deployed therein, the Responsible Entity shall ensure that all IT technologies in the Power System Equipment/System should have the ability to be upgraded.

b) The Responsible Entity shall ensure that the Information Security Division shall draw the list of all communicable equipments/systems nearing end life or are left without support from OEM. Thereafter CISO shall identify equipment/systems to be phased out from the list drawn, firm up their replacement plan and put up the replacement plan for approval before the Board of Directors.

c) The CISO shall ensure that till equipments/systems nearing end life or left without support from OEM are not replaced, their cyber security is hardened and ensured through additional controls provisioned in consultation with the OEM or alternate Supplier(s)*.

*e.g. Use of CDAC developed AppSamvid and whitelisting of applications installed may be explored across all legacy systems.

d) The Responsible Entity shall document in their Cyber Security Policy a Standard Operating Procedure for safe and secure disposal of outlived or legacy devices.

NHPC LIMITED FARIDABAD

Article 8. Cyber Security Training.

a) The Responsible Entity shall establish, document, implement, and maintain an annual cyber security training program for personnel having authorized cyber or authorized physical access (unescorted or escorted) to their Critical Systems.
b) The Responsible Entity shall review annually their cyber security training program and shall update it whenever necessary. Annual Review shall record evaluation of the effectiveness of the trainings held.
c) The Responsible Entity shall ensure that Cyber Security training program designed for their IT as well as OT O&M Personnel must include following topics and as per their functional requirements and security concerns additional topics shall be added:
   1) User authentication and authorization.
   2) Cyber Security and Protection mechanisms of IT/OT/ICS Systems.
   3) Introduction to various standards i.e. ISO/IEC:15408, ISO/IEC:24748-1, ISO: 27001, ISO: 27002, ISO 27019, IS 16335, IEC/ISO:62443.
   4) Training on implementation of ISO/IEC 27001 and awareness on IEC 62443.
   5) Vulnerability Assessment in the Critical System.
   6) Monitoring and preserving of electronic logs of access of Critical Assets.
   7) Detecting cyber-attacks on SCADA and ICS systems
   8) The handling of Critical System during cyber crisis.
   9) Action plans and procedures to recover or re-establish normal functioning of Critical Assets and access thereto following a Cyber Security Incident.
   10) Hands on SCADA operation at any of the Regional Load Dispatch Centre.
   11) Handling of risks involved in the procurement of COTS Products.

d) All Personnel engaged in O&M of IT & OT Systems shall mandatorily undergo courses on cyber security of Power Sector from any of the training institute designated by CEA, immediately within 90 days from the notification of CEA Guidelines on Cyber Security in Power Sector.
e) The Responsible Entity shall ensure that none of their newly hired or the current Personnel have access to the Critical System, prior to the satisfactory completion of cyber security training programme from the Training Institutes designated in India, except in specified circumstances such as cyber crisis or an emergency.
f) NPTI in consultation with CEA shall identify and design domain specific courses on Cyber Security for different target groups. The "Governing Board for PSO Training and Certification" shall approve the content, duration etc of these courses and shall review it Annually. NPTI shall conduct these courses at all of their branches on regular basis and shall maintain the list of the Participants successfully completing the course.

Article 9 Cyber Supply Chain Risk Management

a) The Responsible Entity shall ensure that, as and when Ministry of Power, Government of India notifies the Model Contractual Clauses on cyber security, these clauses are included in their every Bid invited for procurement of any ICT based components/equipments/System to be used for Power System.
b) The Responsible Entity shall ensure that all the Communicable Intelligent Equipments and the Service Level Agreements (SLAs) for their Critical Systems shall be sourced from the list of the "Trusted Sources" as and when drawn by MoP/CEA.

NHPC LIMITED FARIDABAD

c) The Responsible Entity shall ensure that, in case, for the any Communicable Intelligent Devices, if no Trusted Source has been identified, then the successful bidder in compliance with the provisions made in MoP order dated 2.7.2020 and any other relevant MoP order has got the product cyber tested for any kind of embedded malware/Trojan/cyber threat and for adherence to Indian Standards at the designated lab.

d) The Responsible Entity shall ensure that the essential cyber security tests are carried out successfully during FAT, SAT as detailed in **Annexure A.** The equipment/System besides for functionality shall also be tested in the factory for vulnerabilities, design flaws, parts being counterfeit or tainted, so as to minimize problems during on-site-testing and installation. Cyber Security Conformance Testing are to be carried out in the designated Lab as listed in **Annexure-I of MoP Order No. 12/13/2020-T&R dt. 8th June, 2021(Order at Annexure-B).**

e) The Responsible Entity shall ensure that the Equipment/System supplied by the successful bidder shall accompany with a certificate[$, #] obtained by OEM from a certification body accredited to assess devices and process for conformances to IEC 62443-4 standards during design and manufacture. The Responsible Entity shall accept the certificate submitted along with the supplied Equipment/System only if it's in line with the Testing Protocol as notified by Ministry of Power, Government of India, from time to time.

f) The Responsible Entity in compliance to the requirement of Article 9(e) shall also accept, till the setting up of an adequate certification facility in the India, a digitally signed self-declaration of conformance to the IEC 62443-4 standards during design and manufacture of the equipment/system, if submitted by the OEM.

g) The Responsible Entity shall dispose all unserviceable or obsolete Communicable Intelligent Devices as per the procedure laid in their Cyber Risk Assessment and Mitigation Plans which shall be in line with the prevailing best practices.

$ The National & International certification may be specified in the tender for critical systems/sub-systems being procured by the Responsible Entity.

Certification Schemes:
Embedded Device Security Assurance Certification is for an individual product,
System Security Assurance Certification is for a set of products in a system (possibly from different vendors)
Security Development Lifecycle Assurance Certification is for the development processes that a manufacturer uses for developing products.

Article 10 Cyber Security Incident Report and Response Plan

a) The CISO of the Responsible Entity shall report in the formats prescribed by CERT-In, all Cyber Security Incidents, classified as reportable events.

b) Root cause analysis for all reportable events shall be carried out and corrective action taken, so as to ensure that any re-occurrence of such event can be managed with ease.

c) The Responsible Entity shall mandatorily define in their Cyber Security Policy, criteria(s) identified on the basis of impact analysis, for declaring the occurrence of

NHPC LIMITED FARIDABAD

Cyber Security Incident(s) as a Cyber Crisis in the System owned or controlled by them.

d) The Responsible Entity shall mandatorily designate an Officer along with his/her standby by name and designation and empower them to declare an occurrence of the incident(s) as "Cyber Crisis". The contact details of these Officers shall be updated in the C-CMP within 15 days of changes if any due to transfer or superannuation etc.

e) The CISO shall ensure that during any Cyber Security Incident, ISD monitors and minutely records every details of cyber security events and incidents in both IT as well as the OT System owned or controlled by the Responsible Entity.

f) The CISO shall ensure that each cyber incident is handled strictly as per Cyber Security Incident Response Plan detailed in the latest C-CMP approved by the Board of Directors.

g) The Responsible Entity shall ensure that the efficacy of the Cyber Security Incident Response Plan is tested annually through mock drill(s) carried out, if feasible, as simulation exercise(s) or as table top exercise(s) with wider participation of their employees, in consultation with CERT-In and sectoral CERT. In case if any shortcoming is observed in the Cyber Security Incident Response Plan suitable changes shall be made in it.

h) The Responsible Entity shall ensure that the CISO compiles details of incident detection, incident handling, learnings from each incident and damage claims made if any and shall report to CERT-In as well as upload information on ISAC-Power Portal.

Article 11 Cyber Crisis Management Plan(C-CMP)

a) The Responsible Entity shall prepare a Cyber Crisis Management Plan and submit to their sectoral-CERT for review with intimation to Ministry of Power/CISO-MoP. Responsible Entity shall update their C-CMP on the basis of comments made by sectoral-CERT and then submit for vetting to CERT-In. The C-CMP shall be updated once again to include the observations made by CERT-In before seeking approval of Board of Directors for implementation of C-CMP.

b) The Responsible Entity shall ensure that the C-CMP is reviewed at least annually. The CISO shall ensure that all changes are made in C-CMP only with the due approval of Board of Directors and the changes made in C-CMP have been communicated through a verifiable means to all the concerned Personnel of the Responsible Entity.

c) The CISOs shall be the custodian of all the cyber security related documents including Cyber Crisis Management Plan, Risk Treatment Plan, Statement of Applicability of controls, and compliance to regulator's requirement.

d) The CISO shall be accountable for ensuring enforcement of C-CMP by Information Security Division of the Responsible Entity, during a cyber-crisis, as and when declared by the designated Officer. (refer Article 10(d))

Article 12: Sabotage Reporting%

a) The Responsible Entity shall incorporate procedure for identifying and reporting of sabotage in their Cyber Security Policy within 30 days from issue of the Guidelines, or grant of licence under the appropriate legal provisions to the Responsible Entity.

b) The CISO shall be held liable for non-reporting of identified sabotage(s) as per procedure laid for identifying and reporting of sabotage in the Cyber Security Policy of the Responsible Entity.

NHPC LIMITED FARIDABAD

c) The CISO shall prepare a detailed report on disturbances or unusual occurrences, identified, suspected or determined to be caused by sabotage in the Critical System of the Responsible Entity, and shall submit the report to the Sectoral CERT as well as to CERT-In within 24 hours of its occurrence.
d) The CISO shall submit to NCIIPC within 24 hours of occurrence the report on every sabotage classified as cyber incidents(s) on "Protected System".
e) The CISO upon occurrence on every sabotage shall take custody of all log records as well as digital forensic records of affected Cyber Assets, Intrusion Detection System, Intrusion Protection System, SIEM and shall preserve them for at least 90 days and shall make them available as and when called upon for investigation by the concerned Agencies.

%Disturbances or unusual occurrences, suspected or determined to be caused by sabotage.
Sabotage e.g. can be a forced intrusion in un-manned/manned facility and taking control of operation of Critical System through a communicating device.

Article 13 Security and Testing of Cyber Assets

a) The Responsible Entity shall ensure security of all in-service phase as well as standby Cyber Assets through regular firmware/Software updates and patching, Vulnerability management, Penetration testing (of combined installations), securing configuration, supplementing security controls. CISO shall maintain details of update version of each firmware and software and their certification if received from OEMs.
b) The Responsible Entity shall carry out regularly Vulnerability Assessment of all Cyber Assets owned or under their control. If a Cyber Asset is found vulnerable to any exploits or upon any patch updates or major configuration changes, then further Penetration Testing may be carried out offline or in a suitably configured laboratory test-bed to determine other vulnerabilities that may have not been identified so far.
c) The Responsible Entity shall specify security requirement and evaluation criteria during each phase of their procurement Process.
d) The Responsible Entity shall ensure that all Cyber Assets being procured shall conform to the type tests as mentioned in the specification for type testing listed in the bid document. Type test reports of tests conducted in NABL accredited Labs or internationally accredited labs (with in last 5 years from the date of bid opening) shall be mandated to be submitted along with bid. In case, the submitted Type Test reports are not as per specification, the re-tests shall be conducted without any cost implication to the Responsible Entity.
e) The Responsible Entity shall ensure that all Communicable devices are tested for communication protocol as per the ISO/IEC/IS standards listed in **MoP Order No. 12/13/2020-T&R dated 8th June, 2021(Annexure-B).**
f) The Responsible Entity shall ensure that all Critical Systems designed with Open Source Software are adequately cyber secured.
g) The Responsible Entity as a best practise upon any incidence of Cyber Security Breach shall carry out cyber security tests at any lab designated for cyber testing by Ministry of Power. These tests shall be similar to Pre Commissioning Security Test and those essential for carrying out Post Incident Forensics Analysis.

Article 14 Cyber Security Audit

NHPC LIMITED FARIDABAD

a) The Responsible Entity shall implement Information Security Management System (ISMS) covering all its Critical Systems.
b) The Responsible Entity shall through a CERT-In Empanelled Cyber Security OT Auditor shall get their IT as well as OT System audited at least once in every 6 (six) months and shall close all critical and high vulnerabilities within a period of one month and medium as well as low non-conformity before the next audit. Effective closure of all non-conformities shall be verified during the next audit.
c) The Cyber Security Audit shall be as per ISO/IEC 27001 along with sector specific standard ISO/IEC 27019, IS 16335 and other guidelines issued by appropriate Authority if any. These mentioned standards shall be current with all amendments if any and in case if any standard is superseded, the new standard shall be applicable. CISO shall ensure immediate closure of non-conformance, based on the criticality and by means all non-conformances are to be closed before the next audit.
d) The Responsible Entity shall ensure that CISO has all the required systems and documents in place, as mandated by NSCS for base line cyber security audit.

NHPC LIMITED
FARIDABAD

FAT & SAT

1. During FAT stage, the customer has to verify all types test reports / certificates including Communication protocol and security conformance tests of the devices offered for FAT.
2. FAT of SCADA involves testing as a whole system in the integrated scale down set up. For SCADA, Indian standard IS 15953: 2011 "SCADA System for Power System Applications" provides definition and guidelines for the specification, performance analysis and application of SCADA systems for use in electrical utilities (for transmission & Distribution) including guidance on Tests and inspections.
3. The SAT will be done at customer site as per the SAT document mutually agreed by buyer and supplier. For SAT also, guidance from IS 15953: 2011need to be applied.
4. IEC 61850-10-3 Communication Networks and Systems For Power Utility Automation-Functional testing of IEC 61850 systems (in draft stage - CDTR) covers testing of applications within substations covering

    a. A methodical approach to the verification and validation of a substation solution
    b. The use of IEC 61850 resources for testing in Edition 2.1
    c. Recommended testing practices for different use cases
    d. Definition of the process for testing of IEC 61850 based devices and systems using communications instead of hard wired system interfaces (ex. GOOSE and SV instead of hardwired interfaces)
    e. Use cases related to protection and control functions verification and testing.

    This standard may be used as a guidelines for FAT & SAT for Substation Automation System (SAS) based on IEC 61850.

NHPC LIMITED FARIDABAD

Annexure - B

Annexure – 1

List of designated laboratories for cyber security conformance testing

Table -A. Field Equipment /Operational Technology (OT)

Sl. No.	Equipment	Communication Protocol Conformance Standards	Protocol Security Conformance Standards	Designated Laboratories
1	Remote Terminal Units (RTUs) & PLCs with IEC communications protocols	IEC 60870-5 -101 / IEC 60870-5 -104 (Test Details Annexure 2)	IEC 60870-5- 7 Security extension & IEC 62351 series (specifically IEC 62351-100 parts 1 & 3) (Test Details Annexure-2	Central Power Research Institute (CPRI), Prof Sir C V Raman Road, Sadashivanagar P O, Bengaluru – 560080, Karnataka
2	Intelligent Electronic Equipment / Numerical Protection Relays / Bay Control Units / Bay Protection Units, Gateways, Transformer Tap controller/ changer, etc. with IEC 61850 communication protocol	IEC 61850 – 5 to IEC 61850 – 10 (Test Details Annexure 2)		CPRI
3	Smart meters with IEC 62056 communication protocols	IEC 62056 series / DLMS & IS 15959 series and IS 16444 series (Test details Annexure 2)	IEC 62056 series / DLMS & IS 15959 series and IS 16444 series (Test Details Annexure 2)	1. CPRI 2. Electrical Research and Development Association (ERDA), ERDA Road, GIDC, Makarpura, Vadodara - 390 010 Gujarat 3. Yadav Measurements Pvt. Ltd. (YMPL) 373-375, RIICO Bhamashah Industrial Area Kaladwas 313003 Udaipur – Rajasthan

NHPC LIMITED FARIDABAD

Information Technology (IT) Equipment (Main / Backup / Disaster recovery (DR) Control Centre / Substation control centre IT equipment)

All IT products procured /supplied shall have a valid Certificate of Common Criteria as per ISO/IEC 15408 issued by signatories of the Common Criteria Recognition Agreement (CCRA) (www.commoncriteriaportal.org).

Import/procurement/supplied from vendors sourcing from prior reference countries, the Certificate for Common Criteria shall be from Government Laboratories in India according to the IC3S scheme operated by Ministry of Electronics and Information Technology, which is a signatory to CCRA.

https://www.commoncriteria-india.gov.in/

NHPC LIMITED
FARIDABAD

Details of tests for various identified products

Remote Terminal Units (RTUs) (Sl. No. 1 of Table – A of Annexure – 1)

Test protocol:

Utilities / manufacturers will submit the sample along with all the required technical documentation for taking up testing to the designated laboratory.

Reference standards

1) IEC 60870-5-101 & IEC 60870-5-104 as applicable

2) IEC 60870-5-7 Telecontrol equipment and systems - Part 5-7: Transmission protocols - Security extensions to IEC 60870-5-101 and IEC 60870-5-104 protocols (applying IEC 62351)

3) IEC 62351-100-1 & IEC 62351-100-3 and other cross referenced standards.

Test cases

Extract from standard (IEC 62351-100-1)

The conformance test cases are divided into four clauses:

- Clause 5: Verification of configuration parameters. This clause contains the configuration parameters affecting the message contents and/or the protocol behaviour.
- Clause 6: Verification of communication. The goal of this clause is to verify that Device Under Test (DUT) is able to implement the security extension messages as described in IEC TS 60870-5-7.
- Clause 7: Verification of procedures. The goal of this clause is to verify that DUT is able to execute the security extension procedures as described in IEC TS 62351-5.
- Clause 8: Test result chart. This clause contains the results of the test cases listed in Clauses 6 and 7 for each supported value of the configuration parameters listed in Clause 5.

The test cases are organized in tables. They are numbered; their numbering syntax is: Subclause number (where the Table is located) + test case number.

In the column 'reference' each test case has a direct reference to IEC TS 62351-5 or IEC TS 60870-5-7 where the clause under test is defined.

Test cases are mandatory depending on the description in the column 'Required'. The following situations are possible:

M= Mandatory test case. The test is referencing a clause that is mandatory in IEC TS 62351-5 or IEC TS 60870-5-7.

Protocol Information Conformance Statement (PICS) x, x = Mandatory test case if the functionality is enabled in the PICS (by marking the applicable check box), with a reference to the section number of the PICS (x.x).

NHPC LIMITED FARIDABAD

Conformance testing of security extension procedures

The security extension procedures can be summarized as follows:

- User management
- Update key maintenance
- Session key maintenance
- Challenge/Reply authentication
- Aggressive Mode authentication

Extract from standard (IEC 62351-100-3)

IEC 62351-3 defines the requirements related to the authentication/encryption protocol, procedures and methods to be implemented at TCP/IP (transport) level.

The conformance test cases are divided into three clauses:

- Clause 5: Verification of configuration parameters. This clause contains the parameters specified by the standards referencing IEC 62351-3 (see IEC 62351-3:2014/AMD1:2018, Clause 7) and affecting the protocol behaviour.
- Clause 6: Verification of IEC 62351-3 requirements. The goal of this clause is to verify that DUT is conformant to the requirements of the IEC 62351-3.
- Clause 7: Test result chart. This clause contains the results of the test cases listed in Clause 6 for each supported value of the configuration parameters listed in Clause 5.

The test cases are organized in tables. They are numbered, their numbering syntax is: Subclause number (where the table is located) + test case number.

In the column 'Reference' each test case has a direct reference to IEC 62351-3 where the clause under test is defined. PICS or Protocol Implementation eXtra Information for Testing (PIXIT) could be found in the "Reference" column for some test cases whenever the execution of the test case shall take into account specific parameter values declared in the PICS or PIXIT of the DUT.

Test cases are mandatory depending on the description in the column 'Required'. The following situations are possible:

M = Mandatory test case. The test is referencing to a clause that is mandatory in IEC 62351-3.

PICS

or

PIXIT = Mandatory test case if the functionality is enabled in the PICS or PIXIT by marking the applicable check box or declaring the applicable value.

NHPC LIMITED FARIDABAD

Intelligent Electronic Devices (IEDs) (Sl. No. 2 of Table – A of Annexure – 1)

Utilities / manufacturers will submit the sample along with all the required technical documentation for taking up testing to the designated laboratory.

Reference standards

IEC 61850 series

Specifically IEC 61850-5, IEC 61850-6, IEC 61850-7, IEC 61850-8, IEC 61850-9 and IEC 61850-10

Test cases

Communication protocol conformance as per IEC 61850 -10. This part of standard defines methods and abstract test cases for conformance testing of client, server and sampled values devices used in power utility automation systems, the methods and abstract test cases for conformance testing of engineering tools used in power utility automation systems, and the metrics to be measured within devices according to the requirements defined in IEC 61850-5. Further this part of standard specifies standard techniques for testing of conformance of client, server and sampled value devices and engineering tools, as well as specific measurement techniques to be applied when declaring performance parameters. The use of these techniques will enhance the ability of the system integrator to integrate IEDs easily, operate IEDs correctly, and support the applications as intended.

Smart Meters (Sl. No. 3 of Table – A of Annexure – 1)

Utilities / manufacturers will submit the sample along with all the required technical documentation for taking up testing to the designated laboratory.

IEC 62056 series of standards (Electricity metering data exchange – The DLMS/COSEM suite) specifies details of communication protocol requirements, conformance testing and security requirements. The Part 5-3 (DLMS/COSEM application layer) specifies the DLMS/COSEM application layer in terms of structure, services and protocols for DLMS/COSEM clients and servers, and defines rules to specify the DLMS/COSEM communication profiles. It defines services for establishing and releasing application associations, and data communication services for accessing the methods and attributes of COSEM interface objects, defined in IEC 62056-6-2 using either logical name (LN) or short name (SN) referencing.

Clause 5 and sub clauses specifies security requirements. It cover security concepts, Identification and authentication, Cryptographic algorithms, Cryptographic keys – overview, Key used with symmetric key algorithms, Keys used with public key algorithms and Applying cryptographic protection.

Note: All above referred standards shall be latest with amendments if any at the time of submission of sample(s) for testing.

NHPC LIMITED
FARIDABAD

Annexure – 3

Testing Criteria

1) Supply from Trusted Sources

The sample size shall be as specified by CEA as per the approved criteria for Trusted Vendors

2) Supply from other than trusted vendors

The sample size shall be shall be 5% of the supply lot / ordered quantity (minimum one). The manufacturer shall submit request to the Nodal agency along with vendor's / manufacturer's certifications for supply chain management system practices and secure product development process implementations based on any one or more of standards ISO / IEC 27036, ISO / IEC 20243, IEC 62443 for verification.

After scrutiny of vendor's / manufacturer's certifications the supplier / utilities shall be asked to submit product to the designated laboratory for communication and cyber security conformance testing.

The supply lot shall stand rejected on failure to comply with the test requirements.

3) Supply from prior reference countries

The utility shall obtain prior permission from the Government of India for importing the product / system from prior reference countries.

The sample size shall be shall be 10 % of the supply lot / ordered quantity (minimum one). The manufacturer shall submit request to the Nodal agency along with vendor's / manufacturer's certifications for supply chain management system practices and secure product development process implementations based on any one or more of standards ISO / IEC 27036, ISO / IEC 20243, IEC 62443 for verification.

After scrutiny of vendor's / manufacturer's certifications the supplier / utilities shall be asked to submit product to the designated Government / Government controlled Autonomous laboratory for type tests (Annexure – 4) and communication & cyber security conformance testing.

The supply lot shall stand rejected on failure to comply with the test requirements.

NHPC LIMITED
FARIDABAD

Type Tests

Products imported from prior reference countries shall also undergo type testing as per following standards in addition to communication protocol and security conformance testing at the designated Government / Government controlled Autonomous laboratory:

Type test standards for RTUs

1. IEC 60870-1-2:1989 Telecontrol equipment and systems. Part 1: General considerations. Section Two: Guide for specifications.
2. IEC 60870-2-1:1995 Telecontrol equipment and systems - Part 2: Operating conditions - Section 1: Power supply and electromagnetic compatibility.
3. EC 60870-2-2:1996 Telecontrol equipment and systems - Part 2: Operating conditions -Section 2: Environmental conditions (climatic, mechanical and other non-electrical influences).
4. IEC 60870-3:1989 Telecontrol equipment and systems. Part 3: Interfaces (electrical characteristics)

Type test standard for IEDs / Numerical Protection Relays / Bay controls units

1. IEC 61850-3: 2013, Ed. 2 Communication networks and systems for power utility automation – Part 3: General requirements.

Type test standards for Smart meters

1. IS 16444: 2015 AC static direct connected watthour smart meter class 1 and 2 – Specification.
2. IS 16444 Part 2: 2017 AC static transformer operated watthour and var - Hour smart meters, class 0.2 S, 0.5 S and 1.0 S: Part 2 specification transformer operated smart meters.

Note:

1. All above referred standards shall be latest with amendments if any at the time of submission of sample(s) for testing.
2. Type tests generally covers functionality, environmental, mechanical, EMI/ EMC and electrical safety related tests.

Ref: NHPC Office Order no. NH/DD/DD-II/Dam Safety/DSRP/2019/2286 dated 21.01.2019

Sir,

Please find enclosed, herewith, the Dam Safety Review Panel Report on Teesta-V Dam for your kind perusal and necessary action.

I, on behalf of DSRP, convey thanks to NHPC Officers at Headquarters, Power Station and yourself for making the visit to Teesta-V Power Station comfortable and useful and also providing necessary help in preparation of this report.

Regards,
Yours sincerely

29/3/2019

REPORT OF DAM SAFETY REVIEW PANEL ON TEESTA-V DAM

1.0 INTRODUCTION

1.1 As per the "**Guidelines for Safety Inspection of Dams** " published by CWC in January 2018 and previous minutes of NCDS meetings, all dam owning bodies/agencies should conduct the Comprehensive Safety Review of large dams, which are more than 15 meter in height or which store 60 Mm^3 or more water by an independent panel of experts i.e. "**Dam Safety Review Panel**" once in 10 years and submit the report to Dam Safety Organization.

1.2 Teesta-V dam was commissioned in March 2008 and has a height of 88.60 m above deepest foundation level and it has completed more than 10 years of its operation and requires a comprehensive dam safety inspection. Accordingly, NHPC Ltd, constituted a Dam Safety Review Panel (DSRP) for Teesta-V dam consisting following dam experts for 10 years comprehensive dam safety review:

1. **Dr. B.K. Mittal, Former Chairman, CWC**
2. **Shri Rajan Nair, Former Chairman, Brahmaputra Board**
3. **Shri Y.K.Handa, Former Chief Engineer, CWC**
4. **Shri V.K.Maini, CGM, D&E Division, NHPC Ltd.**
5. **Shri A. K. Jain, GM (Civil), D&E Division, NHPC Ltd.**
6. **Shri R.C. Sharma,GM (Geo.), EG&Geotech Division, NHPC Ltd.**

1.3 The first three members of the panel were nominated by NHPC Ltd vide their letter no. NH/DD/D-11/Dam Safety/DSRP/2019/2286 dated 21.01.2019. The copy of the letter of NHPC along with all enclosures is appended at **Annexure – I.**

1.4 Later, three members of panel were nominated by NHPC Ltd vide their letter no NH/DD/ED(D&E)/DSRP/2019/171 dated 28.01.2019. The copy of the NHPC letter is appended at **Annexure -2.**

1.5 The DSRP had a preliminary meeting with Design Engineers, Hydrologist and Geologists at NHPC Office Complex, Faridabad on

NHPC LIMITED FARIDABAD

26.02.2019. The concerned engineers gave a brief background of the project and its performance since its commissioning. The list of officers, who participated in the introductory meeting, is appended at **Annex.-3.**

1.6 The DSRP inspected the Teesta–V dam and its appurtenant structures along with the engineers of design office at NHPC Headquarter, Faridabad and Project officers between 27th February 2019 and 2nd March 2019. The list of officers and engineers who participated during DSRP inspection of Teesta–V dam is appended at **Annexure -4.**

1.7 During the period from 27th March to 29th March 2019, the DSRP held further discussions with concerned engineers, hydrologist and geologists from NHPC Design office at Faridabad and prepared the Dam Safety Panel Report on Teesta–V dam and submitted to the Competent Authority of NHPC Ltd. The list of NHPC officers who participated in the aforesaid meeting is appended at **Annexure -5.**

1.8 During the preliminary meeting and site inspection of the dam, additional data and information were collected about the performance of the dam during its operation.

2.0 GENERAL LAYOUT OF TEESTA –V POWER STATION

2.1 Teesta-V Hydro Electric Project, now referred as Teesta -V Power Station, is situated in East Sikkim district of Sikkim State of India and it was commissioned in March 2008. The power station is constructed to harness power potential of river Teesta in cascade development scheme. The installed capacity of the Power Station is 510 MW (3 x 170 MW) designed to generate 2573 MUs of power annually.

2.2 The Teesta–V dam is a Concrete Gravity dam. Its height from the deepest foundation level and above river bed level is 88.60 m and 51.20 m respectively. Its top level is at EL 583.20m. The FRL and MDDL are fixed at EL 579.00m and EL 568.00m. The total length of the dam at top is 176.50m. The dam consists of 11 blocks. The dam has orifice type of spillway consisting of 5 blocks in the middle of river. It has two non- overflow blocks on the right bank and four non

NHPC LIMITED FARIDABAD

overflow blocks on left bank. The dam has gross storage capacity of 8.7 MCM at FRL at EL 579.00m with a live storage of 5.3 MCM as per post monsoon survey 2017. For energy dissipation, a flip bucket and plunge pool on the d/s has been provided.

2.3 The major components of the project are given below:

1. 88.6 m high and 176.50 m long Concrete gravity dam
2. Orifice type of spillway consisting of 5 bays of 9.0 m width each
3. 2 Diversion tunnels of horse shoe of 12.2 m dia. each
4. Power intake structure located at 52.0 m away from dam axis consisting 3 numbers of intakes of size 6.5 m X 6.5 m along with 3 numbers of underground de-silting basins, 250 m long, 19.7 m wide and 24.5 m deep each along with silt flushing tunnels.
5. 9.5 m dia. horse shoe shape and 17.1 km long Head Race Tunnel
6. Restricted orifice type semi underground surge tank of 30 m dia and 92.5 m high at the end of HRT
7. 3 numbers of pressure shafts of 4.7 m dia.
8. A Powerhouse of 118.5 m (L) X 23.0 m (W) X 47.5 m (H) housing three turbines of installed capacity of 170 MW each.
9. Tailrace tunnel of 6.0 m dia., D– shaped having length of 165m, 175 m and 185 m each.

3.0 SALIENT FEATURES OF TEESTA-V DAM AND OTHER STRUCTURE

The followings are the salient features of Teesta-V dam and its appurtenant structure:

LOCATION

• State	Sikkim
• District	East Sikkim

HYDROLOGY

• Total catchment area	4307km^2
• Rained catchment	2020 km^2
• Area above permanent Snow level (EL4573m)	2287 km^2

NHPC LIMITED FARIDABAD

- Design flood (original) — 9500 m^3/s
- Revised design flood (2011) — 14596 m^3/s (PMF)
- River diversion design flood — 3251 m^3/s (1 in 25 year flood)

Reservoir

- Maximum reservoir level (MRL) — EL580.72m
- Full reservoir level (FRL) — EL 579.00m
- Minimum draw down level (MDDL) — EL568.00m
- Gross storage (original) — 13.52 MCM
- Gross storage (Post monsoon, 2017) — 8.70 MCM
- Live storage (original) — 6.28 MCM
- Live storage (Post monsoon, 2017) — 5.3 MCM
- Dead storage (original) — 7.24 MCM
- Dead storage (Post monsoon, 2017) — 3.4 MCM

Concrete Dam

- Maximum height above river bed — 51.20m
- Maximum height from deepest foundation level — 88.60m
- Dam top Elevation — EL583.20m
- Length of dam at top — 176.50m

Spillway

- Design flood (original) — 9500 m^3/s
- Revised design flood (2011) — 14596 m^3/s
- Crest Elevation — EL540.00m
- No. of sluice spillway bays and size — Five (each 9m wide and 12.00m high)
- Maximum Tail pool level (at PMF) — EL 548.60m

Diversion Tunnels

- Number and shape — 2 nos, Horse shoe shaped
- Diameter (finished) — 12.2m
- Length — 473 m and 610 m

NHPC LIMITED FARIDABAD

Intake Structure

- Number and size of intakes — 3nos, 6.5m x 6.5m
- Design Discharge — 350.84 m^3/s
- Invert level — EL 554.00/556.00m

De-silting chamber

- Type — Dufour shaped
- Length and — 250m
- Number & size — 3, 19.7m x 24.5m
- Minimum particle size to be removed — 90% of 0.2mm size

Head Race Tunnel (HRT)

- Shape — Horse Shoe shape
- Diameter (Finished) — 9.5m
- Length — 17.1 km
- Design discharge — 292.37 m^3/s
- No. of adits/gated adits — 5 nos./ 4 nos.

4.0 HYDROLOGY

4.1 Description of drainage basin

Teesta –V station is run-of-the river type of project. The water of Teesta river are being diverted at Dikchu which is 2km downstream from the confluence of river Dikchu with river Teesta.

The river Teesta is one of the main Himalayan river originating from the glaciers of Northern Sikkim at an elevation at EL 8500.00m. The river is flowing generally in southern direction draining out the entire state before entering west Bengal at Sevoke near Siliguri town.

The catchment area of Teesta-V dam lies between latitude 27^0 20'N to 28^0 07'N and longitude 88^0 0'E and 88^0 53^0 E. The dam site lies at about latitude 27^0 14' 30" N and longitude 88^0 29'E. The catchment area upto Teesta-V dam site is 4307km^2. The catchment area above the permanent snowline at about EL 4573.00m is 2287 km^2 and the rainfed catchment area is 2020 km^2. The catchment area is studded with 22 numbers of small and big glaciers.

NHPC LIMITED FARIDABAD

The maximum and minimum temperature varies from 37^0 C in summer to 8^0 C and relative humidity varies from 40% to 100%. The average annual rainfall at Dikchu on the basis of available data is 2544mm.

The catchment area plan upto Teesta-V dam has been appended at Fig.1.

4.2 Water availability

The approved water availability series at Teesta-V Dam site has been developed for the period 1984-1996 on the basis of observed discharges at Dikchu. The average annual run off as per approved water availability is 7554 MCM.

4.3 Design flood

In the DPR prepared by NHPC, a PMF of 9500 m^3/s was estimated as a design flood which was approved by CWC.

Later in the year 2011, a comprehensive hydrological study of Teesta basin (Sikkim) was carried out by CWC to review design flood studies for all hydropower schemes on Teesta river upto Teesta-VI barrage. Design flood estimation was done using distributed hydrological model. The entire catchment of Teesta river upto Teesta-VI barrage site had been divided into eight sub catchments. Design flood 14596 m^3/s (PMF) was estimated at Teesta-V Dam site and the revised value of 14596 m^3/s was conveyed by CWC.

The annual flood peaks at Teesta-V dam are recorded for last 20 years. The maximum value of the flood was recorded in 2002 having a value of 3397m^3/s.

4.4 Reservoir

FRL and MDDL of the Teesta-V Dam reservoir are at EL 579.00m and EL 568.00m respectively. As per DPR, the gross and live storage capacity of the Teesta-V Dam reservoir were 13.52 MCM and 6.28 MCM. The dead storage capacity estimated at DPR stage was 7.24 MCM.

NHPC LIMITED FARIDABAD

As per post monsoon 2017 reservoir survey, the gross storage capacity is 8.7 MCM whereas the live and dead storage are 5.3 MCM and 3.4 MCM respectively. The surface area of the Teesta-V reservoir at FRL is 61.53 Ha.

The Teesta-V dam reservoir has been silted upto the crest level of the spillway. The reservoir has lost 35.65% gross storage capacity and 15.6% live storage capacity.

4.5 Reservoir operation and silt flushing

The Teesta-V dam reservoir is being operated as per "Rule curve" developed for the reservoir. The flushing of the reservoir is carried between first June and 30th September depending on the quantity of inflow into the reservoir in each month.

5.0 GEOLOGY

5.1 Geology of the project area

The Project area has low grade metasedimentry rocks belonging to Gorubathan formation, Daling group of lesser Himalaya. The Gorubathang formation comprises of metasedimentaries viz green slate, phyllite, chloritic quartzite, green feldspathic wacke, and basic metavolcanics and green beds.

In the vicinity of dam site phyllitic quartzite with intermittent quartzitic phyllite bands are exposed. Bedrock in the riverbed was encountered under ±42m thick pile of riverine material towards the left bank. The headrace tunnel has been excavated through a folded sequence of inter-banded quartzite, quartzitic phyllite and chlorite schist. Folding of three generations was identified along the Headrace tunnel. The power house and surge shaft area are also located in the quartzite phyllite and phyllitic quartzite with bands of phyllite type rocks.

5.2 Geology of the dam area

The dam site is located about 2km downstream of the confluence of Teesta river with Dikchu Nala. The rocks exposed at dam site are quartzitic phyllite, phyllitic quartzite with bands of phyllite belong to Daling group. Intrusion of igneous rock (syenite) has also been recorded at dam site. At dam axis, the right bank

NHPC LIMITED FARIDABAD

was defined by steep rocky escarpment exhibiting steep slope where as on the left bank major portion was covered with slope wash material comprising of big boulders of various size and clayey materials with scanty outcrops. River bed portion was occupied by thick pile (±40 m) of alluvium deposits towards left bank.

5.3 Problems encountered during construction

5.3.1 Sliding from left bank

The major portion of left bank at and downstream of dam axis was covered with slope wash material with scanty outcrop of quartzitic phyllite and phyllitic quartzite rocks. The portion of left bank between the dam axis and downstream of axis was destabilized during abutment stripping and foundation excavation especially towards left bank during year 2003-04 and slides developed at number of places on left bank from dam axis to 120m downstream of dam axis. The area was stabilized by providing suitable support measures like protection walls, micro piling and grouting, bamboo piling, geo textile and belley benching etc. Apart from that, catch drains on the periphery of slide area and longitudinal drains within slide area were also constructed for arresting the surface water.

5.3.2 Shear Zone at Dam foundation

In the dam foundation, parent rocks were intruded by igneous intrusive (syenite) in part of spillway blocks S3, S4 and S5. The intrusion had caused warping in foliation of rock mass, development of shearing and crushing along contact with parent rocks. Apart from igneous intrusion, a thick sheared and crushed zone (about 18m thickness at dam axis) has been encountered into the bedrock. The shear zone trending along the river direction with average orientation of $320^0/70^0$ and occupying a major area of spillway block S3.

In the foundation of S4 & S5 blocks, weak features like sheared & weathered contact of igneous intrusive body (Syenite) with parent meta sedimentary rock were encountered. Further, foundation conditions in spillway blocks S1 and S2 comprised comparatively of medium strong to strong rock mass and devoid of shear zone were encountered.

NHPC LIMITED FARIDABAD

In order to achieve adequate competency of the foundation, the loose and weak, weathered portion of the bed rock was removed. This was achieved without the use of blasting material in order to avoid further damage to the adjoining rock mass.

The treatment of shear zone in S2 and S3 blocks was carried out by providing three shear keys across shear zone at RD 0-5 m, 30-35 m and 80-84 m and these were extended to the competent rock mass. In addition, installation of 6m long anchors , laying a raft all along shear zone, consolidation grouting, construction of inspection gallery along S3 block were also provided as a part of shear treatment.

Instrumentation monitoring was also carried out in S2 and S3 spillway blocks to monitor the behavior of foundation.

Apart from this shear zone, numbers of interfolial and other shear seams recorded in spillway blocks S3, S4 and S5 were treated by providing reinforcement in trenches and filled with concrete before placement of block concrete.

5.3.3 Consolidation grouting

Consolidation grouting was carried out in dam foundation area for filling of the joints and to increase rock mass properties. The depth of consolidation grouting was kept 10m in S2 and S3 blocks while 5m in other blocks. Grouting was carried out in primary, secondary and tertiary sequence. The spacing of primary and secondary holes was kept at 6m c/c in both directions in staggered manner. Grouting was done from deepest foundation to higher level in both sides. A minimum 2m thick concrete was laid on foundation rock before start of grouting.

5.3.4 Curtain grouting

Curtain grouting, to have credible seepage barrier, was provided in upstream near heal of the Dam for increasing path for reduction of seepage water from reservoir and to reduce exit gradient for safe guarding the foundation against erodibility hazard.

NHPC LIMITED FARIDABAD

5.4 Seismicity

The project area falls within seismic zone-IV as per seismic zone map of India (IS1893-1984). As per the studies carried out at Department of Earthquake Engineering (DEE), University of Roorkee, the recommended values of 0.32g PGA for Maximum Credible Earthquake (MCE) and 0.16g PGA for Design Basis Earthquake (DBE) were adopted for the design of dam.

6.0 DAM AND APPURTENANT STRUCTURES

6.1 General

The dam is located about 2 km downstream of confluence of Teesta River with Dikchu River. The river flows through a narrow gorge and defined by east-west trending ridges. Either bank exhibit contrasting topographical conditions, left bank is relatively gentle slope, while the right bank is vertical escarpment. Topographically, area is rugged and the slopes were covered with thick forests.

6.2 Foundation treatment

The foundation was treated with blanket grouting as explained in Para 5.3.3 and shear keys were provided in spillway blocks S2 and S3 due to presence of shear zone under these blocks as described in Para 5.3.2. The curtain grouting was also carried out to check the seepage from upstream to downstream under the dam foundation.

6.3 Dam

The dam consists of five spillway blocks of the Teesta Dam in the middle of Teesta River and is abutted by two non-overflow blocks on right bank and four non-overflow blocks on left bank. The stability of the dam has been checked as per IS :6512 for all loading conditions as defined in the code.

The height of maximum overflow section is 88.6 m above rock foundation level and it has a base width of 92.38 m. The base width of the overflow block varies as per the height according to rock foundation level. The maximum height of non-overflow block is 87 m and base width is 77 m.

NHPC LIMITED FARIDABAD

The value of horizontal and vertical peak ground acceleration is taken as per site specific response spectra curve. One meter width of non- overflow block (2D section) and full width of spillway section (16m) have been analyzed for various load combination as per IS: 6512 codal provisions.

The vertical stresses at dam foundation level have been calculated for all combinations. The factor of safety against sliding has been calculated on the basis of partial factor of safety in respect of Friction Fϕ and partial factor of safety in respect of cohesion Fc.

The vertical stress in compression at toe works out to be 0.90 to 2.4 MPa in different loading condition. The tensile stress at heel level works out 0.5 to 1.5 MPa in different loading conditions.

The stresses in dam and foundation are within the permissible limits. The dam is also safe against sliding and overturning.

6.4 Galleries and Shafts

The foundation cum drainage gallery (Gallery-G) of 2.25m x 2.8m size is running parallel to the rock line for curtain grouting of dam and providing pressure relief holes. It extends from NOF block R1 at EL503.00m to L4 block at EL576.52m. The bottom most portion of this gallery is at EL499.40m in S1, S2 and part of S3 block. Cross gallery "D" is connected through gallery 'G' and extends upto downstream end in block S3. The inspection gallery 'C' is provided at EL529.22m which connects to stair shaft and elevator in block R1.

Two drifts at EL 529.22m and EL 555.62m were provided for curtain grouting on the right bank extending into the rock from R_1.

Curtain grouting was done through 45mm dia. holes in two rows in S2 and S3 blocks and in a single row in rest of the blocks. Primary holes were provided at a spacing of 6m c/c inclined at 75^0 with the horizontal on upstream side of Dam axis. Secondary holes were spaced at 6m c/c in between primary holes. Tertiary holes were also provided as per requirement. The depth of grout curtain

NHPC LIMITED FARIDABAD

was kept at higher of H/2 or 10m where H= water depth with respect to FRL. The maximum grout curtain depth was of the order of 45m.

The pressure holes / drainage holes were drilled from dam foundation gallery in downstream of grout curtain for reduction of the uplift pressure on dam. 76mm dia. holes were drilled at an interval of 3.0m c/c from the drainage gallery. Pressure relief holes were drilled to a depth of 3/4 th of the curtain grout hole subject to minimum depth of 5m.

A sump room (4m x4m x 3m) has been provided at EL499.40m in deepest block S2 where all drainage water is collected into drainage sump (2.8m dia x 3m deep) located at EL 496.40m from where the water is pumped out through 200 mm dia MS discharge pipes (3 nos.) through pump room (3.5m x 3.5m x 4.0m) located at EL.508.40m. The pipe discharges the water through the outlet in the S2 block at EL550. Pump room and sump room are connected with 2m dia shaft.

A gauge well of size 1m (W) x 1m (L) has been constructed from EL 561.00m to EL583.20m in NOF block R1 to measure reservoir level.

7.0 SPILLWAYS

7.1 General

The spillway is an orifice type spillway structure with gates and breast walls. It has been designed to pass flood equal to 9500 m^3/s. The crest of spillway is at EL 540.00m. The spillway has been provided with 5 nos. of radial gates of size 9.00 m x 12.00 m each. The low level spillway has been provided for flushing of sediments deposited in the reservoir and keeping the intake free of sediment.

7.2 Spillway arrangement

The overflow section has been shaped to an ogee profile with upstream profile with upstream profile in form of ellipse and downstream profile with an equation X^1.85 = 15967* Y. From TP1 to TP2 glacis slope is kept as 1(V):8(H) followed by flip bucket at the end. The flip bucket has been provided to dissipate the

NHPC LIMITED FARIDABAD

energy considering the downstream tail water level, topographical conditions at downstream and economy.

A pre-designed and pre-formed plunge pool having size 40 m x 40 m has been provided at EL.519.0m to avoid uncontrolled scouring. A 15 m wide RCC apron has been provided in S2 and S3 spillway blocks, 10 m in S4 spillway block and 5 m wide in S1 and S5 spillway blocks at the downstream of bucket lip along with shear key.

The results of Model studies carried out at CWPRS, Pune indicated that the discharging capacity of the spillway was adequate to pass maximum discharge of 9500 cumec at MWL EL.580.72m. Besides the piezometric pressures observed along the surface of the spillway were found positive.

It has been reported that erosion of glacis buckets and ends sill occurs frequently during passing of heavy sediment laden water containing boulder. The repairs are carried out as and when required to restore the spillway to its original profile.

Height of pier is 43 m near spillway crest at dam axis and 13 m near flip bucket. The thickness of pier is 3.5 m upto trunion beam and varies to 2.0 m at the end of the bucket as suggested by hydraulic model studies conducted by CWPRS, Pune. The thickness of end pier i.e. left side pier of spillway block S5 and right side pier of block S1 is 3.5 m throughout the length.

The crest is designed for the horizontal stress at different vertical sections. As piers are monolithically connected with spillway glacis concrete, the stresses are induced in the concrete below pier due to combined loading on piers. Due to these loadings, tensile forces are developed and reinforcement is provided to take care of the tensile stresses.

8.0 HYDRO MECHANICAL COMPONENTS

8.1 Spillway radial gates and hydraulic hoists

Spillways have been provided with five numbers radial gates having stainless steel cladded structural steel skin plate to regulate the reservoir level. The gate is fitted with J-type side rubber seals (Teflon cladded), double stem top rubber

NHPC LIMITED FARIDABAD

seal and wedge type bottom seals. In addition anti-jet seal is provided at the lintel on the embedded part.

Two numbers hydraulic cylinders of capacity 205 T each, attached to the gate has been provided to operate each gate. Hydraulic cylinders are operated by one unit of hydraulic power pack which consists of two motors, two pumps associated control and operating systems. Each power pack can act as standby for the adjacent gate in case the designated power pack is not in order and is also capable of operating the two gates simultaneously. A petrol engine driven portable power pack is also provided to operate one gate at 25% of rated speed.

8.2 Spillway stoplogs and gantry crane

Two sets of stoplogs, each set consisting of one top unit and five interchangeable units have been provided for a clear opening of 9.0m wide x 14.0m high at the upstream of the radial gates for the maintenance, repair and inspection of radial gates. The stop logs have upstream skin plate and downstream sealing and are designed corresponding to FRL 579.00m. Rubber seals fitted to stoplogs are musical note type side seals, double stem type top seal (for top unit) and wedge type bottom seal.

Lowering of the stoplogs shall be under no flow condition and lifting shall be under balanced head condition achieved through integral filling in valves provided in top unit. A probe mechanism is provided for ensuring the perfect placement of the spillway stoplogs on sill beam at EL 539.865m.

Stop logs are handled by means of an automatic engaging and disengaging type lifting beam and 50T electrically operated gantry crane installed over the rails at top of dam EL 583.20m.

9.0 INSTRUMENTATION

9.1 Details of Instruments

The followings are the instruments embedded in the dam:

a) **Multipoint bore hole extensometer (MPBX)**

NHPC LIMITED FARIDABAD

10 numbers of extensometer have been installed in spillway block S2 and S3. Out of ten MPBX, eight are electronic type and two are mechanical type. Two MPBX especially number 6 and 7 are not working and cannot be replaced because being embedded in the dam.

b) Uniaxial Joint Meter (Unidirectional)

14 number of uniaxial joint meter (electronic type) have been installed at various contraction joints between the NOF to NOF and at NOF to overflow block joints at various elevation to monitor joint openings between blocks. One uniaxial joint meter no. 8 is not working and cannot be replaced as being embedded in the dam.

c) Pore Pressure Gauge

10 numbers of pore pressure gauges have been installed in dam portion to measure the pore water pressure in the foundation downstream of the grout curtain. The recorded values show variation of 0.06 kg/cm^2 to 2.32 kg /cm^2 during year 2018.

d) Uplift measuring pipes

6 numbers of uplift measuring pipes have been installed. Four numbers have been installed at close to Dam axis in downstream side and two numbers at downstream far away from dam axis along with gallery 'D' to monitor the residual head of water at the point of installation. The recorded values show variation between 0 kg/cm to 3.6 kg/cm^2 during year 2018.

e) Perimetric Joint Meters

11 no. perimetric joint meters (vibrating wire type) have been installed at joint blocks in different blocks at different elevations in especially made niches for measuring the relative displacement of two adjacent concrete blocks in three orthogonal directions. The recorded values show minor variation in the data.

f) Stress meter/ Strain meter/ No-stress strain meter

NHPC LIMITED FARIDABAD

Stress meter, Strain meter and No-stress strain meter have been embedded in overflow and non-overflow blocks at foundation level near heel and toe of the dam. Strain meter rosette comprises of 5 vibrating wire type strain meter including a support to permit installation and measurement at 0^0, 45^0, 90^0 and 135^0 and one normal to this plan. No stress strain meters are provided to measure strain other than due to loads. The maximum value of stress recorded is 8.3 kg cm^2 during the year 2018.

g) Temperature Gauges

18 no. temperature gauges have been installed at various elevations and location to measure the internal temperature in the concrete structure. Out of these, 7 nos. are installed in NOF section and 11 numbers in overflow section. The recorded value show minor variation in data.

h) Topographical Markers

9 no. topographical markers are installed in dam and they are being used to monitor the horizontal and vertical movement of the dam crest. No significant movement have been noticed so far.

i) Survey targets/Studs

6 no. of leveling studs with base plates have been embedded on the dam top and a leveling network has established with reference to bench marks to monitor vertical displacement of the dam block. Out of 6 survey targets 4 have been placed on dam top of the overflow section, one in right bank and one in left bank of dam. No significant movement has been noticed.

j) Direct/inverted pendulum

One direct pendulum is installed in two overflow blocks S3 and S5 to monitor horizontal displacement relative to vertical axis. One inverted pendulum is installed in overflow block S5 and is anchored in the bed rock 25m below the foundation level of the block to monitor absolute horizontal displacement of the

foundation and concrete monolith above it. The recorded values show minor variation.

k) Automatic water level recorder

2 nos. of water level measuring gauges have been installed to monitor water level in the reservoir. One water level recorder has been installed on pier between S4 and S5 blocks and other on the pier of S1 and S2 block.

l) Automatic Weather station

The automatic weather station has been installed in the vicinity of the dam area to record automatically and continuously the meteorological data like wind speed, air temperature, rainfall, relative humidity etc.

m) Strong motion accelerographs and Seismometers

3 no. strong motion accelerographs have been installed to record the seismic events. One in the foundation gallery and one at dam have been provided. The third instrument is installed on right bank at some distance away from dam for free field data.

10.0 EMERGENCY ACTION PLAN

10.1 General

The emergency action plan based on "Guidelines for development and Implementation of Emergency Action Plan (EAP) for Dams" published by CWC in May 2006 has been prepared for the flood discharge value of 9500 m^3/s.

11.0 OBSERVATIONS AND DISCUSSIONS

11.1 Hydrology

11.1.1 GLOF

River Teesta is one of the main Himalayan River originating in the glaciers of Northern Sikkim at an elevation of about 8500m. There are few glacial lakes present in the catchment area up to project site of Teesta-V Dam site. As per

information in WRIS, the largest potential hazardous glacial lake in Teesta basin is a moraine dammed lake namely Khangchung Cho lake and is located at about 133km upstream of Teesta-V Dam along the river. This lake is having a water spread area of 164 ha as per October 2015 inventory information available on WRIS. Being the largest potential hazardous glacial lake in Teesta basin, it has been considered in GLOF study.

The glacial lake out bursting may be associated with flood event. To get a reasonable estimate of GLOF at dam site, the outburst flood is routed in the channel along with 100 years return period flood. The 100 year return flood worked out at Teesta-V Dam site is 3818 m^3/s based on flood frequency analysis at Teesta-V Dam using instantaneous flood peaks for period 1984-2015. Accordingly, the flood return period of 100 years (3818 m^3/s) has been channelized along with the GLOF hydrograph. The peak due to GLOF is 6316 m^3/s at Lake site and same get attenuated to 3820 m^3/s just upstream of Teesta-V Dam when routed with 100 year flood.

The annual flood peaks at the Teesta-V Dam site vary from 1079 m^3/s to 3397 m^3/s for a period between 1998 and 2018. The attenuated GLOF value is slightly more than the annual peak flood at Dam site.

It is therefore opined that the GLOF is no threat to the Teesta-V Dam at present.

11.1.2 Design Flood

At the DPR stage, a PMF of 9500 m^3/s was estimated by NHPC as design flood which was approved by CWC.

Later in the year 2011, a comprehensive study was carried by CWC to review the design flood studies for all hydro power schemes on Teesta river up to Teesta- VI Barrage and a design flood of 14596 m^3/s (PMF) was estimated at Teesta-V Dam site by CWC and NHPC was intimated accordingly.

The Teesta -V Dam which is a concrete gravity Dam is 176.50 m wide at top at EL 583.20 m. At dam axis the right bank of Teesta river at Teesta-V Dam site is very steep. However, the left bank is relatively flatter but the geology is poor.

NHPC LIMITED
एनएचपीसी
N.H.P.C
FARIDABAD

As there is an enhancement in the design flood value from 9500 m^3/s to 14596 m^3/s , it was required to provide surplusing work to pass an additional design flood value of 5096 m^3/s (14596 – 9500). The Dam site was explored to examine the possibility to provide at an additional surplusing work near or around the Dam site.

As already stated, that right bank is almost vertical and the possibility of providing the additional surplusing work at this bank was not considered feasible. While the left bank has slightly flatter slope but has poor geological formation and may be met with geological surprises. Besides, it would involve a huge amount of excavation. Even at time of original design and construction, the left bank of the river downstream of the bucket lip was excavated to have an unobstructive ski jump jet to dissipate the hydraulic energy. Apparently, to provide additional surplusing work at dam and around is very remote and it was not considered feasible.

As per the IS: 11223-1985, the floods of larger or smaller magnitude may be used if the hazards involved are high or low. The relevant parameters to be considered in judging the hazards to the size would be:-

1. Distance to and location of the human habitation on the downstream after considering the likely future developments.
2. Maximum hydraulic capacity of the downstream channel at the level at which catastrophic damage is not expected.

For more important projects, the Dam break studies may be done as an aid to the judgment in deciding whether PMF needs to be used. Where the studies or judgment indicate an eminent danger to present or future human settlement, the PMF should be used.

There is a project Teesta -VI located at 25 km downstream of Teesta-V. This project has been designed for the value of SPF of 11600 m^3/s. when a SPF event is considered at Teesta -VI, the corresponding value of flood at the Teesta -V would be 11136 m^3/s. The corresponding water level at Teesta -V reservoir would be at EL 582.57 m.

NHPC LIMITED FARIDABAD

Whenever PMF event take place, a discharge of the order 3319 m^3/s will flow over the top of Dam. This is a rare event which may take place or may not take within the life of Teesta-V Dam, but the safety of the Teesta -V Dam should be ensured. Even if some damages take place that should be repairable. It is opined that due to site and geological constraint, the provision of additional spillway capacity appears to be not feasible.

It is also pertinent to mention here that there is a standard operating procedure being followed at dam site during release of water during medium and high floods from dam as well as power house for protection of people living in downstream area. It involves intimation through powerful sirens/hooters to give prior warning to the people before release of water, erection of warning boards in the vulnerable areas in downstream of dam along river course which are easily accessible to local people. People are made aware of high inflows in the river and advised to move to safer locations**. In event of flood of the order of higher floods, proper warning system would be made active to warn the downstream population to minimize the economic losses.**

It is therefore recommended Emergency Action Plan should be updated for PMF of 14596 m^3/s keeping in view the site constraints in providing additional surplusing capacities at dam site.

Besides, a proposal by raising a 1.5 m high parapet wall on top of dam to augment sluice spillway capacity along with passing remaining discharge by activating the plugged diversion tunnels with proper intake along with gate may be examined. If the proposal is found technically and economically feasible, may be implemented.

It is therefore recommended that the proposal to pass additional discharge during PMF condition by raising the 1.5 m high parapet wall and passing the remaining discharge by activating the diversion tunnels along with proper intake and gates may be explored.

NHPC LIMITED FARIDABAD

11.1.3 Reservoir Silt Flushing

Hydraulic model studies for flushing of sediments from Teesta -V reservoir were carried out at CWPRS, Pune which indicated that flushing discharge of 1000 m^3/s was able to flush out 0.75, 1.275 and 1.61 MCM during 12, 24 and 36 hours respectively. But higher flushing discharge, the performance would be better. However, it was also found in model studies that with discharge of 500 m^3/s, the flushing of the sediment was slightly sluggish.

By perusing the flushing table, it is noticed that the flushing discharge varies between 700 m^3/s and 1000 m^3/s depending upon the period varying from June to September. It is opined that any flushing discharge less than 1000m^3/s would be not very efficient in removal of the silt load from reservoir.

It is pertinent to mention here that reservoir flushing has been proposed during monsoon even at discharges lower than 1000 m^3/s to remove the sediment which would otherwise get accumulated in the reservoir if the same is not flushed out. Moreover, as per actual flushing data it is seen at flushing discharge of about 700-800 cumec, about 2.5-3.0 MCM of sediment has been flushed out with flushing duration of about 18-20 hours. Also, even at lower discharges there would be high ppm in the river which would require the power house to be shut down. So, the incoming high concentration sediment needs to be managed so that intake remains sediment free.

It is therefore, recommended that the mathematical model study may be carried out to evolve an optimum silt flushing pattern for the Teesta-V reservoir.

11.2 Geology

It was reported that the major portion of left bank towards the downstream of Dam axis was covered by slope wash material with scanty out crop of quartzite phyllite and phyllitic quartzite rock. The thickness of overburden increased gradually towards downstream of Dam axis. The left bank, downstream of Dam axis was destabilized during abutment stripping and foundation excavation especially towards left bank during construction in year 2003-04.Besides, slides developed at number of places on the left bank from Dam axis to RD 120m

NHPC LIMITED
एन एच पी सी
N·H·P·C
FARIDABAD

downstream of dam axis. The area was stabilized by providing suitable support measures i.e. protection walls, micro piling and grouting, bamboo piling, geotextile and bailey benching etc.

During the inspection on 28.02.2019, it was reported that the area on the left bank adjoining plunge pool is getting disturbed during the monsoon.

The throw distance of the ski jump jet for various discharges is about 40m from the lip in free flow conditions from the spillway and it is about 60m from lip of bucket in partial gate operation conditions. Thus the plunge pool lies at a distance between RD 120m and 160m downstream from Dam axis. An area near RD120m downstream from Dam axis on left bank is already stabilized during construction of project. Now, this area beyond RD 120m downstream from Dam axis upto RD160m to RD 170m downstream of Dam axis adjacent to plunge pool on left bank needs to be stabilized to check further slide in this particular area by providing suitable remedial measures eg. protection wall, micro-piling etc.

It is, therefore, recommended that the area on the left bank adjacent to plunge pool between RD 120 m to RD 160 m downstream of Dam axis may be stabilized by using appropriate remedial measures.

11.3 Dam

11.3.1 Top Surface of Dam

No visible distress was noticed on the top surface of the Dam except some surface hair cracks were visible on top which appears of no significance.

11.3.2 Foundation gallery

The foundation gallery is starting at an invert level of EL.503.00m in the common joint block of R1 and S1. The block R2 is a small block and terminating at much higher level.

The foundation of block R1 and block S1 is common upto EL.523.00m. The formed/porous drains are almost clogged in the common joint block R1and S1 due to deposition of leached material. A niche was observed at the junction of

NHPC LIMITED
एन एच पी सी
NHPC
FARIDABAD

right abutment and the joint block R1 and S1 of Dam which indicated that water was seeping through this place. The seepage was noticed on the upstream face of gallery. The foundation gallery continues at EL.499.40m upto some distance in block S3 and continue further upto block L4 through stairs with landings at EL.503.72 m, 517.52m, 529.22m (2nd gallery), 550.82m, 563.56 m and 576.52m.

The stepped portion of gallery is profusely seeping. It is reported that quantity of the seepage water from left hand side varies between 6 to 8 litre per second and from right side it varies between 1 to 2 litre per second.

The foundation of block S2 and block S3 is common upto El.502.40m. The most of formed/porous drains all along the length of gallery are clogged due to deposition of leached material in them and the whole body of Dam is water charged. Even in the side gallery at EL.499.40m in blocks S3,S2 and S1, the seepage is noticed all along its length. This gallery takes a right turn towards block S2 and block S1 in the end. In this portion, the seepage is noticed in the drains of the gallery.

It was reported that the seepage was due to from the plunge pool which is located at a distance between RD120 to RD 140 m from downstream of dam axis and 40 to 60 m from the end of spillway blocks having bottom level at an EL.519.00m which is about 19.6m above the downstream toe gallery (EL.499.4m) of the Dam. This head difference is causing seepage in the downstream toe gallery of Dam.

There is a niche on the downstream face of foundation gallery in block S3 where direct and indirect pendulums were proposed to be installed. The direct pendulum was installed during construction and is functioning but the indirect pendulum could not be installed. During construction, heavy seepage was coming from the hole drilled for inverted pendulum and it was not possible to fix the inverted pendulum. The opening for intended installation of indirect pendulum was left open. Later, a pipe was fixed in the hole and closed from top. From the outside circumference of pipe, the gougy material was oozing out. It appears that the oozed material was from shear zone as the block S3 is partly lying on shear zone and partly on rock. It is proposed that the area within

NHPC LIMITED
एनएचपीसी
N.H.P.C.
FARIDABAD

the existing pipe should be grouted first with polyurethane and then pipe should be filled with concrete.

It is therefore recommended that the area within the existing pipe may be grouted first with polyurethane and then filled with the concrete.

The deposition of leached material was noticed in the drains, floor, upstream and downstream faces of the foundation gallery. The deposition of leached material was also noticed on the floor of side gallery and downstream toe gallery of Dam.

11.3.3 Gallery/Drifts at EL 529.22m

There is an another gallery in the body of the Dam at EL 529.22m extending from block R1 to block S5 and flanked by curtain grouting unlined drift on either side i.e. one on left abutment and two on right abutment. The seepage water was coming from both faces of curtain grouting drifts in the flanks. The quantity of seepage water was more from the left hand side drift than the right hand side drift.

In view of above, it is recommended that curtain grouting should be carried out to reduce the seepage from foundations and to check the oozing gougy material in the inverted pendulum shaft in S3 block along with fan grouting from levelled landings of stairs to reduce the seepage in the unlined curtain grouting drifts.

11.3.4 Formed / porous drains

As already noticed that body of the Dam is water charged and the formed / porous drains are already clogged due to deposition of leached material. It would not be prudent to repair the existing formed / porous drains as the surrounding area of these holes would have been already clogged due to leaching.

It is, therefore, recommended that new formed / porous drains should be drilled at suitable intervals between existing clogged drains to check the seepage from the upstream face of Dam.

11.3.5 Spillway

The Teesta river carries very heavy silt load during monsoon period. The Teesta-V Dam was filled up to its crest level EL 540.00m in the first few years of its commissioning.

During flushing and spilling operations which take place during monsoon when Teesta river brings heavy silt, the glacis of spillway get abraised / eroded. Sometimes deep pot holes are formed or sometimes steel reinforcement are exposed to the sky. The abrasion / erosion does not follow any set pattern. The damaged portions are repaired by using high performance concrete or by polymer concrete. But even repaired portion again get damaged due to abrasion/ erosion.

It is, therefore, recommended that steel liner may be provided over all glacis of spillways to check the recurrences of such abrasion / erosion damages.

11.3.6 Structural safety and stability of Dam

Earlier, the Dam was designed to pass a design flood discharge (PMF) of 9500 m^3/s. The structural safety and stability of Dam was ensured for this design flood for various seismic and non-seismic loading conditions as per IS 6512:1984 for MWL (EL 580.72m) and FRL (EL 579.00m) with Dam top level at EL 583.20m.

In the year 2011, CWC revised the design flood value (PMF) to 14596 m^3/s from 9500 m3/s. There is a substantial increase in the value of design flood by 5091 m^3/s. Attempts were made to provide additional spillway capacity to pass their additional flood either through shaft spillway or otherwise. But due to site constraints on right bank and poor geology on left bank, it was found not feasible to provide additional spillway capacity on either bank.

In these circumstances, it is inevitable that the Dam may be topped in PMF condition. It was estimated that in PMF condition, the water level in the reservoir may rise to an EL 588.00m. Thus, the Dam may be over topped by a 4.8m deep sheet of water.

NHPC LIMITED FARIDABAD

It is, therefore, recommended that structural safety and stability of Dam should be revisited for new PMF loading condition. If required, suitable remedial measures may be taken to ensure the structural safety and stability of Dam.

11.4 Instrumentation

The Teesta-V Dam has an elaborate arrangement of Instruments installed / fixed in Dam body to study the behaviour of Dam during its operation at various stages and compare its actual behaviour with assumed designed parameters. The most of the instruments are functioning as being digital and the data from them being regularly collected. However, the data collected need to be analysed regularly and compared as adopted while designing the Dam. Some instruments are showing constant values / minor variations. The manufacture company shall be consulted to check whether the instruments are working properly or having some issues with calibration.

It is, therefore, recommended that all data collected from instruments installed should be analyzed regularly to assess the health and performance of the Dam.

11.5 Emergency Action Plan

As the designed flood value (PMF) has been revised from 9500 m^3/s to 14596 m^3/s, the Emergency Action Plan (EAP) may be updated to enhanced revised PMF value. In the EAP, the flood plains which are likely to be vulnerable should be demarcated with proper warning signs and due arrangement from downstream of the Dam to the upstream of Teesta-VI barrage to minimize and mitigate the impact of PMF condition on local population living on the banks of Teesta river in the zone as per the guidelines issued by the Competent Authority.

It is, therefore, recommended that Emergency Action Plan (EAP) may be updated regularly as per the guidelines issued by the Competent Authority.

NHPC LIMITED FARIDABAD

12.0 Recommendations

The following are the recommendations in brief:-

1) The GLOF is no threat to the Teesta-V Dam at present.

2) Emergency Action Plan should be updated for PMF of 14596 m^3/s keeping in view the site constraints in providing additional surplusing capacities at Dam site.

3) The proposal to pass additional discharge during PMF condition by raising 1.5 m high parapet wall on top of dam and passing the remaining discharge by activating the diversion tunnels along with proper intake and gate may be examined.

4) The mathematical model study may be carried to evolve an optimum silt flushing pattern for the Teesta-V Dam reservoir.

5) It is recommended that the area within the existing pipe near pendulum niche in S3 block may be grouted first with polyurethane and then filled with concrete.

6) The area on left bank adjacent to the plunge-pool between 120 m and 160 m downstream of Dam axis may be stabilized by using appropriate remedial measures.

7) The curtain grouting should be carried out to reduce seepage with fan grouting from level landings of stairs to reduce seepage in unlined curtain grouting drifts.

8) The new formed / porous drains should be drilled at suitable intervals between existing clogged drains to check seepage from the upstream face of the Dam.

9) The steel liner may be provided over all glacis of spillway to check abrasion and erosion.

NHPC LIMITED FARIDABAD

10) The structural safety and stability of Dam should be revisited for new PMF loading condition. If required, suitable remedial measures may be taken to ensure the structural safety and stability of Dam.

11) All data collected from the instruments installed should be analyzed regularly to assess the health and performance of the Dam.

12) Emergency Action Plan (EAP) may be updated regularly as per the guidelines issued by the Competent Authority.

13.0 Conclusion

The 88.6 m high Teesta-V Dam is functioning satisfactorily for the approved DPR design flood. However, for revised enhanced PMF value as communicated by CWC during year 2011, suitable remedial measures are required to be put in place.

14.0 Acknowledgements

The DSRP members place on record their appreciation and sincere thanks to all NHPC officers and staff at their Headquarter and field formation for their cooperation and help during the appraisal of Teesta-V dam and in preparation of DSRP report.

Sub: Constitution of Dam Safety Review Panel for Teesta-V Dam of Teesta-V Power Station

Dear Sir,

As per the "Guidelines for Safety Inspection of Dams" published by CWC in January-2018 and previous minutes of NCDS meetings, all dam owning bodies/ agencies should conduct the comprehensive safety review of large dams, which are more than 15 meter in height or which store 60 Mm^3 or more water by an independent panel of experts i.e. "Dam Safety Review Panel" once in 10 years and submit report to Dam safety Organization. It may be mentioned that height of Teesta-V Dam is 88.6 m.

Subsequent to the expression of your consent to be a member, the "Dam Safety Review Panel" has been constituted to get the comprehensive safety review inspection carried out which is being planned from 25th February, 2019. In this regard, your goodself is hereby requested to be a member of this panel, on the following terms and conditions.

a) An amount of Rs. 10000/- (Ten thousand only) per day as an honorarium to each member of DSRP shall be paid for meetings, site visits etc. The above honorarium shall also be applicable for the journey period.

b) For local journey/ conveyance, reimbursement for full taxi fare shall be made from residence/ guest house/ hotel to the place of meeting and back. In case of utilizing own vehicle, payment shall be made @ Rs. 10/- per km of the actual journey performed.

NHPC LIMITED FARIDABAD

c) The travel fare shall be of Economy Air fare/ AC-I class train fare subject to actual journey performed.

d) During visit, the members of the committee shall be treated as NHPC Guest for lodging/ boarding facilities.

e) Income Tax along with surcharge, if any as per norms will be deducted at source.

f) Sh. Ajay Mittal, General Manager (Civil), Design Division shall be the Coordinator for dam safety visit including organizing meetings, payments etc.

g) Sh. A.K.Jain, General Manager (Civil), Design Division will accompany with DSRP during site visits & meetings and will associate for preparation of report & all technical assistance, as required.

h) Other terms of reference are enclosed at **Annexure-A.**

i) Memorandum for DSRP on Teesta-V Dam is enclosed.

j) DSRP shall comprise of 6 members. Other three members from NHPC Ltd will be intimated later on.

The schedule of the meeting and inspection is also enclosed for your information.

Thanking you,

Yours faithfully

21/01/2019.

(Keshav Deshmukh)
Chief General Manager (D-II)
Design & Engg Division

Encl: As above.

NHPC LIMITED FARIDABAD

Annexure - A

TERMS OF REFERENCE FOR DAM SAFETY REVIEW PANEL (DSRP)

A. General

1) Hereinafter, Dam shall refer to Teesta-V Dam.

2) The comprehensive safety review inspection of dam shall be carried out by the DSRP as per "Chapter-10 i.e. Comprehensive Dam Safety Review" of the "Guidelines for Safety Inspection of Dams" issued by CWC in January - 2018.

3) DSRP shall undertake the comprehensive safety review of the dam to assess the integrity of the dam based on the review of available documents related to the investigation, design, construction and O&M of the dam; making an on-site examination, evaluating features and actions pertaining to the safety of the dam; arriving conclusions and providing recommendations to the Corporation that may be needed for ensuring the level of safety as per acceptable safety criteria (e.g. engineering standards, dam safety guidelines) or risk management criteria.

B. Details to be provided to DSRP before inspection

1) A technical memorandum for dam inspection shall be made available to each member of DSRP team before inspection. The technical memorandum shall comprise of the chapters on general information, hydrology, geology, layout including drawings, dams & spillway, dam incidents including remedial measures/ modifications undertaken, reservoir operation and regulation plan. Further the duly filled Dam safety inspection form in CWC format (Appendix B) shall also be enclosed for reference.

1) All pertinent records including design records, construction records alongwith recent operation & maintenance and instrumentation data shall be made available to the DSRP team during inspection.

C. Meetings & Inspections

2) An advance schedule shall be drawn up by the DSRP for the meetings, site visit and preparation of DSRP reports in consultation with the representatives of the Corporation.

3) The meetings and site inspection shall be arranged by NHPC Ltd. DSRP meetings will be held at Corporate Office, NHPC Ltd at Faridabad/ project site and shall be attended by all members.

4) The DSRP will carry out field inspections utilizing a standard checklist (Refer – Appendix B of the Guidelines for Safety Inspection of Dam) and note the condition of the elements on the checklist and categorize their status as satisfactory/ fair/ poor/ unsatisfactory. Additional narrative will be provided for

NHPC LIMITED FARIDABAD

poor and unsatisfactory elements. On the basis of these notes, measures needed to assure safety of the dam, categorized in regard to the urgency, shall be recommended.

D. Roles and responsibilities of DSRP

1) DSRP members shall make a comprehensive review of all data related to the dam and make an onsite examination. Operators and field personnel familiar with the dam and its operation shall join the team for onsite examination. They shall be capable of answering or obtaining answers to questions, the team may have, concerning the existing conditions and the operation of the dam.

2) Dam Inspection shall be carried out by DSRP as per Chapter-10 of the Guidelines covering the inspection items brought out in Annexure-I and the features, events & evidence brought out in Annexure-II (Copy of annexure-I & II enclosed).

3) The DSRP will be advisory in function and provide an expert opinion on safety conditions of the dam and various studies conducted and give recommendations/ suggestions for further improvement and rehabilitation requirements.

E. Reporting procedures

A report shall be prepared by DSRP for the inspected dam, and shall include but not be limited to:

1) The outlines of Comprehensive Dam Safety Review report may include
   - i) Description of dam and its operation,
   - ii) Evaluation of design, construction and analysis detail,
   - iii) Inspection, testing and examination detail,
   - iv) Hydrologic review,
   - v) Seismic review,
   - vi) Instrumentation and evaluation,
   - vii) Risk consequences,
   - viii) Future performance monitoring,
   - ix) Recommendation issue for short term and long term rehabilitations, material testing, physical modeling,
   - x) Key records/ information/ reports, key drawings-original and modified,

2) Recommendations of DSRP may also include
   - i) For any emergency measures or actions, if required, to assure the immediate and long term safety of the structure.

NHPC LIMITED FARIDABAD

ii) Remedial measures and actions related to design, construction, operation maintenance, monitoring and evaluation, and inspection of the structure, if required.

iii) Additional detailed studies, investigations and analysis, if required.

iv) Recommendations for improvements in routine maintenance and inspection of dam, if required.

v) Short term and long term risk reduction measures (structural as well as non-structural).

3) Report will be prepared, signed by all members of the Panel and presented to the Corporation within 30 days after site visit.

F. Support Services

1) Corporation shall make the operations and maintenance staff of the dam available to respond to the DSRP's questions & the proceedings shall become part of the record of the DSRP's report. Corporation's designers and engineering consultants, if any, shall be present during selected DSRP meetings. The DSRP will be provided with the available background information, relevant data, notes or explanations regarding the design computations or methods used. Corporation's General Manager or representative(s) will co-ordinate the assembling of such information.

2) Corporation will provide secretarial assistance such as drafting, reprographic services and coordination for preparation of DSRP reports.

---------- o ----------

NHPC LIMITED FARIDABAD

TENTATIVE ITINERARY FOR MEETINGS, INSPECTION OF TEESTA-V DAM BY DAM SAFETY REVIEW PANEL

Itinerary for first phase of preliminary meeting/ discussions followed by Site Inspections is as below:

25-02-2019	Arrival at New Delhi from Pune by flight and stay at VIP Guest House/ Hotel, Faridabad (for Sh. Rajan Nair).
26-02-2019	Preliminary Meeting of members of DSRP with NHPC officials at Design Division, C.O., Faridabad.
27-02-2019	New Delhi to Bagdogra by flight and further proceed to Teesta-V Power Station by Project vehicles.
28-02-2019/ 01-03-2019	Stay at Teesta-V Power Station, Dam Inspection, discussion with site officers & meeting.
02-03-2019	Proceed to Bagdogra Airport by project vehicle for return journey to Delhi
02-03-2019	Arrival at New Delhi from Bagdogra by flight and stay at VIP Guest House/Hotel at Faridabad (for Sh. Rajan Nair).
03-03-2019	Return journey to Pune by Flight (for Sh. Rajan Nair).

Itinerary for Second Phase of meeting / discussions and finalization of report is as below:

26-03-2019	Arrival at New Delhi from Pune by flight and stay at VIP Guest House/Hotel, Faridabad (for Sh. Rajan Nair).
27-03-2019	Meeting of members of DSRP with NHPC officials for finalization of report at Design Division, C.O. Faridabad.
28-03-2019	Discussion & preparation of report at Design Division, C.O., Faridabad...
29-03-2019	Finalization of report at corporate office Return journey to Pune by Flight (for Sh. Rajan Nair).

Sub: Dam Safety Review Panel for Teesta-V Dam of Teesta-V Power Station

Refer: Letter no. NH/DD/D-II/ Dam Safety/DSRP/2019/2286 dated 21.01.2019

Sir,

This is in continuation to above mentioned letter vide no. 2286 dated 21.01.2019 regarding formation of DSRP and nomination of internal members from NHPC Ltd. In this context, it is intimated that three internal members namely, Sh. V. K. Maini, CGM; Sh. A. K. Jain, GM (Civil) and Sh. R. C. Sharma, GM (Geology) have been nominated as part of Dam Safety Review Panel. The term of reference for these three members will be same as stipulated at annexure-A of above letter no. 2286. The constitution of DSRP is as follows:

1. Dr. B. K. Mittal, Former Chairman, CWC - Chairman
2. Sh. Rajan Nair, Former Chairman, Brahmaputra Board - Member
3. Sh. Y. K. Handa, Retd. Chief Engineer, CWC - Member
4. Sh. V. K. Maini, CGM, HM, D&E Division, NHPC Ltd. - Member (Internal)
5. Sh. A. K. Jain, GM (Civil), D&E Division, NHPC Ltd. - Member (Internal)
6. Sh. R.C. Sharma, GM(Geology), Geology Division, NHPC Ltd. - Member (Internal)

Thanking you,

Yours faithfully

Narendra

(Narendra Kumar)
Executive Director
Design & Engg. Division

Copy to:
1. Sh. V. K. Maini, CGM (D-III), HM, D&E Division, NHPC Ltd.
2. Sh. A. K. Jain, GM (Civil), D&E Division, NHPC Ltd
3. Sh. R. C. Sharma, GM (Geology), Geology Division, NHPC Ltd.

NHPC LIMITED FARIDABAD

ANNEXURE - 3

List of NHPC Officers at Corporate Office, Faridabad who participated in discussion held on 26th February 2019

1. Sh. Narendra Kumar, ED, D&E Division
2. Sh. V.K. Maini, CGM, D&E Division
3. Sh. Keshav Deshmukh, CGM, D&E Division
4. Sh. R.C. Sharma, GM, EG & Geotech Division
5. Sh. Rajeev Baboota, GM (Civil), D&E Division
6. Sh. Ajay Mittal, GM (Civil), D&E Division
7. Smt. Bharti Gupta, DGM (Civil), D&E Division
8. Sh. Rajesh Kumar, DGM (Civil), D&E Division
9. Sh. RMA Khan, DGM (Civil), D&E Division
10. Sh. Mukesh Kumar, DGM (Civil), D&E Division
11. Sh. Ankur Vishwakarma, DM (Civil), D&E Division
12. Sh. Ashok Kumar Meena, DM (Civil), D&E Division

NHPC LIMITED FARIDABAD

ANNEXURE -4

List of NHPC Officers who participated in field visit during 28th February & 1st March, 2019

From Teesta-V Power Station:

1. Sh. Sahdev Khatua, GM (Civil) - Incharge
2. Sh. Rajappan K., GM (Civil)
3. Sh. S. K. Sahu, SM (Mechanical)
4. Sh. P. K. Singh, SM (Civil)
5. Sh. S. D. Bhutia, SM (Civil)
6. Sh. Rajesh Kumar, SM (Electrical)
7. Sh. Shyam, M (Mechanical)
8. Sh. Satish Kumar Suman, DM (Civil)
9. Sh. Manoj Divedi, AM (Civil)
10. Sh. Abhay Kumar Singh, AM (Mechanical)
11. Sh. Sunil Kumar Singh, AE (Civil)
12. Sh. S. P. Mondal, AE (Civil)
13. Sh. Sunil Panjiyar, AE (Civil)

From Corporate Office:

1. Sh. V. K. Maini, CGM, D&E Division
2. Sh. R. C. Sharma, GM (Geo), EG & Geotech Division
3. Sh. RMA Khan, DGM (Civil), D&E Division
4. Smt. Bharti Gupta, DGM (Civil), D&E Division

NHPC LIMITED FARIDABAD

ANNEXURE -5

List of NHPC Officers who participated in discussions at Corporate Office, Faridabad held during 27th – 29th March, 2018

1. Sh. Narendra Kumar, ED, D&E Division
2. Sh. V.K. Maini, CGM (D-III), HM, D&E Division
3. Sh. Keshav Deshmukh, CGM, D&E Division
4. Sh. A. K. Jain, GM (Civil), D&E Division
5. Sh. R.C. Sharma, GM, EG & Geotech Division
6. Sh. Rajeev Baboota, GM (Civil), D&E Division
7. Sh. Ajay Mittal, GM (Civil), D&E Division
8. Sh. S. P. Mukherjee, GM (Civil), D&E Division
9. Sh. RMA Khan, DGM (Civil), D&E Division
10. Smt. Bharti Gupta, DGM (Civil)-Hydrology, D&E Division
11. Sh. Rajeev Saxena, SM (Geo), EG & Geotech Division
12. Sh. Anoop Kumar Gupta, SM (Civil), D&E Division
13. Sh. Ankur Vishwakarma, DM (Civil), D&E Division
14. Sh. Ashok Kumar Meena, DM (Civil), D&E Division

NOTES 01

1. ALL DIMENSIONS ARE IN MILLIMETERS AND ELEVATIONS IN METERS.
2. BEFORE GROUTING, THE FOUNDATION ROCK SHALL BE MAPPED FOR DISCONTINUITIES, SHEAR ZONE FAULTS, JOINT PATTERN & WEAK AREAS ETC.
3. GROUTING OPERATION SHALL CONFORM TO T.S B.7 & IS 6066 -1994.
4. GROUTING SHALL BE CARRIED OUT FROM DEEPEST FOUNDATION TO HIGHER LEVEL ON BOTH SIDES. MIN. 2000 th. CONCRETE SHALL BE LAID ON FOUNDATION ROCK BEFORE START OF GROUTING.
5. GROUT HOLES SHALL BE NORMAL TO THE ROCK SURFACE. HOWEVER IF SUCH HOLES BECOME PARALLEL TO SHEAR ZEAM OR DIP OF FOUNDATION ROCK, THE HOLES SHALL BE DRILLED AT AN ANGLE WITH THE FOUNDATION SO THAT THE HOLES INTERSECT THE SHEAR SEAM AND BEDDING JOINTS.
6. GROUTING SHALL BE STARTED WITH A LOW INITIAL PRESSURE OF 0.2 kg/cm² OF UNDERLYING ROCK AT THE COLLAR OR TOP OF STAGE DEPTH IN S1, S4 & S5 BLOCK . IN S2 & S3 BLOCK, THE PRESSURE SHALL VARY FROM 0.5 Kg/cm² AT THE TOP TO 3 Kg/cm² AT THE BOTTOM, IF REQUIRED, PRESSURE MAY BE SLIGHTLY MODIFIED PER SITE CONDITIONS AND GROUTING EXPERIENCE AS DIRECTED BY THE ENGINEER-IN-CHARGE.
7. PRIMARY HOLES SHALL BE DRILLED AND GROUTED FIRST, AFTER THAT SECONDARY HOLES MAY BE TAKEN UP AS PER REQUIREMENT AND RESULTS OF PRIMARY HOLES.
8. DETAILED RECORD OF GROUTING OPERATION SHALL BE KEPT FOR FURTHER USE.
9. GROUTING IS NOT TO BE DONE IN AN ISOLATED BLOCK AND SHALL HAVE CONTINUITY AT LEAST IN THE ADJACENT BLOCKS.
10. THE DEPTH, LOCATION AND SPACING OF GROUT HOLES MAY BE SLIGHTLY MODIFIED AS PER SITE CONDITIONS AS DECIDED BY ENGINEER-CHARGE.
11. FOR DETAILS OF GROUT CURTAIN, REFER SEPARATE DRAWINGS.
12. CORES OF ENTIRE 10 m DEPTH FROM CHECK HOLES SHALL BE EXTRACTED FOR ROCK MECHANIC TESTS AFTER CONSOLIDATION GROUTING. WATER PRESSURE TEST SHALL BE DONE IN THESE CHECK HOLES TO CHECK PERMEABILITY.

NOTES

1. ALL DIMENSIONS ARE IN MILLIMETRES AND LEVELS IN METRES.
2. ALL INSTRUMENTS ARE INDICATIVE ONLY. ACTUAL SHAPE AND SIZE SHALL BE AS PER MANUFACTURER'S MANUAL.
3. THE NUMBER AND LOCATION OF THE INSTRUMENTS MAY BE MARGINALLY MODIFIED BY THE ENGINEER-IN-CHARGE DURING CONSTRUCTION PERIOD ACCORDING TO THE REQUIREMENT AS PER SITE CONDITIONS.
4. ALL INSTRUMENTS, JUNCTION BOXES, READING PANELS SHALL BE INSTALLED AS GIVEN IN MANUFACTURER'S/SUPPLIER'S MANUAL AND AS PER T.S.S.
5. VIBRATING WIRE TYPE ELECTRICAL PIEZOMETERS SHALL BE INSTALLED AS SHOWN ON THE DRAWINGS AND ALL THE PIEZOMETER CABLES SHALL BE CONNECTED TO A JUCTION BOX.
6. STAND PIPES FOR MEASURING UPLIFT PRESSURES SHALL BE INSTALLED IN THE DAM IN THE FIRST LIFT JUST ABOVE THE CONTACT BETWEEN THE FOUNDATION ROCK AND THE BASE OF THE DAM. 50 mm DIA. HOLES SHALL THEN BE DRILLED VERTICALLY TO A DEPTH OF 2000 mm BELOW THE ROCK AND CONCRETE INTERFACE. THESE STAND PIPES SHALL BE CAPPED WITH A THREE WAY COCK PERMITTING CONNECTION TO A PORTABLE PRESSURE GAUGE.
7. STRESS METER STRAIN METER AND NO STRESS STRAIN METERS SHALL BE INSTALLED AT DIFFERENT LOCATIONS AS SHOWN IN THE DRAWINGS. SPACING BETWEEN THESE INSTRUMENTS SHALL BE AS PER MANUFACTURER'S SPECIFICATIONS. CABLES SHALL BE ATTACHED TO JUNCTION BOX.
8. TELE THERMOMETERS AND TEMPERATURE GAUGES SHALL BE INSTALLED AS SHOWN ON THE DRAWINGS AND CABLES SHALL BE CONNECTED TO THE JUNCTION BOX.
9. ALL INSTRUMENTS SHALL BE EMBEDDED IN CONCRETE WITH SMALLER SIZE AGGREGATE (NOT MORE THEN 40mm) AT LEAST ONE DAY BEFORE NORMAL LIFT CONCRETING IS POURED. CARE SHOULD ALSO BE TAKEN NOT TO DAMAGE OR DISLOCATE THE INSTRUMENTS/ CABLES WHILE CONCRETING.

02 10. 2 NOS. 2-POINT BORE HOLE EXTENSOMETERS SHALL BE OF MECHANICAL TYPE AS SHOWN IN DRAWING & OTHERS OF ELECTRONIC TYPE.

NHPC LIMITED
FARIDABAD

1. About NHPC, Teesta – V

Teesta-V Power Station (3x170 MW) is a run of the river scheme with diurnal storage to harness the hydro power potential of river Teesta for peaking during the lean season and is located in the state of Sikkim. The Power Station was commissioned in the year 2008.

2. About Navitus

Navitus Controls & Equipment Private Limited (NCEPL) is a niche Service Provider that focuses on delivering end to end Automation Capabilities for Industrial Process Automation. NCEPL has partnered with World leading Companies including VIBROSYSTM to deliver complete Solutions in the areas of On-Line Condition Monitoring of Electrical Assets, which includes Generator, Transformer, Cable, Panels- AIS / GIS, Motor, Bus Bar, Bus Reactor etc.

Navitus Controls & Equipment Pvt Ltd (NCEPL) intends to introduce Implementable Architecture Solutions for helping the Customers to leverage Technology in order to achieve their Business Strategies. NCEPL is a System Integrator that brings the right blend of Hardware and Software Platforms to yield the best Price Performance for the client for Consulting and Systems Integration Project. NCEPL tries to attain balance in Utility, Metal and Mining Verticals in key areas of

- Automation Effectiveness
- Business Innovation
- System Improvement
- Productivity Enhancement.

NCEPL also provides technology and services that help its customers address the limitations of an old and aging Electrical infrastructure. NCEPL has partnered with leading manufacturers of Monitoring Devices, Communication Infrastructure Providers and Analytical Software Providers to design and configure end-to-end solution in the areas of "Condition Monitoring" of the Electrical Assets. Combining deep industry experience and technical knowhow with creative ideas, NCEPL has created intelligent, reliable and leading-edge technologies that add value to our customers' businesses and help them to move to a "Condition Based Maintenance Program" from an existing "Time Based Maintenance Program". Some of the benefits that our solutions can provide are:

1. Lowering the cost of maintenance of the electrical assets by introducing "Condition Based Maintenance" Program
2. Extending the life of the assets
3. Providing early alarm about the health of the assets and reducing the possibilities of unplanned outages and potential revenue loss

3. Proposal Background

Air Gap Monitoring System (AGMS) was supplied to NHPC, Teesta V by VIBROSYSTM, Canada in the year 2008. The AGMS is now in operation partially as some of the readings are not captured owing to defects mostly in signal conditioners, Analyser / Processor (ZPU 16) and other Hardwares. The existing Hardwares has become obsolete due non-availability of spares and service support from OEM. The Zoom (Zero Outage Online Monitoring) software for Analyser is continually getting upgraded by Vibrosystm.

NCEPL technical team along with expert from Vibrosystm visited Teesta -V on 22nd. July 2022 for detail physical inspection, testing and health assessment of existing Air Gap Monitoring Systems, which are partially in operation.

During visit all the signal conditioners LIN modules and Air Gap Sensors kept in Inventory of Teesta V thoroughly tested assessed along with exiting hardwares fitted with running Units.

The detail observations were recorded jointly with Teesta V in MOM dated 22/7/22 and enclosed herewith.

The Following components were tested / inspected within the limited scope & facilities at site:

A. LIN modules & AG Sensors in Inventory - Found in order.
B. 18 nos. LIN modules are defective – Need replacement.
C. One Air Gap Sensor connection leads snapped – Needs replacement.
D. Main Processor (ZPU 16) of all three units are defective - Need replacement with ZPU 5000.
E. ZOOM 7 Suite diagnostic software need to be provided with ZPU 5000.

Based on the above inputs NCEPL is now submitting a proposal for Upgradation of AGMS unit for all 03 units of existing Teesta V with replacement of defective components like LIN modules (Signal Conditioner), main processor ZPU 5000, Zoom Software and components which needed for upgradation

4. Proposed Solution

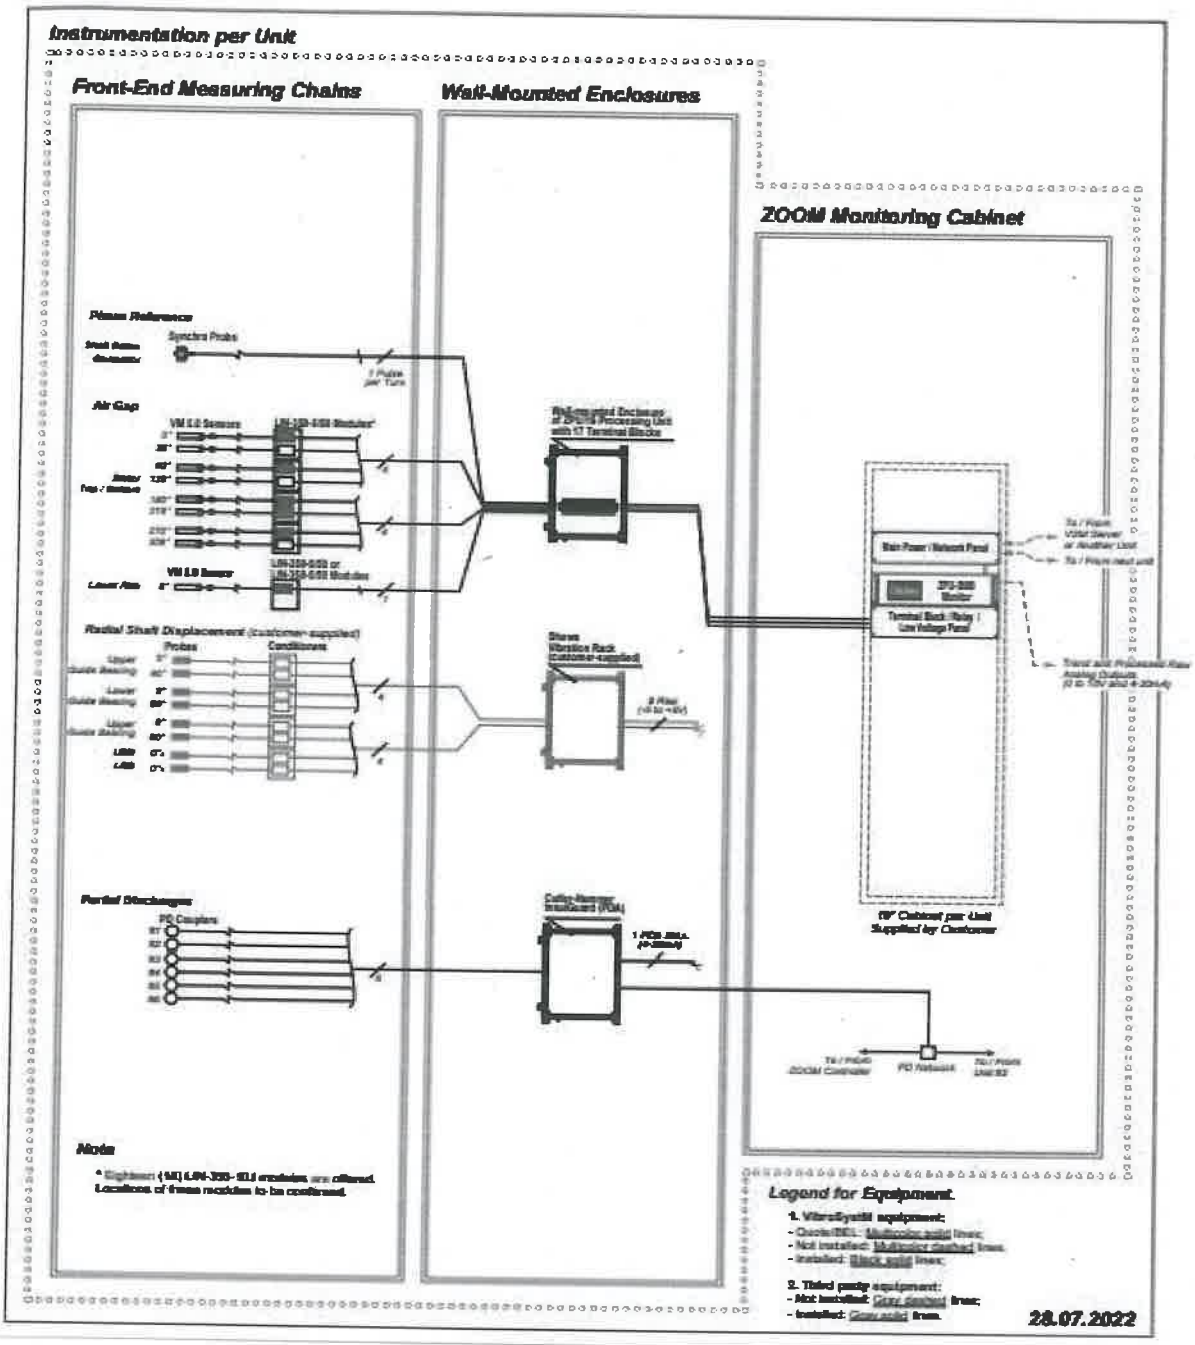
NCEPL proposes overall up gradation of the system with the existing Air Gap sensors and LIN modules which are operational will be integrated with the new LIN modules and ZPU 5000 units. The LIN modules are to be integrated with the ZPU 5000 unit. The ZPU 5000 units shall be further connected to a central server complete with ZOOM watch suite of diagnostic software as shown in the schematic below.

Besides the installation & Commissioning, NCEPL will supply the essential hardware required for the up gradation as per BOM.

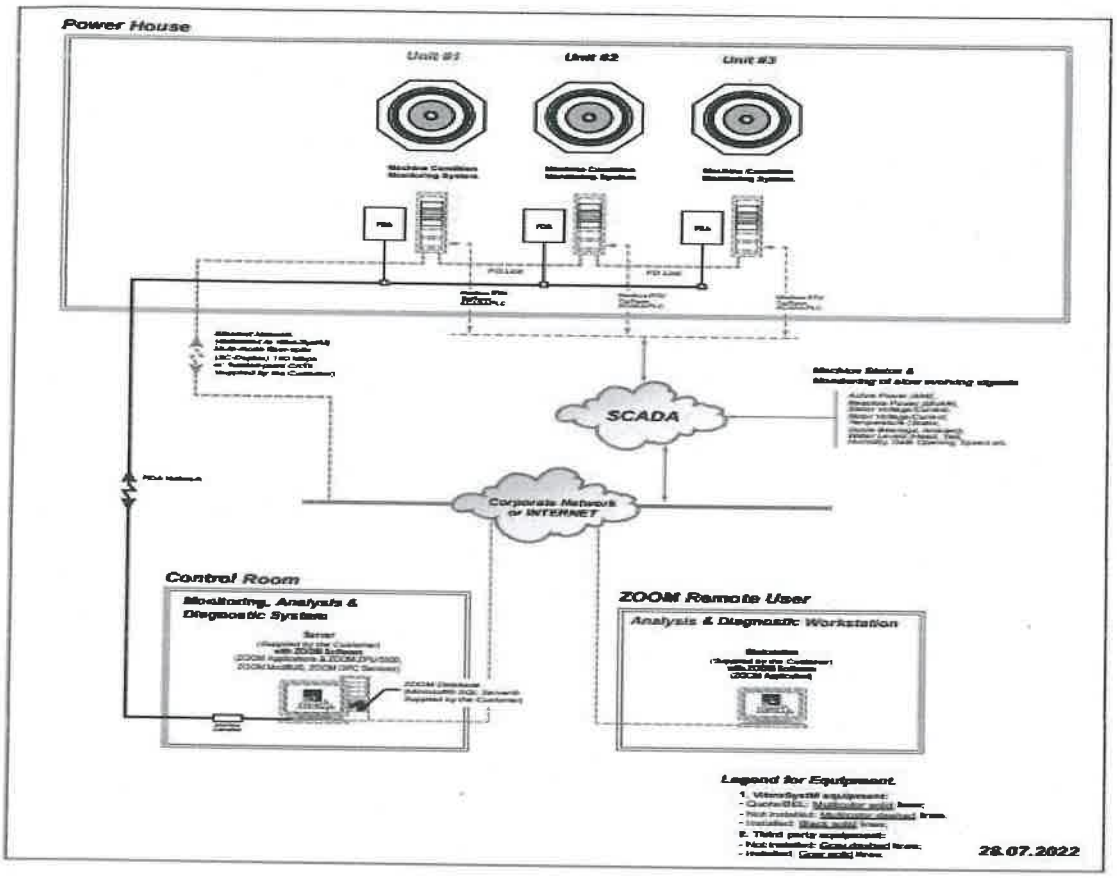
Points Considered During Proposal Preparation:

- The Air Gap Sensors & all accessories of existing Units, which are healthy and fit for I&C as found during last inspection will be kept intact in the system.
- All the existing & healthy communication & Signal cables will be used during upgradation.
- 19" rack mount cabinet is available in the control room for ZPU installation.
- Single phase 220V AC supply and UPS should be available in the rack cabinet.
- Internet access should be made available for required communication.
- Accommodation & Local Conveyance for 3 NCEPL Personnel shall be customer responsibility.
- Local Labour (1 skilled+ 2 unskilled) support during Installation to be provided by NHPC.
- The cable laying from LIN to ZPU (if required) shall be the responsibility of NHPC under NCEPL supervision.

5. Schematic Diagram



NHPC LIMITED
FARIDABAD



6. Roles & Responsibility

NCEPL along with its OEM, M/S VibroSystM will provide all support in respect of supply, upgradation, commissioning and troubleshooting of AGMS system in Teesta V as per the responsibility matrix shown below and as per the assumptions listed above. However, it requires a dedicated support from NHPC team to successfully implement the project. The respective roles and responsibilities of both the parties are given below.

Sl no	Activity	NCEPL/VibroSystM	NHPC
1	Assigning a Project Manager for the project	X	X
2	Supply of all hardware as per the BOM	X	
3	Supply of ZOOM Monitoring Software	X	
4	Database management software		X
5	Server	X	
6	Engineering drawings	X	
7	Design, fabrication and installation of sensors brackets	X	
8	Unloading, Receipt of Materials at Site and Safe Storage of Materials & Issue of the same for installation		X
9	Installation of Hardwares, Panels, Sensors, Cable laying	X	X
10	Supervision of Installation of wall mounted enclosures/protection boxes, cabling, terminations	X	
11	Tech. staff (1 person), skilled technicians (2 persons) and unskilled labor (2 persons) for installation and cabling work		X
12	Light electrical hand tools (hand drill, heat gun, Arc & Gas Welding set)		X
13	Lodging at NHPC Guest House		X
14	Local transport from Guest House to work site		X
15	Providing Internet connection & Access to other systems as required		X
16	Participate in Unit Testing & SAT	X	X
17	Issuance of completion certificate		X

NHPC LIMITED FARIDABAD

7. Prices, Commercial Terms & Conditions:-

Basic Price for AGMS Upgradation of Teesta V, Unit # 1, 2 & 3:

Item No.	Item Description	Qty	Price in Rs.
	Spare Parts		
1	*Conditioner LIN-350-10J-5/50 with SMA/BNC adapter*	18 nos.	
2	*LIN-200 to LIN-300 adapter hardware* *IMPORTANT NOTES:* *- The above LIN-350-10J-5/50 conditioner is compatible ONLY with VM5.0 airgap sensor (P/N: 9101-09050-11x) and triaxial cable (P/N: 9128-10E70-51x);* *- Fifteen (15) LIN-200 to LIN-300 adapter kits of twenty-seven (27) required have been supplied in the past, therefore only twelve (12) kits are offered.*	12 nos.	**1,01,00,000.00 (One Crore One Lakh Only)**
	Measuring Chains		
3.1	Cable / 4 conductors shielded "Zero-Halogen" –AWG 22	3 lots	
3.2	4 levels terminal block, gray,AWG24-10, 6.2mm width	51 nos.	
3.3	End cover for terminal block type PT 4-PE/3L, grey		
	Acquisition & Protection		
4.1	ZPU-5000 Multi-channel processing instrumentation & monitoring / protection unit	3 nos.	
4.2	Communication module	3 nos.	
4.3	Control Module	3 nos.	
4.4	"2-Ch." Air Gap Input Module (LIN)	15 nos.	
5.1	3U terminal block panel with power supply for measurement chains and relays	3 nos.	
5.2	3U Main AC / DC and Auxiliary AC / DC Power Supply Panel	3 nos.	
	Software		
6	ZOOM 7 Software Suite Includes ZOOM Software Applications (Database management system not included)	1 set	
	Engineering, Supervision of Installation & Commissioning Services	3 Units	**18,00,000.00 (Eighteen Lakh Only)**

Delivery Period –20 weeks from the date of PO for Supply Items needed for Upgradation and 45 days for Installation & Commissioning after receipt of materials at site.

Taxes & Duties –The above prices are on FOR site basis and inclusive of packing & forwarding but exclusive of GST which shall be charged at prevailing rate (18%)

Payment Terms –

- 90% payment against Supply Items to be made within 15 days of receipt of materials at Site and balance 10% payment to be made against completion of I&C.
- 100% payment of I&C charges to be made within 15 days from the date of completion of Installation & commissioning work.

Warranty Clause –There shall be a warranty of 18 months from the date of supply and 12 months from the date of handing over of upgraded Generator Monitoring System, whichever is earlier. Warranty service will be provided for the portion of supply of monitoring system along with installation done by NCEPL.

NHPC LIMITED FARIDABAD

8. Annexure-I

Minutes of Meeting held between NHPC-Teesta V & Navitus Controls & Equipments (P) Ltd. and Vibrosystm's Representative on 22/7/22 after thorough Inspection of Existing Air Gap Monitoring Systems Installed in 03 Generators

Members Presents:

For NHPC- Teesta V	For Vibrosystm & Navitus Controls & Equipment (P) Ltd
Mr. Sakti Narayan Dey	Mr. Ravishek Dixit (Vibrosystm)
Mr. Amit Srivsatava	Mr. Subhamay Sarkar (Navitus)
	Mr. Romit Datta (Navitus)

The Engineers of M/s Vibrosystm and M/s Navitus Controls & Equipment (P) Ltd arrived at Teesta-V Power Station on 22.07.2022 for Checking of Air gap monitoring system installed at Teesta-V Power Station.

Since then AGMS units are in operations but the main processor unit i.e. ZPU 16 need to be replaced with ZPU 5000 & ZOOM-7 work station compatible with ZPU 5000.

At present some AGMS sensors were not showing air gap data owing to defects in LIN module / defects in Air Gap Sensor integrated wire.

During the visit, 18 nos. of LIN Modules were found faulty. 8 nos. of Lin Module in Spare Inventory were checked and found in healthy condition.

In 03 Generators, all the AG Sensors and LIN Modules were inspected and data were collected for analysis at Vibrosystm's end. After scrutiny of collected data, Vibrosystm will offer suggested BOM for complete upgradation and techno-commercial offer will be submitted by Navitus Controls & Equipment (P) Ltd accordingly.

PS to HMoP & NRE/ PPS to Secretary (Power)/ Sr. PPS to AS (Hydro)/ PPS to JS (Hydro)/ Director (H-I)/Director (H-II)/ DD (H-II)/ DD (NHPC)

Minutes of the Meeting to review Early Warning System (EWS) against flash floods in Hydro Electric Projects held under the Chairmanship of Hon'ble Minister of Power & NRE on 18th October, 2023, 4:45 pm onwards at Shram Shakti Bhawan, New Delhi.

The List of Participants is enclosed as **Annexure-I**

Initiating the discussion, Hon'ble Minister of Power & NRE stated that during the meeting held in Nov, 2021, he had directed to implement Early Warning System (EWS) in Hydro Electric Projects so that forewarning of floods, avalanches etc can be available and prompt advance action can be taken to minimize the loss of lives and properties. Hon'ble Minister inquired about the status of implementation of EWS.

2. Member (Hydro), informed that CEA has identified 47 vulnerable Hydro Electric Projects (HEPs) and these HEPs are either first HEP located in the basin or in the upper reaches of the Himalayas. The Short Term measures have been fully implemented in 35 HEPs, partially implemented in 2 HEPs and yet to be implemented in 10 HEPs. He informed that a SOP was prepared by CEA and forwarded to developers to implement EWS in two phases. In Phase-1 the developers were to implement Short Term Measures at the earliest and in Phase-II they were to implement Long Term Measures.

3. Member Hydro, CEA, further stated that in Teesta-III HEP, the developer was in the process of installing comprehensive EWS, however the developer had installed manual early observation station in upstream of Lachen River, and had tied up with Sikkim Power Development Corporation and CWC sites for sharing data. HMoP directed that Action Taken on the directions regarding installation of EWS/sensors may be sought from the Developer of Teesta-III.

4. CMD-NHPC apprised that Teesta-V is second project in the basin and, hence, sensors have not been installed. However in their 12 projects, where they are first in basin, they have installed necessary EWS and they are receiving real-time data from all the HEPs in their control room located in Faridabad.

5. Hon'ble Minister directed that sensors along with video cameras may be deployed at glacier sites for continuous monitoring of the movement/shift in glaciers/water bodies. The sensors should be deployed for monitoring the precipitation of snow, the snow carrying capacity (i.e. the max size of formation after which snow slides), depth measurement of lake, severity of snow at mouth of lakes, satellite imagery etc. An SoP should be prepared by CEA on specification of the sensors with reliable power supply, their placement, interpretation of information from sensors, types of alarm systems to be installed, collection of data on time frame during which avalanches etc. are more likely to happen. The SoP should also include measures like actions to be taken on receiving of alert/alarm, automatic siren system, instantaneous/automatic opening of gates, evacuation of manpower from tunnels, fluorescent direction indicators, exit lights in tunnels etc. The responsibility of each person should be defined clearly in the SOP. HMoP directed that 'Exit' should be properly marked.

6. Hon'ble Minister further directed that all the project developers in a particular basin shall share their contribution towards costs incurred in installation of the system/sensors throughout the basin. Guidelines shall be issued by CEA for sharing of cost among the project developers. CEA would also carry out physical inspections on half yearly basis to review the status of implementation of EWS in Hydro Power Projects. Further the status of implementation of EWS in HEPs should be reviewed in the Ministry on a quarterly basis. He also directed to review implementation of EWS in under construction projects.

NHPC LIMITED FARIDABAD

7. Hon'ble Minister expressed his concern on washing away of Teesta-III Dam and directed CWC and CEA for a thorough investigation regarding approval/clearance given for the project. Secretary (Power) remarked that the dam was initially planned as a concrete dam, however, it was constructed as a rock-filled concrete dam. Hon'ble Minister inquired from CWC and CEA the reasons for allowing rock filled dam. Secretary, MoJS apprised that National Dam Safety Authority (NDSA) would examine all the aspects of dam safety in this incident and shall give its report. Hon'ble Minister suggested that it should be recorded in the SOP that the first dam in every basin should be a concrete dam based on a solid rock formation and shall be constructed at least 15-20 kms away from the glacial lake mouth so as to have sufficient lead time for responding to the situation and for evacuation of men and equipments/machineries.

8. Hon'ble Minister emphasized that acquisition of satellite imagery by the projects from concerned agencies and its interpretation should be included in the SoP and an institutional mechanism should be established in this regard. The officials deputed for interpreting the satellite imagery shall inform about the increase in size of lake and other activities so that necessary action can be taken. Hon'ble Minister directed CEA to work upon calculating a safe distance from the glacier for setting up a project in a basin, so that information regarding lake burst etc. is received in time.

9. Director (Projects), NTPC gave an overview of the EWS installed at Tapovan Vishnugad Hydro Electric Project (TVHEP). He mentioned about various sensors for measurement of water level and flow, Command and Control Centre and monitoring station.

10. Chairman, BBMB informed that BBMB was the first organization to install EWS in its projects in 2015, by installing sensors/gauges to read the height of snow fall, rain fall, discharge and its velocity. He said that the Probable Maximum Flood (PMF) of Bhakra dam at present is almost double that of the originally calculated when the dam was constructed. HMoP directed that CWC may examine the factors that are responsible for the rise of PMF and a report be submitted.

11. Director (Electrical), SJVNL informed about the sensors installed by them and the bulk alert SMSs being sent on opening of gates. Hon'ble Minister recommended that the projects should release some water beforehand when rainfall is anticipated to avoid sudden release of large amount of flow after rainfall.

12. Chief Secretary (Sikkim) informed that road connectivity with three major towns Lachen, Lachung & Chungthang in Mangan district has been disrupted, which might take 2-3 months to restore. Power system has been restored. Telecommunication with Lachen is still disrupted. He suggested that AI based automated gate opening system can be installed. The communication between the projects in the same basin may be improved. He added that special hooters may be installed. He further observed that the control rooms are being manned by junior rank officers.

13. Dr. N. Purnachandra Rao, Chief Scientist (Retd.), NGRI-Hyderabad informed that they are working on an EWS which can recognize, locate and track the flood as it moves. They are developing an algorithm to recognize whether it is a landslide, avalanche or glacial burst, flood etc. so that alert can be conveyed in time. HM desired that a presentation in this regard may be given by NGRI during the next meeting.

NHPC LIMITED FARIDABAD

14. Dr. R.J. Perumal, Scientist-F from WIHG-Dehradun requested that WIHG may be given opportunity for upper catchment monitoring for glacial sites, as they have already developed glacial lake inventory. HM desired that representatives from WIHG may be present in the next meeting.

15. Following **action points** emerged from the discussion:

i. CEA to prepare comprehensive Standard Operating Procedure(s) (SOP) covering all the aspects including the identification, specification of sensors, pre-incident actions, automated gate opening in each project, gradation of hooters, level of in-charge & manpower to be deployment in the control rooms of the project sites and regular reviews by CEA.

ii. Developer of Teesta-III Project may be asked to furnish the Action Taken on previous directions of CEA/MoP on installation of EWS/sensors.

iii. Guidelines to be issued by CEA for sharing of costs among the project developers for installation of the EWS/sensors in a particular basin.

iv. CEA and CWC to conduct investigation regarding approval/clearance of the Teesta-III dam in Sikkim including the type of dam sanctioned and the reasons for allowing rock filled concrete dam.

v. CEA to carry out inspections on half yearly basis to review the status of implementation of EWS in Hydro Power Projects. Implementation of EWS in under construction dams should also be reviewed.

vi. CEA and CWC to work upon calculating a safe distance from the glacier for setting up the first project in a basin which should be a Concrete Dam.

vii. CWC to examine the factors responsible for the rise of Probable Maximum Flood (PMF) in Bhakra and submit report after considering extreme events like GLOFs, Avlanches, heavy rain fall, cloud bursts etc.

viii. Project developers to explore the possibilities of collaborating with various agencies for obtaining satellite imagery on daily basis during critical period.

ix. Status of implementation of EWS in HEPs to be reviewed by the Ministry on quarterly basis.

x. CEA alongwith the Developers to prepare basin-wise presentations for subsequent meetings.

xi. Representatives of NGRI-Hyderabad and WIHG-Dehradun to be present and make a presentation during the next meeting.

xii. Next Review Meeting should be organized at MoP after three months.

The meeting ended with a Vote of Thanks to the Chair.

Subject: Regarding Upgradation of Control System (Electronic part) of Turbine Governor

Sir,
We are in receipt of offer for spares and offer for upgradation of existing Turbine Governor Control system (Electronic Part). We need following clarification regarding this:-

1. **The HMI Panel is windows XP OS based. Is it possible to retain the system and upgrade the operating system of the HMI.**
2. **Weather M/s Toshiba is ready to supply spares of existing Electronic Control System?**

-

Toshiba Reply: The existing Teesta-V Governor regulator is adopting TOSMAP-GS/R series, which is obsoleted modules and currently out of production and the same had been informed to NHPC in past. So, we will not be able to provide any technical services (Software upgrade/modification etc.) or supply any spare.
Due to advancement in technology, we have introduced TOSMAP DS/LX which we implement with Window 11 based OS. Therefore we would like to replace the existing system with our latest TOSMAP DS/LX based Governor Control System.

3. **If we are going for the replacement of Electrical Control System is there any need of change in hydraulic system?**

-

Toshiba Reply: Please refer our techno-commercial proposal submitted in Feb.,2024 for upgradation of Turbine Governor Control System and Spare parts for hydraulic system.

i. We need to upgrade the LVDTs (in hydraulic system) for Main Distribution Valves and Servo Motors as the existing LVDTs are not compatible with proposed governor control system (TOSMAP DS/LX).
ii. We also recommend upgrading the exiting Convertor PG901, which is although compatible with proposed governor control system (TOSMAP DS/LX), however discontinued model.

1588

The above recommendations are also mentioned in our proposals submitted.

NHPC LIMITED FARIDABAD

4. **We are going for upgradation of SCADA system. Technical support will be required from the OEM. Consent of M/s Toshiba is requested.**

Toshiba Reply: Kindly be noted that being OEM, we don't advice upgradation of existing SCADA system /Governor control system by any other Agency, Non-OEM due to complex system integration of the entire power plant. Therefore, we regret for such technical support to any third party.

Please provide us the clarification and optimum solution for the same.

Thanks and Regards.

Statutory Alert:
1. The authenticity of this Stamp Certificate should be verified at 'www.shcilestamp.com'. Any discrepancy in the details on this Certificate and as

1. The Claimant M/s Gammon India Ltd. is a Public Limited Company having its registered office at Gammon House, Veer Savarkar Marg, Prabhadevi, Mumbai – 400025.
2. The Respondent M/s NHPC Ltd. (formerly known as National Hydroelectric Power Corporation Ltd.) is a Company wholly owned by the Government of India and having its registered office at NHPC Office Complex, Sector 33, Faridabad - 121003 (Haryana).
3. This is an arbitral award with regard to the contract agreement for Package Lot-TT-III of the Teesta Hydro Electric Project for the installed capacity of 3 x 170MW in the 5th stage of River Teesta Basin Development Plan in East District of Sikkim.
4. This contract was signed by and between the parties on 21.03.2001. The contract value was Rs.348,95,11,700.00. The date of commencement of work was specified as 23.03.2001. The period of completion was stipulated as 2,040 days. Accordingly the date of completion was specified as 22.10.2006. The work has been completed on 25.01.2008, the extension of time has been granted for 782 days i.e. upto 12.12.2008. The scope of the work under the contract included the construction of :
   (i) Middle Portion of about 13810m length of 9.5m, finished diameter horse-shoe shaped Head Race Tunnel (HRT).
   (ii) 3 Nos. Adits, 2, 3 & 4 of length approximately 370 m, 400 m and 270 m respectively.
5. During the currency of the contract certain disputes arose between the parties. As per the Claimant, it encountered certain adverse geological conditions right from the commencement of the work which had not been foreseen by it from the bid document. The Claimant had stated that he had been referring the same to the Respondent from time to time. Later, the Claimant submitted his claims for compensation for the consequences arising due to adverse geological conditions on 21.03.2007. The claims were rejected by the Respondent on 18.04.2008. The Claimant registered his dis-agreement with the decision of the Respondent and issued a notice; vide his letter dt.26.07.2008, to the Engineer for resolution of the dispute under GCC Clause (GCC Cl.) 67.1. Engineer reiterated, vide his letter dt.26.07.2008 and communicated the stand already taken in his aforesaid letter dt.18.04.2008 and rejected the Claimant's contention. Accordingly, the Claimant

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L. Kotwal) Arbitrator

(N.N. Singhal) Arbitrator

referred the matter for Arbitration under clause 67 of the contract vide his letter dt.30.07.2008.

6. The Claimant / Gammon India Ltd. (GIL) nominated Sh. N.N. Singhal as Arbitrator on 30.07.2008. The Respondent/NHPC Ltd. nominated Sh. S.L. Kotwal, as Arbitrator on 08.10.2008. Both the Arbitrators after consulting each other and with mutual consent appointed Sh. V.K. Tyagi as Presiding Arbitrator. Thus, the constitution of the Arbitral Tribunal (AT) was completed. AT entered into reference of present Arbitration vide Presiding Arbitrator's orders dt.10.11.2008. First arbitral hearing was held on 16.12.2008 in which the procedure for conduct of arbitral proceedings, time schedule for submission of documents and the issues regarding payment of Arbitrator's fees and other expenses were decided. The following schedule for submission of document was decided:

S.No.	Particulars	Date
1.	Claimant's Statement of Claim (SOC)	31.01.2009
2.	Respondent's Statement of Defence (SOD)	31.03.2009
3.	Claimant's Rejoinder	30.04.2009

7. The Claimant submitted its SOC on 16.03.2009 in 7 no. volumes. The Respondent submitted their Statement of Defence (SOD) in the 2nd hearing held on 08.09.2009. No counter claims were filed. However, certain preliminary objections were filed by the Respondent through the SOD. After deliberations in the same hearing, the Respondent's counsel agreed that they may be taken up when the case is heard on merit. The Rejoinder was submitted by the Claimant in the 3rd arbitral hearing held on 07.11.2009. The list of documents filed by the parties is as below:

Volume no.	Particulars	From page to page
1C	SOC with following documents	1 to 68
2C	Documents No.C_1 to C_{15}	1 to 313
3C	Documents No. C_{15} to C_{234}	314 to 915
4C	Documents No. C_{235} to C_{367}	916 to 1257
	Documents No. C_{368} (Detailed Geo-technical report by Mr. Rodney D.Shaw)	
5C	Volume-1	1258 to 1428
6C	Volume-2	1479 to 1606
7C	Volume-3	1608 to 1911 (there is no page 1607)
R1	Respondent's SOD	1 to 78
8C	Claimant's Rejoinder	1 to 47

Arbitrator

8.1 The Claimant, in his SOC, has given brief history of the construction under the contract. Some of the salient features of the same are narrated below:

(i) The date of commencement of the work was given as 23.03.2001. However, there was some delay owing to late handing over of the site and approach road. Accordingly, the work on the adits was commenced as below:

(a) Adit-2 09.05.2001

(b) Adit-3 31.05.2001

(c) Adit-4 23.07.2001

(ii) As per the contract, the work was scheduled to be completed within 2,040 days (67 months). However, the Respondent, during the currency of the contract, desired the Claimant for completion of the work within 1,826 days (60 months). The Claimant, showed its inability, vide their letter dt.08.05.2001 (Exh.C-30) to agree to the same without payment of additional cost

(iii) The detailed proposal for acceleration of the work for early completion including cost was submitted by the Claimant on 01.09.2003 vide Exh.C-108.

(iv) The Claimant states that on instructions from the Respondent, the acceleration measures were initiated by the Claimant while the discussion for reaching agreement on payment of additional cost were in progress. However, the progress of work in the Head Race Tunnel (HRT) was severely affected by various other reasons mainly due to extremely adverse geological conditions encountered resulting in cavity formation, loose falls, failure of supports, change in blasting pattern, reduction in rate of pull, increased seepage etc. The time for completion of the work, therefore, had further increased from that foreseen as per the accelerated programme.

(v) The Claimant submitted different applications for determining entitlement to extension of time due to various reasons.

(vi) The Claimant revised the cost of taking acceleration measures and submitted the revised cost estimate on 22.01.2008 for the amount of Rs.125.00 crore.

(vii) The Claimant states that after prolonged discussions, the Respondent released a payment of Rs.9.81 crores on 02.02.2009 towards the cost of

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L.Kotwal) Arbitrator

(N.N. Singhal) Arbitrator

acceleration measures taken against the demand of Rs.125.00 crores as claimed by the Claimant on 22.01.2008.

8.2 The Respondent had admitted the various dates of start of the work on adits as above. However, it is stated that the Claimant was not diligent in performing its work; the office of the Claimant at site started working from 24.04.2001. The drawing of the portal was issued by the Respondent on 04.05.2001. The Engineer-in-Charge (EIC) of the work asked the Claimant, on 01.05.2001 to nominate an officer who was nominated by them on 13.05.2001. The Claimant obtained explosives and labour license on 17.05 2001 & 31.05.2001 respectively. As per the Respondent, it is the Claimant who delayed the start of the work.

9. The parties, on directions from AT, exchanged admission & denial of documents of each other in the 4th arbitral hearing held on 12.12.2009. The Claimant submitted the affidavit dt.16.02.2010 of Sh. Ashish Gupta, the then DGM of the Claimant in support of the documents denied by the Respondent. The Respondent also submitted the affidavit dt 17.02.2010 of Sh. Asfaque Ahmed, Engineer (Civil) of Teesta Power Station (Stage-V) of Respondent Company. The Respondent had denied few documents filed by the Claimant. After deliberations, it was agreed in the 7th hearing on 14.04.2010 that documents bearing no.C-114, C-128 and C-240 filed by the Claimant with their SOC shall not be considered and are not taken on record.

10 In the 4th hearing held on 12.12.2009, on the basis of suggested issues and after deliberations with the parties, the following issues were framed:

(1) Whether the claims are contrary to the provisions of the contract, more particularly to clause 53.1 of the General Conditions of Contract?

(2) Whether the bidders were required to place bids on the data/information provided in the bid documents or each of them was required to develop their own data and information for submission of bids?

(3) Whether the adverse geological conditions/circumstances encountered by the Claimant were unforeseeable? If so, consequences thereof.

(4) Whether the Claimant in execution of the works has followed the instructions/ approvals and technical specifications stipulated in the contract?

(5) Whether the Claimant is entitled to payment as claimed on account of additional cost for dewatering during construction due to increased seepage and fractured rock?

(6) Whether the Claimant is entitled to payment as claimed on account of additional cost of underground excavation due to cycle time?

NHPC LIMITED FARIDABAD

(V.K Tyagi) Presiding Arbitrator

(S.L Kotwal) Arbitrator

(H.N. Singhal) Arbitrator

(7) Whether the Claimant is entitled to payment as claimed on account of additional cost of rock stabilisation and supports?

(8) Whether the Claimant is entitled to payment as claimed on account of additional cost of shotcrete?

(9) Whether the Claimant is entitled to payment as claimed on account of additional cost of concrete?

(10) Whether the Claimant is entitled to payment as claimed on account of additional cost due to loose fall?

(11) Whether the Claimant is entitled to additional cost as claimed on account of rib rectification as claimed in Part B items 1 and 3?

(12) Whether the Claimant is entitled to additional cost as claimed on account of smaller segment of gantry?

(13) Whether the Claimant is entitled to additional cost as claimed on account of heading excavation from F-3 to F-4 and F-6 to F-5?

(14) Whether the Claimant is entitled to additional costs as claimed on account of gantry dismantling and re-erection?

(15) Whether the Claimant is entitled to additional cost on account of ventilation ducts?

(16) Whether the Claimant is entitled to additional cost as claimed on account of benching in segments/stage wise?

(17) Whether the Claimant is entitled to additional cost as claimed on account of additional lead costs for Face-3 and For Face-6?

(18) Whether the Claimant is entitled to additional cost as claimed on account of additional cost due to small segmental gantry?

(19) Whether the Claimant is entitled to additional cost as claimed on account of excessive consumption of gelatine?

(20) Whether the Claimant is entitled to additional payment as claimed on account of idling of resources?

(21) Whether the Claimant is entitled to interest as claimed by it? If so, at what rate?

(22) Which party is entitled to cost? And to what extent?

11. The Claimant tendered the affidavit dt.16.02.2010 and 29.04.2010 of Sh. Ashish Gupta, CW-1. He was cross-examined by the counsel of the Respondent from 13th arbitral hearing held on 28.09.2010 to 25th hearing held on 20.02.2012. The Respondent tendered the affidavit dt.18.11.2011 of Sh. Sarvesh Mishra the then Senior Manager (Geology), Teesta-IV HE Project, Balutar (East Sikkim) NHPC Ltd. who was cross-examined by the counsel of the Claimant from 26th hearing held on 21.02.2012 to 29th hearing held on 06.07.2012. During cross-examination, witnesses of both the parties submitted additional documents which were taken on record.

12-A. During the currency of the contract, a number of extensions of time for completion of the work were granted which has also been confirmed by the Respondent's witness RW-1 during cross-examination. The details of various extensions of time as filed by RW-1 are reproduced as below:

TIME EXTENSIONS OF LOT TT-3 HRT PACKAGE

Sl. No.	Location	Type of delay	Claimed by Contractor (Days)	Recommended by project (Days)	Approved by C.O. (Days)	Remarks
First time extension details (upto October'04):						
1	Adit-III	Delay due to non handover of PWD road	87	0	0	
		Delay due to stoppage of work by local people	63	0	0	
		Delay due to non hand over of land	52	0	0	
		Blockage of Singtam-Dikchu road	46	14	0	Not admissible in terms of clause 62.4 of COPA
		Delay due to transporter's strike	8	0	0	
		Time lost in induction of Tamrock due to road blockage	43	0	0	
		Delay due to increase in contract value	93	31	0	The work in progress. The final contract value is yet to be arrived at. Hence not considered at this stage.
		Damage due to damage of supports for geological surprise	5	4	4	
		Delay due to invert concrete (change in construction programme)	15	5	0	The work in progress. The final contract value is yet to be arrived at. Hence not considered in this stage.
			392	54	4	
2	Face-IV	Erection of wall beam	65	21	10	Delays excluding overlapping period. Extension is considered in terms of clause 44.1(d) of COPA.
		Stoppage due to unforeseen geological reason	210	192	192	
		Delay due to damage of supports due to geological surprise	3	3	1	Delays excluding overlapping period. Extension is considered in terms of clause 44.1(d) of COPA.
			284	216	203	
3	Face-V	Erection of wall beam	98	33	27	Delays excluding overlapping period. Extension is considered in terms of clause 44.1(d) of COPA.
		Stoppage due to unforeseen geological reason	147	142	142	
		Damage due to geological surprise	1	1	1	
		Delay due to damage of supports due to geological surprise	35	1	0	
			279	177	170	
		TOTAL	676	370	207	upto 17.05.2007
Second time extension details (beyond October'04):						
1	Face-IV	Loosefall due to heavyrain at adit-III	6	0	0	
		Cavity treatment from RD 966m to 986m	210	15	2	Delays excluding overlapping period. Extension is considered in terms of clause 44.1(d) of COPA
		Cavity treatment from RD 1475m to 1500m	330	300	102	
		Delay due to increase in contract value	93	93	93	
		Slow progress in benching and concrete lining & twisting/buckling of ribs.	83	0	0	
		TOTAL	722	408	197	upto 30.11.2007
Third time extension details (beyond October'04):						
1	Face-IV	Loosefall due to heavy rain at adit-III	9	0	0	
		Cavity treatment from RD 966m to 986m	15	0	0	Delays excluding overlapping period. Extension is considered in terms of clause 44.1(d) of COPA.
		Cavity treatment from RD 1475m to 1500m	300	0	0	
		Delay due to increase in contract value	300	0	0	
		Slow progress in benching and concrete lining & twisting/buckling of ribs.	83	0	0	
		Already approved in first T.E.	207			
2	Face-VII	Collapse in Face-7 (RD 2027-2057m)		35	35	Delays excluding overlapping period. Extension is considered in terms of clause 44.1(d) of COPA.

12-B. During cross-examination of CW-1, it was noted that some work was allotted by GIL to a sub-Contractor, M/s Coastal. The sub-Contractor was allotted the work of 3.5 Km Heading + 4.5 Km Benching + 4.5 Km. Concrete lining of HRT with a proportionate cost of Rs. 85.0 crores. Sub-Contractor worked w.e.f. 06.02.2002 till April 2004 and could complete 1 Km. (approx.) heading costing Rs.20.7 crore (including price variation) only. As the sub-Contractor was not able to work due to geological conditions, its sub-contract was foreclosed without any further loss / levy of cost on the sub-Contractor Thereafter, the sub-contracted work was taken over by GIL itself.

12-C It has also been brought on record that GIL was asked by NHPC to execute additional 209 M tunnelling beyond the scope of the work under the contract as another Contractor to whom the work had initially been allotted was not able to do the job.

13. When the arbitral proceedings were progressing, the Claimant filed an application dt.13.04.2011 intimating AT that both the parties are exploring possibilities of an amicable settlement of the issue and expect some decisions shortly and in view of the same. AT was requested to defer the arbitral proceedings for a period of 3 months. However vide their letter dt.15.04.2011, the Claimant withdrew their letter dt.13.04.2011 and requested the AT to continue with the proceedings as scheduled earlier. The proceedings were accordingly continued by AT.

14. As detailed in para 11 above, the cross-examination of the witnesses was over by 06.07.2012. The Claimant's counsel started his arguments on the merit of the case in the 30th hearing held on 07.07.2012 and concluded the same in the 37th hearing held on 28.11.2012.

15. The Respondent, in the 38th hearing held on 18.01.2013 filed an application for discovery of some documents. The same was replied by the Claimant on 28.01.2013. The Respondent filed certain documents regarding their application on 15.02.2013. The matter was argued by the counsel of the parties in the 40th hearing held on 15.02.2013. After they had completed their arguments, AT held its internal meeting on 16.02.2013 and directed the parties to file the written brief of their arguments in the matter of this application. The written submissions on this matter were filed by the Claimant on 13.03.2013 and from the Respondent

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(N.N. Singhal)
Arbitrator

on 23.03.2013. Later, AT had its internal meeting on 08.04.2013 and delivered its decision. The operative part of the AT's decision is reproduced as below :

> 1- *The AT has considered all the pleadings, arguments, evidence and citations placed before it. The AT is of the opinion that the adjudication of the present dispute before it required two steps to be followed:*
>
> *(i) Adjudication of the claim on the merits to establish the admissibility of the claim under the provisions of the contract and the law;*
>
> *(ii) The quantification is required to be examined if the claim is found to be valid on the contractual and legal basis*
>
> 2- *The tenability of claim is yet to be adjudicated by the AT. It is only that the Claimant has submitted their oral arguments. The Respondent is yet to start their arguments on the admissibility of the claim.*
>
> 3- *Under these facts & circumstances, the Respondent may take up their contention for quantification of the amount at the appropriate stage in the arbitral proceedings.*
>
> 4- *It is made clear that AT's these views shall not be taken as any reflection on the merit of the case from either side. The parties may submit their case on the merit as deemed fit by them. The arbitral proceedings shall continue as before*
>
> 5- *The Respondents' application dt.18.01.2013 is disposed off accordingly leaving the parties to their own cost.*

16 AT accordingly decided that the arbitral proceedings shall be continued and the Respondent was directed to commence their arguments in the hearing already fixed for 09.04.2013.

17. However, the Respondent, in the 43rd hearing, filed an application dt.08.07.2013 u/s 27 of Arbitration & Conciliation Act, 1996. In this application, citing AT's decision dt.08.04.2013, the Respondent made the following prayer:

> *(a) Allow the present application and permit the filing of an application by the Respondent under section 27 before the appropriate Court for obtaining the evidence corresponding balance sheets of the Claimant pertaining to the Teesta V project for the year 2001-2002 till 2007-2008 either from the Office of the Registrar of Companies or from the authorities of the State of Sikkim; and*
>
> *(b) Pass such other and further orders as are deemed fit and proper in the facts and circumstances of the case.*

18. The Claimant filed their reply vide their application dt.25.07.2013. In this application, the Claimant prayed as below:

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Chhabra)
Arbitrator

(N.N. Singhal)
Arbitrator

1. *In the facts and circumstances it is submitted that the present application filed by the Respondent merits dismissal and accordingly be dismissed based on the AT's order dated 08.04.2013.*
2. *The documents to be submitted as above shall be taken on records upon submission. However maintainability of the claim be judged based on the contract conditions and the Respondent's default resulting into additional cost to the Claimant.*
3. *The Respondent may please be imposed with the cost for delays arising due to frivolous application.*

19. The matter was taken up for deliberation in the 46th hearing held on 29.07.2013. In view of the Claimant's submission that they shall be submitting the copy of contract revenue and expenditure summary for the period commencing F.Y. 2001-02 to F.Y. 2007-08, duly certified by the Auditors within next 15 days, the Claimant were allowed time for filing the same by 14.08.2013 and the decision on the Respondent's aforesaid application was deferred till such submission by the Claimant.

20. The Claimant filed an application dt.29.08.2013 vide which contract revenue and expenditure summary of the project certified by the Auditors for the period F.Y. 2001-02 to F.Y. 2007-08 were filed. The matter was taken up in the 47th hearing held on 09.12.2013 when the Respondent stated that they have been able to obtain the annual reports of the Claimant from the Claimant's website and shall be filing the relevant pages for the periods F.Y.2004-05 to 2007-08 within a period of 2 weeks. The Respondent later filed an affidavit of evidence dt.03.01.2014 along with annual report from 2004 to 2008 pertaining to the Claimant as down-loadable from the website, though this information was not accompanied by any certificate u/s 65(B) of the Indian Evidence Act, 1872. The Claimant during the 48th hearing held on 10.02 2014 filed the reply affidavit to the Respondent's affidavit.

21. The Respondent's counsel commenced his reply arguments on merit in the 48th hearing held on 10.02.2014 and concluded the same in the 60th hearing held on 22.08.2014.

22. The rejoinder arguments were advanced by the Claimant's counsel from the 60th hearing held on 22.08.2014 to the 64th hearing held on 06.12.2014.

23. The sur-rejoinder arguments and reply thereof were advanced in the 65th hearing held on 03.02.2015 to 69th hearing held on 24.04.2015.

NHPC LIMITED FARIDABAD

24. In the 70th hearing held on 25.04.2015, both the parties have confirmed that they have been given full and equal opportunity to present their respective cases, therefore, with the consent of the parties and their counsel, the arbitral proceedings were closed and the award was reserved. However, both the parties stated that they shall be submitting written synopsis of their contentions. AT allowed the same and directed them to file it, if they so desire by 30.06.2015.

25. The Written Synopsis of arguments was filed by the Claimant on 09.08.2015 whereas the Respondent filed the same on 17.08.2015.

26. During arguments, the following documents were also filed by the parties. They have also been considered by the AT.

S.No.	Submitted by	Particular
1.	Claimant	CWC 'Guidelines for Preparation of Project Estimates for River Valley Projects' March, 1997
2.	Claimant	IS Code 11590 : 1995 (Reaffirmed 2000) 'Guidelines for Working Out Unit Rate Cost of the Construction Equipment Used For River Valley Projects'
3.	Claimant	Report on Petrographic Study of Samples of the Teesta Project by Prof. H.S. Pandalai, Deptt. of Earth Sciences, Indian Institute of Technology, Bombay, Dt.7th April, 2005
4	Respondent	Copy of Sec.211, Companies Act, 1956 with copy of Accounting Standard (AS/7) from page 65 to 83
5.	Respondent	Extract from the book on 'Petrography' An Introduction to the Study of Rocks in Thin Sections by Howel Williams, Francis J. Turner and Charles M. Gilbert, University of California, Berkeley from pages 208 to 214
6.	Respondent on 21.08.2014	A map prepared by Respondent showing Analysis of Geological Data based on Report of Mr. Rodney D.Shaw (Vol.C-7)

27. The parties have filed citation of many court judgments during the arguments by their counsel. They have also been considered by the AT. The list of the citations filed by the parties is as below:

28. The parties have also filed the opinion dt.21.08.2012 of the then Attorney General of India in respect of this contract.

29. The Respondent has filed the copy of another Arbitral Tribunal's order dt.13.01.2010 in the matter of Arbitration between M/s Hydel Construction Pvt. Ltd. Vs State of Uttarakhand. The Claimant has filed the copy of another Arbitral Tribunal's order dt.11.02.2015 in the matter of Arbitration between the same parties and with respect to the same contract agreement.

30. NOW, THEREFORE, the Arbitral Tribunal having considered the pleadings of both the parties, letters, documents, statements, citations of various court judgments and oral and written submissions and after applying its mind to all the material on record makes, delivers and publishes this award in writing hereto.

31. As noted hereinbefore, the issues were framed in the 4th hearing held on 22.12.2009 in the matter with the consent of the parties. The written synopsis of arguments has been filed by the Claimant and the Respondent on 09.08.2015 & 17.08.2015. AT has gone through the synopsis and find that none of the parties has submitted the same issue-wise. Both the parties have filed the synopsis of arguments in a narrative form. Some of the points, which were neither included in the pleadings nor even argued have also been mentioned in these synopsis. AT

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L.Kolwal)

(N.K. Singhal)
Arbitrator

has carefully and after applying its mind considered the matter issue-wise as below:

32. Before taking up the issues as framed on merit for consideration in the matter of present case, AT considers it appropriate to deliberate and decide the following additional points which were raised by the Respondent's counsel at the very commencement of his arguments. These points were not made part of the framed issues but have been raised by the Respondent's counsel separately. Accordingly, they are being discussed and decided first before proceeding any further.

A. **REGARDING DISCOVERY AND PRODUCTION OF DOCUMENTS:**

As narrated hereinbefore, the Respondent had filed an application dt.18.01.2013 for discovery and production of documents. AT had decided this application vide its order dt.08.04.2013. In this order, AT had noted that it is of the view that for the reasons to be given in the award, that the discovery/production of documents as sought by the Respondent in their application dt.18.01.2013 is not relevant for maintainability of the claim petition. Accordingly, AT decides the matter as below.

(i) In the application dt.18.01.2013 filed by the Respondent, it was submitted as under:

a. That the actual figures regarding the amounts the Claimant would have actually spent on the work of the Project will be available in the audited accounts maintained by them for the Teesta V project over the years. They must have been filing these accounts before the Ministry of Company Affairs also in terms of the Companies Act, 1956. The Claimant is also bound to maintain segmental accounts regarding the projects executed by them. In the circumstances the audited accounts of the project maintained by the Claimant from the start of construction of the project on 22.03.2001 till the date of completion of the project on 30.11.2007 will give a clear picture of the amounts spent by them for the project and will be essential for the proper adjudication of the Preliminary Objection raised by the Respondent.

(ii) The Claimant in their reply dt.28.01.2013 had submitted as below:

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L. Kotwal) Arbitrator

(N.N. Singhal)

a. The Claimant had submitted the details of additional cost as incurred arising out of unforeseen physical conditions / various other variations / complying to the Respondent's instructions. The calculations are supported by:

1. CWC guidelines for preparation of project estimate for river valley projects.
2. IS 11590:1995 (Reaffirmed 2000)- Guidelines for working out unit rate cost of construction equipment used for river valley projects (1st revision).

Therefore, the additional cost has been duly supported as per the norms and do not require any other documents/submission.

b. As already explained hereinabove, the Claimant's expenses on the project including profit and loss have got no link to the claims arising out of contract/ Respondent's action. It is also submitted that tenability of claim cannot be adjudged based on the loss/ profit reflected in the Balance Sheet, as Profit/Loss is not the criteria for the claim and similarly in this case the basis of claim is the additional cost incurred by the Contractor due to post award variations/unforeseen conditions/instruction of the Respondent.

(iii) It is in the light of the submissions, AT in its order dt.08.04.2013 had held as above. The decision of AT is clarified hereinafter in this award.

(iv) The Respondent had vehemently argued the matter citing Sec.211 of the Companies Act, 1956 and the Accounting Standards AS-7 as recommended by Institute of Chartered Accountants of India under the Chartered Accountants Act, 1949. The copies of these documents have been filed by the Respondent. The Claimant has stated that the Respondent has wrongly quoted the statutory provisions regarding maintaining balance sheet / profit & loss account for individual projects or showing the amount of claims in the balance sheet. The Claimant has submitted that

(a) As per clause 211 of Company's Act, 1956 the balance-sheet and profit and loss account shall give a true and fair view of the state of affairs of the company as at the end of the financial year i.e. balance-sheet and profit and loss statement of a company as a whole i.e. of the company as a whole and not of the individual project which the company had undertaken to execute.

(b) Further the balance sheet and profit and loss statement is not compulsory to maintain/disclose for individual works/projects being executed by the company.

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L. Kotwal) Arbitrator

(H.N. Singhal) Arbitrator

The Claimant has maintained the project wise "Contract Revenue and Expenditure" which was duly certified by the auditor which was submitted by the Claimant for the Teesta HRT project before the AT.

(v) The Respondent has based its argument on para 7 of AS-7 which is reproduced as below:

> *7. When a contract covers a number of assets, the construction of each asset should be treated as a separate construction contract when:*
>
> *(a) separate proposals have been submitted for each asset;*
>
> *(b) each asset has been subject to separate negotiation and the Contractor and customer have been able to accept or reject that part of the contract relating to each asset; and*
>
> *(c) the costs and revenues of each asset can be identified.*

(vi) AT has considered the submissions made by the parties. A perusal of para-7 of AS-7 as reproduced reveals that this is applicable to a contract which covers a number of assets where separate proposals have been submitted for each asset and each asset has been subject to separate negotiations. Thus, on a plain reading of this para it is clear that this para is not applicable to the matter. This para does not provide for submission of project-wise balance sheet under the Companies Act, 1956 as contended by the Respondent. The Respondent has further contended that the Claimant has not shown the amount of his claims as have been claimed herein the present arbitration in the respective balance sheets. In this connection, AT has perused the provisions of AS-7. The relevant paragraph in this connection is 13 of AS-7. This para is reproduced as below:

> *13. A claim is an amount that the Contractor seeks to collect from the customer or another party as reimbursement for costs not included in the contract price. A claim may arise from, for example, customer caused delays, errors in specifications or design, and disputed variations in contract work. The measurement of the amounts of revenue arising from claims is subject to a high level of uncertainty and often depends on the outcome of negotiations. Therefore, claims are only included in contract revenue when:*
>
> *(a) negotiations have reached an advanced stage such that it is probable that the customer will accept the claim; and*
>
> *(b) the amount that it is probable will be accepted by the customer can be measured reliably.*

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Agarwal)
Arbitrator

(H.N. Singhal)

(vii) As per the provisions of aforesaid paragraph 13, the measurement of amount of revenue arising from the claims, like the claims arising out of customer caused delays, are subject to high level of uncertainty and depend on the outcome of negotiations and therefore such claims are included in the contract revenue when negotiations have reached an advanced stage such that it is probable that the customer will accept the claim and the amount likely to be accepted by the customer is measured reliably. Obviously, the Claimant's claims under consideration in the present arbitration do not fall in this category.

(viii) After consideration of the provision of paragraphs 7 & 13 of AS-7, AT is of the opinion that they are not relevant to the issue of present arbitration. The contention of the Respondent in this connection deserves rejection.

(ix) Further, the Respondent has filed the copy of the Balance Sheet of the Claimant's Company alleged to have been downloaded by them from the website. As noted by the AT, the information submitted by the Respondent is not accompanied by the statutory certificate prescribed u/s 65(B) of the Evidence Act, 1872. As such this electronic record is not admissible as evidence.

(x) The Claimant has submitted some project-wise information duly certified by their Chartered Accountant with their application dt.29.08.2013.

(xi) As noted above, the Respondent has argued strongly about the justification of Claimant's alleged losses from the requirements of company laws which he states to be mandatory and under which profit & loss accounts of the project have to be submitted. It has also been argued that unless the claimed losses/damages are reflected in the project profit & loss accounts, they cannot be maintained.

As held above, it does not appear to be necessary for the Companies to show losses and expected amounts of arbitration awards etc. in the annual statement of accounts. Even otherwise it cannot be the basis of the Arbitral Tribunal's findings on the admissibility of any claim and its award. If there are genuine claims which are contractually and legally admissible, the same cannot be rejected on the basis that they were not reflected in the Company's profit & loss accounts. On the other hand, the profit & loss accounts may have indicated some losses, but the same may not be convincingly proved before the AT and the

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L. Kothari) Arbitrator

(N.N. Singhal) Arbitrator

claims may deserve rejection by the AT. There are separate forums and agencies to ensure or take care of the requirements of Company Laws. AT has no role to play in the matter of Company's balance sheet.

(xii) The above point is decided accordingly. There appears to be no statutory requirement of submission or filing project-wise revenue account by the Companies or show the amount of claims under Arbitration in their annual balance sheets. Even otherwise, AT cannot base its findings and declare its award on the basis of Company's balance sheets.

B. REGARDING NEGOTIATIONS FOR AMICABLE SETTLEMENT

(i) As noted above, on 18.01.2013, the Respondent filed an application for discovery/production of certain documents. In para (V), the Respondent made a reference to negotiations held between the parties. The Respondent had submitted that the Claimant during negotiations had indicated their willingness to accept Rs.75.00 crores as full & final settlement of their claims including the claim under this Arbitration and in case they had actually spent Rs.243.00 crores over the contract price as claimed by them it is not possible that the Claimant would have been willing to settle the claim along with other disputes for the comparatively smaller amount as proposed by them.

(ii)a. The reply to the same was filed by the Claimant vide their application dt.28.01.2013. With this application, they had also filed the copy of their letter no.GIL/RO-NOIDA/THRT/2011-2012/20 dt.25.06.2011. This letter dt.25.06.2011 was written by the Claimant to CMD of the Respondent for 'Amicable Settlement of Dispules' and was marked as 'WITHOUT PREJUDICE'.

b. In their reply the Claimant had stated that "the Respondent had constituted a high level committee comprising of three working Directors and this high level committee sought Claimant's consent for amicable settlement and the Claimant in response had given a conditional consent and the Claimant understands that the Respondent has taken the matter to its Board and even received positive opinion from Attorney General of India. The process, however, was suddenly closed and was not concluded. The mentioned amount of Rs.75 crores was, therefore, part of above exercise of amicable settlement and thus cannot be the basis for evaluation of present claim."

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(N.N. Singhal)
Arbitrator

c. The Claimant has referred to the aforesaid letter dt.25.06.2011 which they state was submitted by them for amicable settlement of the disputes. This letter is marked as 'WITHOUT PREJUDICE'. The Claimant states that in the last para of the letter, the Claimant had stated that "the aforesaid proposal is being made without prejudice to our contractual and legal rights to compensation and exclusively on the aforesaid issues and for the subject contract only as an amicable and final settlement of subject disputes. Therefore, the aforesaid agreement should not constitute a precedent for settlement of any other disputes in respect of any work to be executed, being executed or already executed by Gammon India Limited".

d. The Claimant states that the inferences and conclusions drawn by the Respondent on the basis of aforesaid proposal for amicable settlement are incorrect, wrong and baseless.

(iii). This point has been raised time and again by the Respondent during arguments. This point has been considered by AT. In this connection, the AT reproduces the following from the judgment of the Hon'ble Supreme Court in the matter of 2004(1) Arb. LR 156 (SC) Chairman and M.D. N.T.P.C. Ltd. Vs Reshmi Constructions, Builders & Contractor. In this judgment, the Hon'ble Court has considered the amplitude and restrictions of the phrase 'Without Prejudice'. The Hon'ble Court has held as below:

> *34. Meaning of the words "without prejudice" came up for consideration before this Court in Superintendent (Tech.I) Central Excise, I.D.D. Jabalpur and others vs. Pratap Rai, (1978) 3 SCC 113, wherein it has been held:*
>
> *"The Appellate Collector has clearly used the words, "without prejudice" which also indicate that the order of the Collector was not final and irrevocable. The term "without prejudice" has been defined in Black's Law Dictionary as follows:*
>
> *'Where an offer or admission is made 'without prejudice', or a motion is defined or a bill in equity dismissed 'without prejudice', it is meant as a declaration that no rights or privileges of the party concerned are to be considered as thereby waived or lost, except in so far as may be expressly conceded or decided. See, also dismissal without prejudice.'*
>
> *Similarly, in Wharton's Law Lexicon the author while interpreting the term 'without prejudice' observed as follows:*

NHPC LIMITED FARIDABAD

'The words import an understanding that if the negotiation fails, nothing that has passed shall be taken advantage of thereafter. so, if a defendant offers, 'without prejudice', to pay half the claim, the plaintiff must not only rely on the offer as an admission of his having a right to some payment.'

The rule is that nothing written or said 'without prejudice' can be considered at the trial without the consent of both parties -- not even by a judge in determining whether or not there is good cause for depriving a successful litigant of costs..... The word is also frequently used without the foregoing implications in statutes and inter parties to exclude or save transactions, acts and rights from the consequences of a stated proposition and so as to mean 'not affecting', 'saving' or 'excepting'

In short, therefore, the implication of the term 'without prejudice' means (1) that the cause or the matter has not been decided on merits, (2) that fresh proceedings according to law were not barred."

(iv) As noted hereinbefore, the Claimant had filed his letter dt.25.06.2011 for amicable settlement of the matter clearly marking it as 'Without Prejudice'. As such the Claimant is not precluded from filing the present claims.

(v) The Claimant in his reply has stated that the Respondent had constituted a high level committee of its Directors to consider the Claimant's claims and for their amicable settlement. Ultimately this effort of amicable settlement failed. AT is conscious of the fact that the process of amicable settlement between the parties was not in accordance with the statutory provisions regarding 'Conciliation' as provided in Part-3 of the Arbitration & Conciliation Act, 1996. However, sustenance can be gathered from the fundamental principles of the provisions made therein. AT, therefore, reproduces the section 75 & 81 of this Act which deal with the 'Confidentiality' and 'Admissibility of the Evidence in other Proceedings' respectively:

75. Confidentiality-Notwithstanding anything contained in any other law for the time being in force, the conciliator and the parties shall keep confidential all matters relating to the conciliation proceedings. Confidentiality shall extend also to the settlement agreement, except where its disclosure is necessary for purposes of implementation and enforcement.

81. Admissibility of evidence in other proceedings.-The parties shall not rely on or introduce as evidence in arbitral or judicial proceedings, whether or not such proceedings relate to the dispute that is the subject of the conciliation proceedings,

NHPC LIMITED FARIDABAD

(V.K Tyagi) Presiding Arbitrator

(S.L.Kohwal) Arbitrator

(R.N. Singhal) Arbitrator

(a) *views expressed or suggestions made by the other party in respect of a possible settlement of the dispute;*

(b) *admissions made by the other party in the course of the conciliation proceedings;*

(c) *Proposals made by the conciliator;*

(d) *the fact that the other party had indicated his willingness to accept a proposal for settlement made by the conciliator.*

(vi) Accordingly, the Respondent should have kept confidentiality of all the matters relating to the proceedings of amicable settlement which obviously they have not done. The Respondent also should not have relied or introduced as evidence the correspondence exchanged between the parties during the process of amicable settlement in the present arbitral proceedings.

(vii) This point is decided by the AT accordingly. In view of the aforesaid judgment of the Hon'ble Supreme Court as well as the provisions in the Act of 1996 regarding conciliation, the contention of the Respondent in regard to the offer of the Claimant vide their letter dt.25.06.2011 which was for amicable settlement and was marked 'WITHOUT PREJUDICE' vis-à-vis present claims deserves rejection and is accordingly rejected.

C. REGARDING CLAIM BEING BARRED UNDER ORDER – II, RULE-2 OF CPC

(i) Although this point was not framed as an issue but this question was raised after about 48 arbitral hearings by the Respondent during arguments. In fact this point was addressed by the Senior Counsel of the Respondent vehemently by referring to various letters written by the Claimant to the Respondent vide which the Claimant informed the Respondent about various hindrances and disruptions at site and asked for extension of time and compensation.

(ii) The Respondent in this connection referred to para 2.12 & 2.13 of SOC. For proper appreciation of the matter, the same is reproduced as below. In these para, the Claimant had stated that

2.12 While, the issue of acceleration efforts made by the Claimant for acceleration of the works is being dealt separately, as already explained herein above, and the claim for prolongation of the original contract period from 22.10.2006 to 25.01.2008 shall be dealt separately. The scope of present claim submitted before Honorable Arbitral Tribunal is confined to the consequences of adverse geological condition

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L. Kotwal) Arbitrator

(N.N. Singhai)

resulting in additional cost inputs and increase in cycle time of excavation in various rock classes.

2.13 In view of the fact that, the issue of determination of Claimant's entitlement to extension of time and also that concerning the acceleration efforts made by the Claimant for recovery of the delays not attributable to him are being dealt separately and outside the scope of present dispute, the present submission does not discuss in detail various events and circumstances, that led to the delay and grant of extension of time.

(iii) The Respondent has referred to their reply to the Claimant's above contention as made out in the SOD. The same is reproduced as below :

Contents of the corresponding para of the claim are denied. The subject matter/essence of the claim for compression, claim for prolongation of original contract period and the present claim is same. The Claimant has given notice under clause 67.1 of GCC to the Respondent for claims for compression, claim for prolongation of original contract period with malafide intention, and for making illegal gains. The Claimant had sought time extension under Clause 44.1 of COPA and the same was granted to him. It does not entitle the Claimant for any other cost compensation; he has been well compensated for work done.

(iv) On the basis of these pleadings, the Respondent has stated that the present claim is barred under Order 2, Rule 2 of CPC, 1908 as per the submissions made by the Claimant themselves. The Respondent has stated that the Claimant has filed another statement of claim before another Arbitral Tribunal with respect to the same contract and as such he is barred to file the present claim. The Claimant has contested the Respondent's contention. The matter was argued by the counsel of both the parties. They filed a number of citations in support of their contentions.

(v) Before proceeding further, the provisions of Order-II, Rule-2 are reproduced as below:

Rule -2

(1) Suit to include the whole claim.–(1) Every suit shall include the whole of the claim which the plaintiff is entitled to make in respect of the cause of action; but a plaintiff may relinquish any portion of his claim in order to bring the suit within the jurisdiction of any court.

(2) Relinquishment of part of claim.–Where a plaintiff omits to sue in respect of, or intentionally relinquishes, any portion of his claim, he shall not afterwards sue in respect of the portion so omitted or relinquished.

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(N.K. Singhal)

(3) Omission to sue for one of several reliefs.–A person entitled to more than one relief in respect of the same cause of action may sue for all or any of such reliefs; but if he omits, except with the leave of the Court, to sue for all such reliefs, he shall not afterwards sue for any relief so omitted.

Explanation– For the purposes of this rule an obligation and a collateral security for its performance and successive claims arising under the same obligation shall be deemed respectively to constitute but one cause of action.

(vi) In the first instance, the Claimant's counsel objected to the contention of the Respondent on the basis of Sec.19 of the Arbitration & Conciliation Act, 1996 stating that the AT is not bound by the CPC, 1908 or Indian Evidence Act, 1872.

(vii) AT has considered this point first and is of the opinion that the objection of the Claimant's counsel is not tenable. In sub-section (1) of Sec.19, the Act has prescribed that the AT shall not be bound by the Code of Civil Procedure, 1908 or by the Evidence Act, 1872. These are words of amplitude and not of restriction. These words do not prohibit the AT from drawing sustenance from the fundamental principles underlying the Civil Procedure Code or Evidence Act, but free the Tribunal from being bound, as would a Civil Court, by the requirement of observing the provisions of the Code and the law relating to evidence with all its rigour. The aspect of 'Judicial Decision', therefore, just cannot be overlooked by AT who decides and adjudicates the rights between the parties. AT cannot overlook the basic principles of CPC and Evidence Act apart from the principles of natural justice, fair play and equity. Accordingly, this objection of the Claimant's counsel is not tenable and rejected.

(viii) Regarding other aspect of the present claim being barred by Or.2 Rule-2 few dates are important:

(i) Date of start of the work - 22.03.2001

(ii) Stipulated period of completion 2040 days (67 months)

(iii) Respondent issued instructions for acceleration of the work – 08.05.2001 and to compress the period of completion to 1826 days (60 months)

(iv) Stipulated date of completion - 22.10.2006

(v) Actual date of completion - 25.01.2008

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(N.K. Singhal)
Arbitrator

(ix) According to the submissions made before AT, the present arbitral proceedings are in respect of the Claimant's claims for the additional efforts required due to encountering of unforeseen geological conditions other than those envisaged at the time of bid. The arbitral proceedings in the matter started on 16.12.2008 and the Statement of Claim was submitted before the present AT on 12.03.2009.

(x) For correct appreciation of the matter, the para 2.8 & 2.9 of the Statement of Claim are reproduced as below to arrive at the situation of the claim pending in the other Arbitration before another AT.

> 2.8 The discussion for arriving at an agreement on the cost of acceleration measures to be paid to the Claimant were, however, still continuing. After prolong discussion, the Respondent had released a payment of only Rs.9.81 crs on 02.02.2009 towards the cost of acceleration measures taken, as against Rs.125.00 Crs claimed by the Claimant vide his amended proposal dated 22.01.2008. (Exhibit C-338, Vol.-4C, Page 1185)
>
> 2.9 The Respondent did not provide the details and basis for his determination of the cost of Acceleration measures payable to the Claimant. The Claimant has requested for such details for his review and examinations before deciding future course of action.

(xi) Thus, with regard to the other arbitral proceedings pending before another AT, it is clear that the claims therein are related to the additional resources deployed for accelerating the progress and to compress the scheduled time. It is stated before the AT that the claim on this account could be filed by the Claimant only after the payment of the final bill after May 2009. The Claimant's counsel stated that thus, the claim for making additional resources deployed for accelerating the progress could not have been raised with the present arbitral proceedings which are for additional efforts required due to encountering of unforeseen geological conditions which is the subject matter of present Arbitration. The other Arbitration with regard to cost of additional resources deployed for accelerating the progress was commenced on 18.06.2009 and the statement of claim is stated to have been filed before other Arbitral Tribunal on 20.04.2013.

(xii) The Claimant's counsel has stated that the causes of action of both the claims are different and as such the bar of Or.2, Rule-2 shall not apply to the present arbitral proceeding. Moreover, as per Or.2, Rule-2, the restrictions for filing the claims applies to the second Arbitration only and not to the first Arbitration. As

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L. Kaswal) Arbitrator

(N.N. Singhal)

this present Arbitration before this AT has been filed much prior to the second Arbitration proceedings, the present Arbitration cannot be said to be barred by Or.2, Rule-2.

(xiii) Both the parties have filed various citations in support of their case. They are already listed hereinbefore by the AT. The same have also been considered by AT while examining & considering matter.

(xiv) AT has considered the provisions of Or.2, Rule 1 & 2. The object of Rule-1 & 2 is to prevent multiplicity of the suits. The Rule in Order-2, Rule-2 is founded on the principle that a person shall not be vexed twice for one and the same cause. In order to attract the bar of Or.2, Rule 2 the earlier suit should be founded on the same cause of action on which the subsequent suit is based, and if in the earlier suit, the plaintiff has omitted to sue in respect of or intentionally relinquished any portion of his claim, he will not subsequently be entitled to sue in respect of the portion of his claim so omitted or relinquished. This rule does not require that when several causes of action arise from one transaction, the plaintiff should sue for all of them in one suit. As per this rule, it is the second and not the first suit which is barred. Further in order to succeed on a plea of a bar under Or 2, r 2(3), Civil Procedure Code, a defendant who raises the plea must take out (1) that the second suit was in respect of the same cause of action as that on which the previous suit was based; (2) that in respect of that cause of action the plaintiff was entitled to more than one relief; (3) that being thus entitled to more than one relief the plaintiff, without leave obtained from the court, omitted to sue for the relief for which the second suit had been filed. Or.2, Rule 2, CPC comes into operation where the cause of action on which the previous suit was filed, forms the foundation of the subsequent suit; and when the plaintiff could have claimed the relief sought in the subsequent suit, in the earlier suit. With this interpretation of Or.2 Rule-2, AT has examined the contention of the Respondent in respect of the present claims in this Arbitration as barred.

(xv) AT has examined and considered the submissions of both the parties in this matter. Unless there is identity between the cause of action on which the earlier suit was filed and that on which the claim in the later suit is based, there would be no scope for the application of the bar of Or.2, Rule-2. The cause of action should not merely be similar, but it must be the same. When the subsequent suit

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kanwal)
Arbitrator

(N.N. Singhal)

is based on a cause of action different from the first suit, even the second suit is not barred. In the present matter, it is clear that the cause of action of the present arbitral proceedings before this AT relate to the occurrence of adverse geological conditions and unforeseeable conditions encountered during the execution of the work under the contract whereas the second/other reference before another AT is towards the cost of efforts required for making additional resources deployed for accelerating the progress of the work. It has been noted hereinbefore that the Respondent had desired the Claimant for compressing the completion period from 67 months to 60 months. It has been submitted before this AT that the Arbitration proceedings pending before another AT are in respect of acceleration efforts. Thus, the causes of action in respect of both the arbitral proceedings are distinct and distinguishable. Obviously, the bar of Or.2, Rule-2 shall not apply to the present arbitral proceedings.

(xvi) Moreover, the present arbitral proceedings were commenced vide GIL's letter dt.30.07.2008. The Statement of Claim was filed on 12.03.2009. It is noted that the other arbitral proceedings commenced only after 14.11.2009 when the notice of Arbitration was given by the Claimant. Under these situations, if the bar under Or.2, Rule-2 was to apply it has to be in respect of the other arbitral proceedings and not to the present one.

(xvii) Considering all the circumstances, facts and details, the objection of the Respondent about the present arbitral proceedings being barred by Or.2, Rule-2 of CPC, 1908 is not maintainable and is rejected.

33. After deciding the points raised by the Respondent during arbitral proceedings as above, AT now takes up the matter on merit issue-wise as below:

34. **Issue No. 1: Whether the claims are contrary to the provisions of the contract more particularly to clause 53.1 of the General Conditions of Contract?**

34.1 The Respondent in his Statement of Defence has filed a preliminary objection in para (D) & (E) which are reproduced as below:

(D) Fourthly it is further submitted that the instant claim petition is also liable to be rejected under clause 53.1 of the GCC of the Contract which provides as follows:

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(N.N. Singhal)
Arbitrator

"Notwithstanding any other provisions of the contract, if the Contractor indented to claim any additional payment pursuant to any clause of these conditions or otherwise, he shall give notice of his intention to the Engineer, with a copy to the Employer, within 28 days after the event giving rise to the claim has first arisen."

The Claimant, did not abide by the same and has for the first time vide their letter dt.21.03.2007 (Annexure Vol.4C, Exh.C-292, Page 1057 to the statement of claim) raised the present claim against the Respondent, which is in utter disregard of the above provision. This claim has been raised after a long gap of time, as an after-thought, contrary to aforesaid specific provision and for illegal gains. Therefore, the same is not maintainable for these reasons.

(E) In fact it is submitted that Clauses 53.2, 53.3 and 53.4 of GCC clearly envisage that claims of the nature sought to be raised in the present arbitration, must be supported by "contemporary records". "Contemporary records" refer to the Books of Accounts/Expense Vouchers/Statement of Expenses etc. A bare reading of the Statement of claim makes it evident that the Claimant's case is completely bereft of any contemporaneous record whatsoever, and instead the claims are based on artificially and notionally derived figures having no factual basis. Clause 53.4 mandates that any claim of the nature sought to be raised must be assessed by an arbitral tribunal under Clause 67.3 .... "on the basis of contemporaneous record (whether or not such records were brought to the Engineer's notice as required under Sub-clause 53.2 and 53.3)....." In the absence of any contemporary record whatsoever, the claims are liable to be rejected outright.

34.2 The Claimant in their rejoinder reply have rebutted the Respondent's aforesaid contention as reproduced below:.

Reply to Para D : The objections raised by the Respondent alleging non-compliance with clause 53 of the GCC is yet again contrary to the factual position on record, contrary to the express provisions of the Contract and the applicable law. Claimant had given due notices of his intention to claim the consequences arising from encountering of unforeseeable physical conditions. The quantification of the claim, however, could be done only after completion of the Works, when the impact of the unforeseeable conditions was fully known.

The Claimant submits that due notices were issued by the Claimant at the relevant time. Even presuming, without admitting that the said notice was not given, it is submitted that the contract allows the claims to be reviewed and decided even in

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L.Kotwal)
Arbitrator

(H.L. Singhal)
Arbitrator

the absence of issuance of notice under Sub clause 53.1. Sub clause 53.4 of the Contract, pertinent to the issue, is elicited below for ease of reference:

"If the Contractor fails to comply with any of the provisions of this clause in respect of any claim which he seeks to make, his entitlement to payment in respect thereof shall not exceed such amount as the Engineer or any Arbitrator or Arbitrators appointed pursuant to Sub clause 67.3 assessing the claim considers to be verified by contemporary records (whether or not such records were brought to the Engineer's notice as required under Sub clauses 53.2 and 53.3)...."

The Claimant therefore submits that the Claim has to be adjudicated by this Hon'ble Tribunal based on the documentary records made available before it. Furthermore, the Contract allows raising of any claim by the Claimant even at the stage of submission of statement at completion when the Claimant is required to state the estimate of amount which the Contractor considers will become due to him under the Contract.

The issue has also been decided by Hon'ble Orissa High Court in case 2006 (2) R.A.J 217 (Ori)- State of Orissa and others Vs Larsen and Toubro Limited. In para 8 of Judgment Hon'ble Court has ruled that "...It is clear from the aforesaid clause that the committee of Arbitrators appointed under clause 67.3 of the agreement is competent to determine a dispute and pass award in respect of extra items/additional claims even though above clauses of the agreement have not been complied with....".

The Contract (Cl.60.12) also allows that upon submission of the final statement, the Contractor shall give to the Employer, with copy to the Engineer, a written discharge confirming that the total of the final statement represent full and final settlement of all money due to the Contractor arising out of or in respect of the Contract. Provided that such discharge shall become effective only after payment due under the final certificate issued pursuant to sub clause 60.13 has been made and the performance security referred to in Sub clause 10.1 has been returned to the Contractor. Thus the Respondent will not be discharged of any amount of money becoming due to the final payment being made under sub clause 60.13.

The Claimant further submitted that in view of the amended provisions of section 28-b of the Indian Contract Act, it is only the statutory limitation period that will be legally valid and binding on the parties and any stipulation in the Contract reducing the validity of the claim to a lower period than the statutory period of limitation will be void and legally unenforceable to that extent.

Thus even under the law any provision reducing the period of statutory limitation will not have any valid effect. Therefore, the contentions raised by the Respondent are even otherwise not maintainable.

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(D.N. Singhal)

Sub Clause 53.4 of the Contract as already referred hereinabove, allows the claim to be decided by the Arbitral Tribunal based on the contemporaneous record. The Claimant submits that all the evaluation of the claims of the Claimant is based on contemporaneous records, copies of which have been submitted before the Hon'ble Tribunal.

The objections raised by the Respondent are, therefore, not maintainable at all.

Reply to Para E : The contents of the Reply under the Para are incorrect, false and hence denied. In any case, the contents of this Para do not constitute a preliminary objection Correctness or otherwise of the amount claimed has to be determined by the Hon'ble Arbitral Tribunal. It is, however, submitted that the evaluation of the claim has been done based on the contemporary records and documents and not on any hypothetical or imaginary basis, as contended by the Respondent. Any other document, which may be required by the Hon'ble Arbitral Tribunal for determination of the correctness of evaluation will be produced by the Claimant at appropriate time. Objections raised by the Respondent are, therefore, not maintainable.

34.3 For better appreciation of the matter the GCC Cl.53.1 to 53.4 are reproduced as below:

53.1 Notwithstanding any other provision of the contract, if the Contractor intends to claim any additional payment pursuant to any Clause of these conditions or otherwise, he shall give notice of his intention to the Engineer, with a copy to the Employer, within 28 days after the event giving rise to the claim has first arisen.

53.2 Upon the happening of the event referred to in Sub-Clause 53.1, the Contractor shall keep such contemporary records as may reasonably be necessary to support any claim he may subsequently wish to make. Without necessarily admitting the Employer's liability, the Engineer shall, on receipt of a notice under Sub-Clause 53.1, inspect such contemporary records and may instruct the Contractor to keep any further contemporary records as are reasonable and may be material to the claim of which notice has been given. The Contractor shall permit the Engineer to inspect all records kept pursuant to this Sub-Clause and shall supply him with copies thereof as and when the Engineer so instructs.

53.3 Within 28 days, or such other reasonable time as may be agreed by the Engineer of giving notice under Sub-Clause 53.1, the Contractor shall send to the Engineer an account giving detailed particulars of the amount claimed and the grounds upon which the claim is based. Where the event giving rise to the claim has a continuing effect, such account shall be considered to be an interim account and the Contractor shall, at such intervals as the Engineer may

NHPC LIMITED FARIDABAD

N.K. Tyagi
Presiding Arbitrator

(S.L.Kotwal)
Arbitrator

(H.L.Singhal)
Arbitrator

reasonably require, send further interim accounts giving the accumulated amount of the claim and any further grounds upon which it is based. In cases where interim accounts are sent to the Engineer, the Contractor shall send a final account within 28 days of the end of the effects resulting from the event. The Contractor shall, if required by the Engineer so to do, copy to the Employer all accounts sent to the Engineer pursuant to this Sub-Clause.

53.4 If the Contractor fails to comply with any of the provisions of this Clause in respect of any claim which he seeks to make his entitlement to payment in respect thereof shall not exceed such amount as the Engineer or any Arbitration or Arbitrators appointed pursuant to Sub-Clause 67.3 assessing the claim considers to be verified by contemporary records (whether or nor such records were brought to the Engineer's notice as required under Sub-Clause 53.2 and 53.3).

34.4 In the aforesaid rejoinder reply, the Claimant has mentioned that the contract allows raising of any claim by the Claimant even at the stage of submission of statement at completion. During arguments, the Claimant's counsel referred to COPA Sub-Clauses 60.10, 60.11 and 60.14 in this respect. The relevant portion of these clauses are also reproduced as below for adjudication of the issue:

Sub-Clause 60.10 : Not later than 84 days after the issue of the Taking-Over Certificate in respect of the whole of the Works, the Contractor shall submit to the Engineer a Statement at Completion in the number of copies specified in the Appendix to Bid with supporting documents showing in detail, in the form approved by the Engineer.

(a) the final value of all work done in accordance with the Contract upto the date stated in such Taking-Over Certificate.

(b) any further sums which the Contractor considers to be due, and

(c) an estimate of amounts which the Contractor considers will become due to him under the Contract.

.....

Sub-Clause 60.11 : Not later than 56 days after the issue of the Defects Liability Certificate pursuant to Sub-Clause 62.1, the Contractor shall submit to the Engineer for consideration a draft final statement in the number of copies stipulated in the Appendix to Bid with supporting documents showing in detail, in the form approved by the Engineer,

(a) the value of all work done in accordance with the Contract; and

(b) any further sums which the Contractor considers to be due to him under the Contract or otherwise.

.....

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(N.N. Singhal)

Sub-Clause 60.14 : The Employer shall not be liable to the Contractor for any matter or thing arising out of or in connection with the Contract or execution of the Works, unless the Contractor shall have included a claim in respect thereof in his Final Statement and (except in respect of matters or things arising after the issue of the Taking-Over Certificate in respect of the whole of the Works) in the Statement at Completion referred to in Sub-Clause 60.10.

34.5 This issue has been examined by the AT in two aspects; firstly the applicability of GCC Cl.53.1 to 53.3 as to whether these clauses bar the submission of claim, secondly, wheiher the Claimant has complied with these GCC Clauses in the present case.

34.6 During arguments much emphasis was laid by the Respondent's counsel on the *non obstante clause* (Notwithstanding any other provision of the Contract) in GCC Cl.53.1. The Respondent's Counsel emphasised that this provision is a prohibitory clause and when the provision of GCC Cl.53.1 has not been followed by giving a notice within 28 days after the event has arisen, the Claimant is barred from raising the claims subsequently.

34.7 The Claimant's Counsel has rebutted the Respondent's contention referring to Sec.43 of the Arbitration & Conciliation Act, 1996, Sec.28 of the Contract Act, GCC Cl.53.4, COPA Sub-Clauses 60.10, 60.11 & 60.14. He also referred to the following two judgments:

S.No.	Citation	Parties
1.	(1997) 11 SCC 40	State of Bihar and others Vs Hanuman Mal Jain
2.	AIR 2006 Orissa 45	State of Orissa Vs L & T Ltd.

34.8 The non-obstante clause was considered by the Hon'ble Supreme Court in the matter of (1992) 1 SCC 335, R.S. Raghunath Vs State of Karnataka and Another as below:

"11.....But the non obstante clause need not necessary and always be co-extensive with the operative part so as to have the effect of cutting down the clear terms of an enactment and if the works of the enactment are clear and are capable of a clear interpretation on a plain and grammatical construction of the words the non obstante clause cannot cut down the construction and restrict the scope of its operation. In such cases the non obstante clause has to be read as clarifying the whole position and must be understood to have been incorporated in the enactment by the legislature by way of abundant caution and not by way of limiting the ambit and scope of the Special Rules."

AHPC LIMITED FARIDABAD

34.9 In view of the aforesaid decision of the Hon'ble Supreme Court, the non-obstante clause can also be read as clarifying the whole position. It need not be understood to have been incorporated by way of limiting the ambit and scope of other provisions of the contract. The GCC Cl.53.1 does not prohibit raising of the claim by the Contractor on a subsequent date as is clear from the conjoint reading of the provision of GCC Cl.53.4 read with COPA Sub-Clauses 60.10, 60.11 & 60.14. GCC Cl.53.1 only lays down the procedure how the claim could be lodged. It does not oust the raising of the claim on subsequent dates. GCC Cl.53.4 provides for settlement of the claim in the absence of 28 days notice. This clause specifically provides that in the event of failure of the Contractor to give a 28 days notice his entitlement to payment of claim shall not exceed such amount as the Engineer or Arbitrator (appointed under the Arbitration Clause) determines. COPA Sub-Clause 60.10 provides that the Contractor can claim further sums which he considers to be due to him not later than 84 days through the statement at completion which he has to submit after the issue of Taking-Over Certificate in respect of the whole work.

34.10 COPA Sub-Clause 60.11 further provides that the Contractor can raise the claim for any other amount which he considers to be due to him under the contract or otherwise through the final statement which he has to submit not later than 56 days after the issue of defect liability certificate. It is only COPA Sub-Clause 60.14 which provides that in case the Contractor does not include his claim in the final statement and in the statement at completion, the Employer shall not be liable to the Contractor for any matter or thing arising out of or in connection with the contract or the execution of work. Accordingly, the time limit for raising of the claims by the Contractor expires only after 56 days of the issue of defect liability certificate. The present arbitral proceedings due to adverse geology were commenced on 16.12.2008, the final bill was processed on 10.03.2009 i.e. the claims had been raised much before the processing of final bill. Accordingly, the AT is competent to determine the disputes and pass awards even in the absence of 28 days notice under GCC Cl.53.1. Thus the first aspect of the issue about the applicability of GCC Cl.53.1 to 53.3 is decided accordingly.

34.11 With regard to the second aspect of the matter, the Claimant's counsel referred to various exhibits under which the claims towards compensation and/or

NHPC LIMITED FARIDABAD

(V K Tyagi)
Presiding Arbitrator

(S.L. Goyal)
Arbitrator

(N.N. Singhal)

extension of time had been submitted to the Respondent. He has specially referred to exhibits no. 64 (dt.23.08.2002), 71 (dt.10.10.2002), 69 (dt.24.02.2003), 90 (dt.24.02.2003), 97 (dt.23.06.2003), 98 (dt.25.06.2003), 102 (dt.30.06.2003), 135(dt.02.04.2004), 145(dt.29.06.2004), 148(dt.19.07.2004), 163(dt.28.09.2004), 168 (dt.30.10.2004), 172 (dt.26.11.2004), 200(dt.16.06.2005), 208 (dt.20.08.2005) of Vol.3C and 273 (dt.07.11.2006) & 292 (dt.21.03.2007) of Vol.4C of the Statement of Claim.

34.12 The Respondent's counsel has specially referred to the judgment of Hon'ble Supreme Court in the matter of (2009) 12 SCC 1 : State of Rajasthan & Anr. Vs Ferro Concrete Construction Pvt. Ltd. He has inter-alia referred to para 52 to 55 of this judgment. AT has respectfully considered this judgment. AT is of the view that the ratio of this judgment cannot be applied to the present matter. The case of Ferro Concrete Construction Pvt. Ltd. was for a manufacturing unit where the productivity of machines established in the factory were considered. The contract under consideration before the present AT is related to mainly underground works for construction of a Hydroelectric Project. This work has no resemblance with any work of a manufacturing unit. As such the ratio of the judgment is not applicable to the present matter.

34.13 Considering the above referred letters as mentioned in para 34.11 above, it is also clear that the Claimant has been giving sufficient notices to the Respondent from time to time for raising his claims towards extension of time as well as compensation due to adverse geological conditions. In this case the extension of time has also been granted by the Respondent upto 12.12.2008 as per details given earlier as confirmed by the Respondent's witness RW-1. Under these circumstances, the second aspect of the issue is decided against the Respondent accordingly.

35. **Issue No. 2 : Whether the bidders were required to place bids on the data/information provided in the bid documents or each of them was required to develop their own data and information for submission of bids?**

Issue No.3 : Whether the adverse geological conditions/circumstances encountered by the Claimants were unforeseeable? If so, consequences thereof.

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L.Kohli) Arbitrator

(N.N. Singhal) Arbitrator

35.1 Both these issues are considered together as below:

35.2 The Claimant in the Statement of Claim has stated that immediately after the award of works contract and commencement of the work, it was evident even during the excavation of adits itself that the conditions in the HRT are likely to be much worse than that foreseen. Sudden unexpected behaviour of the rock compelled the Engineer to adopt all precautionary measures e.g. line drilling, immediate supports installation, reduced pull length, use of ribs etc. However, despite all these precautions loose falls, cavity formation, collapses and failure of installed supports continued unabated. Fatal accidents and damage to key equipments compelled further review and close monitoring by the Engineer after every advance. The support system instructed by the Engineer for different rock classification was, however, not adequate for supporting the types of rocks encountered. Increase in the over-breaks, formation of cavities, failure of the supports already provided requiring removal and reinstallation of the supports, reduction of blast length, change of blasting pattern etc. became a regular feature. Encountering of poor quality of rocks for much longer length, heavy seepage conditions, change in design, inadequate supports etc. seriously affected the cycle time and also caused heavy additional costs.

35.3 The Claimant further submitted that the information about the Geology of the HRT likely to be encountered, the type of rock supports to be provided for different kinds of rock class, the time for completion of the Works and various other information given in the tender document formed the basis for submission of the Bid, which were also clearly spelt out in the Bid submitted by the Claimant. In SOC, the Claimant has narrated, in para 3.2, the various clauses of Information to Bidders which according to him contained definite and categorical information about the Geology and the type of rock conditions foreseeable and likely to be encountered in HRT and the Adits falling under the scope of the contract. The Claimant states that these provisions about the Geology foreseeable and likely to be encountered formed the basis of preparation and submission of his bid. He states that Methodology included in the Bid contained the programme for execution, cycle time for concreting, the length of tunnel to be excavated from different faces, cycle time of excavation in different rock classes, the plant and equipment to be deployed at each of the Adits / faces, the time

NHPC LIMITED FARIDABAD

required for each of the activities in the tunnelling excavation etc. The critical face considered by the Claimant, keeping in view the Geology defined in the tender documents, was also mentioned in the methodology submitted by the Claimant.

35.4 The Claimant has further stated that the percentage of Rocks projected as per Geological section of Drawing No.NH-Ts-2DAO-41-GA060 and encountered as logged and recorded in Drawing no. 11085, 11086, 11087, 11088 as per table 2 are summarized as follows :

Rock type as per Tender drawing NH-TS-2DAO-41-GA060		Rock type as actually encountered as per drawings 11085, 11086, 11087, 11088		Remark
Rock Type	Percentage	Rock Type	Percentage	
Phyllite	0.93%	Phyllite	14.00%	Sheared phyllite categorized with Phyllite
Phyllite quartzite with intercalation of Phyllite	3.62%	Phyllite quartzite with intercalation of Phyllite	44.07%	
Quartzite with intercalation of Phyllite Quartzite	3.52%	Quartzite with intercalation of Phyllite Quartzite	12.68%	
Quartzitic Phyllite	18.38%	Quartzitic Phyllite	3.49%	
Phyllitic Quartzite	72.55%	Phyllitic Quartzite	25.79	

The above data indicates that there is a substantial variation in the rock type as projected in Geological section appended with ITB and rock types encountered during tunnelling. Worth mentioning is the increase in the percentage of phyllite and intercalation of Phyllite with Phyllitic quartzites which are incompetent Rocks and constitute a poor tunnelling media.

A comparison of the Rock class foreseen in Contract and actually encountered, based on RMR system and the rock class actually assigned based on support installed is given below:

Rock Class	Length of Rock class as per ITB	Length of Rock class based on support instructed by Engineer	Length of Rock class determined (during HRT logging) as per RMR classification (table-1)
I	0%	1.10%	0%
II	20%	6.39%	0%
III	55%	69.87%	45.10%
IV	20%	20.14%	42.27%
V	5%	2.51%	12.63%

There is a distinct and wide variation in the rock categories as forecast, support instructed by Engineer and as worked out after geological logging. This difference is due to the presence of numerous shear seams / zones mostly water charged, and also closely spaced and rough discontinuities with poor RQD,

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L.Kohwal)
Arbitrator

(N.K. Singhal)
Arbitrator

which apparently were not or could not be considered while proposing the rock classification as given in the ITB.

35.5 The Respondent has referred to clause 8.1 of the Instruction to Bidders & Bidding Data. The same is reproduced as below:

> 8.1 The bidder is advised to visit and examine the site of Works and its surroundings and obtain for itself on its own responsibility all information that may be necessary for preparing the bid and entering into a contract for construction of the Works. The costs of visiting the Site shall be at the bidder's own expense.

35.6 The Respondent accordingly contended that any variation in the geology encountered cannot be the basis of present claims and as such the claims deserve to be rejected.

35.7 The Respondent has also stated that it cannot be the case of the Claimant that geological conditions likely to be encountered at site were not known to the Claimant. The Respondent has referred to the clause 13.1 on page 63-64 vol 1 of the contract which states that the segment of HRT would be laid in alternating sequence phyllitic quartzite and quartzitic phyllite and quartzitic rock. Further, in this clause, the approximate length under various rock classes which may appear during the execution of the work have been indicated. It was further provided in this clause that assessment of cumulative length of various rock classes is approximate and is meant only for estimating rock support requirement at tender stage. Therefore, during excavation variations in rock classes are possible which shall not be accounted for any deviation in Contract Agreement. It is rather a common phenomenon that formation of cavities due to change in rock classification may occur during tunnelling activities. A bare reading of the said clause 13.1 reveals that it was well within the contemplation of the parties that different class of rocks would be encountered and this ought to have been taken care of by the Claimant at the time of bidding. During arguments, Respondent filed a map of the alignment plan of HRT. The Respondent stated that they have prepared this plan on the basis of the report of Mr. Rodney Shaw, Vol.C-7. According to this study, the Respondent stated that the Class-III and IV rocks encountered at site were met only in 73.16% and 26.84 % of the length and thus it cannot be said that there has been large scale variation in the rocks encountered at site.

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(N.N. Singhal)
Arbitrator

35.8 The Claimant had denied the contention of the Respondent including the plan submitted by the Respondent as above. According to Claimant, the report contained in Vol.C-7 had described only the sample of rocks at various places and as such it cannot be extrapolated to various lengths as has been done by the Respondent in preparing the aforesaid plan.

35.9 The AT has considered the contentions of both the parties. The contention of the Respondent is not tenable for the reason that the stipulation that the Contractor should see the site before tendering is only for the purpose of putting him on guard regarding nature of site conditions so as to enable him to gauge the extent the work required and draw up the estimate for his bid accordingly. The intending tenderers cannot be expected to do drilling and drifting in such projects to assess and determine the anticipated extent of rock conditions. In engineering contracts like the present one, the Contractor naturally expect to be given all information available as to the geological and physical conditions of site based on prolonged/detailed investigations by the Employer through expert agencies. Obviously, the wide variation in the rock classification from that given in the contract could neither be foreseen by NHPC nor by the intending bidders. From the record, it has also emerged that wide variation in the rock classification as actually encountered also necessitated change in methodology and required deployment of additional plant & equipment by the Claimant. The Information to Bidder, clause 12.2 stipulates that geological and geotechnical investigations were carried out along the proposed HRT and various Adits to be constructed in this lot during feasibility and pre-construction stage. Further clause 12.2.1 stipulates that exploratory drilling was carried out in two drill holes to decipher bedrock depth and testing of points load strength index was conducted on nine bulk samples at 9 locations from HRT area. Clause 12.2.2 stipulates that geophysical survey was also conducted in limited area around Adit-4 to delineate bed rock profile. In these circumstances, when the data had been provided by the Respondent after extensive drilling, geophysical survey and testing of rock samples in laboratory, how could it be expected from the intending bidders to know about the sub-surface conditions by visiting the site as stipulated in clause 8 of Instruction to Bidder & Bidding Data.

35.10 AT is of the opinion that no matter how good a party's due diligence, other intelligence gathering or background investigations, it cannot be expected to find out everything about such underground conditions before entering into it. At the time of entering into the contract, the parties agree on price and terms based upon the strength of presentation made in the bidding of documents – typically at the time of inviting bids.

35.11 The issues no.2 & 3 are decided accordingly against the Respondent.

35.12 The consequences of adverse geological conditions / circumstances encountered by the Claimant shall be dealt with subsequently while taking up various claims.

36. **Issue No.4 : Whether the Claimant in execution of the works has followed the instructions/ approvals and technical specifications stipulated in the contract?**

36.1 The Claimant, in para 3.7.2 of SOC, has stated that each and every operation in the contract in the tunnel was being carried out strictly under direct control, supervision and as per directions of the Engineer. The Claimant was not allowed to execute any work whatsoever without prior consent and approval of the Engineer.

36.2 The Respondent has denied the Claimant's averment.

36.3 During arguments, the Respondent has pointed out to following letters written by it: (i) R-6 dt.21.07.2002, (ii) C-65 dt.05.09.2002 and (iii) letter dt.03.07.2003. A perusal of the letter dt.21.07.2002 reveals that it was written by the Respondent admitting distress at site. In the letter dt.05.09.2002, the Respondent has admitted the problem of seepage and cavity formation at site. The Chief Engineer further agreed that the situation has created a hindrance to the work to a great extent and to the progress of the work. The Claimant was advised to improve the provisions of proper support system after blast. This letter was replied by the Claimant vide Exh.C-66 dt.10.09.2002 stating that the situation arising in the tunnel is unforeseen due to simultaneous unprecedented ingress of water coupled with loose fall and chimney formation.

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(U.N. Singhal)
Arbitrator

36.4 The exchange of such letters between the Contractor and the Employer are common in such type of work. The main point is that there was problem at site which created disruption in the progress of the work. The letter Exh.C-106 has also been brought to the notice of AT which was written by Chief Engineer (HRT) of the Respondent. In this letter, he stated that it has been observed that at various locations due to adverse Geological strata and cavities the progress is hampering badly. You are requested to submit proposal to achieve faster progress at such areas. If needed the use of advanced technology may kindly be explored and proposal be submitted for consideration of NHPC. It was further required from the Contractor that the induction of fore-poling Machine (20m) suitable for tackling such poor zone can also be considered (as suggested by the Claimant vide his letter dt.27.06.03), if it can speed up the progress and help in achieving construction schedule.

36.5 No specific instance has been cited by the Respondent in support of their suggestion that the Claimant did not follow the instructions / approvals and technical specifications stipulated in the contract.

36.6 The aforesaid issue no.4 is decided accordingly against the Respondent. (There is no contrary pleading from the Respondent to the Claimant's specific pleading as cited in para 3.7.3 of SOC)

37. AT has decided the preliminary objections raised by the Respondent in issue no.1 to 4 above. The issue no.5 onwards relate to the payments as claimed on account of additional cost for various reasons. Each issue is claim-wise and will have to be considered accordingly. However, it is necessary to consider the relevant contractual provisions.

38. In order to find out the answer to the various issues relating to claims we have to have a look on the relevant provisions of the contract which forms the Claimant's thrust for grant of the claims.

(i) Clause 6.4: As per this clause of contract, if there is delay in issue of drawings which affect the progress of works and the Claimant suffers delay and/or incurs costs, then the Engineer shall, after due consultation with the Employer and the Contractor, determine extension of time under Clause 44.1 and the additional costs for such delays

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

NHPC LIMITED
FARIDABAD

(N.N. Singhal)
Arbitrator

(ii) Clause 12.2: In terms of Clause 12.2 of contract, during the execution of the works, if the Claimant encounters physical obstructions or physical conditions, other than climatic conditions and suffers delay and/or incurs costs then the Engineer shall, after due consultation with the Employer and the Contractor, determine extension of time under Clause 44.1 and the additional costs for such delays.

(iii) Clause 42.2: In terms of Clause 42.2 of contract if the Claimant suffers delay and/or incurs costs from failure on the part of the Respondent to give possession of site, the Engineer shall, after due consultation with the Employer and the Contractor, determine extension of time under Clause 44.1 and the additional costs for such delays.

39. It is also relevant to consider the following definitions forming part of the contract:

(i) Clause 1.1(e)(i): "Contract price" means the sum stated in the letter of acceptance as payable to the Contractor for the execution and completion of the works and the remedying of any defects therein in accordance with the provisions of the contract.

(ii) Clause 1.1(g)(i): "Cost" means all expenditure properly incurred or to be incurred, whether on or off the Site, including overhead and other charges properly allocable thereto but does not include any allowance for profit.

40. Clause 44 provides for extension of time under circumstances. The relevant part of the same is reproduced as below:

"44.1 In the event of—

(a) the amount or nature of extra or additional work,

(b) exceptionally adverse climatic conditions, exceeding 1 in 100 years recurrence

(c) any delay, impediment or prevention by the Employer, or

(d) other special circumstances which may occur, other than through a default of or breach of contract by the Contractor or for which he is responsible which effect the execution of work and entitle the Contractor to an extension of the Time for Completion of the Works, or any Section or part thereof,

the Engineer shall, after due consultation with the Employer and the Contractor, determine the amount of such extension and shall notify the Contractor accordingly, with a copy to the Employer.

41. The matter of aforesaid clauses has been very beautifully described by the Hon'ble Justice Manmohan Singh in the matter of NHAI Vs HCC Ltd., 2014 (3) Arb. LR 243 (Delhi) as below:

> 37. Upon the collective reading of the aforementioned clauses of the agreement, the following position can be said to be discernible:
>
> • That there are different kinds of delays and costs which are enumerated under Clause 6.4, Clause 12.2 and Clause 42.2 respectively which may become reason for the grant of the extension of the time and incurring of the costs which may be added to the contract price. Clause 6.4 provides that if any delay is caused by reason of any failure or inability of the Engineer to issue any drawings or instructions for which notice has been given by the Contractor, the extension of time is permissible under Clause 44 and the amount of such costs which the Engineer may determine may be added. Similarly, Clause 12.2 deals with the delay caused due to physical obstructions or other adverse climatic conditions and Clause 42.2 relates to the delay occurred due to failure on the part of the Employer to give possession in accordance with the Sub-Clause 42.1. There are different kinds of delays which have been earmarked by the Clause 6.4, Clause 12.2 and Clause 42.2. In all such cases of the delays, the provision for the grant of the extension of time is common which is Clause 44
>
> • As there are different kinds of delays and the extension of time in the contract period are mentioned in the Clauses 6.4, 12.2 and 42.2, similarly, the element of the costs which may be incurred by the Contractor are also mentioned for determination of the same by the Engineer which may be added in the contract price. The expression used in the said clauses is "costs which shall be added in contract price". The wordings are thus confined to "costs" "which shall be added in the contract price". The expression 'costs' is distinctly defined under the provision of Clause 1.1(g) and the expression "contract price" is also defined in Clause 1.1(e) of the agreement. As the wording used in said clauses is "costs", no expression "additional costs" can be separately found in the clauses or defined in the contract different from "costs" and thus one has to revert back to the definition of the expression "costs" as defined in Clause 1.1(g) in order to see what shall constitute costs which shall be proper expenditure incurred or to be incurred on the site or off the site with certain inclusions as mentioned in the said clause. It is costs of such a nature which shall be added to the contract price and not all other inclusions which may be outside the scope of the expression "costs" as defined in the agreement.
>
> • The reading of the definition of the expression "costs" makes it further clear that the costs means all the expenditure properly incurred or to be incurred on the site or off the site and includes the overheads and other charges properly allocable. The expression 'costs' is contractually defined with certain inclusions like overheads and other charges and exclusions like allowance of the profits. The said definition of "costs" means and includes definition which covers the "other charges" which

NHPC LIMITED एनएचपीसी NHPC FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L. Kotwal) Arbitrator

(D.N. Singhal)

are on or off the site "properly allocable". Once there exists a delay in the completion of the works due to preventions or obstructions of the Employer, the other charges incurred or to be incurred by the Contractor may include the payment towards the purchase of inputs at the relevant time or later on, may be at higher price, charges on the overheads towards stay of machinery or plant, etc. In that way, the definition of the expression 'costs' is per se wide enough to encompass within itself the other charges which are connected with the delay caused. What flows from this is that though the costs are not the same as that of the compensatory damages which may include the element of profit or loss of earning capacity depending upon the proximity or remoteness, still the definition of costs as defined in the contract is itself wide enough to cover other charges properly allocable. Under such circumstances, the possibility of inclusion of the charges relating to the rise and fall of the inputs as other charges which are allocable as uncovered compensation in the manner done by the Respondent in order to categorize them as costs cannot be ruled out in view of the definition of the expression 'cost'.

- It is also noteworthy to mention that the Clauses 6.4, 12.2 and 42.2 in all use the term "costs which shall be added to the contract price", the expression 'costs' has to be understood in the context of the nature of the delay caused by the Engineer or the Employer. The costs which shall be added to the contract price under the relevant clauses has to have the nexus between the incurring of the expenditure vis-a-vis the nature of the delay caused. This is due to the reason that it is because of the said nature of delay caused which resulted into the extension of time and consequential costs. Thus, the costs which are required to be claimed and included under the relevant Clauses 6.4, 12.2 and 42.2 cannot be unrelated to the causes of the delay and no costs in generality can be put inside the said bracket in order to claim the same. It is necessary to point out this position at this stage as the arbitral tribunal while reading the said clauses together arrives at the broad based conclusion at para 11.4.11 that the reading of the clauses suggests that for every default of the Employer, the costs becomes payable and the said costs can be claimed in generality. I find upon reading of the Clauses 6.4, 12.2 and 42.2 that such is not the position, the delays are discretely defined along with their respective clauses and the consequential costs which are required to be ascertained by the Engineer added to the contract price.

Thus, the arbitral tribunal's interpretation upon the collective reading of the clauses suggesting that the additional costs are payable in each and every delay caused due to the default of the Employer and the costs as an expression should be loosely used to cover the element of the profit and earning capacity wherever it is claimed is not an interpretation which can be discerned from even the plain reading of the Clauses 6.4, 12.2 and 42.2 under the contract. The costs are payable only to the extent that the

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(U.N. Singhal)
Arbitrator

same have some nexus with the nature of the delay caused which attracts the costs and the amount claimed falls within the definition of the expression 'costs' and not otherwise.

It is well settled principle of the interpretation of the contract that the each and every word employed by the draftsmen in the clauses should be given meaningful effect in order to keep every clause of the contract workable and operative in their respective fields. Applying the said principle to the clauses of the agreement, if the intention of the draftsmen was to provide for the recovery of the costs in generality which is in nature of compensatory damages, there was no occasion to use the expression "costs which shall be added to contract price" in each and every clause relating to delay for different reasons. Obviously, the intention was to provide for the addition of the costs in the contract price which are germane to the reason of the delay and are direct consequence of the reasons of the delay and not the ones which are unconnected with that of the delay in question. Thus, the interpretation given above makes the clauses workable as against the ones interpreting the expression "costs" in generality which makes them unworkable.

42. From the above analysis, it is clear that :

(i) 'Additional Cost' is caused when the work is disrupted i.e. when there is a material difference between the performance conditions that were expected at the time of bid and those actually encountered resulting in increased difficulty and cost of performance.

(ii) The 'additional cost' shall be payable as per the applicability of clauses 6.4, 12.2 & 42.2 of the contract.

(iii) The payment of 'additional cost' as contemplated in GCC Cl.6.4, 12.2 & 42.2 is distinct and distinguishable from the 'valuation of variations' (as contemplated in GCC Cl.52.2 read with COPA Sub-Clause 52.2) and 'price adjustment' (as contemplated in COPA Sub-Clauses 70.1 & 70.8). As such the contention of the Respondent that the determination of additional cost payable under GCC Cl. 6.4, 12.2 & 42.2 tantamount to variation in rates is not correct. As stated hereinbefore, these are governed by different and independent contract clauses.

(iv) The 'cost' is contractually defined under the provisions of Clause 1.1(g). The element of profit and earning capacity is not included in the clause and as such shall not be payable. As such the 'additional cost' found payable under clauses 6.4, 12.2 & 42.2 shall not include the element of 'profit'.

(V.K Tyagi)
Presiding Arbitrator

(S.L.Kotwal)
Arbitrator

(H.H. Singhal)
Arbitrator

43. The next question comes for consideration is as to how to calculate and determine the amount of additional costs which may become payable under the aforesaid eventuality as prescribed in clauses 6.4, 12.2 & 42.2 of the contract. These clauses do not provide for any answer to this question.

44. The Claimant has raised the claim on the basis of analysis of rates given in the CWC guidelines which are followed on all India basis as far as river valley projects are concerned. Sec.55 and 73 of the Indian Contract Act do not lay down the mode and manner as to how and in what manner, the computation of damages or compensation has to be made. The sections provide only for the entitlement to compensation and not to the mode and manner in which such compensation is to be quantified. It is an accepted position that different formulae can be applied in different circumstances and the question as to whether damages should be computed by taking recourse to one or the other formulae, having regard to the facts & circumstances of a particular case, would fall within the domain of the Arbitrator. In a situation like in the present case, the hindrances at site vary in time, in space, in intensity as well as its degree. The adoption of CWC Guidelines for computing additional cost cannot thus be said to be in violation of any contractual condition or law. In fact, in the present case, the claim is based on the change in cycle time given in the contract. Another document is on record captioned guidelines for working out unit rate cost of the construction equipment used for river valley projects (First Revision) IS 11590 : 1995 (Reaffirmed 2000) issued by Bureau of Indian Standards.

45. AT has considered this question further. The contract is subject to Federation Internationale Des Ingenieurs-Conseils (FIDIC)'s 'Conditions of Contract for Works of Civil Engineering Construction' Part-1-General Conditions Fourth Edition-1987 reprinted 1992 with further amendment and Part-II-Conditions of Particular Application. GCC Cl.12.2 of these conditions provide for 'Not Foreseeable Physical Obstructions or Conditions'. This GCC Clause is reproduced as below:

> *If, however, during the execution of the works the Contractor encounters physical obstructions or physical conditions, other than climatic conditions on the Site, which obstructions or conditions were, in his opinion, not foreseeable by an experienced Contractor, the Contractor shall forthwith give notice thereof to the Engineer, with a copy to the Employer. On receipt of such notice, the Engineer*

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L. Kohli) Arbitrator

(H.N. Singhal)

shall if in his opinion such obstructions or conditions could not have been reasonably foreseen by an experienced Contractor after due consultation with the Employer and the Contractor, determine.

(a) any extension of time to which the Contractor is entitled under Clause 44, and

(b) the amount of any costs which may have been incurred by the Contractor by reason of such obstructions or conditions having been encountered, which shall be added to the Contract Price.

and shall notify the Contractor accordingly, with a copy to the Employer. Such determination shall take account of any instruction which the Engineer may issue to the Contractor in connection therewith, and any proper and reasonable measures acceptable to the Engineer which the Contractor may take in the absence of specific instructions from the Engineer.

146.1 It will be worthwhile to mention here that while bidding for the works of such technical nature, pre-qualification criteria are applied by the Employer and only after satisfying that the intending bidder has adequate experience of such works and has technical capability to handle such works including hindrances and difficulties associated with such works, the intending bidders are allowed to submit financial bids. Generally, the site investigations will also have been carried out by the Employer, and the assumed ground conditions informed to the design on which the contract documents have been based. The bidders are thus well expected to take care of various problems likely to be encountered during execution. But the Contractor will have limited opportunity to investigate the site conditions which require geotechnical or other investigation. As such their experience on similar works certainly cannot be extended to imply that the handling of the issues in the present contract shall be at his cost on the ground that he was aware that such problems could arise and he was expected to tackle them. It shall be a ridiculous proposition. Considering the above, when due to poor and adverse geological situations, the procedure, pattern, methodology for the work of execution is required to be modified with regular instruction from the Engineer, there appears no justifiable reason not to compensate the contractor for lower output resulting in additional cost to him. It is, therefore, the considered opinion of AT that additional cost resulting from increase cycle time for execution of works should be suitably compensated.

146.2 Civil engineering standard forms, therefore, allow for the Contractor to recover additional cost incurred as a result of ground conditions which could not have been foreseen by a competent Contractor. The purpose of such clause is to

(V.K. Tyagi)
Presiding Arbitrator

(S.L.Kohli)
Arbitrator

(N.N. Singhal)

protect the Contractor against a risk in the physical condition of the site which it would be unreasonable to expect the Contractor to price in their tender considering that the Contractor's opportunity for site investigation is limited. A wide range of conditions may be foreseeable as physical condition which potentially affect the execution of work but it would be counterproductive to expect the Contractor to price for remote contingencies unlikely to occur. The purpose of such clause is to compensate the Contractor for the cost of any affect on its cost which are beyond its control and to avoid difficulties in making an appropriate allowance for such amount in the bids.

47. The determination of additional cost / compensation depends upon the circumstances of individual case. Since in this case, the agreement between the parties mentions the payment of compensation then the agreement is to govern the matter. There is a distinction between cases:

(a) where there is an absence of evidence, which makes it impossible to fix damages; and

(b) where there is difficulty in assessing damages because of the nature of the damages proved.

In the former case, the case of the Claimant may fail, but, in the latter case, an effort should be made to put the injured party in the same position as he would have been, if he had not sustained the wrong.

The fact that damages cannot be assessed with certainty does not relieve the wrongdoer of paying damages.

48 It will be relevant to quote the statement of law which appears in Halsbury's Law (pg.385) of J.P. Singhal's Law of Damages & Compensation (second edition), LexisNexis Butterworths:

> *A distinction must be drawn, however, between cases where the difficulties are due to uncertainty as to the causation of damage, where questions of remoteness arise, and cases where they are due to the fact that the assessment of damages cannot be made with any mathematical accuracy. Lack of relevant evidence may make it impossible to assess damages at all, as where the extent of the loss is dependent upon too many contingencies, and, in such cases, where liability is established, nominal damages only may be awarded. Where it is established, however, that damage has been incurred for which a defendant should be held liable, the plaintiff may be accorded the benefit of every reasonable presumption as to the loss suffered. Thus, the court doing the best that can be done with insufficient material, may have*

NHPC LIMITED FARIDABAD

(V.K Tyagi)
Presiding Arbitrator

(S.L Kotwal)
Arbitrator

(N.K. Singhal)

to form conclusions on matters on which there is no evidence, and to make allowance for contingencies even to the extent of making a pure guess.

49. It will also be relevant to cite the case of YC Rattayya Vs Venkataramayya (AIR 1959 AP 551) where the following points were noted:

(a) A distinction must be drawn between cases of absence of evidence, which makes it impossible to fix damages, and cases which present difficulty in assessing damages because of the nature of the damage proved.

(b) The difficulty in assessing damages is no ground for refusing substantial damages.

(c) Courts should try to get at that sum of money which would put the injured party in the same position he would have been, if he had not sustained the wrong which entitles him to claim damages. The judge must assess damages as best as he can on the materials available.

(d) The Court must not decline to estimate damages, merely because the plaintiff could not adduce the best evidence.

(e) In cases, where evidence can be adduced as to the quantum of damages, the amount should be determined with a degree of certainty, though absolute certainty is not required.

(f) It is not necessary to adduce direct evidence as to the amount in all cases.

(g) Damages are not uncertain, merely because the loss sustained is incapable of proof with certainty of mathematical demonstration, or because it is to some extent contingent and incapable of precise measurement.

(h) All that has to be made out is that loss of profits was likely to result from the breach of contract, and was a probable and direct result thereof. The plaintiff is only entitled to such damages as can be fairly and reasonably considered as arising naturally, in accordance with the usual course of things.

(i) The damages awarded should be those which are the direct and natural consequences of the injury. The plaintiff must establish that the breach was the real or effective cause of the loss or damage sustained.

(j) Mere speculative profits such as might be conjectured to have been the probable result of an adventure which was defeated by the breach of the contract, and with respect to which no means exist of ascertaining, even approximately, are not recoverable damages.

NHPC LIMITED FARIDABAD

(S.L. Hotwani)
Arbitrator

(R.N. Singhal)

(k) The Court must make an intelligible and probable estimate, which the nature of the case will permit, on the facts and circumstances of each particular case

(l) It is legitimate to assess the damages approximately.

50. It will also be relevant to cite the case of Gambhirmull Vs Indian Bank Ltd. (AIR 1963 Cal 163), it was said:

(a) The fact that damages are difficult to estimate and cannot be assessed with certainty or precision, does not relieve the wrong-doer of the necessity of paying damages for his breach of duty, and is no ground for awarding only nominal damages.

(b) A distinction must be drawn between cases:

- Where the difficulties are due to uncertainty as to the causation of damages, where questions of remoteness arise; and
- Where they are due to the fact that the assessment of damages cannot be made with any mathematical accuracy.

(c) Lack of relevant evidence may make it impossible to assess damages at all, as where the extent of the loss is dependent upon too many contingencies; but, if it is established that damage has accrued, for which the defendant should be held liable, the plaintiff may be given the benefit of every reasonable presumption as to the loss suffered.

(d) The Court must do the best that it can do with insufficient material and may form conclusions on matters on which there is no evidence, and make allowance for contingencies, even by going to the extent of making a pure guess.

51.1 At this stage, it will be worthwhile to cite the following from the judgment of Hon'ble Supreme Court in the case of McDermott International Inc. Vs Burn Standard Co. Ltd. & Others (2006) 11 SCC 181. The relevant paras are reproduced as below:

96. .....It is, therefore, in our considered opinion, not correct to contend that the invoice is the only base whereby and whereunder a claim can be made. There is no legal warrant for the said proposition. A claim can also be made through correspondence or in meetings.

97. A claim for overhead costs resulting in decrease in profit or additional management costs is a claim for damages.

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(N.N. Singhal)

98. An invoice is drawn only in respect of a claim made in terms of the contract. For raising a claim based on breach of contract, no invoice is required to be drawn.

51.2 The Sec.28(3) of the Arbitration & Conciliation Act, 1996 provides that the Arbitral Tribunal has not only to look into the terms of the contract but has also to take into account the usages of the trade applicable to the transaction. In engineering practice, various codes and manuals constitute the usage of the trade applicable to particular transactions. Whenever and wherever necessary, help and support of various codes and manuals is always taken in construction of engineering project. The practice of utilizing manuals has also been supported by Hon'ble Supreme Court in the aforesaid judgment in the McDermott Case in para 129 which is reproduced as below :

129. Clause 1.1.13 defined specifications to mean Industry Standard Codes (ISC). In the absence of a contractually specified method of calculation, MII applied the AISC manual of steel construction for calculating the as-fabricated tonnage. AISC is an industry standard. It has been applied by ONGC in other contracts. Even the arbitrator has noted that BSCL has also accepted the validity of the AISC Code. Now BSCL cannot turn around and take a contrary position before this Court in the proceedings under Section 34 of the Act. Hence by adopting the AISC Code, the Arbitrator has not acted contrary to the terms of the contract.

In this way, the Hon'ble Supreme Court has allowed the use of AISC manual which is an industry standard in the absence of contractually specified method of calculation.

51.3 Various Govt. Departments dealing in engineering contract have their own manuals for analysis of rates of various items required for execution of works. Ministry of Road Transport & Highways has published the Standard Data Book For Analysis of Rates which is universally followed by NHAI for its Highways Projects and Contracts. Central Public Works Department has published its own manuals for Analysis of Rates of various items besides Delhi Schedule of Rates. They are universally followed by various organizations of Central Govt. including CPWD more particularly for building works. In the same way, Central Water Commission (CWC) has published various guidelines and as well as analysis of rates for Hydro-Power Projects. They are also followed by NHPC and other Organizations dealing with Hydro-Power Projects in preparing their project reports.

(S.K. Kotwal)
Arbitrator

(B.L. Singhal)
Arbitrator

51.4 Thus, the applicability of CWC Guidelines for calculating the additional cost is a plausible method. It is more so because it is dependent on too many contingencies. The additional cost may be required to be incurred for reasons varying in time, space, length, factors and other contingencies making it practically impossible to exactly quantify the same. The Claimant has calculated the additional cost on the basis of CWC guidelines. As per AT, this is a industry standard and there appears nothing wrong in adopting the same for calculation of additional cost. However, as discussed here-in-above, the element of profit cannot be considered as admissible in such costs.

52. After receipt of the tender, the Respondent have asked for the break-up of the rates of 10 B.O.Q. items in the Data Sheet - 13 forming part of the bidding document vide their letter dt.15.03.2001 (pg.159 of contract volume-1). This information was supplied by the Contractor and is annexed in the contract volume-1 from page 162 to 181. The Claimant has stated that the break-up given by him is forming part of the contract, therefore, it has adopted the cost of supervisory and managerial staff, other direct cost, indirect cost and overhead and profit components from these submissions in calculating the payable additional cost. It is also based on CWC Guidelines as quoted above and accordingly, their adoption cannot be said to be in violation of the contract clauses. However, in these calculations the element of overhead & profit has been taken as 15% on the cost of work. As narrated here-in-before, the element of profit is not to be considered as per the definition of cost. As such the element of overhead charges has been calculated by AT @7.5% only ignoring the other part towards profit.

53. As per the Guidelines for Preparation of Project Estimate for River Valley Project Govt. of India, Central Water Commission, March 1997, the break-up of indirect wages benefits payable to workmen on River Valley Projects has been calculated as 80% and 55% for skilled & semi-skilled and unskilled workers respectively (pg.66 to 67). The Contractor has taken this percentage to mark-up the wages of labour on these rates. This percentage also appears to be in order as they are universally followed in India.

54.1 One thing has to be understood that in works like this one which involve large scale underground works in uncertain and unpredictable geological conditions we

NHPC LIMITED FARIDABAD

(V.K Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(N.N. Singhal)
Arbitrator

cannot assess the financial implications of various unforeseen situations in a simple mathematical manner. The determination for the additional cost involved in case of disruptions and hindrances as have been encountered is not an exact science. However, the Respondent cannot be permitted to escape liability because of the difficulty in assessing the damages on account of its very nature. The only practical way/method available is the assessment for determining additional cost of idling and under utilization of all resources covering additional efforts involved. All these factors and their affect have been considered by AT. Accordingly, AT has not allowed additional costs claimed for ventilation, water charges, electrical energy charges and other such charges which the members of AT did not find fit to be awarded in view of their experience on such works.

54.2 Regarding idling and/or under utilization of machinery, the Respondent have alleged that the Claimant did not have sufficient equipment resources and there were often break-down of equipment. The Claimant has denied the allegation, however, they admit that there were minor break-downs which are natural in the magnitude of the equipment deployed. The Claimant has also stated that this allegation of the Respondent is incorrect because the inadequacy of equipment was never a point of contention between the parties and in fact the Respondent had made an advance to the Claimant for bringing more equipment for acceleration of the progress of the work. The break-down of equipment is factored in calculating the cost / efficiency and rate analysis as per CWC Guidelines. Thus, the admitted position with regard to deployment of equipment resources at site is that the Claimant not only deployed adequate equipment but on the asking of the Respondent brought additional advanced technology/equipment for tackling the problem of adverse geological strata at the same time. it cannot be denied that there may have been break-downs of equipment. As such no credit and debit account of availability of equipment and their idling / under utilization can be prepared. Accordingly, the idling charges have been bifurcated and only 50% of the equipment charges have been considered by the AT while calculating additional cost hereinafter (ref. MECON Vs Pioneer Fabricators (P) Ltd. : 2007 (4) Arb. L.R. Del.323 – Para 31).

55. The element of 5% towards supervisory and managerial staff and 25% indirect cost has also been adopted by the Claimant on the basis of rate analysis

NHPC LIMITED FARIDABAD

submitted. They appear to be in order and has been considered by AT as such being part of the contract document.

66. **Issue No.5 Whether the Claimant is entitled to payment as claimed on account of additional cost for dewatering during construction due to increased seepage and fractured rock?**

56.1 This issue relates to the Claimant's claim no.B.1 (on page 66 of SOC) for additional cost of dewatering during construction due to increased seepage and fractured rock i.e. for the work of dewatering of construction sites (U.G. & Surface) including supply, installation and removal of pumping equipment from the site for the amount of Rs.2,20,88,350.00.

56.2 The Claimant in this matter has stated that the effect of such increase in cycle time has been compared and is claimed. Unforeseen occurrence of water in large quantities had required deployment of additional dewatering equipments. The occurrence of large water bodies and seepage condition coupled with fractured rocks throughout the HRT caused heavy deterioration of the invert material resulting in heavy maintenance cost of the invert, increased down time of equipment, increased cycle time which has been claimed on actual basis.

56.3 The Claimant in Exh.C-14, page 143 of Vol.2C has given the details of the foreseen conditions of seepage as per the bidding document. He has also narrated actual site conditions encountered. According to him, the presence of dripping/seepage in entire reach of tunnel against expected is varying from no seepage, light, moderate to heavy along with phyllite in entire tunnel, deteriorated the working condition. This caused major deterioration in invert condition for movement of equipments and increased cost towards road maintenance/drains by deployment of additional manpower, JCB and also had direct impact on performance/ maintenance of hauling equipments. The occurrence of seepage in entire tunnel with phyllite and fractured strata caused slush and more fines which resulted in choking of pumps and damaging of parts requiring very high maintenance of dewatering pumps and also requiring large number of standby pumps.

56.4 The details of evaluation of additional cost incurred on dewatering have been given by the Claimant in Ann.C-15 from page 158 to 186. The Claimant has

claimed additional cost @Rs.5.40 per KWH for 40,93,891 KWH amounting to Rs.2,20,88,350.00.

56.5 The Respondent has denied the claim stating that the Claimant has prepared the additional cost on making sumps with the assumption of sumps at every 400 m and deployment of manpower and machinery which is pure speculation. Actual inputs for making sumps at every 400 m have not been verified jointly. Though it is true that sumps were made, but (i) the effort required is not the same every time as claimed by Contractor (ii) the inputs claimed by Contractor are on false and imaginary grounds. Also it may be noted that as per Section B.1 of TS the cost of making sumps is included in the BOQ rate. Further as per Section B.1 of technical specification, Vol.-3, Page 47-54, the Claimant is fully responsible for proper designing, execution and maintenance of complete drainage system during entire period of contract. The rate of the item cannot be revised as per Sub-Clause 52.2 of COPA & Clause 1.4.1.3, 1.4.2.3 of T.S. Moreover, the input considered for deriving rates is fabricated and cannot be accepted.

56.6 AT has considered the issue no.5 and related claim no.B.1. AT is of the opinion that under the facts & circumstances, the Claimant is not entitled to any additional cost for dewatering during construction due to increased seepage/fractured rock.

56.7 The issue no.5 is decided accordingly.

56.8 The claim no.B.1 for the amount of Rs.2,20,88,350.00 is rejected.

57. **Issue No. 6 : Whether the Claimant is entitled to payment as claimed on account of additional cost of underground excavation due to cycle time?**

57.1 This issue relates to the claim no.3 (with reference to Technical Specification no.B-3) as raised by the Claimant on pg.66 of the SOC. This relates to the excavation of Head Race Tunnel and Adits.

57.2 The position of the claim is as below:

Item No.	Rock Class	Agreement Rate per cum (Rs.)	Certified executed quantity (cum)	Additional Rate claimed per cum (Rs.)	Amount claimed (Rs.)
3.1.1	I, II & III	869	6,50,418.00	482	31,35,01,476
3.1.2	IV & V	1150	1,99,852.46	1988	39,73,06,698
				Total	71,08,08,174

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(N.N. Singhal)
Arbitrator

57.3 The Claimant has submitted the reasons for claiming the aforesaid amount on pg.145 of Vol.-2C of SOC. The details of the same are summarized / reproduced as below:

(i) Regarding drilling time, the Claimant has stated that the work was planned with twin, boom tamrock jumbo capable of drilling 2.1 m per min. per boom. This was based on the site geology described in 13.1 & 13.2 of ITB and the relevant tendered drawing. However, the drilling rate had to be reduced by reducing pressure to almost 25% to avoid deviation of holes which were getting deviated if the equipment was operated on rated or even 80% capacity. This was due to fractured rock, phyllite shears as also detailed in drawings 11085 to 11088. Additional holes were also required to be drilled and re-drilled due to their collapsing. Drifter rod stucking requiring frequent flushing of holes also became necessary. This resulted in increased drilling time causing delay and additional cost.

(ii) Regarding charging/testing/blasting, it is stated that loading was planned manually with no sub-activity. However, the holes were required to be flushed / cleaned or even re-drilled due to their collapsing as per rock conditions. The work also increased due to presence of seepage of water throughout. The seepage was much more than envisaged in ITB 13.8 & 13.2. It resulted in increase in the time of charging/testing/blasting causing delay and additional cost.

(iii) Regarding mucking and bottom cleaning, it is stated that this activity was planned by loading the muck after the blast with excavator with loader bucket and hauling with dumpers. However, in actual, there was additional activity of deploying of back-hoe excavator / J.C.B. after the main mucking to clean the bottom to remove slush due to heavy seepage water coupled with phyllite, sheared/fractured/poor rock condition. The additional sub-activity of bottom cleaning increased the cycle time and cost.

(iv) Regarding permanent support system, it is stated that the decision about the type and quantity was to be taken by the Engineer. However, in actual, advance was also directed for a section without ribs. After the blast, Engineer instructed if support was required. In such cases where ribs were required the secondary blast became compulsory to accommodate ribs in the section. Thus every time

NHPC LIMITED FARIDABAD

additional secondary blast had to be done to accommodate class-IV & V supports resulting in additional time and cost. .

(v) Regarding over-break, it is stated that pay line was indicated as 100 mm beyond minimum pay line. However, in actual the over break was beyond pay line due to geological reasons as high as 4 m where class I, II & III supports were instructed. Such high over break increased the cycle time of providing the supports and caused hindrances in advance.

(vi) Regarding pull, it is stated that in class I & II, class III and class IV & V, it was foreseen as per the contract 3.5, 3 and 2.5 meters respectively based on site geology given in ITB, section of tunnel and normal time requirement to support excavated reach. However, in actual due to poor rock geology coupled with seepage and time required for providing supports due to their change type, increase in quantity, over break the Engineer reduced the pull. It resulted in higher cycle time, reduced pull in-spite of deployment of increased resources. This resulted in increasing the cost and time.

(vii) The instance of arranging additional equipment is supported by contemporary record, for example, NHPC requested, vide letter dt.07.05.2002 (exhibit C-60) for equipment required for boring of probe holes as well as grouting holes for a length upto 30m. This was not contemplated in the contract.

57.4 The details of the additional cycle time vis-a-vis as envisaged in the contract have been given by the Claimant on pg.125-131, Vol.2C of the SOC whereas the detailed calculation have been given from pg.164 to 184. The details of the claim have been worked out on the basis of analysis of rate given in Guidelines for Preparation of Project Estimates for River Valley Projects issued by Central Water Commission, Govt. of India, New Delhi in March 1997, copy of which has been placed on record by the Claimant.

57.5 The Respondent have denied the claim from pg.48 to 49 of their SOD stating (i) that the Claimant has put forward the claim mainly on following:

a) Cost of drill steel

b) Cost of explosive

c) Cost of labour & machinery

d) Other L.S. Charges

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L. Kakwai) Arbitrator

(N.N. Singhal)

A simple glance on the above will reveal that claim has been made on theoretical calculations without getting the inputs verified from NHPC. The consumption of drill steel and explosive is also on the theoretical basis. It is a fact that consumption varies as per skill and efficiency of manpower and machinery deployed at site. Also the extra cost of labour & machinery is totally fictitious. It is fact that there were frequent breakdowns of machinery, shortage of manpower and material during execution of work. Also lumpsum charges have been added by the Contractor only to obtain huge payments. Further, the Claimant was fully responsible for increase in the cycle time due to frequent breakdown of his equipment/inadequate deployment/ non-availability of required manpower, machinery, materials, lack of supervision etc. Further, the rates of items cannot be revised as per Sub-Clause 52.2 of COPA & Clause 3.15.5 of Technical Specifications, page 83. In addition to this the contract does not have any provision for such type of payment as claimed on the basis of increase in cycle time. The cycle time is not realistic because certain factors like breakdown of equipment/ inadequate deployment/ non-availability of required manpower, machinery, materials, lack of supervision etc. have not been taken into account. Moreover, the inputs considered for deriving rates are fabricated and cannot be accepted.

(ii). In the written synopsis of the argument, the Respondent have pointed out the typographical error on pg.170 of the SOC.

(iii) In the rejoinder reply, the Claimant has stated that it has done the estimation of timing/rate of the activity based on the study of data about the rock geology provided in the tender document and tender drawing based on which cycle time of various activities were assumed and bid was submitted. The bid was examined by Respondent seeking several clarification and information, leading to submission of the revised bid. Claimant deny the allegation of frequent break down of machineries, non availability of manpower, material, machinery, lack of supervision and delay in providing initial rock support in time. No rate revision has been claimed and it is only the additional cost claimed which was not envisaged for varied instructions/ conditions at the time of tendering. The claim has been submitted with all justifications and is based on facts.

57.6 In the statement of admission & denial of Claimant's documents, the Respondent have denied the documents from pg.141 to 313 of Vol.2C of SOC. The Claimant

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(H.N. Singhal)

filed an affidavit dt.29.04.2010. In the affidavit, he elaborated the points from para 89 to 115. The Claimant's witness was cross-examined in this regard. Some of the questions relating to this claim and their answers are reproduced as below :

Q.128: Do you understand the various rock types?

A-128: Based on the working experience, I can understand the various rock types to some extent but not fully since I am not a geologist.

Q-129: What is the difference between phyllitic quartzite and quartzite?

A-129: With my working experience phyllitic-quartzite is combination/mixed bands of phyllite and quartzite whereas quartzite is pure quartzite.

Q-130: What is quartzitic-phyllite?

A-130: With my working experience quartzitic-phyllite is combination/mixed bands of quartzite and phyllite.

Q-131: What is difference in characteristics of the rocks in terms of excavation with reference phyllitic quartzite and quartzite?

A-131: Generally, excavation in quartzite is relatively easier and faster.

Q-132: Have you maintained contemporary records for valuation of Claims?

A-132. Yes.

C-133. Have these records been produced before this tribunal?

A-133 Some of the records are part of the submission. Any other particular record if required by AT shall be submitted.

C-134 Are the calculations for Claims based on actual inputs?

A-134 Calculations are based on actual data and analysed based on the established guidelines like River Valley Guidelines etc.

Q-135: Are there joint records to support the parameters adopted in working out the Claims?

A-135: Partly.

Q-136: Have you produced those records before the AT?

A-136: No but we have referred to such records in our submission like Measurement Books of NHPC duly signed by us, letters etc.

Q-137: Can you produce these joint records?

A-137: Joint records like copy of Measurement Book is not with us. However we were shown the abstract of the Measurement Book and those detail are with us. Additionally joint record of major resources deployed is also available. These can be produced.

Q-138: Which are the Claims that have been preferred on the basis of the joint records?

A-138: Our Claim is based on the combination of the joint records and other reasons as detailed in the Statement of Claim and rejoinder submitted.

Q-139: Are there certain claims pertaining to idling of resources?

A-139: Yes, Idling of resources is part of the total claim.

NHPC LIMITED FARIDABAD

(V.K. Tyagi)

(S.L. Kotwal)
Arbitrator

(N.N. Singhal)
Arbitrator

~~57~~

Q.180: Why has there been an increase in cycle time?

A-180: Prime reason was unforeseen geological and physical conditions.

Q-181: Was the increase in cycle time verified by the EIC during execution of work?

A-181: The effect on progress due to increase in cycle time was intimated to the Respondent from time to time such as vide letters file as exhibit-C125 of Volume-3C (page no.655-667)

Q-182: I put it to you that during execution of the contract, you never got the alleged increase in cycle time verified by the EIC. What do you have to say?

A-182: We had submitted the details of increase in cycle time and its effects to the Respondent from time to time but there was no response from them.

Q-183: Can you show to the AT the document by which verification of increased cycle time was sought by you from the Respondent?

A-183: There is no such specific letter. However the effect of adverse geological conditions on progress was even acknowledged by EIC vide the letter exhibit-C106 of volume-3C (page no.611).

57.7 Although the AT is not bound by the provisions of Evidence Act, however, sustenance can always be drawn from that Act. The Claimant's witness has especially referred in his affidavit to the documents denied by the Respondent. The witness was thoroughly cross-examined by the Respondent's counsel from the 13th arbitral hearing held on 28.09.2010 to 25th hearing held on 20.02.2012. As such AT is of the opinion that the documents denied by the Respondent and affirmed by the Claimant can be considered in the present proceedings.

57.8 It will be worthwhile to mention here that while bidding for the works of such technical nature, prequalification criteria are applied vigorously and only after ascertaining that the party has adequate experience of such works and has enough capacity to handle hindrances and difficulties associated with such works, the party is authorised to submit financial bids. Therefore, there is no doubt that the finally chosen bidder has all the experience and knowledge of such (contracted) works. The Contractor is well expected to take care of various problems actually encountered during execution, but it certainly cannot be extended to imply that handling of such issues shall be at his cost, on the ground that he was aware while bidding that such problems could arise and he was expected to tackle them.

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L. Kotwal)

(H.N. Singhal)

Considering the above, when due to poor adverse situations the procedure, pattern, methodology for the work of excavation of HRT had to be modified with regular instructions from the Engineer and to the satisfaction of the Engineer. Thus there appears no justifiable reason not to compensate the Contractor for lower output resulting in obvious additional financial cost. It is, therefore, the considered opinion of AT that additional cost resulting from increased cycle time for excavation of HRT should be suitably compensated.

57.9.1 The Claimant has stated that he has submitted contemporary records for complete geological sections as encountered at site comparing the same with tender provisions. The Claimant has submitted the comparison between support systems foreseen in contract document as given in construction drawing vis-a-vis as actually installed in Annex.C-1 (Vol-2) from pg.20 to 34. The Claimant has stated that because of adverse geological conditions spacing of steel ribs envisaged at 1.25 m was varied from 0.5 m to 1.0 m. For the ribs, ISMB 300 was used in place of ISMB 250 in Class-IV support system, additional wall plates and bracing had to be provided, also the 5m rock anchors were used in place of 4 m rock anchors and the Claimant was asked to provide cladding concrete wall in heading inside walls with or without vertical support in class-I, II & III rocks (refer Exhibit C-1-16/17, Vol.2C). The Claimant has also submitted details of rib rectification which were necessitated due to their buckling and twisting because of adverse geological condition. Exhibit-C-161, 217 of Vol. 3C and Exhibit C-235, 250, 280 of Vol.4C.

57.9.2 The Claimant has filed the comparison between support systems foreseen in the contract document v/s as given in the construction drawings v/s as actually installed from pg.19 to 21 of Vol.2C. The details of the variation in the spacing of the ribs have also been detailed on pg.22 of Vol.2C. The spacing of ribs on face-IV varied from 0.66 to 0.81 M whereas on face-VI it varied from 0.79 to 0.9 M. The construction drawings showing steel rib details have also been filed before AT from pg.23 to 30 of Vol.2C. The details of rock anchors of various sizes have also been given on pg.32 and 33 of Vol.2C. Erection of ribs required consolidation grouting. The details of the same and cladding concrete have also been shown on pg.31, 34 & 35 of Vol.2C. AT has examined these documents while considering the matter on merit.

(N.K. Singhal)

~~59~~

57.10 The AT has also considered the point that in view of difficulties encountered in drilling of blast holes, frequent collapse of holes, reduced pull length, collapses and over breaks, the services of Scientist from Central Mining Research Institute, Dhanbad were availed in 2004, who after visiting the site and detailed examination of the conditions in the HRT, concluded that the difficulties experienced in HRT were due to extremely adverse geological conditions encountered (Exhibit-C-127, Vol.-3C. Page 669).

57.11 The Claimant has referred to many letters exchanged between the parties regarding adverse geological conditions and failure of support systems due to their buckling and twisting. Thus, the Claimant has given adequate notices to the Respondent regarding physical obstructions being encountered at site resulting in lesser progress than planned. AT has also examined the extent of physical obstructions being encountered at site. AT has considered the following relevant points in this regard.

57.12 Instead of quoting from the entire correspondence, it will be worthwhile to reproduce the letter of Chief Engineer, HRT NHPC Ltd.'s letter dt.27/28.08.2003 which was written to M/s GIL as below:

> *It has been observed that at various locations due to adverse Geological strata and cavities the progress is hampering badly. You are requested to submit proposal to achieve faster progress at such areas. If needed the use of advanced technology may kindly be explored and proposal be submitted for consideration of NHPC.*
>
> *In this context as suggested by M/s GIL vide their letter No. CMG/303 dt.27.06.03, the induction of Fore polling Machine (20m) suitable for tackling such poor zone can also be considered if it can speed up the progress and help in achieving construction schedule.*

57.13 In this connection, the services of M/s Bhumi Developers, New Delhi were engaged by the Claimant for carrying out fore poling work and submitted the required methodology in June, 2004 (Exhibit no.C-144, pg.730 of Vol.3C).

57.14 However, this did not work. In this connection, the report dt.08.07.2004 of Sr. Manager HRT at pg.625 & 626 of Vol.3C is also relevant and reproduced as below:

> *This is in continuation to earlier note no NH/TSV/CE(HRT)/1103 dated 28.08.2003 vide which preparedness with R.P.U.M. of tunnel advancement in case of poor rock*

NHPC LIMITED FARIDABAD

(H.R. Singhal)

conditions was envisaged. The heading excavation at Face – 4, Adit – III, of HRT remains critical since 25.03.2004. The heading face consist of loose and powdery strata which keep on flowing whenever the face is opened for advancement. A little seepage is also observed. For advancement consolidation grouting of the face was taken up. Till 29.06.2004, 1071 bags of cement grout has been done. The details of face consolidation grouting is enclosed as Annex – "A". However there was not much reprieve in the adverse geological conditions prevailing at the face. In addition, to check the flowing condition before opening the face fore poling the face with 36mm dia. bars 2 to 3 m inside the rock drilled at 300mm center to center along the periphery was also taken up. At certain location channels and pipes were also used for fore-poling. The loose rock material used to pass/flow through the spaces between these fore poles and hence at certain locations Hot Rolled Sheets-2.5mm thick were also placed above the fore poles. Fore-poling of 45mm dia. perforated mild steal pipe with help of existing Boomer (drilling jumbo) was attempted but was not successful as the holes used to collapse and pipe insertion for sufficient depth was not possible. In order to asses the strata ahead Probe holes were drilled in the heading face and the data of the same is enclosed as Annexure – "B"

In spite of all the above measures the progress of face – 4 that could be achieved during the last three months is as under.

May – 9 m

June – 3 m

The activities undertaken at face – 4 during the period are enclosed as Annexure – "C". It may be mentioned that the single longest reach yet to be excavated is between face – III and Face – IV totalling to about 1750m. Looking at the above condition M/s GIL has proposed to induct Reinforced Protective Umbrella Method for further advancement at face – 4. The methodology is enclosed as Annexure – D. M/s Bhumi Developers (P) Ltd. are mobilizing the desired technique and equipment who have used the same successfully at Delhi Metro Rail Corporation.

It is felt that the use of R.P.U.M. in face – IV shall help in the following:

1. It is very effective method to save time and execute speedy advancement in poor rock strata.
2. The use of the machine provides total safety while working at the face.
3. This sort of treatment can be tried and utilized in the collapsed faces as well as to tackle the cavities safely and fast.

Submitted for kind consideration.

57.15 The Claimant have submitted the copy of 'Detailed Geo-Technical Report' by an expert Mr. Rodney D. Shaw, Berkeley Geo-Technical Associates who was

NHPC LIMITED FARIDABAD

engaged in the year 2005 to give his detailed report on HRT and Adits 2, 3 & 4 of project. The detailed report has been filed by the Claimant in Vol.5C, 6C & 7C which runs into about 650 pages. Mr. Shaw got the rock samples collected from the site and the same were got tested for Petrographic studies at Department of Earth Sciences, Indian Institute of Technology Bombay as well as Central Petrological Laboratories, Geological Survey of India, Kolkata. 9 samples were collected from site in the presence of the representatives of Respondent and the same were also got tested in IIT, Bombay in Sept.2005. The report of these Petrographic studies has been filed by the Claimant. Mr. Shaw submitted his report on the basis of such sample study. The report of Mr. Shaw has not been denied by the Respondent. On the other hand, the Respondent, relying on the report of Mr. Shaw submitted a chart on 28.01.2014 during arbitral proceedings showing their view of analysis of geological data along HRT. It is another thing that their view was not found tenable as they have extrapolated the study of samples to entire length.

57.16 The Claimant vide Exhibit-C 292 dt.21.03.2007 submitted the details of the claim on this account enclosing the details as well as the Geo-Technical Report of Mr. Shaw to the Respondent. The Exhibit was accompanied by the time cycles, status of HRT, Chart showing unforeseen obstructions encountered, as well as the claim for the expenses and delays due to unforeseen delay condition.

57.17.1 The Claimant has also filed the 'Geotechnical Evaluation Report' dt.12.02.2009 of Sh. H.M. Dayal, Dy. Director General (Retd.), Geological Survey of India, Consultant Geologist from pg.67 to 100 of Vol.2C. This was confirmed by Claimant's witness CW-1 in answer to question no.88 during cross examination. The report is detailed one and the results thereof are given on pg.70 of Vol.2C.

57.17.2 The report of Sh. H.M. Dayal is a very detailed document about the classification of rocks encountered at site. It has tabulated the Geo-technical features on the basis of geological logs including the dripping / seepage, thickness and frequency of shear zone as well as rock class as per RMR recorded in the geological log vis-a-vis support instructed. This has been done for the entire length of the tunnel. This study has also given a comparison of rock projected as per geological condition given in the tender documents and as

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L. Kotwal) Arbitrator

(H.N. Singhal)

encountered during execution. The details of over break in particular lengths have also been given for all faces. The entire rock classification has also been plotted for the rock as encountered on the geological section in the full length of HRT. This report has clearly enumerated the actual rock types encountered.

57.18 A lot of questions were asked from the Claimant's witness CW-1 on petrographic studies of the site which are on record. The Claimant's witness has submitted the details of the samples collected and tested along with relevant enclosures in reply to qus.no.123 & 124 asked in the 18th hearing on 23.04.2011. These details were taken on record as Exhibit CW-1/1. The details of change in methodology of work have been detailed out by the Claimant in pg.19 of Vol.2C. The deployment of equipment as actually deployed vis-a-vis the planned deployment has been established by the Claimant through the contemporary evidence on record before the AT. AT has considered the same in its determination of the additional cost found payable to the Claimant hereinafter.

57.19.1 It is sufficiently evidenced that there were significant variations in geo-technical features as projected in the bidding document and as actually observed. The details of the same have been reproduced hereinabove in para 35.4. It also can be concluded that rock supports were initially provided without considering the geotechnical features and R.M.R. classification which resulted in failure of ribs, which in some cases was after a lapse of about 2 to 3 months of erection. Mr. Dayal has also concluded that keeping in view the inadequacy of the supports provided in the HRT, appropriate rectification of ribs were carried out which were fouling in the finished lines of Tunnel, before lining of the tunnel. Even in case of rocks classified in categories III rocks encountered have bedding shears and 3 to 4 sets of joints creating over breaks at a number of places. This has resulted in slow progress in tunnelling.

57.19.2 Based on the above mentioned details, AT is of the opinion that the Claimant is entitled for additional cost for encountering the adverse geological conditions in underground excavation. However, it is not practically possible to exactly pin point each zone of physical obstructions as such, it will, therefore, be reasonable to consider only 65% length of such rock types for additional cost which is calculated as below in para 57.21 hereinafer.

NHPC LIMITED FARIDABAD

57.20 AT has gone into the computations of the claimed amount, hindrances and unforeseen obstructions etc. AT has done its own calculations for claim no.3. Based on AT's decision in Para 52, 53, 54.1, 54.2 and 55 hereinbefore, AT has come up with a rate of Rs.192 and Rs.772 per cum for rock types I, II, III and IV, V respectively towards payment of additional cost to the Claimant.

57.21 Accordingly, the awarded amount against this claim comes as below :

Item No.	Rock Class	Certified executed quantity (cum)	Additional Rate claimed per cum (Rs.)	Amount claimed (Rs.)	Quantity allowed by AT		Awarded rate (Rs.)	Awarded amount (Rs.)
					% of col.3	cum		
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
3.1.1	I, II & III	6,50,418.00	482	31,35,01,476.00	65%	4,22,000 (say)	192.00	8,10,24,000.00
3.1.2	IV & V	1,99,852.46	1988	39,73,06,698.00	65%	1,30,000 (say)	772.00	10,03,60,000.00
	Total			71,08,08,174.00				18,13,84,000.00 Say 18,13,00,000

57.22 The Respondent / NHPC are accordingly directed to pay an amount of Rs.18,13,00,000.00 to the Claimant M/s Gammon India Ltd. against claim no.3 as above

58. Issue No. 7 : Whether the Claimant is entitled to payment as claimed on account of additional costs of rock stabilisation and supports?

58.1 This issue relates to the claim no. 4 (with reference to Technical Specification no. B-4) as raised by the Claimant on pg. 66 of the SOC. This relates to the additional cost of rock stabilization and supports.

58.2 The position of the claim is as below:

Item No.	Description	Agreement Quantity	Agreement Rate (Rs.)	Certified executed quantity	Additional Rate claimed (Rs.)	Amount claimed (Rs.)
4.3	Rock anchors 25mm dia, length 4m	4,30,000 m	345 per m	5,20,662.00 m	291 per m	15,16,12,642
4.8	Steel ribs, supply & installation (including accessories)	3,700 ton	38,000 per ton	4531.58 ton	34072 per ton	15,43,99,994
					Total -	30,59,12,636

58.3 The Claimant has submitted the reasons for claiming the aforesaid amounts on pg.147 & 148 of Vol.-2C of SOC. The summary of the same is given / reproduced as below:

(V.K. Tyagi) Presiding Arbitrator

(S.L.Kohli) Arbitrator

(N.N. Singhal) Arbitrator

NHPC LIMITED FARIDABAD

(i) The Claimant states that clause 3.15.2 of Technical Specifications indicated 10 no. rock bolts per linear mtr of tunnel for which a time of 3 to 3.5 hrs was kept for similar length of tunnel i.e. it was expected it will take one hour for 10 no. rock anchors. However in actual, it nearly took 2 hrs for 10 rock anchors. This was due to the reason that the rock was fractured which resulted in increased drilling time, penetration rate was forced to reduce from equipment capacity of 2.1 m per min to avoid deviation of hole. Even after drilling the drill holes were getting collapsed/choked requiring cleaning and washing. Some of the holes had to be abandoned and new holes redrilled. Grout flowing in cracks consuming more volumes. During drilling holes rock surface getting disturbed/undulated requiring additional padding between rock surface and bearing plate. It resulted in increase in actual time taken in drilling and providing anchors. This resulted in additional costs for which the additional claim @Rs.291 per m has been raised. The calculations of the same are given in pg.185 to 191 of Vol.2C.

(ii) The Claimant has claimed for additional time taken in erection of steel ribs due to their changed design than contemplated in the contract drawings. In the tender drawing, it was foreseen that the spacing of ribs shall be 1.25 m with ISHB 200 considering 2.5 m pull requiring 2 no ribs. However, as per Engineer's instructions, the spacing was kept variable ranging from 0.5 to 1.0 m. This reduced spacing increased all over cycle time and created hindrance to the excavation progress. As per tender drawing section ISHB 200 was prescribed for ribs which was changed in the construction drawing to ISMB 250 and in HRT even ISMB 300 was also used. This required additional fabrication efforts in terms of time and cost due to longer webs. The tender drawing further provided one continuous section for class IV & V rocks not requiring any joining. However, the work was executed as per construction drawing which provided ribs section in 6 segments, splicing at site both in the flange and the web requiring nut bolting as well as welding. This required additional time in fabrication in segments, their erection and splicing at site which in term increased time and cost. The tender drawing did not envisage any wall plate for class IV rock whereas in the construction drawing a wall plate with splicing at site both in the flange and web requiring nut bolting as well as welding was provided. The construction as per this drawing required additional time in fabrication, erection and cost of providing

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L.Kanwal)
Arbitrator

(H.R. Singhal)

splice plates. For class V rocks continuous section with wall plate with joining only with the wall plate was provided whereas in actual rib section in 6 segments including wall plate splicing at site both in the flange and web requiring nut bolting as well as welding had to be done. This required additional time in fabrication in segments, their erection and splicing at site which in term increased time and cost. Technical Specification no.4.6.1 (13) stipulated no bracing in class IV rocks whereas in actual bracing was provided extensively because of which cycle time increased. The Claimant has made a claim @Rs.34,072.00 per ton against this claim. The calculations for the same are given from pg.192 to 203 of Vol.2C of SOC.

58.4 The Respondent in their reply have stated that the claim is based on extra time taken by the Claimant vis-a-vis time estimated at the time of bidding. In this connection it may be noted that the records pertaining to actual time taken for each activity has been produced. Also the estimated time taken by the Claimant is their own estimation during bidding and has no relevance to contractual obligations. Further all the inputs and cost thereof are highly exaggerated and without any documentary proof. The payment of rock anchor/Rib installed has been released as per terms and conditions of contract. The increase in the cycle time in carrying out the work is due to breakdown of equipment/inadequate deployment/non-availability of required manpower, machinery, materials, lack of supervision and delay in providing initial rock supports in rock standing time. The contract does not have any provision for considering the revision of rate on the basis of cycle time. Further, the rate of the item cannot be revised under Sub-Clause 52.2 of COPA & Clause 4.8.2.7 & 4.8.4.3 of Technical Specifications. Moreover, the input considered for deriving rate is fabricated and cannot be accepted.

58.5 The position of documents denied by the Respondent has already been discussed here-in-above. The details of the claim have been worked out on the basis of analysis of rate given in Guidelines for Preparation of Project Estimates for River Valley Projects issued by Central Water Commission, Govt. of India, New Delhi in March 1997, copy of which has been placed on record by the Claimant.

58.6 AT has already considered the contention of both the parties in the light of Sec.55 and 73 of the Indian Contract Act. The same is not being repeated here for the sake of brevity.

58.7 AT has considered the calculations for evaluation of additional cost of rock anchor installation under item no.4.3.2. The Claimant has calculated additional cycle time taking the estimated and actual time as 2 & 4 hrs. respectively. The estimated time in this case is provided on pg.145 of the contract. In fact the estimated time provided in the contract is 3.30 hrs. Thus, there cannot be said to be appreciable difference in the cycle time as provided in the contract and as claimed by the Claimant. Hence the claim against item no.4.3 for the amount of Rs.15,15,12,642.00 is rejected and the issue no.7 (in part) related to this claim is decided against the Claimant.

58.8 The change in cycle time for installation of steel ribs due to change in design has been established by the Claimant through the contemporary evidence on record before the AT in the matter. AT has gone into the computations of the claimed amount due to change in cycle time for installation of steel ribs. AT has done its own calculations for claim no.4 relating to the claimed amount of Rs.15,43,99,994.00. Based on AT's decision in Para 52, 53, 54.1, 54.2 and 55 hereinbefore, AT has come up with a rate of Rs.9,687.00 per ton towards payment of additional cost to the Claimant. The second part of the Claimant's claim is decided in his favour and issue no.7 to that extent is decided in favour of the Claimant.

58.9 Accordingly, the awarded amount against this claim comes as below:

Item No.	Particulars	Certified executed quantity	Additional Rate claimed (Rs.)	Amount claimed (Rs.)	Awarded rate (Rs.)	Awarded amount (Rs)
4.3	Rock anchors 25mm dia, length 4m	5,20,662.00 M	291/M	15,15,12,642	Nil	Nil
4.8	Steel ribs, supply & installation (including accessories)	4531.58 T	34072/T	15,43,99,994	9,687.00	4,38,97,415.00
	Total			30,59,12,636		4,38,97,415.00
					Say Rs.	4,38,00,000.00

58.10 The Respondent / NHPC are accordingly directed to pay an amount of Rs 4,38,00,000.00 to the Claimant M/s Gammon India Ltd. against claim no.4 as above.

59. **Issue No. 8 : Whether the Claimant is entitled to payment as claimed on account of additional costs of shotcrete?**

59.1 This issue relates to the claim no.5 as raised by the Claimant on pg.67 of the SOC. This relates to the additional cost of shotcrete (plain).

59.2 The position of the claim is as below:

Item No	Description	Agreement Quantity	Agreement Rate (Rs.)	Certified executed quantity	Additional Rate claimed (Rs.)	Amount claimed (Rs.)
5.1	Plain Shotcrete	25,000 cum	8050 per cum	33609.27	3777.00	12,69,42,213

59.3 The Claimant has submitted the reasons for claiming the aforesaid amount on pg.149 of Vol.-2C of SOC. The summary of the same is given / reproduced as below:

(i) As per the contract, the time envisaged was 1 hr for class II rock for 3.5 M, 1.5 hr for class III rock for 3 M and 1.5 hr for class IV & V for 2.5 M based on technical specification, clauses 5.9 (1), 5.15 (1) & 5.9 (2).

(ii) However, the actual time taken was 5 hrs for 3 M length due to the poor rock conditions requiring major scaling operation using excavator bucket, manually, with pressured water jetting. There was over break of 1 to 1.5 mtr in general and upto 4 mtr in crown resulted in shotcrete operation to be done at a height of 8-11 mtrs which was very difficult, requiring more time and resulted in increased rebound. Due to fractured rock condition, shotcrete was required to fill the cracks / crevices before building the specified thickness. The locations where water affected and required to be diverted for shotcrete operation was present in entire length of tunnel in a much larger area than envisaged in clause 13.1 and 13.2 of ITB. The additional thickness of shotcrete @10% not measured and paid. All these operations required additional time and cost.

(iii) The calculations for the claimed rate have been given from pg.204 to 213 of Vol.2C.

NHPC LIMITED FARIDABAD

59.4 The Respondent in reply have stated that the claim is based on extra time taken by the Claimant vis-a-vis time estimated at the time of bidding. In this connection it may be noted that the records pertaining to actual time taken for each activity has been produced. Also the estimated time taken by the Claimant is their own estimation during bidding and has no relevance to contractual obligations. Further all the inputs and cost thereof are highly exaggerated and without any documentary proof. The Claimant has been paid the revised rate due to variation in the BOQ quantities by more than 25%. The Claimant has been paid an amount of Rs.2.48 crore on this account, as per Sub-Clause 52.2 of COPA. The Claimant had accepted the payment without any protest.

59.5 In the rejoinder reply, the Claimant has stated that while revising the rates of increased quantity, factors of changed conditions were not considered by the Respondent. Hence they are claimed now.

59.6 AT has already considered the contention of both the parties regarding applicability of CWC Guidelines and Sec.55 & 73 of the Indian Contract Act hereinbefore and the same is not being repeated here for the sake of brevity.

59.7 The calculations for the agreement rate of Rs.8,050 per cum of this item is given on pg.188 to 170 of the contract agreement.

59.8 From the submissions of the Respondent, it appears that the rate of this item was revised due to variation in the BOQ quantities being more than 25%. The point being raised by the Claimant now was also raised by them even at that point of time. However, the Respondent revised the rate and have paid an amount of Rs.2.48 crores additionally due to change in rates of this BOQ item. Considering the facts and circumstances of the matter, AT is of the opinion that the Claimant is not entitled to any amount under this claim.

59.9 The issue no.8 is decided accordingly to that extent. The AT rejects the claim as raised by the Claimant.

59.10 The Respondent / NHPC are accordingly directed to pay an amount of Rs.NIL to the Claimant M/s Gammon India Ltd. against claim no.4 as above.

60. **Issue No. 9 : Whether the Claimant is entitled to payment as claimed on account of additional costs of concrete?**

60.1 This issue relates to the claim no.7 (with reference to Technical Specification no.B-7) as raised by the Claimant on pg.57 of the SOC. This relates to the additional cost of plain cement concrete lining in sides & vaults (overt)

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(N.N. Singhal)

~~69~~

60.2 The position of the claim is as below:

Item No.	Particular	Agreement Rate per cum (Rs.)	Certified executed quantity (cum)	Additional Rate claimed per cum (Rs.)	Amount claimed (Rs.)
7.1.2.2	plain cement concrete M25/A20	3045	324824.00	1231	39,98,58,344

60.3 The Claimant has submitted the reasons for claiming the aforesaid amount on pg.150 of Vol.-2C of SOC. The summary of the same is given / reproduced as below:

(i) As per tender document, the equipment for concrete lining works as per data sheet-3 were 12 M long conventional shutter, concrete pump 30 cum capacity – 1 for each face. Batching plant-30 cum capacity one for each adit of two face, Transit mixer-6 cum capacity – 4 for each adit. However in actual mobilization required by Engineer the equipment was CIFA design traveller and shutter of 12 m, Batching plant 30 cum capacity – 3 Nos. for each adit, concrete pump-1000BHP (60Cum per Hr) 2 for each adit, 10 transit mixer for each adit. This resulted in additional cost of equipment with higher capacity to do overt concrete lining.

(ii) As per tender document, overt concrete lining in class-I II, III – was to be done without steel ribs. The thickness of lining was 400 mm for which shutters were planned and the placement of concrete was planned in 13 Hrs with 20 cum per hr progress..However, actual lining increased to as high as 4 mtr and in general 1 to 1.5 m increasing the placement time. This increased thickness was not foreseen and providing bulkhead shutter became difficult, time consuming requiring additional support. This also resulted in forced slowing down of concrete pouring rate.

(iii) As per tender document, overt concrete lining in class-IV, V- was with steel ribs but no activity was required after heading and benching. However, the steel ribs got deformed requiring additional thorough survey to ascertain ribs fouling in finish line and carry out rectification when required. This required additional time to check each and every rib and rectify / install new rib. This activity was not foreseen and all the resources for lining were idled for the duration in which rib rectification was carried out.

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L.Kohli)
Arbitrator

(D.H. Singhal)
Arbitrator

(iv) As per tender document, clause 7.4.1 of Technical Specification, ordinary Portland cement grade-43 or higher was to be used. Accordingly setting time foreseen as per tender methodology was 12 hrs. However in actual NHPC issued PPC cement whose setting time was 14 hrs. As such additional 2 hr setting time for each gantry resulting in increased cycle time/standing cost.

(v) As per tender document, only light to moderate seepage in particular locations was expected whereas in actual this was present in entire length. Additional efforts had to be made to divert water before pouring of concrete requiring additional time and cost.

60.4 In reply, the Respondent have stated that the claim is based on extra time taken by the Claimant vis-a-vis time estimated at the time of bidding. In this connection it may be noted that the records pertaining to actual time taken for each activity has been produced. Also the estimated time taken by the Claimant is their own estimation during bidding and has no relevance to contractual obligations. Further all the inputs and costs thereof are highly exaggerated and without any documentary proof. Further, the rate of the item cannot be revised under Sub-Clause 52.2 of COPA as variation is not more than 25%. Moreover, the input considered for deriving rates is fabricated and cannot be accepted.

60.5.1 AT has considered the contention of both the parties with regard to the applicability of CWC Guidelines and Section 55 and 73 of the Indian Contract Act hereinbefore and the same is not being repeated for the sake of brevity. AT has also considered the details of monthly progress of heading and overt concreting for various faces which have also been filed by the Claimant on pg.132 of Vol.2C.

60.5.2 The case has been established by the Claimant through the contemporary evidence on record before the AT that the thickness of concrete in lining which was initially envisaged as 400 mm only got increased to as high as 4.0 M and in general from 1 to 1.5 M. This definitely would have resulted in increased placement time as well as extra efforts in placing the concrete in the overt. The increased time in placing the concrete was also coupled with the increased setting time due to use of PPC in place of OPC cement. However, the Claimant would have envisaged certain thickness of concrete in the overt lining while tendering due to imminent over-breaks. Accordingly, AT considers that additional

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L. Kohwal)
Arbitrator

(D.N. Singhal)
Arbitrator

cost will be justified to be paid only on 50% of the quantity of corresponding grade of concrete.

60.6 AT has gone into the computations of the claimed amount, hindrances and unforeseen obstructions etc. AT has done its own calculations for claim no.7. Based on AT's decision in Para 52, 53, 54.1, 54.2 and 55 hereinbefore, AT has come up with a rate of Rs.501 per cum towards payment of additional cost to the Claimant.

60.7 Based on the aforesaid rate and the decision of AT in Para 60.5.2, the claim is awarded as below:

Item No.	Rock Class	Certified executed quantity (cum)	Additional Rate claimed per cum (Rs.)	Amount claimed (Rs.)	Quantity considered for payment (cum)	Awarded rate (Rs.)	Awarded amount (Rs.)
7.1.2.2	Plain CC lining M25/A20	3,24,824.00	1,231.00	39,98,58,344	Only 50% of executed quantity i.e. 1,62,000.00	501.00	8,11,62,000 say 8,11,00,000

60.8 The issue no.9 is decided accordingly to that extent in favour of the Claimant.

60.9 The Respondent / NHPC are accordingly directed to pay an amount of Rs.8,11,00,000.00 to the Claimant M/s Gammon India Ltd. against claim no.7 as above.

61. The position of Part A claims of SOC comes as below :

Item No.	Description	Claimed amount (Rs.)	Awarded amount (Rs.)
1.	Additional cost of dewatering during construction due to increased seepage and fractured rock	2,20,88,350.00	Nil
3.	Addition cost of underground excavation due to increase in cycle time		
3.1.1	Class- I, II & III	31,35,01,476.00	
3.1.2	Class-IV & V	39,73,06,698.00	18,13,00,000.00
4.	Additional cost of rock stabilization and supports		
4.3.2	Rock anchors 25mm dia and length 4m	15,15,12,642.00	Nil
4.8	Steel ribs supply and installation	15,43,99,994.00	4,36,00,000.00
5.1	Additional cost of plain shotcrete	12,69,42,213.00	Nil
7.1.2.2	Additional cost of plain CC lining in sides & vaults (overt) M25/A20	39,98,58,344.00	8,11,00,000.00
	Total	1,56,56,09,717.00	30,62,00,000.00

62. **Issue No. 10 : Whether the Claimant is entitled to payment as claimed on account of additional costs due to loose fall?**

NHPC LIMITED FARIDABAD

V.K. Tyagi
Presiding Arbitrator

(S.L. Kotwal)
Arbitrator

(D.N. Singhal)
Arbitrator

62.1 This issue relates to Part-B claim no.1 as raised by the Claimant on pg.67 of the SOC. This relates to the additional expenses due to loose falls.

62.2 The Claimant on pg.151 of Vol.2C has stated that the contract provided in its clause 3.6 (2) of T.S. that Engineer shall, after consulting the Contractor, will determine the rock support system which shall be used during excavation advance. Clause 3.6(4) further required that support shall be installed without delay during the process of excavation within the heading zone without which further advance shall not be allowed. The activities in tunnel were carried out as per the instructions of the Engineer. The supports during underground excavation were provided both in heading and benching as decided by Engineer-in-charge and only after his satisfaction further advance was made. However, at site many supports provided failed due to loose fall resulting in complete stoppage of ongoing activity. The details of such locations where major loose falls occurred have been recorded. The stoppage of work caused major hindrances resulted in losses due to idling of complete establishment and was not foreseen during tendering. NHPC has reimbursed only the cost of new supports after the loose fall. However, expenses due to such hindrances have not been reimbursed.

62.3 The amount of claim has been detailed out on pg.230 of Vol.2C for faces V, VI & VII including additional slopes in 209 M length which was ordered to be executed beyond the scope of the contract.

62.4 The Claimant has claimed the amount as below:

S.No.	Particulars	Amount (in Rs.)
1.	Cost of idling of equipment	25,29,97,149.00
2.	Supervisory & managerial staff @5% of (1)	1,26,49,857.00
3.	Total	26,56,47,006.00
4.	Indirect cost @25% of (3)	6,64,11,752.00
5.	Total	33,20,58,758.00
6.	Overhead & profit @15% of (5)	4,98,08,814.00
7.	Total claimed amount	38,18,67,571.00

62.5 In reply the Respondent have stated that the Claimant has fabricated the records and it is denied that work was stopped and machinery/manpower was idle during the period claimed. In fact, the Contractor was always short of resources and thus affecting the work progress. Whenever there was stoppage of work at the particular place, the resources were redeployed at other work faces and there was never idling of resources. During execution of work, the Contractor has been suitably compensated for multi-drifting and other extra items. The claim made by Contractor is made on assumptions only and without any verification of records

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L.Kotwal)
Arbitrator

(M.N. Singhal)

as per standard practice. The Claimant has been paid all the expenses for negotiating the zone of loose fall. Since, the Claimant was executing similar type of work on six faces, therefore, the Claimant had redeployed the resources at different sites during the period of loose fall and there was no idling of resources. The input considered for deriving the cost on account of idling is fabricated and cannot be accepted.

62.6 In rejoinder, the Claimant has stated that Respondent has simply denied the fact that the work was stopped due to loosefalls. Please refer detail of loosefall and the days affected/hindered the progress vide Exhibit C15-14/158 page 229-230 of vol.2C. Further the progress of that day may be verified from the Daily Progress Report. Such loosefall had major stoppages and idling of resources. Further allegation that Claimant were short of manpower, machinery is not correct and is not acceptable. It is further clarified that Claimant had always kept sufficient manpower/machinery and even mobilized additional equipment as and when became essential to meet conditions. Regarding multidrift the same has been done in face IV RD 1475-1572 only and this patch took more than one year to overcome due to the unforeseen adverse geology causing complete resources in terms of manpower and machinery idle which were dedicated to this face. Regarding deployment of resource in other face it is hereby confirmed that resources mobilized had remained at site under-utilised. Therefore, our claim for resources idling during loose fall and additional expenses incurred in negotiation of the loose fall had to be compensated and is justified. The Claimant referred to many exhibits in this regard.

62.7 The Claimant has submitted Exhibit C-2 from pg.37 to 39 of Vol.2C in which details of loose falls causing major cavities has been given chainage-wise, length-wise, period of the occurrence. These details have been given even Face-wise i.e. for the advance of tunnelling from Face-II, Face-III, Face-IV, Face-V, Face-VI & Face-VII separately and even the loose falls occurring in the reach which the Claimant was asked to excavate beyond their scope. The Claimant has also submitted a list of loose falls resulting in damages to equipment deployed (pg.39 of Vol.2C) the list of loose falls resulting in damage to the executed works (pg.48 of Vol.2C) as well as unfortunate accidents resulting in deaths / serious injury of workers (pg.49 of Vol.2C). In all six persons lost their lives whereas 5

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L.Kotwal)
Arbitrator

(H.N. Singhal)

persons were seriously injured due to loose falls. Copies of FIRs and Death Certificates have also been filed by the Claimant. The damage to equipment is also supported by contemporary record, for example, the Tam rock drill jambo imported with a cost of Euro 3,15,000 CIF Kolkata from Finland got damaged on 18.04.2002 (ref.C-59) requiring replacement of certain parts to be imported from Finland. Exhibit C-69 refers to damage to the equipment on 01.10.2002. These instances are being referred as an illustration only.

62.8.1 The Claimant has also filed date-wise correspondence in Vol.4 vide which occurrence of various loose falls and formation of cavities were intimated to the Respondent. Hence, the contention of the Respondent that the Claimant has fabricated the record of loose fall and formation of cavities cannot stand. The Claimant has also filed the details of the average pull, number of cycle and pull length in each face and class of rocks encountered during heading excavation from pg.107 & 108 of Vol.2C. The classification of rocks before loose falls, after loose falls and as paid in measurement books by the Respondent has been given by the Claimant citing references of correspondence from pg.123-124 of Vol.2C. The details of cycle time for various faces and various rock types have also been filed by the Claimant from pg.125 to 131 of Vol.2C.

62.8.2 The instances of loose fall resulting in chimney formation is also supported by contemporary record for example there was chimney formation of the height of 14 M on 09.05.2002 (refer Exhibit C-61 dt.09.05.2002 and C-62 dt.25.06.2002). The letter dt.25.06.2002 also confirms that the spacing of ribs had to be reduced with extra stiffeners at side. However, due to intermittent loose fall, it took 25days to tackle the problem. Again on 22.06.2002, there was a loose fall with flow of large quantity of water resulting in another cavity of the height of 12-13 M (refer Exhibit C-63 dt.01.07.2002). These instances are being referred here only as a matter of illustrating the problems which were encountered at site.

62.8.3 The Claimant had submitted his claim for the above mentioned loose falls for additional cost supported by contemporary record vide his letter dt.23.08.2002 (refer Exhibit C-64). Respondent denied the claim on the basis of a contractual clause which deals with adverse climatic conditions exceeding 1 in 100 years (refer Exhibit C-65 dt.05.09.2002). On careful consideration, it is clear that the contract clause referred in this letter was not applicable to the matter and the

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L.Kothari) Arbitrator

(N.N. Singhal)

contractor's claim should have been examined on the basis of contemporary record submitted by him. Again this instance has been cited as for illustration only.

62.9 The Claimant's witness was put to cross-examination on the basis of his affidavit dt.16.02.2010. In regard to loose falls. The relevant questions and their answers are reproduced as below:

Q-187: When did you realize that an additional claim on account of loose fall is involved? Was it during execution of the work or afterwards?

A-187: It was realized during execution of the work.

Q-188: Did you notify the EIC about it and get it verified by him?

A-188: Various notifications were given from time to time and total cost implication was submitted once the overall cost impact was known.

Q-189: Are the notifications allegedly submitted to the EIC on record in the present proceedings?

A-189: Yes, one of such notification is exhibited as C-64 (page 443) of volume-3C which includes cost implication for particular instance.

Q-190: Can you tell the AT the reasons of loose fall?

A-190: Reason of loose fall were unforeseen and not attributable to the Claimant since Claimant has followed all instruction, specification and drawings during execution of work.

Q-191: Kindly inform the AT what steps were taken by you to avoid loose fall?

A-191: The Claimant followed all the instructions of the Respondent. We also resorted to reduction in pull and pre grouting of the face.

Q-192: Are the instructions referred by you in Answer-191 on record of the present proceedings?

A-192: I will check the record and submit the details, if any in the next hearing.

Q-193: I put it to you that loose fall could have occurred due to failure to provide timely supports by the Claimant. What have you to say?

A-193: No, it is not correct.

Q-194: Is this claim of additional cost on account of loose fall based on record verified by EIC?

A-194: The claim is based on the events, BOQ and various contract conditions. Separate verification of the claim has not been done by EIC.

Q-195: I put it to you that the entire claim is based on Claimant's assumptions. What have you to say?

A-195: No, it is not correct.

Q-196: Can you tell the AT if rib rectification was needed?

A-196: Yes.

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L.Kotwal)
Arbitrator

(N.N. Singhal)

Q-197: What were the circumstances which necessitated rib rectification?

A-197: The twisted and buckled ribs were falling below the finish section, hence they were required to be rectified.

Q-198: I put it to you that rib rectification was required due to poor erection/poor blasting techniques adopted by you. What have you to say?

A-198: No, it is not correct.

Q-199: Were the alleged stoppages of work on account of rib rectification duly notified contemporaneously to the EIC?

A-199: The intimations for slow progress and events requiring additional activities on account of rib rectification were given to EIC.

Q-200: Can you tell the AT whether the same are on record in the present proceedings?

A-200: One of such letters is exhibited as C-280 on page 1040 of volume-4C.

62.10 The Claimant has submitted the details of the claim on pg.230 of Vol.2C for the amount of Rs.38,18,67,571.00 on the basis of per day cost of machinery and manpower. The Claimant has submitted date-wise, chainage-wise and effected length-wise details of the loose falls causing major cavities from pg.37 to 39 of Vol -2C. This table also includes the number of days to tackle these cavities. On pg.231 (Ann.15-76/158), the Claimant has given the details of hourly loss of machinery and manpower for the financial year 2002, 2003 and 2004 separately. The details are given for face-wise advances. The details of equipment deployed on various faces and the cost of depreciation etc. has been worked out separately for every face. The details of machinery deployed on each face have been given citing plant code numbers and the cost of the machines as per the invoice. The detailed calculations and summary thereof has been given by the Claimant from pg.231 to 277 of Vol.2C. Similarly, the cost of man power deployed on each face has also been given separately. Thus, the disruption due to loose falls and deployment of resources viz-a-viz their idling for this claim has been established by the Claimant through the contemporary evidence on record before the AT. In the period the work remained suspended due to loose falls, the cost of maintaining electricity and ventilation has also been worked out and included in various pages of exhibit. The detailed calculations were explained by the Claimant side during arguments. The details of depreciation etc. have been worked out on the basis of equipment's life in years as well as hours and averaging the two in accordance with the CWC guidelines. AT has gone into the calculations

NHPC LIMITED FARIDABAD

(V.K. Tyagi) (S.L.Kothari) (N.N. Singhal)

submitted by the Claimant in support of this claim. The calculations have been done in detail as per the universal practice adopted. These calculations appear to be in order. However, it cannot be denied that there would have been break-downs of machinery and further non-utilization of resources at the flick of button. As no credit and debit account of the machinery deployed and remaining idle vis-a-vis underutilization due to the reasons such as break-down can be made, as such AT is of the opinion that only 50% of the owner's cost be allowed in this claim.

62.11 AT has gone into the computations of the claimed amount, hindrances and unforeseen obstructions etc. AT has done its own calculations for this claim no.1 of Part-B. Based on AT's decision in Para 62.10, 52, 53 & 55 hereinbefore and also disallowing the cost of supervisory and managerial staff, AT has come to the conclusion that the Claimant is entitled to the additional cost amounting to Rs.17,00,00,000.00 against this claim and the issue no.10 is decided in favour of the Claimant to that extent.

62.12 The Respondent / NHPC are accordingly directed to pay an amount of Rs.17,00,00,000.00 to the Claimant M/s Gammon India Ltd. against claim no.1 of Part B as above.

63. Issue No. 11 : Whether the Claimant is entitled to additional costs as claimed on account of rib rectification as claimed in Part B items 1 and 3?

63.1 This issue relates to Part-B claim no.2 & 3 for the amounts of Rs.2,43,43,993.00 and Rs.39,37,473.32 respectively as raised by the Claimant on pg.67 of the SOC.

63.2 The Claimant in the Statement of Claim (pg.152 of Vol.2C) has stated that the steel ribs in the tunnel during Heading excavation were to be provided as per 4.6.2, 4.6.3 of TS and construction drawing to be issued by the Engineer. In contract time of 2Hr 20 min was kept for installation of steel ribs. The work of providing steel rib was carried out as per TS, construction drawing no. NHPC/CAI-41-DD-417, material issued by NHPC and Engineer's instruction at site. After the erection as per the specification and drawing major deformation, twisting and buckling occurred in all the ribs. This deformation/twisting/buckling was very extensive and ribs were further strengthened as per Engineer's instruction with additional bracings/ties. Despite those additional measures almost all ribs were deformed and some of them were fouling with the finish concrete lines of the tunnel. As per Engineer's instruction these steel ribs were

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L. Kalwar) Arbitrator

(N.N. Singhal) Arbitrator

replaced/rectified in small segments which was difficult and time consuming work. The work of rectification in steel ribs is entirely a new activity which was never foreseen and not required to be done after the work has been carried out as per the specifications. NHPC has reimbursed only cost of these new steel ribs based on weight, and expenses towards standing cost of lining equipments/resources along with cost towards removal of deformed rib segments has not paid. This additional time has been major hindrance on the progress of the work and caused major cost implications.

63.3 The Respondent in the written statement have stated that the claim is based on assumptions, theoretical calculations to make illegal and unjust gains, if possible. There has not been any stoppage of work due to rib rectification. The idling cost worked out by Claimant is not based on actual inputs. All the expenses on account of rib rectification have been paid to the Claimant. The Claimant was carrying out so many activities in parallel at one face and also doing the rib rectification activities side by side. Therefore, there was no idling of resources. The inputs considered for deriving the cost on account of idling is fabricated and cannot be accepted.

63.4.1 During cross-examination, Claimant's witness CW-1 has replied to the questions regarding this matter as below:

Q-37: Whether any rib rectification was carried out by the Claimant as directed by the Respondent?

A-37: Rib rectification was carried out by the Claimant after approval of their proposal by Engineer-in-charge.

Q-38: What was the total length of tunnel in which such rectification was carried out? Can you inform the AT about it?

A-38: I will check the records and will inform in the next hearing.

.....

Q-47: Are you able to reply to question no.38 now?

A-47: Yes, the total length of the tunnel in which such rectification was carried out is 356m.

63.4.2 The instances of distortion in ribs are also supported by contemporary record such as Exhibits C-78 dt.26.12.2002 and C-79 dt 27.12.2002. It was intimated by the Claimant that on 25.12.2002, immediately after the blast, there was chimney formation of the height of 6 M and despite having completed all the support system and additional supports of channel bracings and providing rock anchors,

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L.Kotwal) Arbitrator

(N.N. Singhal) Arbitrator

there was major distortion in the ribs from RD 457 to 518 requiring suspension of work as well as providing additional ties and grouting. This instance is being cited as illustrative only for the occurrence of requirement of rib rectification. There is sufficient evidence produced by the Claimant for rib rectification necessitated due to deformation/twisting/buckling of the initially provided support system.

63.5 Thus, there cannot be any doubt that there was distortion, buckling and displacement of ribs as is evident from the reports mentioned hereinabove. It must have resulted in idling of resources. The Claimant has raised the claim on the basis of idling of resources at the rates calculated in relation to claim no.1 Part-B (additional cost due to loose fall). The details of ribs rectified due to twisting and buckling has been given in detail from pg.109 to 118 of Vol.2C

63.6 The Claimant has submitted Annexures 8 & 9 on pages 278 & 279 of Vol.2C for the amounts of Rs.2,43,43,993.00 and Rs.39,37,473.00 respectively. A perusal of certified quantities indicates that the Annex.9 is overlapping Annex.8. As such the claim raised by Annex.9 for the amount of Rs.39,37,473.00 deserves rejection. The issue no.11 relating to the claim for the amount of Rs.39,37,473.00 is decided against the Claimant to that extent.

63.7 With regard to claim for the amount of Rs.2,43,43,993.00 as raised by Annex.8, the AT considers only 50% idling of resources as well as towards cost of supervisory and managerial staff. This claim does not overlap the claim of additional cost due to loose fall as that claim is for the financial years 2002 to 2004 whereas this claim is for the year 2006. The matter of this claim has been established by the Claimant through the contemporary evidence on record before the AT.

63.8 AT has gone into the computations of the claimed amount due to the hindrance caused on account of rib rectification etc. AT has done its own calculations for the claimed amount of Rs.2,43,43,993.00. Based on AT's decision in Para 63.7, 52, 53 and 55 hereinbefore, AT has come to the conclusion that the Claimant is entitled for payment of additional cost amounting to Rs.1,13,00,000.00. The issue no.11 relating to the claim for the amount of Rs.2,43,43,993.00 is decided accordingly to that extent in favour of the Claimant.

63.9 The Respondent / NHPC are accordingly directed to pay an amount of Rs.1,13,00,000.00 to the Claimant M/s Gammon India Ltd. against claim no.2 (Part-B) as above. The claim no.3 (Part-B) stands rejected.

NHPC LIMITED FARIDABAD

64. **Issue No. 12 : Whether the Claimant is entitled to additional costs as claimed on account of smaller segment of gantry?**

Issue No. 14 : Whether the Claimant is entitled to additional costs as claimed on account of gantry dismantling and re-erection?

Issue No. 18: Whether the Claimant is entitled to additional costs as claimed on account of additional cost due to small segmental gantry?

64.1 These issues relate to Part-B claims no.4, 7 and 12A for the amounts of Rs.17,30,733.90, 13,83,686.00 and 1,61,70,810.29 respectively

64.2 The Claimant has stated that overt lining concrete was planned in segments of 12m as D" of P/8175-A of the contract document. The CIFA gantry comprising of traveller and shutter was mobilised and lining started as per the contract plans. However due to the twisting and buckling of the ribs Engineer ordered rectification of steel rib fouling in the finished line prior to the lining. In some of the locations the rib rectification was possible but the Engineer decided not to disturb the twisted / buckled ribs and decided to embed same as it is in the lining. However, in some of such locations shifting, movement, alignment of 12m long shutter was not possible hence the length of the shutter was reduced which varied from as low as 2.2m against 12m. This reduction in length of shutter required dismantling of balance shutters and erection later on. In addition the concrete cycle for reduced length had direct impact on overall progress, since the time for pulling, alignment, pouring arrangement, setting time etc. remain same. The additional time/hindrance thus has caused a major increase in the cost for doing lining in smaller segments in comparison to the contract length of 12m. The additional cost is applicable for smaller segments and for dismantling and re-erection of the gantry.

64.3 In reply the Respondent have stated that due to inefficiency of the Contractor, there has been undercuts and to expedite the work the Contractor has used small segments of gantry shutter instead of 12m long shutter. In fact, by deploying smaller segments the Contractor has actually gained and accordingly he could expedite the work. Also a compression claim was paid to Contractor. The Claimant has been paid for carrying out the work as per contract provision. Moreover, the Claimant was paid an advance of Rs.15 crore for mobilization of such type of plants/equipment. The Claimant had to erect and dismantle gantry shutters for overt lining of HRT. The cost of erection and dismantling is included

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L.Kohli) Arbitrator

(N.N. Singhal) Arbitrator

in the rate of concrete as per Technical Specifications. Further, the amount worked out by Contractor is not based on actual input and cost thereof. This is the part of concreting work in the construction of tunnel and the Claimant has been paid for the work done.

64.4 The Claimant has given the details of this claim in Ann.10, 13 & 18 from pg.286 to 290, pg.298 to 299 and pg.311 in Vol.2C respectively. In these details, the Claimant has calculated the work of laying of rail line, fixing of bolt up to 300 mm long or above, shifting of gantry etc. and additional cost incurred in pouring of concrete.

64.5 AT has considered the contention of the parties. The reply of Respondent is not to the point. However, the Claimant's claims are also not found tenable.

64.6 The issues no.12, 14 & 18 are decided accordingly to that extent and claim nos. 4, 7 & 12(A) are rejected.

64.7 The Respondent / NHPC are accordingly directed to pay an amount of Rs.Nil to the Claimant M/s Gammon India Ltd. against Part-B claims no.4, 7 & 12A for the amounts of Rs.17,30,733.90, 13,83,686.00 & 1,61,70,810.29 respectively

65. **Issue No. 13 : Whether the Claimant is entitled to additional costs as claimed on account of heading excavation from F-3 to F-4 and F-6 to F-5?**
Issue No. 15 : Whether the Claimant is entitled to additional costs on account of ventilation ducts?
Issue No. 17: Whether the Claimant is entitled to additional costs as claimed on account of additional lead costs for Face-3 and For Face-6?

65.1 These issues shall be considered together. They relate to claims in Part-B numbering 5 & 6, 8 and 10 & 11 for the amounts of Rs.4,02,58,038.43 & Rs.1,88,60,203.78, 1,06,15,781.53 and 2,03,76,461.21 & 1,47,27,225.60 respectively.

65.2 The Claimant referring to the data sheet no.9 of P/8175-A i.e. proposed construction programme for Teesta HRT stated that the entire programme clearly indicates the length of each face (II, III, IV, V, VI & VIII) from the 3 Adits (II, III & IV). The length of face-III, IV and V, VI had been 2454m and 2368m respectively. The resources for each adits/face categorically planned independently and were separate to meet target schedule. The resources were mobilised and set up to meet requirement of each face independently. However,

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator (S.L. Kapur) Arbitrator (T.N. Singhal) Arbitrator

Face-IV & Face-V had critical situation causing major hindrances on the tunnel excavation progress. The hindrances resulted in slow progress due to large collapses, complete stoppage of work, major twisting and buckling of ribs due to which despite additional resources actual tunnel did not progress as per the contract. Engineer instructed additional excavation length from Face-III into Face-IV & Face-VI into Face-V 524M and 426M. Thus total length of excavation from face-III was 2978m and from Face-VI was 2794m. Progressing beyond initial planned length in the tunnel had direct impact on the ventilation system, service line which needed further strengthening. Accordingly, additional ventilation fans required to be installed in series in face-III which has additional major cost implication on electricity. In addition as the length of tunnel increased, various services, feeding of inputs on tunnel heading and its monitoring became difficult and costlier. Despite increased inputs the efficiency of man and machinery reduced with increased lead inside tunnel. It has been seen that the progress in face-III beyond stipulated length of 2454m took 262 days against contractual 131 days and in face-VI took 189 days against contractual 107 days. This increase in time occurred despite increase in resources from what was planned in the contract.

65.3 In reply the Respondent have stated that the work of tunnel was awarded to Claimant as a whole. The claim has been raised by Claimant as progress of work on different fronts is different than expected. It is well known that it is never possible to achieve the same progress on two fronts in the tunnel. The Contractor has achieved progress as per resources deployed on various fronts. If there was loss on one front simultaneously there was gain on other front. The valuation has been made by the Claimant on theoretical assumptions without any documentary evidence of resources deployed. The contract was awarded as a whole for tunnelling of 13.811/13.825 Km.

The Respondent have further stated that the cost of ventilation duct is included in the item rate of excavation of HRT as per Technical Specifications. No separate payment is payable to Contractor on this account. Also rate of excavation is final and cannot be revised as per Sub-Clause 52.2 of COPA. The cost worked out by Claimant is not based on actual inputs. The Claimant was responsible for safety and security of all his installations. The damage to

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L.Kokra) Arbitrator

(H.N. Singhal) Arbitrator

ventilation duct, if any, occurred during execution of the work, may be due to Claimant's negligence and any claim on this account is liable to be rejected.

65.4 The Claimant has submitted the calculations of aforesaid claims in Annex.11 (pg.291-294 of Vol.2C), Annex.12 (pg.295-297 of Vol.2C), Annex.14A (pg.300 of Vol.2C), Annex.16 (pg.305-307 of Vol.2C) and Annex.17 (pg.308-310 of Vol.2C) respectively.

65.5 AT has considered the contention of the parties. After applying its mind, AT is not inclined to award these claims.

65.6 The issues no.13, 15 & 17 are decided accordingly and claims no.5, 6, 8, 10 & 11 are rejected.

65.7 The Respondent / NHPC are accordingly directed to pay an amount of Rs. Nil to the Claimant M/s Gammon India Ltd. against its claims in Part-B numbering 5 & 6, 8 and 10 & 11 for the amounts of Rs.4,02,58,039.43 & Rs.1,88,60,203.78, 1,06,15,781.53 and 2,03,76,461.21 & 1,47,27,225.60 respectively.

66. **Issue No. 16 : Whether the Claimant is entitled to additional costs as claimed on account of benching in segments/stage wise?**

66.1 This issue relates to Part-B claim no.9 for the amount of Rs.31,72,16,064.77.

66.2 The Claimant has stated that this claim relates to the underground excavation of the left out height post heading. Benching was planned as full face as the target of 10M per day. The process of benching was planned to excavate complete left out height in one blast each of approx. 3M. However, segmental benching was instructed by the Engineer to reduce the vibrations and supporting the sides in very small segments. The above stated multistage benching had to be done leaving 1 M undercut on both sides. This undercut was later removed using breakers for providing concrete lining. The benching had to be carried out keeping service lines of air, water, dewatering, and electricity intact and thus, needing controlled blasting by covering top of drilled and loaded holes with sand bags, steel platform with muck on top etc. This was also necessitated due to twisting and buckling of all the ribs requiring extraordinary precaution. It is seen that even with the segmental benching, incidence of collapse of heading/heading supports occurred. This increased requirement of resources and cycle time including additional requirement of explosive, equipment & manpower. In addition invert road / ramp making became an additional activity to facilitate segmental benching.

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

(S.L.Kotwal)
Arbitrator

(N.N. Singhal)
Arbitrator

66.3 The Respondent stated that the benching excavation has been done by Contractor as per method statement. However, due to inefficiency of the Contractor, there have been undercuts. The undercuts have been removed by Contractor in various stages. The cost of multistage excavation has already been paid to the Claimant during execution of work. The cost now claimed has not been worked on actual inputs but on theoretical assumptions. The Claimant was responsible for carrying out benching as per requirement of site and the payment of the same has been released.

66.4 AT has considered the material on record before it. The multi-stage benching and later removal of 1 M undercut on both sides is sufficiently evidenced before AT.

66.5 The Claimant has raised the claim in Annex.14B from pg.301-303 in Vol.2C as below:

(i) The total volume of muck excavated in 3 M pull has been estimated as 96 cum.

(ii) The Claimant has stated that he had to spend Rs.5,772.26 as direct labour charges which comes to Rs.60.13 per cum.

(iii) The Claimant has stated that he had to incur cost of equipment, material and explosive, hook-up wire amounting to Rs.558.07 against the planned expenses of Rs.305.51 per cum.

(iv) The Claimant has stated that he had to incur additional Rs.257.00 per cum towards ventilation.

(v) The Claimant has stated that additional charges for electricity through Diesel Generating set amounting to Rs.79.00 per cum. were also incurred.

(vi) In this way, the Claimant has stated that he had to incur total Rs.953.65 per cum against the planned expenses of Rs.305.51 per cum. He has thus claimed the additional expenses of Rs.648.14 per cum.

(vii) The Claimant has claimed the additional cost only for part of the length of the HRT i.e. in 10,133 M length of the tunnel. The estimated cross-section of the tunnel being 32 sqm section, the Claimant has claimed an amount of Rs.21,01,63,852.00.

66.6 AT has considered the contemporary record filed before the AT in Vol. 2C P 72-92 & p 123-124. It is observed that segmental benching due to poor geological conditions had to be carried out in 3446 metre length of HRT from various faces.

NHPC LIMITED FARIDABAD

(V.K. Tyagi) Presiding Arbitrator

(S.L.Kohli) Arbitrator

(I.N. Singhal) Arbitrator

Thus, the claim is established by the contemporary evidence on record before the AT for this length. Accordingly additional cost is allowed in this length of tunnel only. This quantity of excavation in this length has been worked out as 1,10,277 cum. from the documents on record. The amount of award is being calculated for this quantity only hereinafter.

66.7 AT also considers that the payment of direct labour charges and 50% additional for machinery charges only shall meet the ends of justice. The payable rate comes to Rs.185.00 per cum against the claimed rate of Rs.648.14 per cum.

66.8 AT has gone into the computations of the claimed amount, hindrances and unforeseen obstructions etc. AT has done its own calculations for this claim. Based on AT's decision in Para 66.5, 52, 54.1 and 55 hereinbefore, AT has come to the conclusion that the Claimant is entitled for additional cost for the amount of Rs.2,88,00,000.00 against this claim. The issue no.16 is decided accordingly.

66.9 The Respondent / NHPC are accordingly directed to pay an amount of Rs. 2,88,00,000.00 to the Claimant M/s Gammon India Ltd. against their claim no.9 in Part-B for the amount of Rs.31,72,16,064.77.

67. **Issue No. 19 : Whether the Claimant is entitled to additional costs as claimed on account of excessive consumption of gelatine?**

67.1 This issue relates to Part-B claim no.12B for the amount of Rs.1,33,57,165.76.

67.2.1 The Claimant has stated that clause 13.0 of ITB describes site geology. Further 13.1 & 13.2 details geology in HRT and Adits along with the rock conditions in the tunnel as below:

(i) RD 3754 to 8676 M: The main rock type in this reach would be phyllitic quartzite, quartzitic phyllite and quartzite with bands of phyllites.

(ii) RD 8676 to 15437M: mentions-Principle rock type in this section is phyllitic quartzite with minor bands of quartzite phyllite.

(iii) Adit-II: Adit would negotiate foliated and jointed phyllitic quartzite.

(iv) Adit-III : Principal rock type is phyllitic quartzite.

(v) Adit-IV : Jointed and foliated phyllitic quartzite.

67.2.2 Based on above rock types, maximum consumption of explosive was considered/worked out as 1 kg/cum. However, rock conditions in entire tunnel were found on poorer side with major presence of phyllite/fractured rock mass. Due to this rock condition, the requirement of explosive varied to avoid

NHPC LIMITED FARIDABAD

differential advance in the heading, blowing of the drill holes and normal advance as per drill plans. The explosive requirement increased to 1.18 kg per cum due to varied rock condition which was not foreseen while tendering and is an additional cost. The Claimant has claimed the aforesaid amount accordingly in Annex.19 on pg.312 of Vol.2C.

67.3 The Respondent in reply have stated that the claim of Contractor is based on assumption that average consumption is 1Kg/m3. However, in actual practice it varies from 1-2 Kg/m3. Also the cost has been claimed under additional cost of underground excavation. Further the claim has been raised without verification of actual inputs and hence is denied and is liable to be rejected. The Claimant was responsible for excessive consumption due to wrong adoption of drilling and blasting pattern, improper loading, packing and lack of supervision at site. Hence, the claim is not tenable.

67.4 AT has considered the contention of the parties. The variation as claimed by the Contractor can hardly be said to be a variation entitling for claim of additional cost. AT is accordingly not inclined to award this claim.

67.5 The issue no.19 is decided accordingly against the Claimant.

67.6 The Respondent / NHPC are accordingly directed to pay an amount of Rs.Nil to the Claimant M/s Gammon India Ltd. against claim no.12B in Part B for the amount of Rs.1,33,57,165.76.

68. <u>Issue No. 20 : Whether the Claimant is entitled to additional costs as claimed on account of idling of resources?</u>

68.1 In view of the decision and award relating to issue no.10 & claim no.1 of Part B, this issue does not require any separate consideration.

69. The position of claims as per the amount claimed by the Claimant and awarded by AT for Part B claims comes as below :

Item No.	Description	Claimed amount (Rs.)	Awarded amount (Rs.)
1.	Additional cost due to loose fall	38,18,67,571.22	17,00,00,000.00
2.	Additional cost due to Rib rectification	2,43,43,993.00	1,13,00,000.00
3.	Additional cost due to Rib rectification	39,37,473.32	Nil
4.	Additional cost due to smaller segment of gantry	17,30,733.90	Nil
5.	Additional cost due to heading excavation from F-3 to F-4	4,02,58,039.43	Nil
6.	Additional cost due to heading excavation from F-6 to F-5	1,88,60,203.78	Nil
7.	Additional cost due to gantry dismantling and re-erection	13,83,686.00	Nil

72. **Issue No. 21 : Whether the Claimant is entitled to interest as claimed by it? If so, at what rate?**

72.1 The Claimant has claimed interest @12% p.a. from the date of incurring such expenses till the actual date of release of payment to him. The Respondent have denied that the Claimant is entitled to any interest.

72.2 AT has considered the matter for payment of interest. As per Sec.31(7) of the Arbitration & Conciliation Act, 1996. AT has powers to award the interest at such rate as it deems reasonable.

72.3 Sub-clause 60.7(a) of COPA provides that the Employer will make an interest bearing advance payment to the Contractor @12% p.a. (simple) for the cost of mobilization in respect of the works. Similarly, sub-clause 60.7(b) provides that the Employer will make interest bearing advance payment @12% p.a. (simple) against key construction equipment for the work and brought to site. Thus, the rate of interest @12% p.a. (simple) has become the contractual rate of interest by and between the parties in accordance with the law laid down by the Hon'ble Supreme Court of India in the matter of Bhagwati Oxygen Ltd. Vs Hindustan Copper Ltd. : 2005(1) Arb. WLJ 608 (SC). AT accordingly holds that the payment of interest @12% p.a. (simple) shall meet the ends of justice.

72.4 After considering the matter, AT is not inclined to award interest for the pre-reference period i.e. from the date of cause of action to the date of reference (submission of Statement of Claim before the AT).

72.5 The arbitration in the matter would have commenced only after 30.07.2008 when the arbitration clause was invoked by the Claimant. AT accordingly holds that the payment of interest @12% p.a. simple for the period from 01.08.2008 to the date of actual payment on the amount of Rs.51,63,00,000.00 shall be payable additionally to the Claimant. AT awards accordingly.

72.6 The issue no.21 is decided accordingly and to that extent.

73. **Issue no. 22 : Which party is entitled to costs? And to what extent?**

73.1 In the eighth arbitral hearing, it was decided that travel, lodging & boarding expenses shall, in the first instance, be borne by the Claimant. The Respondent shall later reimburse 50% of the same towards their share to the Claimant as per the bills raised.

NHPC LIMITED FARIDABAD

73.2 In this case any expenses towards travel, boarding & lodging expenses of the Arbitrators have been borne by the Claimant during the conduct of arbitral proceedings, they are entitled to recover 50% of the same from the Respondent towards their share. The Respondent is directed to pay his share of such expenses to the Claimant as per their demand. The parties are directed to settle their accounts in this respect accordingly.

73.3 In case, the Respondent fail to make payment of their share of any charges mentioned above, the Claimant shall be entitled to recover the same in addition to the awarded amount of Rs.51,63,00,000.00.

73.4 No further orders towards cost except as above. The party shall bear their own cost. The issue no.22 is decided accordingly.

74. No counter claims have been raised by the Respondent in the matter.

75. The Claimant has submitted the stamp paper of Rs.500.00 for making and declaring the award. The balance stamp papers as and when required shall be supplied by the Claimant and the cost of the same shall also be borne by it.

76. As per COPA Sub-Clause 67.3 (v), the venue of arbitral proceedings was decided at New Delhi/Faridabad. The first arbitral hearing was held at Faridabad but later all hearings including the internal meetings of AT have been held at New Delhi. The award is also being declared at New Delhi. Thus, the final award shall be deemed to have been made and declared at New Delhi in accordance with Sec. 31 (4) of the Arbitration and Conciliation Act, 1996.

77. This final arbitral award has been made unanimously by AT after considering all the documents, contractual provisions, pleadings of parties, documents, letters, correspondence and drawings filed on record, citations, oral and written arguments submitted by both the Parties (Claimant and Respondent) during the arbitral hearings.

Signed and delivered on the First day of the month of June, in the year of 2016 at New Delhi.

IN THE MATTER OF ARBITRATION REGARDING THE CLAIM FOR EXPENSES AND DELAYS INCURRED DUE TO UNFORSEEN PHYSICAL CONDITIONS WITH RESPECT TO THE CONTRACT FOR CONSTRUCTION OF HEAD RACE TUNNEL (LOT TT-III) AT TEESTA H.E.PROJECT (STAGE-V) IN THE STATE OF SIKKIM

BETWEEN

M/s Gammon India Ltd. - **CLAIMANT**

V/s

M/s NHPC Ltd - **RESPONDENT**

The arbitral award in the above matter was made and delivered by the Arbitral Tribunal (AT) on 01.06.2016. The award was unanimous. The signed copies of the award were handed over to the representatives of the parties on the same day.

2. Subsequent to the above, the Claimant has filed an application dt.30.06.2016 u/s 33 of Arbitration & Conciliation Act, 1996 for correction and interpretation of the aforesaid award.

3. This application was within time being within a period of 30 days of the declaration of the arbitral award and in accordance with the provisions prescribed in Sec.33 (1) of the Arbitration & Conciliation Act, 1996. The matter was discussed with the other Members of the AT telephonically. With their concurrence, the Respondent was directed, vide Presiding Arbitrator's e-mail dt.04.07.2016 to submit its response, if any, to this application within a period of 10 days.

application dt.30.06.2016 has to be decided by AT by 29.07.2016. The matter of this application was accordingly discussed amongst the members of the AT in detail telephonically as well as through e-mails. This order is being issued with the concurrence of all the members of the AT.

6. The Claimant in the aforesaid application dt 30.06.2016 has inter-alia prayed as below:

Prayers

The Claimant most humbly prays before this Ld. Tribunal to allow this Application for correction and interpretation of Award and issue clarification, as follows:

i) Specify the total amount of Award, including interest accrued, as on the date of publishing of the Award

ii) Issue the necessary amendment to the Award by including the interest @ of 12% on the sum payable to the Claimant as on the date of publishing the Award.

iii) Any other order that the Ld. Arbitral Tribunal may deem fit and proper.

7. To consider the aforesaid prayers of the Claimant, it shall be appropriate to reproduce the relevant part of the award dealing with the payment of interest as below:

72. Issue No. 21 : Whether the Claimant is entitled to interest as claimed by it? If so, at what rate?

72.1 The Claimant has claimed interest @12% p.a. from the date of incurring such expenses till the actual date of release of payment to him. The Respondent have denied that the Claimant is entitled to any interest.

72.2 AT has considered the matter for payment of interest. As per Sec.31(7) of the Arbitration & Conciliation Act, 1996. AT has powers to award the interest at such rate as it deems reasonable.

72.3 Sub-clause 60.7(a) of COPA provides that the Employer will make an interest bearing advance payment to the Contractor @12% p.a. (simple) for the cost of mobilization in respect of the works. Similarly, sub-clause 60.7(b) provides that the Employer will make interest bearing advance payment @12% p.a. (simple) against key construction equipment for the work and brought to site. Thus, the rate of interest @12% p.a. (simple) has become the contractual rate of interest by and between the parties in accordance with the law laid down by the Hon'ble Supreme Court of India in the matter of Bhagwati Oxygen Ltd. Vs Hindustan Copper Ltd. : 2005(1) Arb. WLJ 608 (SC). AT accordingly holds that the payment of interest @12% p.a. (simple) shall meet the ends of justice.

NHPC LIMITED एनएचपीसी N.H.P.C FARIDABAD

(V.K Iyer)
Presiding Arbitrator

~~113~~

72.4 *After considering the matter, AT is not inclined to award interest for the pre-reference period i.e. from the date of cause of action to the date of reference (submission of Statement of Claim before the AT)*

72.5 *The arbitration in the matter would have commenced only after 30.07.2008 when the arbitration clause was invoked by the Claimant. AT accordingly holds that the payment of interest @12% p.a. simple for the period from 01.08.2008 to the date of actual payment on the amount of Rs.51,63,00,000.00 shall be payable additionally to the Claimant. AT awards accordingly.*

72.6 *The issue no.21 is decided accordingly and to that extent.*

8. The Claimant, in the aforesaid application, has submitted that

5. '....the said para of the Award is deficient, to the extent that, the amount payable to the Claimant, by the Respondent, as on the date of publishing the Award is not quantified. We, therefore, request Ld. AT to quantify the amount payable to the Claimant, as per the Award, including the interest accrued as on the date of the Award which works out as below:

(i) Amount as per serial no.70 of the Award = Rs.51,63,00,000.00

(ii) Interest payable for period 30/07/2008 to 01/06/2016 (7.84 Year) @12% per annum as per serial no.72.5 of the Award = Rs.48,56,33,194.00

(iii) Total amount as on 01/06/2016 = Rs.100,19,33,194.00

6. Further the interest shall be payable on the award amount as above i.e. on Rs.100,19,33,194.00 @12% per annum, till the actual date of Payment of the Award amount. This calculation error on the computation of the Award amount needs to be corrected. Accordingly Award may please be correctly computed and included in the Award.

9. The Respondent has objected to the application on the ground that AT after rendering the award has become *functus officio* and the relief as claimed in the present application is beyond the scope of Sec.33 and liable to be rejected outright. It is neither correction of a typographic or clerical error. It is also not a computational error. In fact the Claimant is seeking a review of the Award and for addition of some relief which has not been granted to it.

10. In the rejoinder reply, the Claimant has reiterated their prayer and has relied on Sec.31 (7) of the Arbitration & Conciliation Act, 1996 and also on the judgment in the matter of M/s Hyder Consulting (UK) Ltd. *supra*.

NHPC LIMITED FARIDABAD

(V.K. Tyagi)
Presiding Arbitrator

11. As stated hereinbefore, the matter was discussed amongst the members of the AT. The contention of the Respondent that the AT had become *functus officio* after rendering of the award is not correct and is rejected for the reasons that AT has been vested with the powers, under the provisions of Sec.33 of the Arbitration & Conciliation Act, 1996, for correction and interpretation of the Award and also for making and declaring additional award after rendering of the arbitral award.

12. As far as the prayer of the Claimant regarding specifying the total amount of award including interest accrued as on the date of publishing of the award is concerned, AT has gone through the calculations submitted by the Claimant in para 5 of Claimant's application dt.30.06.2016. The calculations have been checked by the AT. The total awarded amount due as on 01.06.2016 comes to Rs.100.20 crores (rounded off). The Claimant's this prayer is sustained to that extent.

13. With regard to the prayer of the Claimant for issuing necessary amendment to the award by including the interest @12% on the sum payable to the Claimant as on the date of publishing the award is concerned, the same is not found maintainable by the AT. AT holds that no interference with the award is required with respect to this prayer of the Claimant.

14. However, if the Claimant feels that he is entitled to a relief which has been omitted in the arbitral award in view of the aforesaid judgment in the matter of M/s Hyder Consulting (UK) Ltd. *supra* and Sec.31(7) of the Arbitration & Conciliation Act, 1996, it is at liberty to raise the same in a separate suit or arbitral reference as deemed fit and proper.

15. This order is being made unanimously by AT after considering all the documents, contractual & legal provisions and pleadings of parties filed on record and citation submitted.

Signed and delivered for and on behalf of the AT on 27th day of the month of July, in the year of 2016.

Office Memorandum

Subject: Measures to revive the Construction Sector – reg.

The construction sector has been facing a number of problems, mainly arising from the liquidity constraints caused on account of their payments not being released by the Government Departments/ Public Sector Undertakings (PSUs) pursuant to the arbitral awards. To discuss the problems of the construction sector, detailed deliberations/ consultations were held with the representatives of the construction industry, banks, major government PSUs and concerned Ministries/ Departments. Based on the above deliberations/ consultations, the NITI Aayog placed a proposal before the Cabinet Committee on Economic Affairs (CCEA) for its consideration suggesting various short- term and long-term measures required for addressing the issues ailing the construction sector. The CCEA, chaired by the Hon'ble Prime Minister, has considered the proposals of NITI Aayog in its meeting held on 31st August 2016 and approved the same for the revival of construction sector.

(UD & HUD) 773/08 Dir (UD) JS 12/9/16

2. Accordingly, following instructions are hereby issued for compliance and necessary action by all concerned i.e. the Government Departments/ Ministries/ Public Sector Undertakings awarding the public contracts/ implementing various projects involving construction activities:

2.1 In case of contracts/ concessions where the process of arbitration was initiated under the pre-amended Arbitration Act, the PSUs/ Departments may seek the consent of the contractors/ concessionaires to transfer the pending cases under the amended Arbitration Act, wherever possible. The shift to amended Arbitration Act is expected to make the arbitration process more cost effective and help in settlement of the disputes in a timely manner;

JS (UD)

2.2 In case of claims where the PSU/ Department has challenged the Arbitral Award already announced, 75% of the award may be paid by the PSU/ Department to the contractor/ concessionaire against Bank Guarantee without prejudice to the final order of the Court in the matter under challenge. The payment may be made into a designated Escrow Account with the stipulation that the amount so released will be used, first, for payment of lenders' dues, second, for completion of the project and then for completion of other projects of the same PSU/ Department, as mutually agreed/ decided. Any balance remaining in the escrow account subsequent to settlement of lenders' dues and completion of projects of the PSU/ Department may be allowed to be used by the contractor/ concessionaire with the prior approval of

NHPC LIMITED FARIDABAD

the lead banker and the Department/PSU.

2.3 In case the subsequent court order requires refund of the money paid by a PSU/ Department against a Bank Guarantee, the amount shall be refunded by the contractor/ concessionaire along with appropriate interest. The rate of interest on such refund amount may be decided by the PSU/ Department keeping in view the cost of capital to the PSU/ Department or the rate of interest provided for in the Contract Agreement or the rate of interest awarded under the Arbitral Award under challenge.

Notes:

(i) For Departments, cost of capital shall be taken as Weighted Average Coupon rate of outstanding stock of Central Government securities for the period ending in the preceding quarter, or Weighted Average Coupon rate of Central Government securities issued during the preceding quarter (whichever is higher);

(ii) PSUs shall either calculate their own cost of capital or take State Bank of India's One Year Marginal Cost of fund-based Lending Rate plus 2%;

(iii) The appropriate interest rate on such refund shall be decided at the time of releasing funds to the Escrow Account;

(iv) If otherwise eligible and subject to contractual provisions, retention money and other amounts withheld may also be released against bank guarantee as per the laid down criteria.

3. All the concerned Ministries/ Departments shall also issue instructions to their respective PSUs for taking necessary action accordingly.

Sub: Release of 75% of Arbitral Award amount in relation to Contract for Execution of Civil works HRT including Adits 2,3 &4 etc. (Lot-TT-III) (Ref-I) for Teesta-V Power Station in state of Sikkim :- Arbitral Award dated 01.06.2016.

Ref: i) NITI Aayog Office Memorandum No. N-14070/14/2016-PPPAU dated 05.09.2016
ii) NITI Aayog Office Memorandum No. N-14070/14/2016-PPPAU dated 28.11.2019
iii) Escrow Account Agreement dated 28.09.2018
iv) Supplementary Escrow Account Agreement dated 09.01.2019

Sir,

In Pursuant to the NITI Aayog circular dated 05th Sept 2016, the payout letter had been issued to M/s GECPL on dated 20.02.2018 for release 75% of payment in respect of arbitration award dated 01.06.2016 against BG amounting to Rs 91,08,41,127/- i.e. payout amount plus interest for one year. In compliance to payout letter an Escrow Account Agreement was executed on dated 28.09.2018 followed by Arbitral Award Escrow Account supplementary Agreement dated 09.01.2019 and subsequently an amount of Rs 81, 32, 51, 006/- was released in Escrow Account.

As per terms and conditions of Escrow Account Agreement the submitted BG has to be renewed by M/s GECPL on annual basis plus interest.

Now in terms of recent Office Memorandum of NITI Aayog dated 28.11.2019, 75% of payment to be released in respect of arbitral award against BG only for payout amount and not for interest component. In this regard if you wish, you can replace the existing BG of Rs 99,94,80,462/- (Payout Amount plus future interest component) with fresh BG only for pay amount i.e. Rs 81,32,51,006/-. In this regard an Arbitral Award Escrow Account Supplementary Agreement to the existing escrow account agreement is required to be executed and fresh BG only for payout amount is required to be submitted in the new BG format.

Hence in this regard the format for Arbitral Award Escrow Account supplementary agreement and BG have been enclosed herewith for the necessary action if you wish to replace your submitted BG with fresh BG.

Encl: A/a

M/s NHPC Limited
Vs
M/s Gammon Engineers & Contractors Pvt. Ltd. and another

Present: Mr. Chetan Mittal, Senior Advocate,
with Mr. Gaurav Chopra, Advocate,
and Mr. Udit Garg, Advocate,
for the appellant.
Mr. Pawan Upadhayay, Advocate,
for respondent No. 1.

* * * *

CM-96-FCARB-2019

Leave is granted to place on record the amended memo of parties filed on behalf of respondent No. 1 and the application is allowed.

FAO-CARB-20-2019

Heard Mr. Chetan Mittal, learned senior counsel assisted by Mr. Gaurav Chopra and Mr. Udit Garg, learned counsel appearing for the appellant and Mr. Pawan Upadhayay, learned counsel appearing for respondent No. 1.

It has been pointed out to us that against an award of ₹ 100.19 crores, ₹ 81.16 crores has already been deposited by the appellant which has been withdrawn by respondent No. 1 against a bank guarantee. The dispute remains only with respect to rest of the amount.

After having heard learned counsel for the parties and considering the facts and circumstances, it is hereby provided that the balance amount of ₹ 19.03 crores be deposited by the appellant with the Executing Court within one month from today. The amount so deposited shall be liable to be withdrawn by respondent No. 1, after notice to the appellant, subject to its furnishing adequate security to the satisfaction of the Executing Court.

For the rest amount of ₹ 81.16 crores for which a bank guarantee has been given, respondent No. 1 is under an obligation to keep it alive.

Adjourned to 08.08.2019.

UNDER CONTRACT AGREEMENT NO. NHPC/CCW/0603/ 17/800/40TTT-3/2001 DATED 21.03.2001 FOR CONSTRUCTION OF HEAD RACE TUNNEL AT TEESTA H.E. PROJECT (STAGE-V) LOT TT-3 AND ADITS 2, 3 & 4.

AWARD

1.0 The Contract Agreement for the above works was signed on 21.03.2001, between M/s GIL and M/s NHPC Ltd. after the issue of Letter of Acceptance on 09.03.2001, with following salient features: -

i.	Invitation of Bid	:	08.09.2000
ii.	Submission of Bid	:	14.11.2000
iii.	Submission of Revised Bid	:	27.12.2000
iv.	Date of Agreement	:	21.03.2001
v.	Date of Start	:	22.03.2001
vi.	Contract Period	:	67 months (2040 days)
vii.	Date of Completion	:	22.10.2006
viii.	Contract Value	:	Rs. 348.95 crores

1.1 The original bid had been submitted on 14.11.2000 on the basis of information about the types of rock and geology and the classification of rock based on the extent of difficulties encountered in tunneling which determined the support system. The Respondent sought several clarifications and information which led to submission of a revised bid on 27.12.2000.

1.2 During the execution of works, major hindrances were faced by the Claimant which resulted in delays in completion of works. Some variations were also instructed by the Respondent, including instructions to take up acceleration measures to compress the construction schedule from 67 months as per

(N N Singhal) (V K Agarwal) (O P Goel)

Contract to 60 months, involving mobilization of additional resources (equipment etc.).

1.3 Several differences arose between the Claimant and the Respondent during the course of execution of works. After prolonged correspondence for resolving the same, the Claimant had submitted draft final bill on 10.03.2009 (Exh.-132). The Respondent accepted part of the final bill, rejecting other issues, which were notified as disputes. One of the disputes was under another arbitration (since finalized). Other disputes are referred to the present Tribunal, after following the procedure for settlement of disputes as per GCC Clause 67.1, vide letter dated 18.06.2009.

1.4 Thereafter, the Respondent expressed its intention to settle the issues amicably as per GCC Clause 67.2, which was agreed and the arbitration proceedings were deferred vide letter dated 20.03.2010. Although some proposal had been forwarded to the Respondent's Board for approval, no decision was conveyed to the Claimant inspite of many reminders during Jan. 2011 to Oct. 2012. As no final settlement seemed possible, the Claimant re-invoked arbitration proceedings vide letter dated 26.10.2012 (Exh. 128), and appointed Shri N.N. Singhal as nominee Arbitrator in accordance with GCC Clause 67 of the Contract.

1.5 The Respondent appointed Shri V.K. Agarwal as nominee Arbitrator on 10.12.2012. The two Arbitrators appointed Shri O.P. Goel as Presiding Arbitrator and thus the Arbitral Tribunal (AT) was duly constituted on 21.01.2013.

2.0 As per directions of the AT, the Claimant submitted its Statement of Claim (SOC) on 20.04.2013. The Respondent submitted its Statement of Defence(SOD) on 05.09.2013. The Claimant submitted its Rejoinder to the SOD on 03.10.2013.

NHPC LIMITED FARIDABAD

1699

(N N Singhal) (V K Agarwal) (O P Goel)

2.1 The Claimant has raised the following claims through the SOC:

Claim No. 1	:	Payment for cost incurred for Acceleration Measures (Rs. 115,05,50,425)
Claim No. 2	:	Payment of Additional cost towards work on Face 8 beyond Face 7 (Rs. 2,54,27,000)
Claim No. 3	:	Payment of Rolling Margin (Rs. 1,22,81,449)
Claim No. 4	:	Reimbursement for procurement of sand in absence of quarry (Rs. 1,41,99,830)
Claim No. 5	:	Reimbursement of cost of Balance Lease Land (Rs.74,74,972)
Claim No. 6(a)	:	Reimbursement of cost for Extension of Insurance Policy due to time extension and increase in contract value (Rs.2,82,21,860)
Claim No. 6(b)	:	Payment of BG charges due to extension of time (Rs.23,96,435)
Claim No. 6(c)	:	Payment for NHPC & PWD Roads Maintenance after 22.10.2006(Rs.71, 59,856)
Claim No. 7	:	Claim for interest @ 12% p.a. compounded monthly.
Claim No. 8	:	Cost of Arbitration as per actual cost.

2.2 Cross-examination of Respondent's witness (RW-1) Shri Biman Ghosh was taken up on 07.04.2014 and concluded on 08.04.2014

(8th hearing). During this period a copy of the report of the Attorney General, Govt. of India was also filed by the Respondent on 08.04.2014.

2.3 Cross-examination of Claimant's witness (CW-1) Shri Ashish Gupta was commenced on 01.05.2014 and concluded on 17.07.2014 (11th hearing).

3.0 At the start of oral arguments, the Respondent raised some preliminary objections, and desired decision of the Tribunal on these issues first, before start of arguments by the Claimant, to be followed by defence arguments.

3.1 The Respondent's Counsel took up the main preliminary objections in the 12th hearing (28.08.2014), on the following issues:-

i) Order 2 Rule 2 CPC.
ii) Limitation under the Limitation Act, 1963.

The Counsel concluded his arguments in the 16th hearing.

3.2 The Counsel for the Claimant took up his arguments in the 17th hearing and concluded in the 23rd hearing on 08.12.2014.

3.3 The Counsel for the Respondent took up rejoinder arguments and concluded on 09.02.2015 (26th hearing).

3.4 The Tribunal deliberated on the two issues and passed its Orders on 11.02.2015 (28th hearing), annexed herewith as **Encl.1**, holding that the objections of the Respondent cannot be sustained, and accordingly directed the parties to proceed with the arbitration proceedings.

NHPC LIMITED FARIDABAD

(N N Singhal) (V K Agarwal) (O P Goel)

3.5 The Claimant commenced their submissions in the 29th hearing on 23.03.2015 and concluded on 28.07.2015 (38th hearing). During the course of oral arguments the Claimant dropped claim no 5 (37th hearing). Later on the Claimant also dropped sub-items 4, 5, 7, 8, 9, 10 & 11 of claim no. 1 as recorded in the minutes of 48th hearing. It was also explained by the Claimant that there was no pending dispute on these items since the amounts accepted by the Respondent were not disputed by the Claimant.

3.6 The Respondent commenced their oral arguments on 14.09.2015 (39th hearing) and concluded in the 62nd hearing on 26.07.2016.

3.7 The Claimant took up rejoinder arguments on 27.07.2016 (63rd hearing) The Claimant also submitted an application for production of supporting documents by the Respondent on the Committee's Report on claim no. 1 regarding computation of amounts payable for acceleration measures under various heads submitted by the Respondent during their oral submissions.

3.8 The application was opposed by the Respondent on the following grounds: -

i) The Claimant has not submitted its calculations for claim no. 1 but wants the Respondent to furnish their details, which are already on record.
ii) The Committee Report is an internal matter of the Respondent. What matters is the final decision taken by the Respondent and conveyed to the Claimant.
iii) The Claimant is trying to delay the proceedings while the arguments are at the concluding stage.

(N N Singhal) (V K Agarwal) (O P Goel)

iv) All the relevant details have already been made available to the Tribunal and the Claimant during oral submissions.

3.9 Both parties concluded their arguments on 24.01.2017 (70th hearing).

3.10 The Tribunal considered the issue in the light of the objections by the Respondent and issued its order in the internal meeting held on 02.02.2017 (71st hearing) disallowing application of the Claimant (Annexed herewith as **Encl. 2**), and directed them to proceed with the rebuttal arguments.

3.11 The Claimant resumed their arguments on claim no. 1 and other claims and concluded on 27.03.2017 (72nd hearing). Both parties concluded their final arguments during 73rd & 74th hearings held on 10/11.05.2017. Hearings were thereafter closed.

3.12. Written Synopses of oral submissions have been received from the Claimant on 12.06.2017 and from the Respondent on 13.06.2017.

4.0 List of documents submitted by the parties are given below, besides the Contract Agreement (4 Volumes).

I. BY THE CLAIMANT

1.	Statement of Claim (SOC)	20.04.2013
i.	Vol. C-1 (SOC)	1 – 46
ii.	Vol. C-2 (Clam No. 1)	47 – 98
iii.	Vol. C-3 (Claim No. 2)	99 – 333
iv.	Vol. C-4 (Claim No. 3, 4, 5)	334 – 549
v.	Vol. C-5 Claim No. 6a, 6b, 6c)	550 – 660
vi.	Vol. C-6 (Exh. 1 to 80)	661 – 860

NHPC LIMITED FARIDABAD

vii. Vol. C-7 (Exh. 81 to 105)	861 – 1024
viii. Vol. C-8 (Exh. 106 to 150)	1025 – 1146
2. Rejoinder to SOD (1 – 16)	03.10.2013
3. Written Synopsis of oral arguments	12.06.2017

II. BY THE RESPONDENT

1. Statement of Defence (SOD) (along with Annexures R-1 to R-3)	05.09.2013
2. Memorandum of US Department of Transportation (R-4)	27.07.2016
3. Copy of Award in case of GIL Vs NHPC (R-5)	27.07.2016
4. Written Synopsis of oral arguments	13.06.2017

4.1 Both parties also submitted court judgments to support their contentions. The Claimant has filed three judgments (CJ-1 to CJ-3). The Respondent has filed twenty-one judgments (RJ-1 to RJ-21).

5.0 Final Claims of the Claimant besides Interest & Cost are as under:

Claim No. 1 Payment for cost incurred for Acceleration Measures.

Claim No. 2 Payment of additional cost towards work on Face 8 beyond Face 7.

NHPC LIMITED FARIDABAD

(N N Singhal) (V K Agarwal) (O P Goel)

Claim No. 3	Payment of Rolling Margin.
Claim No. 4	Reimbursement for procurement of sand in absence of quarry.
Claim No. 5	Withdrawn.
Claim No. 6(a)	Payment of cost for Extension of Insurance Policy.
Claim No. 6(b)	Payment for Extension of BG charges.
Claim No. 6(c)	Payment for Maintenance of NHPC & PWD roads beyond original date of completion i.e. 22.10.2006.

The Claims are taken up in the following paras.

6.0 CLAIM NO. 1 – PAYMENT FOR COST INCURRED FOR ACCELERATION MEASURES (RS. 115,05,50,425)

6.1 THE CLAIMANT'S CASE

(i) The Claimant has submitted through SOC that after the award of work on 09.03.2001(LOA) and signing of agreement on 21.03.2001, the Respondent informed GIL vide letter dated 27.04.2001 that the completion period for Contract Works had erroneously been calculated as 67 months (2040 days) in the agreement, while it should have been 60 months (1826 days). It was, also conveyed that the correction is required to be made and work completed in 60 months, and concurrence was required from the Contractor, and further that it shall be done without any additional cost to NHPC.

(N N Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

(ii) The Claimant replied to the above vide letter dated 08.05.2001 and informed that reduction in the completion period by 7 months would only be possible by mobilizing additional resources, resulting into additional expenses. The Claimant, therefore, regretted their inability to agree for the same without any additional cost to NHPC. It was further conveyed that in case NHPC still desired that the Works be completed within 60 months, GIL was willing to do so subject to payment of additional cost, which would be communicated after final decision in the matter by NHPC. After exchange of a few letters the Claimant (GIL) confirmed working on the revised proposal in its letter dated 30.09.2002. The Construction Programme for completing the job in 60 months was submitted by GIL to NHPC on 27.06.2003. It was also conveyed that for achieving the revised schedule, substantial additional cost was being incurred for procuring and mobilizing additional plant & equipment and also that they were continuing to deploy such plants on the understanding that the additional cost shall be reimbursed to them. A request was also made to approve the programme along with cost thereof to strengthen their hands in completing the project in 60 months.

(iii) The Respondent (NHPC) formally confirmed working on the revised schedule by its letter dated 03.01.2004, (Exh. 19). M/s GIL confirmed vide letter dated 14.02.2004 that in continuation of letter dated 27.06.2003, they had inducted a set of equipment with a request to consider the same for compression claim under Clauses 51.2 & 52.1 of COPA.

(iv) By letter dated 24.02.2004, GIL gave a list of additional equipment required to be inducted for compression of

schedule, and requested for additional advance of Rs. 20 crores against B.G. An advance of Rs. 15 crores was allowed and paid in April, 2004.

(v) On 16.07.2004, GIL intimated that approval of 60 months compression schedule was still awaited, along with related cost, and reimbursement of additional expenses to the tune of Rs. 35 crores notified to NHPC had not yet been made to them or otherwise it would not be possible to progress with the 60 months schedule.

(vi) In the meeting held on 07.02.2005 (MoM Exh. 32) between NHPC and GIL, the construction schedule for compression and requirement of additional equipment and manpower to achieve the same were discussed in detail. GIL also raised the issue of reimbursement of huge amounts already invested towards mobilization of additional resources and requested NHPC for early settlement of pending issues/ claims in order to help in easing out cash flow.

(vii) On 19.05.2005 in reference to MoM dated 16.05.2005, GIL again stressed on the need for additional inputs in all disciplines in the project as discussed in the meeting held on 16.05.2005 at NHPC Corporate Office, Faridabad. In the meeting it was also decided that for investment of Rs. 15 crores for additional equipment, interest free advance against BG shall be made available, which shall be adjusted against the final approved amount payable against the compression claim. It was also urged that NHPC should approve the proposal within a week's time. The issue was taken up again by GIL vide letter dated 23.05.2005, with a request for approval of schedule and related payments within 3 week's time without which GIL

(N N Singhal) (V K Agarwal) (O P Goel)

would not undertake compression steps. A reminder was sent by GIL on 11.07.2005.

(viii) During Aug. 2005 to Nov. 2005 several meetings were held between NHPC and GIL regarding acceleration measures, additional resources, reimbursement of additional costs incurred by GIL. However, the commercial offer regarding compression cost remained under consideration of NHPC. Upto that stage, target for completion (of HRT) remained as Jan. 2007, while EOT as per delays upto Oct. 2004 had been approved by NHPC upto 17th May, 2007. (Exh. 35)

(ix) GIL submitted its demand for acceleration cost to NHPC on 24.01.2006 based on completion date as Jan. 2017 with normal extended date as 17.05.2007. The cost claimed therein was Rs. 122.3 crores including OH and Profit @ 20% (Exh. 50). A reminder was sent on 01.04.2006 for early payment without which acceleration works would not be possible. Communications were also made at the level of CMD-GIL and CMD-NHPC repeatedly.

(x) EOT case for delays beyond Oct. 2004 had been sent by GIL to NHPC on 02.11.2006 which was approved by NHPC upto 17th May, 2007. (Exh.92)

(xi) No approval, however, was available even upto Sept. 2006 when NHPC asked GIL to submit 3 proposals for completing HRT works upto April 07, May 07 & June 07 which was complied by GIL vide letter dated 11.09.2006 (Exh. 66). It was communicated that inspite of their mobilization of additional resources for completion by March 2007, NHPC has not yet approved the financial

(N N Singhal) (V K Agarwal) (D P Goel)

offer. It was also noted that EOT upto Nov. 2007 had been approved by NHPC on 16.05.2007. On 13.02.2007 NHPC only wrote to GIL that since the works could not be completed by Feb. 2007, the compression claim could not be considered.

(xii) In reply to GIL's reminder dated 14.05.2007, NHPC asked for details/proof of additional equipment deployed along with demobilisation dates and similar details for additional manpower deployed for further processing of the case. The updated details were furnished by GIL on 22.01.2008 (Exh. 110). In the meantime, substantial completion of works was achieved on 30.11.2007, 378 days ahead of the approved extended completion date of 12.12.2008.

(xiii) On 18.08.2008, NHPC with reference to GIL's letters (Jan. 2006 to Aug. 2008) informed that an amount of Rs. 12.58 crores had been approved by competent authority as acceleration cost. It was further informed that Rs.2.54 crores had already been released. Further amount would be released on acceptance of the following conditions: -

(a) The other claims arising out of similar reasons viz. encountering of bad geological conditions shall not be entertained by NHPC.
(b) Acceptance towards settlement of this claim be conveyed.

(xiv) GIL did not accept the conditions since this claim was for payments against Accelerated Works which was an independent matter. GIL also requested to provide the back-up of Rs. 12.58 crores which was made available by NHPC on 16.09.2008. GIL protested on the reduction

(N N Singhal) (V K Agarwal) (O P Goel)

factor used by NHPC in computing the admissible amount. GIL also provided itemwise comments on the claimed amounts and the amounts approved by NHPC, and requested for release of balance approved amount of Rs. 10.04 crores without the 'No Claim Certificate' (Exh. 131 dt. 06.12.2008). The amount of Rs. 10.04 crores was thereafter released by NHDC on 02.02.2009.

(xv) The Respondent explained the calculations of the approved amount only during proceedings of amicable settlement, which revealed that though the Respondent had principally relied on CWC guidelines for preparation of project estimate for River Valley Projects and Guidelines on Use Rate – Hire Charges and Transfer Value of equipment and spare parts, they had committed major calculation errors, omissions, deductions and invalid, wrong, illogical factors unilaterally applied which was a deliberate attempt to reduce the agreed and payable amount.

(xvi) GIL's response to the approved amount as above, is given hereunder itemwise for identifying the claims/issues to be adjudicated by the Tribunal.

(1) Ownership cost of additional equipment

Claimed by GIL Rs. 1869 lacs

Approved by NHPC Rs. 653 lacs

<u>GIL's COMMENTS</u>

(i) Base date of acceleration has been considered by NHPC as 01.05.2004, while the actual starting date for acceleration is April 2003.

NHPC LIMITED FARIDABAD

1710

(N N Singhal) (V K Agarwal) (O P Goel)

(ii) Some equipment were deployed from start of work but were not withdrawn once acceleration proposal came up in April 2003.

(iii) NHPC has considered idling depreciation as 50% which is not acceptable.

(iv) One additional Batching Plant and six Transit Mixers reduced in calculation although considered by the Project.

(v) Some plant as per data sheet which were not deployed by GIL have been considered for deduction in ownership cost (about Rs. 18 lacs) which is not acceptable.

(2) Operation Manpower & R/M cost for additional equipment: -

Claimed by GIL	Rs. 4354 lacs
Approved by NHPC	Rs. 492 lacs

GIL's COMMENTS

(i) CWC guidelines not followed by NHPC for repair provision which has been taken as 20% of cost of equipment for all equipment while CWC provides as 80% to 200% depending upon the type of equipment. Operation cost of equipment not deployed as per data sheet has also been deducted (Rs. 98 lacs) which is not acceptable.

(3) Additional Manpower

Claimed by GIL	Rs. 1167 lacs
Approved by NHPC	Rs. 315 lacs

GIL's COMMENTS

1711

(N N Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

(i) Workers deployed for stores / supervision etc. are not part of overhead. The number/strength was increased to maintain support/service round the clock working at the site.

(4) Additional Plant Installation

Claimed by GIL	Rs. 34 lacs
Approved by NHPC	Rs. 17 lacs

GIL's COMMENTS

(i) Amount is accepted .

(5) Cost of Non-Electric Detonators

Claimed by GIL	Rs. 44 lacs
Approved by NHPC	NIL

GIL's COMMENTS

(i) NHPC's decision is accepted.

(6) Cost of additional infrastructure for additional manpower

Claimed by GIL	Rs. 135 lacs
Approved by NHPC	NIL

GIL'S COMMENTS

(i) Cost of accommodation is an extra indirect expense and is not covered under overhead.

(7) Incentives

Claimed by GIL	Rs. 650 lacs
Approved by NHPC	Rs. 171 lacs

GIL's COMMENTS

(i) Amount is accepted.

NHPC LIMITED FARIDABAD

1712

16

(N N Singhal) (V K Agarwal) (O P Goel)

(8) Cost of shutter dismantling & erection

Claimed by GIL	Rs. 73 lacs
Approved by NHPC	Rs. 57 lacs

GIL's COMMENTS

(i) Amount is accepted.

(9) Cost incurred due to concurrent activities of heading & benching etc.

Claimed by GIL	Rs. 1751 lacs
Approved by NHPC	NIL

GIL's COMMENTS

(i) NHPC decision is accepted.

(10) Cost of additional handling of coarse & fine aggregates etc.

Claimed by GIL	Rs. 317 lacs
Approved by NHPC	Rs. 177 lacs

GIL's COMMENTS

(i) Amount is accepted.

(11) Cost of leasing of additional land for plant installation, stockpile and labour & staff colony.

Claimed by GIL	Rs. 30 lacs
Approved by NHPC	Rs. 18 lacs

GIL's COMMENTS

(i) Amount is accepted.

(12) Thus the total amount claimed by GIL comes to Rs. 10424 lacs against which an amount of Rs. 1900 lacs has been approved by NHPC.

1713

17

(N K Singhal) (V K Agarwal) (O P Goel)

(13) Overhead & Profit has been allowed as given below:

Claimed by GIL @ 20%	Rs. 2085 lacs
Approved by NHPC @ 15%	Rs. 290 lacs

(14) Total admissible amount thereafter comes to:

Claimed by GIL	Rs. 12509 lacs
Approved by NHPC	Rs. 2190 lacs

(xvii) NHPC has further reduced the above admissible amount unilaterally in the proportion of 378 -: (378 + 279) during final evaluation in Corporate Office thereby reducing the additional amount to Rs. 1260 lacs. This is not acceptable since no delays have been attributed to GIL which is clear from extension of time approved by NHPC. It is on record that acceleration has been achieved due to round the clock working, all 30 days a month instead of 25 days as per original contract provision, and deployment of additional plant.

6.2 THE RESPONDENT'S CASE

(i). The Respondent (NHPC) did not dispute any data or detail in the sequential events given by the Claimant (GIL). However, NHPC has brought out the following: -

(a) GIL did not indicate the alleged additional cost for accelerating the works to 60 months (from contracted 67 months) even with the acceleration programme submitted on 01.09.2003. It was only on 24.01.2006 that an amount of Rs. 122 crores was indicated.

(N N Singhal) (V K Agarwal) (O P Goel)

(b) Though the works could not be completed by the scheduled date, after completion of the work by 30.11.2007, GIL submitted a claim for Rs. 125 crores on 22.01.2008. The claim was found to be highly inflated and of dubious nature, as the essence of the claim for cost of compression and another claim for additional cost due to adverse geological conditions (under separate arbitration) were similar in nature.

(c) The claim on account of compression is not covered under provisions of the Contract and is an extra contractual requirement. However, the claim has still been considered by NHPC.

(d) Prior to adoption of acceleration measures, a delay of 279 days on the part of Contractor (GIL) had been worked out during approval of time extensions. It has been determined by NHPC that an acceleration of 378 days was admissible, calculated from the delays not attributable to the Contractor and delays caused by increased scope of works. Accordingly, the compression cost has to be apportioned in the ratio of benefit to the NHPC (no. of days compressed) and delay of 279 days on the part of GIL. The compression cost has been worked out to be Rs. 21.88 crores. By apportionment as above, the cost admissible to GIL comes to Rs. 11.77 crores. This amount has been paid to the Claimant/GIL.

(ii). NHPC has also raised some preliminary objections (other than already decided as per para 3.4) which are as under:

(a) Claimant has not followed the procedure for claim provided under GCC Clause 53.1 of the Contract and

(N N Singhal) (V K Agarwal) (O P Goel)

the claim was raised for the first time on 21.03.2007 and is liable to be rejected on this ground itself. Further, clause 53 provides for contemporaneous records to support the claim, which are totally missing. The claim is thus liable to be rejected outright.

(b) The Claimant had quoted the value of work as Rs.348.95 crores. Due to variations and execution of extra and additional works, the total value of work is Rs.422.93 crores. Price escalation of Rs. 142.8 crores has also been paid. Thus the total payment to the Claimant comes to Rs. 565.78 crores. The L-2 bidder (JAL) had quoted Rs. 375.56 crores. Therefore, the claim raised is liable to be rejected on this ground also. Further, the Claimant had offered for an amicable settlement of all disputes on payment of a sum of Rs.75 crores only.

(c) The Respondent argued that the claim was for alleged cost incurred for acceleration measures taken by the Claimant. Further, there was inadvertent error in the period of completion of the Contract, which was mentioned as 67 months instead of 60 months. The Claimant seized upon this mistake to wrongly start making claim for reducing the completion period to 60 months.

(c) According to the Respondent, the Claimant was not entitled to any amount beyond Rs. 12.58 crores which had already been paid to the Claimant.

6.3 THE CLAIMANT'S REJOINDER

(N N Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

(i) The Respondent's statement that the contract duration was to be 60 months, instead of 67 months means to deny and dispute the written terms of the Contract, which is not at all sustainable in law.

(ii) The acceleration measures were taken on specific direction of the Respondent and the claim for the same was submitted based on established CWC guidelines. The claim had already been accepted by the Respondent and the dispute was only on the evaluation of the cost of acceleration measures by the Claimant. The Respondent had resorted to arbitrary actions to reduce the payable amount.

(iii) It is also denied that saving achieved by acceleration measures has been 378 days. Even from the records of the Respondent, the saving comes to 610 days.

(iv) The Respondent's plea that the claim was liable to be rejected as procedure provided in GCC Clause 53.1 had not been followed was wrong and incorrect and hence denied. The GCC Clause 53.4 clearly provides that the entitlement to claim is not barred by Clause 53.1.

(v) The allegation of the Respondent that no contemporary records were available to support the claim, was wrong and incorrect. The Claimant's submissions were based on contemporary records.

6.4 FINDINGS OF THE TRIBUNAL ON PRELIMINARY OBJECTIONS

Based on the submissions of both the parties, oral arguments, citations relied upon by the parties and the Contract Agreement, the AT takes up the preliminary objections raised by the Respondent (NHPC) in SOD or subsequently during oral submissions and confirmed in the written synopsis.

(N N Singhal) (V K Agarwal) (O P Goel)

i. Applicability of Order 2 Rule 2 CPC and Limitation Act have already been decided by the AT by an interim order as per Enclosure I. Objections raised are not found maintainable for any of the claims.

ii. Issue of non-observance of GCC Clause 53.1 by the Claimant (GIL) has been raised during oral submissions. The facts are that after the commencement of work under the Contract on 21.03.2001, NHPC on 27.04.2001 sought a serious and unusual reduction of 7 months in the period of construction of all works under the Agreement (from 67 months to 60 months), and that too without any additional cost to NHPC. The proposal was not acceptable to GIL who offered to undertake the acceleration measures on additional payments. After confirmation from NHPC, M/s GIL commenced working for such acceleration involving additional resources, changed methodology with overlapping activities etc. Some financial assistance was provided by NHPC against the demand by GIL.

It is pertinent to mention that the work was also being affected and delayed for other reasons like unforeseen adverse geological conditions which had to be considered independently as unrelated to acceleration measures. With such uncertainties, it was not easy and possible to fix a definite time for completion with acceleration measures as well as cost involved. Several dates were indicated during progress of works by both the parties. In May 2005, GIL

(N N Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

indicated cost of Rs. 100 crores for acceleration cost (5 ½ month acceleration), if immediate approval and financial support for additional resources having been deployed are available . In Jan 2006 a cost estimate of Rs. 122 crores was submitted to NHPC. On the request of NHPC, in May 2006 GIL submitted proposals for completion by April 2006, May 2006 and June 2006. This went on and neither any schedule nor cost was approved by NHPC till actual completion of works by 30.11.2007.

In the above circumstances and developments, how does the issue of giving a notice under Clause 53.1 of claims by the Claimant arise? The Respondent himself wanted to squeeze the construction period for its benefit, but upto the last stage, no approval was given although the Claimant continued to carry out the acceleration measures in the interest of work. The issue of notice under Clause 53.1 is totally redundant and not maintainable.

iii. Another issue raised by NHPC is about non-availability of contemporaneous records in support of the Claim amounts. It is observed from records that regular information was made available to NHPC regarding additional equipment mobilized for acceleration of work as well as additional expenses being incurred. The Respondent was free to demand any data contemporaneously and/or also direct the Claimant, if required by them, to submit any other details for verification of the cost of acceleration measures.

(N N Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

The fact is that a Committee was formed by the Respondent to examine the claim, details of which were informed to the Claimant in Aug, 2008 long after completion of works. The report of the Committee shows that there was no mention of non-availability of any data from the Claimant which could effect their assessment and final report.

As such the objection raised is not valid and maintainable.

iv. The Counsel for NHPC has also raised an issue of non-submission by GIL of the segmental accounts of the particular project as are to be maintained under the Companies Act and the Accounting Standard (AS-7).

The AT observes that the details about the requirements of Companies Act and its compliance are not under examination by the Tribunal. The claims arising between the parties under the Contract are to be settled as per the Contract and the A & C Act.
The objection is rejected.

v. The suggestion by the Counsel for the Respondent that if total payments made to the contractor including escalation, additional works and claims made are considered (which come to Rs. 933.55 crores against the contract value of Rs.349 crores), the contractor would not even have got this work, (L-1) is purely hypothetical and irrelevant for adjudicating the claims. The point raised cannot be considered by the AT and is rejected.

(N N Singhal) (V K Agarwal) (O P Goel)

6.5 FINDINGS OF THE TRIBUNAL ON MERITS

6.5.1 The AT records below the dates of various activities leading to taking up acceleration measures by GIL, on which there is no dispute between GIL & NHPC.

i. Date of commencement of works - 21.03.2001

ii. NHPC's instruction to GIL for reducing the contract period from 67 months to 60 months (without any additional cost) -27.04.2001

iii. GIL informed that no acceleration is possible w/o additional cost - 08.05.2001

iv. NHPC confirmed in PRM at Corporate Office regarding acceleration to achieve 60 months Target - 08.10.2002

v. GIL commenced mobilization of additional equipment as confirmed to NHPC -01.04.2003.

vi. Gil submitted accelerated constr -uction programme, reconfirming Deployment of additional equi -pment for which ownership and operating cost shall be payable -27.06.2003

vii. NHPC reconfirmed the accele- rated target for the project by Mar 2006 (60 months) - -03.01.2004

viii. GIL furnished details of additional equipment deployed so far for acceleration measures. -14.02.2004

1721

(N N Singhal) 25 (V K Agarwal) (O P Goel)

6.5.2 In the meantime and subsequently work remained in progress. There were other causes of delays (mainly due to adverse geological conditions) for which EOT was sought by the Claimant and approved after sorting of delay events etc. as per following details.

(i) 1st EOT upto 17.05.2007 on 10.05.2005	Exh.35
(ii) 2nd EOT upto 30.11.2007 on 10.05.2007	Exh.92
(iii) 3rd EOT upto 23.04.2008 on 28.08.2008	Exh.112
(iv) Final EOT upto 12.12.2008 on 28.08.2008	Exh.124

The Respondent has also ascertained that all delays have been due to adverse geological conditions and increased value of work. It is also noted from records that even with extensions of time the Respondent was continuously pressurizing GIL for earlier completion than the extended date, due to acceleration measures being undertaken by the Claimant. However, no formal approval of a date for completion and any financial proposal was issued by the Respondent even upto early 2007, although repeatedly requested by the Claimant in the overall interest of the project.

6.5.3 It was, however, accepted by the Respondent that acceleration measures were being taken by the Claimant. On the request of the Claimant, some financial interest bearing advances were also paid, although the same were inadequate according to the Claimant.

(N N Singhal)

1722

26

(V K Agarwal)

NHPC LIMITED FARIDABAD

(O P Goel)

6.5.4 Various cost estimates for the additional acceleration measures were given by the Claimant. While the period for acceleration had not been finalized between the Respondent and the Claimant, it was not easy and possible to give a fixed date or estimated amount, with all other uncertainties due to poor geological conditions. Financial proposal for completion by Mar 2007 had been given by GIL in Feb 2006. In the circumstances the rejection of the entire issue of the cost for acceleration measures in Feb 2007 by the Respondent did not seem proper. In fact, the cost committee later constituted by the Respondent (after completion of work by end of Nov 2007) has accepted the acceleration measures undertaken by the Claimant. The admissibility of additional cost for acceleration measures, therefore, stands confirmed and the Tribunal supports the same view. However, the issues remain regarding the methodology adopted by the Claimant and by the Committee for arriving at a reasonable and acceptable cost. These issues are under adjudication of the Tribunal and shall be dealt with in the forthcoming paras.

6.5.5 The AT has gone through the claim calculations of the Claimant and methodology used by the committee based on which the Respondent has allowed certain payments and has come to the conclusion that following questions/issues need to be settled to finalize the admissible amount for proving the additional acceleration measures as per instructions by the Respondent.

(a) Whether deployment of additional equipment should be taken from the date of its actual deployment i.e. from

(N N Singhal) 27 (V K Agarwal) (O P Goel)

April 2003 or from May 2004 as adopted by the Respondent.

(b) Whether non- acceptance of certain equipment by the Respondent is justified.

(c) Whether deductions for ownership cost and operational charges of some contractual equipment in the bid, not actually deployed for the execution of total works, are justified.

(d) Whether computation of ownership cost of equipment by the Claimant is as per CWC Guidelines, and acceptable.

(e) Whether deduction of cost of additional works entrusted to GIL from another contract, from cost of acceleration measures is justified.

(f) Whether apportionment of total acceleration achieved between the Claimant and the Respondent due to earler delays is justified-

The above issues are being dealt with in the following paras in the same order.

6.5.6 (a) **Whether deployment of additional equipment should be taken from the date of its actual deployment i.e. from April 2003 or from May 2004 as adopted by the Respondent.**

(i) After confirmation of taking up of acceleration measures in Oct 2002 by NHPC (Exh.8), the Claimant commenced deployment of additional equipment along with other measures. This was duly informed to the Respondent.

(N N Singhal) (V K Agarwal) (O P Goel)

There is no dispute that some equipment had been deployed since Jan. 2003 as also confirmed in the Committee's report. These equipment, were a part of the acceleration measures.

(ii) The argument of the Respondent that deployment of equipment shall be taken from the date actual acceleration was observed on the ground is not valid. It is only due to the acceleration measures that any back-log was also covered otherwise the works would have gone upto Dec 2008 or beyond that. Obviously the acceleration measures would cover any past back-log as well as achieve better progress to complete the works ahead of otherwise extended period, which in the present case has been 378 days earlier than the extended date upto 12.12.2008 as per Respondent's own admission.

(iii) The Tribunal agrees that equipment deployment has to be taken from April 2003 when actual deployment had been commenced by the Claimant, and not from 2004 as adopted by the Respondent.

6.5.6 (b) **Whether non- acceptance of certain equipment by the Respondent is justified.**

(i) The Respondent has not considered such equipment in computation of ownership cost which had been deployed prior to April 2003 i.e. from 2001 to 2002, as has been considered by the Claimant in his computation.

(N N Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

(ii) The Tribunal agrees with the above, since such equipment were there as per contractual or normal practical requirements and had no relation with the acceleration measures.

6.5.6 (c) **Whether deductions for ownership cost and operational charges of some contractual equipment in the bid, not actually deployed for the execution of total works, are justified.**

(i) The Respondent has deducted the ownership charges for equipment not deployed as per the data sheet under the Contract, amounting to Rs. 16 lakhs. Operational charges for the same have also been deducted to the tune of Rs 90 lakhs.

(ii) It is observed from records that such equipment were not deployed from the start of works and no issue was raised on that account. These equipment were only estimated but were never required and deployed upto completion of work.

(iii) It is also observed that there were some equipment which were deployed beyond the contract estimate, but have not been considered in the list. There is no binding that all the listed equipments has necessarily to be deployed, even if not considered essential.

(iv) The AT does not consider the deduction justified.

(N N Singhal) (V K Agarwal) (O P Goel)

6.5.6 (d) **Whether computation of ownership cost of equipment by the Claimant is as per CWC Guidelines, and acceptable.**

(i) The Claimant, in the computation of ownership cost, has considered depreciation, interest on capital investment for the equipment and repair & maintenance cost. Depreciation has been considered as average of depreciation based on life in hours.

(ii) The Respondent has, however, considered the depreciation by taking average of yearly depreciation and considering zero hour usage, since the equipment is idle. Thus the average has been taken as 50% of the yearly depreciation.

(iii) The AT observes that both the computations are not proper. Ownership cost as per I.S. ownership cost should include idle depreciation and interest on capital investment only. Idle depreciation has no logic of taking hourly usage depreciation also. Thus the computations are to be done on yearly depreciation basis only.

(iv) Repair & maintenance charges are also not allowed in ownership cost and so have to be deleted from the Claimant's calculations.

6.5.6 (e) **Whether deduction of cost of additional works entrusted to GIL from another contract, from cost of acceleration measures is justified.**

(N N Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

(i) During execution of works, the Respondent passed on some incomplete work of another contractor to the Claimant, who completed the additional work also within the final completion date of 30.11.2007 with overall acceleration.

(ii) The Respondent had initially approved an amount of Rs. 1.24 cr. & Rs. 1.64 cr. approx for the additional work on agreed terms vide letter dated 21.05.2009. But later, the Respondent deducted Rs. 90 lakhs & Rs 164. 27 lakhs i.e. a total of Rs. 2.54 crores while making assessment of cost for acceleration measures adopted by the Claimant.

(iii) The AT observes that the payment for the actual additional work carried out by the Claimant is totally due to the Claimant and there can be no plausible reason to deny the same to the Claimant.

6.5.6 (f) **Whether apportionment of total acceleration achieved between the Claimant and the Respondent due to earlier delays is justified-**

(i) The Respondent has finally adjusted the amount evaluated as admissible for acceleration measures undertaken by the Claimant in the proportion of coverage of back log at the time of start of acceleration measures by the Claimant to total acceleration period achieved, and

(N N Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

deducted the same from the total payable amount. The payable amount has been reduced as

$$\text{Total cost} \times \frac{378}{(378+279)}$$

(ii) The AT observes that final extension of date of completion of works has been worked out and approved by the Respondent upto 12.12.2008. The EOT has been granted without any LD since no delays have been attributed to the Claimant.

(iii) From the above it can be inferred that the Claimant is being penalized for the alleged back-log of 279 days, although no delays had been considered by the Respondent as attributable to the Claimant. This is fallacious and legally impermissible since the Claimant cannot be indirectly penalized for the delays not attributable to him. The earlier completion of works including the additional work allotted from another contract, has been possible due to various acceleration measures adopted by the Claimant, which do not need to be elaborated here again.

(iv) The Tribunal does not agree with the contention of the Respondent regarding the reduction, as explained earlier and rejects the same.

6.5.7 Having decided the relevant issues on merits of the claim, the Tribunal now comes to quantification of admissible amount payable to the Claimant.

(N N Singhal) (V K Agarwal) (O P Goel)

6.5.7(i) As already narrated under the Claimant's submission under para 6.1 (xvi), the amounts allowed by the Respondent under items 4,5,7,8,9,10 & 11 have been accepted by the Claimant.

6.5.7(ii) Thus only items 1,2,3 & 6 are left for adjudication by the Tribunal and, the same are taken up in the following paras.

(a) **Item (1) Ownership cost of additional equipment.**

(i) The cost has been calculated with following modifications as decided earlier.

(a) Any additional equipment deployed prior to March 2003 has not been considered.

(b) Depreciation has been computed on the basis of life in years.

(c) The modified cost statement is attached as Annex I. The allowable amount comes to Rs. 12,84,74,786.

(b) **Item (2)- Operation Manpower & R/M cost for additional equipment.**

(i) The Claimant has provided additional manpower as per CWC guidelines, and not as per actual deployment which is not considered acceptable. The manpower adopted by the

(N N Singhal) (V K Agarwal) (O P Goel)

Respondent is considered acceptable and has been allowed.

(ii) The period for such manpower has been taken according to deployment of the equipment as per statement of ownership cost under Item (1).

(iii) The revised cost works out to Rs. 6,33,33,603 as per Annex II.

(c) **Item (3) – Additional Manpower.**

(i) The Claimant has taken the additional manpower, besides operation manpower under Item (2), on arbitrary theoretical basis deployment, which is not acceptable. The manpower adopted by the Respondent is considered reasonable and has been allowed.

(ii) However, period for such manpower has been taken from 01.04.2003 instead of 01.05.2004 as adopted by the Respondent.

(iii) The modified amount works out to Rs. 397.26 lakhs.

(d) **Item (6)- Cost of additional infrastructure for additional manpower.**

(V K Agarwal)

NHPC LIMITED FARIDABAD

(O P Goel)

(i) The Claimant has calculated the additional cost for infrastructure for additional manpower on an arbitrary basis without any supporting details, which is not acceptable.

(ii) The Respondent has not allowed the cost.

(iii) The Tribunal observes that as per CWC guidelines, the indirect cost for skilled and unskilled staff which is already considered in wages, includes provision for accommodation/house allowance.

(iv) Therefore, the claim for this item is not allowed.

6.5.8 Based on the foregoing details and decisions, the admissible amounts under all items of Claim No. 1 are summarized below, alongwith amounts claimed.

SUMMARY OF CLAIM NO. 1

Item No.	Amount Claimed (Rs. in lakh)	Amount Allowed (Rs. in lakh)	Remarks
1	1869	1285	*Amounts are agreed by NHPC & GIL
2	4354	633	
3	1167	397	
4	44	17*	
5	24	Nil*	
6	135	Nil	
7	650	171*	
8	73	57*	

(N N Singhal)

1732

36

(V K Agarwal)

FARIDABAD

(O P Goel)

9	1751	Nil*	
10	317	177*	
11	30	18*	
TOTAL	10424	2755	

6.5.9 Adding 15% overhead & profit as agreed by the Respondent, the admissible amount comes to Rs. 3168 lakhs. There is no justification for any deductions from the admissible amount as above.

6.5.10 Therefore, a sum of Rs. 3168 lakhs is allowed under this claim. After deduction of the amount of Rs. 10.06 crores already paid by the Respondent to the Claimant, the net payable amount comes to Rs. 2162 lakhs which is allowed.

6.5.11 The issue of interest shall be taken up separately later.

7.0 CLAIM NO. 2 – PAYMENT OF ADDIONAL COST TOWARDS WORK ON FACE 8 BEYOND FACE 7 (Rs. 2, 54, 27,000)

7.1 THE CLAIMANT'S CASE

(i) The scope of work in the Contract between GIL & NHPC provided for HRT works from RD 1625 to RD 15437 through various adits. The balance HRT works (RD 0 to RD 1625 & RD. 15437 to RD 17695) were in the scope of other agency under separate contract.

(N N Singhal)

1733

37

(V K Agarwal)

NHPC LIMITED FARIDABAD

(O P Goel)

(ii) Due to delays by the other agency, the Respondent requested the Claimant to take up additional tunneling work out of the scope of the other agency. The Claimant pointed out vide letter dt. 04.05.2007 (Exh. No. 90) that since the work was not in their scope it shall be carried out as variation/additional work for which separate payment would be due beyond BOQ rates, for extra lead etc. This was agreed by the Respondent and the Claimant took up the work which was completed alongwith the main work.

(iii) The additional cost was claimed by the Claimant in stages (C-3, p.0099).

(a)	For F-8 beyond F-7 for 140 m	Rs. 1,24,12,912
(b)	Face F8 beyond RD 2226 & RD 2183 to RD 2226	Rs. 1,64,27,000

The Respondent had agreed for the above amounts vide letter dt. 21.05.2009 (Exh. No. 133), and the same had been paid to the Claimant.

NHPC LIMITED FARIDABAD

1734

38

(N N Singhal) (V K Agarwal) (O P Goel)

(iv) However, while approving and releasing claim of acceleration measures, the Respondent deducted the following amounts from the above approved payments.

	Approved Amount. (Rs)	Deduction made (Rs)
(a)	1,24,12,912	90,00,000
(b)	1,64,27,000	1, 64,27,000
		2, 54,27,000

The amounts payable for the additional work are for actual work done on the instructions of the Respondent. This has no relation to the acceleration measures. Thus the deductions made by the Respondent from the approved amounts are not valid or justifiable.

(v) The Claimant has also argued that there is no overlapping, of equipment on these additional works.

(vi) The dispute has, therefore, arisen for refund of the unjustified deductions.

7.2 THE RESPONDENT'S CASE

(i) The claim raised is liable to be rejected as the work was beyond the provisions of the contract between the parties.

(ii) Moreover, although the amounts for the additional work had been approved, but since the same job was also a part of acceleration measures, the approved amounts were

(N N Singhal) (V K Agarwal) (O P Goel)

adjusted from the acceleration claim, except the cost of ventilation duct which was not an element in valuation of acceleration cost.

(iii) The Claimant has also agreed to the valuation of the additional work allotted to the Claimant.

7.3 THE CLAIMANT'S REJOINDER

(i) It is correct that the competent authority had approved the amounts payable against the two additional works as defined under (iii) earlier, but it is not correct that the same job was a part of acceleration measures.

(ii) Other details given in SOC were reiterated.

7.4 FINDINGS OF THE TRIBUNAL

(i) There is no dispute between the Claimant and the Respondent about the fact that due to delays by another agency carrying out HRT works in adjacent reach, the said balance work of HRT was given to GIL for timely completion. There is also no dispute about the agreed cost payable for the additional works, which had also been paid by the Respondent to the Claimant.

(ii) However, when payment for acceleration measures was being examined by the Committee formed by the

(N N Singhal) (V K Agarwal) (O P Goel)

Respondent, an amount of Rs. 2.54 crores was recovered on the plea that some of the additional equipment deployed under acceleration measures had also been used in carrying out the additional HRT works as mentioned above.

(iii) The plea does not stand to logic. Firstly, payment for the additional work had been assessed and paid on the agreed basis i.e. BOQ rates plus additional payments due to increased leads etc. The value/cost of execution of the work had to be paid in full without any recovery.

Secondly, when the additional work was allotted to the Claimant, the Respondent obviously intended that work also to be completed early to utilize the benefit of the acceleration measures undertaken for the contractual work of GIL, for early commissioning of the work (SOD p.13).

(iv) Moreover, it is not understandable how payment for actual additional work carried out can be denied on the alleged account.

(v) The Tribunal accordingly rejects the contention of the Respondent of denying full payment for the additional work, and directs the amount of Rs. 2.54 crores deducted, from the payments to be refunded to the Claimant.

(N N Singhal)

1737

41

(V K Agarwal)

NHPC LIMITED FARIDABAD

(O P Goel)

(vi) The issue of interest shall be taken up separately later.

8.0 CLAIM NO. 3 – PAYMENT OF ROLLING MARGIN (Rs. 1,22,81,449)

8.1 THE CLAIMANT'S CASE

(i) As per the contract, steel required for the work was to be procured and issued by the Respondent to the contractor by weight as supplied by the manufacturer.

(ii) While taking measurements for payments, the steel sections were measured by length and then converted into weight by multiplying by the theoretical weight per meter as per IS: 808, ignoring the actual weight of sections as supplied.

(iii) The Contract provides for payments of steel based on actual weight as per clause 4.8.4.1 of TS reproduced below.

"4.8.4.1 **STEEL RIBS**

1. Measurement for payment for supply and installation of steel ribs and wall plate beams will be of the weight of steel ribs and beams installed and approved by the Engineer-in-Charge.

(N N Singhal)

(V K Agarwal)

NHPC LIMITED FARIDABAD

(O P Goel)

2. Payment will be made at the Unit Price per metric ton entered in the Schedule, which shall include the entire cost of:

a) Supply, manufacture and delivery to the Site with all necessary accessories required for installation.

b) Storage and protection at the Site.

c) Transport to the place of erection and erection

d) Installation of all foot plates, ties, bolts, nuts, cross-bracing and all other accessories, including all permanent or temporary welding.

e) Backfilling with shotcrete, concrete blocks, or any other material approved by the Engineer-in-Charge, including cement and additives, except in accepted geological over break in which case the backfilling will be paid separately as stipulated in the Section "Underground Excavation".

f) Surveying and marking the position and chainages of ribs on the concrete lining.

3. For measurement and payment purposes, the weight of steel ribs and wall plate beams will be based on the unit weight of the steel profiles per linear metre, as stated on the certified copies of manufacturer's reports which the Contractor have submitted to the Engineer-in-Charge or, in absence of such reports, by direct weighing at the Site. The weight of steel accessories shall be on the actual."

1739

43

(N N Singhal) (V K Agarwal) (O P Goel)

(iv) The Claimant requested the Respondent for making payment of steel ribs as per actual weight from the supplier since variations as recorded were more than the specified tolerance of 2.5% since Aug 2003 (Exh. 17,20,24) providing details of actual variations in weight. It was only in April 2004 that the Respondent communicated that the issue was being perused with manufacturers and that suitable reconciliation shall be done.

(v) The Claimant submitted a bill for the difference in weights of steel as above for period upto July 2006 on 14.09.2006 amounting to Rs. 112,61,164 (Exh 67). The bill was updated to Rs. 115,29,453 upto Dec 2007 (Exh 118 dt. 22.07.2008). Final bill amounting to Rs. 122,81,449 was submitted on 25.01.2011 (Exh 139) upto completion of works.

(vi) The Respondent also formed a Committee for verification of the actual weights of structural steel who gave their report on 03.05.2008 (Exh. 114) p. 1045 and confirmed the actual weights which agreed with those given by the Claimant as communicated to the Claimant, vide letter dt. 22.05.2008 (Exh.116).

(vii) Even after the report, the Respondent did not pay for use of the disputed structural steel in full, but verified the payable weight after arbitrary deduction by 2.5% vide letter dated 07.12.2010 (Exh. 137), which was not

(N M Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED एन एच पी सी NHPC FARIDABAD

acceptable to the Claimant, and thus the present dispute has arisen.

8.2 THE RESPONDENT'S CASE

(i) The Respondent's contention is that the reduction by 2.5% is not arbitrary but based on COPA clause 93.4 VI (b) which is reproduced below:

"(b) **STRUCTURAL STEEL**

For calculation of theoretical consumption, weight of finished product as measured for payment as per approved drawing shall be considered. In addition to above, an allowance of 3% (three percent) of above measured quantity shall be considered at Contractor's cost in theoretical consumption to cover for cut pieces (non-returnable), wastage and the rolling margin."

8.3 THE CLAIMANT'S REJOINDER

(i) The Respondent's reliance on the COPA clause 93.4 VI (b) is totally wrong, since the clause relates to reconciliation of steel used against that issued by the Respondent and recovery of cost of excess steel used at penal rase i.e. double the issue rate. It has no relation to measurement and payment for steel used in works, which are governed by Sec. 84 of TS.

8.4 FINDINGS OF THE TRIBUNAL

(N N Singhal) 45 (V K Agarwal) (O P Goel)

(i) Payment for steel ribs, supply and installation (including accessories) is to be made under BOQ Item No. 4.8 @ Rs.3800 per ton. Further, as per Technical Specifications Clause 4.8.4.1, the weight of the steel ribs and wall plate beams should be based on the unit weight of steel profiles per linear metre, as stated on the certified copies of the manufacturer's reports which the Contractor has submitted to the Engineer-in-Charge or in absence of such reports, by direct weighing at the site.

(ii) In this case, the steel was supplied by the Respondent and the Contractor has no documents available with him including the manufacture's reports etc. The logical corollary will be to pay the steel by direct weighing at the site.

(iii) Respondent has argued that in this case for measurement purposes, neither direct weighing at site was done by the Claimant, nor the weights based on manufacturers' reports were used and, therefore, Clause 4.8.4.1 of Technical Specifications and Clause 93.3(vi)(b) of COPA are to be read in conjunction and 2.5% rolling margin deducted.

(iv) Respondent had constituted a Committee to find the weighted average of various steel sections and after carrying out the necessary exercise, Committee

(N N Singhal) (V K Agarwal) (D P Goel)

recommended "Proposed Unit Weights" for various steel sections for consumption purposes after deducting 2.5% rolling margin from the actual weights of sections.

(v) The AT finds that according to Contract provisions, the actual weight of steel at site as measured/verified needs to be considered without reducing the rolling margin for payment purpuses.

(vi) The claim of Rs.1,22,81,449/- (Rs.79,60,737. plus Price Adjustment of Rs.43,20,712.) as submitted by the Claimant is accordingly allowed.

(vii) The issue of interest shall be taken up separately later.

9.0 CLAIM NO. 4 – REIMBURSEMENT FOR PROCUREMENT OF SAND IN ABSENCE OF QUARRY (Rs. 1, 41, 99,830).

9.1 THE CLAIMANT'S CASE

(i) As per item 14 of Information to Bidders (ITB), concrete aggregates requirements for the entire works were to be met from the following quarries.

a) Rock quarry TVR V b (near Adit 3).

b) Usable material from HRT excavation to the extent of 5 lakh cum.

c) Other quarries TVR 4 & TVR Va.

(N N Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

(ii) The Claimant considered his cost accordingly while submitting his bid.

(iii) During execution of work, following situations were encountered.

a) Non-availability of TVR 4 & TVR V a quarries due to Wild Life Institute of India not permitting their development.

b) Boulders of required quality were not available from HRT excavation.

c) Increase in quantities of work, resulting in increased requirements of concrete aggregates.

(iv) Requirement of boulders coarse aggregates and sand increased as under :

	As per BOQ	Actual
Sand	200,296	233,893
Aggregates	320,121	369,243
Boulder	2,000	2,871
TOTAL	522,417	606,007

(v) The sand was obtained from the following quarries as per details given in Annex 1. (Vol C-4, p.338) alongwith additional rates at which sand was available from such quarries.

(V K Agarwal)

NHPC LIMITED FARIDABAD

(O P Goel)

	QTY.	ADDL RATE.
a) Rangpo quarry	103,089. cum	178.30
b) Makha lease land	48,194. cum	9.80
c) Makha other land	31,041. cum	17.48
d) Crusher	45,556 cum	-
e) Balutar quarry	6,010 cum	-
Total	233,893 cum	-

(vi) There is no dispute about the difference in rate for procurement of sand from other quarries instead of project quarry.

(vii) The Claimant requested the Respondent for extra payment for purchase of course & fine aggregates which was agreed by item, but only paid Rs. 51, 95, 900 against Rs. 1,93,95,780 vide letter dated 21.05.2009 (Exh. 133, C-8, p. 1082).

(viii) No reasons for such deduction in quantity paid by the Respondent were given, although verbally it was informed that the quantity had been limited to the contracted quantity, and not actual/certified quantity.

9.2 THE RESPONDENT'S CASE

(i) As per the provisions of the contract, quarries for aggregates were to be provided by the Respondent.

(ii) The Contract had specified that 5.0 lakh cum of usable material would be available from tunnel muck and 1.5 lakh cum from quarry (TVR- V b). However, the TVR V

(N N Singhal) (V K Agarwal) (O P Goel)

bquarry could not be materialized due to objection from the land owner.

(iii) The requirement of aggregates also increased due to increased scope of work to 5.67 lakh cum. There was a shortfall of 102,686 cum of sand which the Contractor was forced to procure and for which payment is claimed by the Contractor.

(iv) A Standing Committee was formed by the Respondent to examine the claim amount for the additional quantity of sand ie. 1,02,686 cum, and based upon the difference of analyzed rate of TVR V b quarry and that for the other sources from which the Claimant had actually procured the sand.

(v) The Committee had recommended an amount of R. 51.96 lakh which had been paid to the Claimant, who had accepted the payment without any protest and so cannot raise the claim now.

(vi) The excavated material from tunnel was good enough to produce the required quantity of aggregates, but the Claimant could not utilize the tunnel muck due to his own shortfalls, no proper arrangement for segregation of boulders, and his reluctance to do so on the presumption that the cost of procuring aggregates will be reimbursed by the Respondent/NHPC (Refer Exh. 10,11 & 12 C-6 of SOC).

(N N Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

9.3 THE CLAIMANT'S REJOINDER

(i) It is incorrect that the Claimant did not fully utilize the excavated muck from the tunnel. The Claimant had utilized 5.44 lakh cum of material from the tunnel excavation, against 5.0 lakh cum assumed in BOQ estimate admitted by the Respondent. The tunnel muck used has contributed the following materials.

(a)	Aggregates	369,343 cum
(b)	Sand	45,556 cum
(c)	Boulder	2,871 cum
	TOTAL	417,670 cum

(ii) With the above, the Claimant could manage all other requirements except for sand due to poor production. Balance requirement of sand was procured from Rangpo quarry to the extent of 103,089 cum, but the Respondent has paid for only 23,448 cum, leaving a balance of 79,641 cum for which the claim has been raised.

9.4 FINDINGS OF THE TRIBUNAL

(i) There is no dispute between the parties that the requirement of coarse and fine aggregates had increased due to increased quantity of concrete works.

(ii) It is also agreed that due to non-availability of some designated quarries, the requirement of sand could not be

(N N Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

met from the quarries as available, including additional areas used, and from crusher due to shortage of boulders.

(iii) The Claimant has argued that as per details furnished by him, sand had to be procured from private quarry (Rangpo) to an extent of 1,03,089 cum which had an additional differential cost of Rs. 178 per cum. The differential rate is also agreed between the parties as noted earlier.

(iv) On the other hand, the Respondent has argued that the Claimant did not fully utilize tunnel excavation muck, which had resulted in so much shortage. As per Standing Committee report, only 23,448 cum had been recommended to be reimbursed, leaving a gap of 79,641 cum, the cost of which has not been reimbursed to the Claimant.

(v) The Claimant has argued that the tunnel muck to extent of 5.44 lakh cum had been utilized but due to poor quality of excavated material available, it could not produce adequate quantity of sand to meet the increased requirement of sand and therefore so in the interest of work (which was under compression schedule), sand was procured from market to avoid any delay in works.

(vi) The quantity of sand procured from Rangpo quarry has been duly certified by the Respondent, which is 103,089 cum. However, the Respondent has accepted payable

(N N Singhal) (V K Agarwal) (O P Goel)

quantity as 23,448 cum, but has not recorded any reason for curtailing the quantity for payment to the Claimant.

(vii) The AT finds that the Respondent had been allowing procurement of sand from Rangpo quarry, and the quantities have also been verified and certified. There appears no valid reason for not making payment for the total quantity procured.

(viii) The claim for payment for the unpaid quantity of 79,641 cum at the accepted rate of Rs. 178.30 per cum, amounting to Rs. 141, 99.830 is allowed.

(ix) The issue of interest shall be taken up separately later

10.0 CLAIM NO. 5 REIMBURSEMENT OF BALANCE LEASE LAND COST (Rs. 74,74, 972).

10.1 The claim has since been dropped by the Claimant and is, therefore, not considered by the Tribunal.

11.0 CLAIM NO. 6: ADDITIONAL COST FOR EXTENDED PERIOD.

11.1 CLAIM NO.6 (a) - REIMBURSEMENT OF COST FOR EXTENSION OF INSURANCE POLICY DUE TO TIME EXTENSION AND INCREASE IN JOB VALUE (Rs.2,82,21,860).

(N N Singhal)

1749

(V K Agarwal)

(O P Goel)

11.1.1 **THE CLAIMANT'S CASE**

(i) As per Contract, the Claimant were required to have Insurance of all works i.e. CAR policy with validity upto scheduled completion of the works which was 22.10.2006.

(ii) Substantial completion, however, was achieved on 30.11.2007. This happened because of difficulties and lapses by the Respondent. Extension of time had been granted by the Respondent without levy of any liquidated damages.

(iii) Due to prolongation in completion, validity of CAR policy had to be extended till 26.01.2008 the date of Taking Over Certificate, and the Claimant had to pay additional premium for keeping the insurance policy alive for the delay period from 22.10.2006 to 26.01.2008. The original CAR insurance policy had involved payment of R.4,91,31,298 including service tax. The total payment made to the insurance company for prorogation of the policy upto 30.11.2008 (with one year defect liability period), and due to inclusion of Design defect & Terrorism cover (which was later on withdrawn) and increase

(N N Singhal) 1750 (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

in value of work had been Rs. 7,73,53,158 including service tax resulting in additional payment of Rs. 2,82,21,860. In addition interest @12% per annum is also claimed as per Contract.

(iv) As the work was extended due to reasons beyond control and responsibility of the Claimant and time extension for completion of works was approved by the Respondent, the Claimant is not responsible for extra expenditure involved due to changes in the CAR policy above. The Claimant, therefore, raised a claim for an amount of Rs. 2,82,21,860.

(v) In addition interest @ 12% per annum is also claimed as per Contract.

11.1.2 **THE RESPONDENT'S CASE**

(i) As per contract provisions, the Claimant was fully responsible for the care of works and materials and plants etc. from the commencement date until the date of issue of taking over certificate. For the purpose, the Claimant had to get Insurance in the joint name of the Contractor and the Employer for all elements including the full value of work until the date of defect liability period (DLP). The Claimant is deemed to have quoted the rates considering the insurance expenses.

(ii) The dispute has arisen as the contract could not be completed within the stipulated time due to increase

(N N Singhal) (V K Agarwal) (O P Goel)

in job volume. The Respondent had allowed time extension without levy of liquidated damages. As the works continued beyond the stipulated time period, the Claimant had to take extension of insurance policy paying extra premium as per contractual obligations. The Claimant has been paid for the extra work in the form of acceleration claim, extra tunneling beyond battery limit as per agreed rate, in addition to price escalation over and above the BOQ rates. Nothing is, therefore, payable on account of the claim as per contractual clause.

11.1.3 **FINDINGS OF THE TRIBUNAL**

(i) The Claimant has claimed extra expenses incurred in extension of the CAR Policy for insurance on account of prolongation of the contract alongwith cover for Design defects, Terrorism (later withdrawn) and due to increase in the value of work.. The prolongation has taken place on account of reasons beyond the control of the Claimant and entirely attributable to the Respondent. Extension of time has been granted by the Respondent without levy of liquidated damages. Design defect and Terrorism cover had been included on the direction of the Respondent.

(N N Singhal) (V K Agarwal) (O P Goel)

(ii) The Respondent has stated that since payment for escalation and acceleration cost has been made to the Claimant, the claim is not justified. The cost of insurance upto completion is deemed to have been covered in the bid.

(iii) Insurance is an element of overheads which has become necessitated on account of prolongation of the contract for which the Claimant is not found responsible. It is agreed that the Claimant is responsible for taking insurance for the extended period. But if extension is not due to any default of the Claimant, the additional expenses necessarily incurred by the Claimant due to such prolongation have to be borne by the Respondent. The bid amount does not cover the cost of insurance for any extended period.

(iv) The claim amount has been subsequently been reduced during arbitration proceedings, allowing credit for increase in the value of works as per BOQ items. The revised amount as per statement submitted on 27.07.2015 is Rs. 2,34,53,433.

(v) The Tribunal, after going through the details, considers that the Claimant is entitled to be compensated for the additional cost incurred for insurance policy on account of prolongation of the

(N N Singhal)

1753

(V K Agarwal)

(O P Goel)

CAR Contract and other reasons mentioned earlier and with due credit for the increase in value of BOQ items.

(vi) The AT, therefore, allows an amount of Rs. 2,34,53,,433 against this claim to the Claimant.

(vii) The issue of interest shall be taken up separately later.

11.2 CLAIM NO.6(b)-REIMBURSEMENT OF BG CHARGES DUE TO EXTENSION OF COMPLETION TIME OF THE PROJECT (Rs. 23,96,435).

11.2.1 THE CLAIMANT'S CASE

(i) The Claimant was required to provide BGs for Performance and Retention Money till the completion of work with one year defect liability period. The work got completed on 30.11.2007 against the scheduled completion of 22.10.2006. The reasons for prolongation were not attributable to the Claimant. The extension of time has been granted by the Respondent without levy of any liquidated damages.

(ii) Accordingly, the BGs for Performance and Retention Money were extended upto the date of end of defect

(N N Singhal) 58 (V K Agarwal) (O P Goel)

liability period i.e. upto 30.11.2008. The Claimant claimed reimbursement of additional BG charges paid to the Bank for extended period of the BGs beyond originally stipulated period. The Performance and Retention Money BGs were to be released after expiry of defect liability period i.e. originally stipulated as 22.10.2007. Because of extension of time, BGs had to be extended upto 30.11.2008. The Claimant is entitled for compensation of extra cost incurred in extension of the BGs which comes to Rs. 23,96,435 for which a bill was raised on 25.08.2008.

(iii) The Claimant has also claimed interest @ 12% p.a.

11.2.2 **THE RESPONDENT'S CASE**

(i) The Claimant had provided BGs for Performance and Retention Money till actual completion of work with one year defect liability period. The claim is not admissible because of contractually reimbursement of BG commission only for extension of time is time related cost. Similarly claim for difference of interest on margin money is not admissible as it is not a Contract expense. The cost of BGs is inbuilt in the rates of BOQ. The Claimant has already been paid for additional work done in the extended period and price escalation. No evidence for expenditure has

(N N Singhal) (V K Agarwal) (O P Goel)

been provided by the Claimant. As such, the claim is liable to be rejected.

11.2.3 **FINDINGS OF THE TRIBUNAL**

(i) The BGs had been provided as per Contract requirements and had to be extended on account of prolongation of work. The reasons for prolongation were not within control of the Claimant and full extension of time has been allowed without levy of any liquidated damages. The Claimant is, therefore, not responsible for prolongation.

(ii) Extra cost involved in extension of BGs necessitated on account of extension of time has to be compensated. The Claimant has placed on record the certificates of Bank showing the amount paid for extending the BGs. The contract only provides for the BGs for the original contract period including DLP.

(iii) However credit has to be given corresponding to increase in value of BOQ items of work. After such credit, the Tribunal arrives at a figure of Rs. 17,71,000 .

(N N Singhal) (V K Agarwal) (O P Goel)

(iv) The claim of Rs. 17,71,000 is found to be justified and the Tribunal allows the same to be paid to the Claimant.

(v) The issue of interest shall be taken up separately later.

11.3 CLAIM NO. 6(c) – PAYMENT FOR NHPC AND PWD ROADS MAINTENANCE BEYOND 22.10.2006 (Rs. 71,59,856).

11.3.1 THE CLAIMANT'S CASE

(i) The NHPC and PWD roads are access roads to work areas. As per Contract a lump-sum amount per km was provided towards construction / up-gradation and maintenance of roads for Contract duration upto 22.10.2006 (refer TS Cl. 12.1.5, 12.3.1.2, 12.8.1.3). The Claimant, however, had to maintain these roads upto the actual completion period i.e. 25.01.2008 for which additional expenditure had to be incurred. Time extension upto 25.01.2008 has been provided by the Respondent without any LD.

(ii) The project works involved construction/upgradation and maintenance of the roads for the contract period. Roads are divided into 2 categories.

(N N Singhal) (V K Agarwal) (O P Goel)

(a) PWD roads (metalled) which required Upgradation (widening etc.), repair & maintenance.

(b) NHPC roads (WBM) which required construction,

repair & maintenance.

Total lengths of PWD & NHPC roads to the various adits (II, III & IV)are as under.

	PWD Road (Km)	NHPC Road (Km)
Adit II	2,9250	0.8955
Adit III	3,4090	0.5197
Adit IV	Nil	1.6000
Total	6.3340	3.0152

In addition, quarry and other roads were about 4.5kms

Payment for these roads for the contract duration was regulated as per BOQ items 12.1 & 12.3 which provided a LS amount per km for the original contract duration.

(iii) Maintenance of these roads had to be continued in the extended period beyond 22.10.2006 at extra cost since the Contract provided for it upto the completion date only. The Claimant notified the Respondent about the additional cost prior to the contract date of completion vide letter dated

(N N Singhal) 62 (V K Agarwal) (O P Goel)

03.10.2006 (Exh.69). A request was also made through the notice to maintain records of actual deployment expenses. The request was repeated through letter dated 07.12.2006 (Exh.74).

(iv) The Claimant had submitted 1st bill for additional its expenses from 20.04.2007 for the period from 23.10.2006 to 31.03.2007 (Exh.89) and the 2nd bill for the period from 01.04.2007 to 31.10.2007 (Exh.105) on 28.11.2007 and final bill upto 25.01.2008 (exhibit 123) with full details. The Respondent sought details and proof of equipment rates, manpower wages and material rates vide letter dated. 14.12.2007 (Exh.107). The details were made available by letter dated. 27.08.2008, but the Respondent rejected the claim on 16.09.2008 (Exh.128). Hence the dispute.

(v) The Claimant has also claimed interest @ 12% pa.

11.3.2 **THE RESPONDENT'S CASE**

(i) Under Clause 12.3.2 of the Technical Specifications, maintenance and repair works of access roads are to be carried out by the Contractor, whether constructed by him or otherwise. Under Clause 12.8.1 (3) no payment is to be made for maintenance and repair of access roads and other roads to quarry areas and other site roads. The Contractor has been paid extra amount in the extended period on

(N N Singhal) (V K Agarwal) (O P Goel)

account of extra work done and is not entitled for the claim which may be rejected.

11.3.3 **FINDINGS OF THE TRIBUNAL**

(i) There is no dispute on the fact that maintenance of roads in the work area and access roads was carried out by the Claimant beyond date of completion i.e. 22.10.2006 an upto 25.01.2008. Period of maintenance upto 30.11.2008 as adopted by the claimant is not acceptable since the date of taking over is 25.01.2008

(ii) There is no BOQ rate available in the Contract for maintenance of roads.

(iii) In the extended period no construction / upgradation work was required to be carried out and there is no claim for the same.

(iv) Proper advance notice for demand of additional cost for maintenance was given to the Respondent prior to date of completion as per contract, alongwith request for keeping record of actual deployment of equipment, labour and material used. The Respondent has not produced any such details with them. The Claimant had also submitted bills for the period upto 25.01.2008 (date of taking over certificate) alongwith all details of month-wise deployment, as mentioned earlier.

(N K Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

(v) Based on the above mentioned details, the Claimant has claimed an amount of Rs. 71,59,856.

(vi) The AT has gone over the details for maintenance cost claimed by the Claimant , but AT has no means to verify the same. Therefore, the AT has made its own assessment for the expenses incurred upto 25.01.2008 and allows a sum of Rs. 20.0 lakhs against this claim.

12.0 CLAIM NO. 7 : CLAIM FOR INTEREST

12.1 CLAIMANT' S CASE

(i) The Claimant is entitled to get interest at the rate of 12% per annum as per Sub – Clause 60.7 of COPA of Volume – 2 of Contract Agreement, as considered by the Respondent towards recovery of advances, compounded monthly, on all the amounts found due to it from the respective due dates on which they have fallen due till date of payment or realization whichever is earlier.

(ii) Further the Claimant vide application dated 06.07.2016 has submitted before the Tribunal to consider inclusion of interest upto the date of award as the total "sum" and further to award interest after the date of award upon the composite amount of interest and claim, considering as "sum", in line

(N N Singhal) (V K Agarwal) (O P Goel)

with Hon'ble Supreme Court judgment in the case "M/S Hyder Consulting (UK) Ltd vs Governor State of Orissa" dated 25.11.2014.

12.2 **RESPONDENT' S CASE**

(i) Since none of the claims is liable to be awarded to the Contractor the Claim for interest is liable to be rejected. However, without prejudice to the above submissions, in case this Tribunal comes to the

(ii) conclusion that some amounts are to be awarded, then the rate of interest cannot be more than 9% simple interest per annum.

12.3 **FINDINGS OF THE TRIBUNAL**

(i) The Claimant has claimed interest at the rate of 12% compounded monthly on the various claims. The rate of interest has been claimed as per provisions in Clause 60.7 of the Contract.

(ii) The Respondent has rebutted the claim stating that no claims are admissible.

(iii) The AT has awarded certain amounts against various claims to the Claimant. The AT considers that the amounts thus awarded have been denied to the Claimant and he has been deprived of the use of the same. Interest on the awarded amounts is, therefore, considered justified.

(N N.Singhal) (V K Agarwal) (O P Goel)

(iv) The rate of interest claimed is high. The rate under Clause 60.7 is for a different purpose and the same is thus not applicable for the claims. The AT considers that a rate of interest of 12% simple p.a. shall be adequate compensation to the Claimant.

(v) Regarding the date from which interest shall be payable, the Tribunal, observes that although the individual claims had been raised with the Respondent at different periods, the notice under GCC Cl. 67 for reference of dispute to arbitration was given by the Claimant vide letter dated 14.11.2009. In the SOC the Claimant has prayed for the interest from the date of arbitration. As such the AT consider that interest shall be allowed on the awarded amount from 14.11.2009 upto the date of award.

(vi) Future Interest @ 12% p.a. (simple) shall be payable on the total amount of the Award i.e. amount awarded against claims plus amount of interest upto the date of Award, from the date of Award to the date of actual payment.

(vii) No future interest, however, shall be payable if the total amount of Award is paid within 90 days of the date of Award.

13.0 CLAIM NO. 8 : COST OF ARBITRATION

(N.N.Singhal)

1763

(V K Agarwal)

67

NHPC LIMITED FARIDABAD

(O P Goel)

13.1 **THE CLAIMANT' S CASE**

(i) As the Respondent failed and / or neglected to settle and pay the claims, the Claimant was compelled to invoke Arbitration. Since the Respondent dragged the Claimant for Arbitration, the Claimant is entitled to recover the cost of Arbitration from the Respondent. The Claimant has claims actual cost incurred.

(ii) An amount of Rs. 50,000 has been claimed.

13.2 **THE RESPONDENT' S CASE**

(i) The Claim for costs of Arbitration is liable to be rejected, particularly in view of the fact that the major item of claim is highly inflated beyond all reasonable limits.

13.3 **FINDINGS OF THE TRIBUNAL**

(i) The AT has considered the rival contentions and decides not to award any cost to the Claimant.

(ii) Accordingly nil amount is awarded to the Claimant.

14.0 During the course of Internal meetings of the AT, the Claimant made two applications, on which response from the Respondent had also been obtained. The same are disposed of as under:

A **Application regarding Change of Name**

(N N Singhal) 1764 (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

i) The Claimant intimated vide letter dt. 14.09.2017 that the rights and obligations of M/s Gammon India Ltd. have been transferred to M/s Gammon Engineers & Contractors Pvt. Ltd. (GECPL) with effect from 31.03.2017 as approved by National Company Law Tribunal (NCLT). The Award, if any , shall , therefore, be made in the name of M/s GECPL.

ii) The Respondent has no objection on the issue as confirmed vide letter dt.29.11.2017

iii)The AT accordingly agrees to make the Award in the name of M/s GECPL

B Application regarding Direction to the Respondent for Payment of GST

i) The Claimant vide letter dt.19.09.2017 made an application to amend the Prayer at Para 5 of SOC (Pg. 44) to direct the Respondent to pay Goods and Service Tax (GST) as per rates applicable on the date of payment of the amount Awarded under claim no. 1 to 8.

ii) The Respondent firstly pointed out that the application at the highly belated stage is a new claim by the Claimant

iii) Moreover , assuming some award may be available to the Claimant, the same will have no GST implication as all payments pertain to periods prior to coming into force of GST Act.

iv)The AT has considered the above submissions by the Parties and is of the view that no amendment to the Prayer

(N N Singhal) 1765 (V K Agarwal) 69 (O P Goel)

NHPC LIMITED FARIDABAD

under SOC is required to be made as per the Application of the Claimant. As such the application of the Claimant is rejected.

15.0 SUMMARY

15.1 The itemwise amounts awarded by the Tribunal against various claims are summarized in the table below:

SUMMARY OF AWARDED AMOUNTS

Claim No.	Description of item	Amount Claimed	Amount Awarded
1.	Payment for cost incurred for Acceleration measures taken.	115,05,50,425	21,62,00,000
2.	Payment of additional cost towards Work in F8 F7 for 140 m, Work in face-8 beyond RD 2226 m and Work in face-8 beyond RD 2183 to RD 2226 m.	2,54,27,000	2,54,27,000
3.	Payment of Rolling Margin.	1,22,81,449	1,22,81,449
4.	Reimbursement for Procurement of Sand in absence of Quarry.	1,41,99,830	1,41,99,830
5.	Reimbursement of Balance Lease land cost.	74,74,972	Dropped
6.	Additional Cost in Extended Period (a)For Extension of insurance policy due to time extension and increase in Contract value.	2,82,21,860	2,34,53,43

(N.N Singhal) (V K Agarwal) (O P Goel)

NHPC LIMITED FARIDABAD

	(b) For BG charges due to extension of completion time of the project.	23,96,435	17,71,000
	(c) For NHPC & PWD Road Maintenance after 22nd Oct 2006.	71,59,856	20,00,000
	TOTAL	124,77,11,827	29,53,05,712
	Say	124.77 Cores	29.53 crores
7.	Payment of interest on the above Claims @ 12% per annum compounded monthly from the date (s) the same were found to be due and payable till the date of payment.	As per actual	Interest @12% p.a. is allowed from date of invocation i.e. 14.11.2009 to the date of Award i.e. 18.01.2018 which comes to Rs. 28.99 crores
8.	Cost of Arbitration	As per actual	NIL

15.1 The Tribunal awards an amount of Rs 29.53 corers to the Claimant as per above details, along with the interest upto the date of Award as Rs. 28.99 crores. Thus the total awarded sum comes to Rs. 58.52 crores which is payable by the Respondent to the Claimant.

15.2 The Award made on eighteenth day of January 2018 at New Delhi.

In the matter of Arbitration between

Gammon India Ltd. ..... **Claimant/Contractor**

And

NHPC Ltd. ..... **Respondent/Employer**

Under agreement for Civil Work of Head Race Tunnel including Adits 2, 3 & 4 at Teesta HE Project (Stage V) Lot TT-3 East Sikkim

Subject: Preliminary Objections raised by the Respondent

1.0 BACKGROUND

1.1 With reference to the various claims by the Claimant under the referred agreement, the Respondent, while submitting the statement of defence, took up several preliminary objections. The Respondent requested that before commencement of oral submissions on the claims by the Claimant, the two preliminary objections relating to Order 2 Rule 2 CPC and on limitation may be taken up and finalized by the Tribunal to avoid any legal complications, while the other preliminary objections/issues shall be taken up during arguments on merits. The Claimant also agreed with the same and, therefore, the AT directed the Respondent to argue on the two preliminary objections in the 11th hearing held on 17.07.2014.

1.2 The Respondent took up his arguments in the 12th hearing held on 28.08.2014 and concluded in the 16th hearing on 25.09.2014. The Claimant took up his counter arguments in the 17th hearing on 13.10.2014 and concluded in the 23rd hearing on 08.12.2014. The parties were directed by the AT to submit written submissions by 23.12.2014, which were received by the Arbitral Tribunal. An application was also filed by the Claimant for production of some documents by the Respondent. The counsel for the Respondent produced the same documents in the 24th hearing held on 06.01.2015. The Claimant made his arguments in the 25th hearing held on 07.01.2015. The Respondent submitted his rejoinder in the 26th hearing held on 09.02.2015 during which the Respondent submitted fresh set of written submission in substitution of the

1768

NHPC LIMITED FARIDABAD

earlier submission dated 23.12.2014 due to the fact that letter dated 25.01.2010 produced with the earlier written submission was not complete and had missed out one page.

Both parties concluded their submissions on 09.02.2015.

2.0 SUBMISSIONS BY THE RESPONDENT

The Respondent took up arguments on the following preliminary issues:

(i) Claims are barred by the principle of Order 2 Rule 2 CPC

(ii) Claims are barred by limitation under the Limitation Act, 1963

2.1 Order 2 Rule 2 CPC

2.1.1 Order 2 Rule 2 CPC stipulates as under:

"2. Suit to include the whole claims

1. *Every suit shall include the whole of the claim which the plaintiff is entitled to make in respect of the cause of action, but a plaintiff may relinquish any portion of his claim in order to bring the suit within the jurisdiction of any court.*
2. *Where a plaintiff omits to sue in respect of or intentionally relinquishes any portion of his claim, he shall not afterwards sue in respect of the portion so omitted or relinquished.*
3. *Omission to sue for one of several reliefs. A person entitled to more than one relief in respect of same cause of action may sue for all or any of such reliefs, but if he omits, except with the leave of the court, to sue for all such reliefs, he shall not afterwards sue for any relief so omitted".*

2.1.2 The Claimant has filed two claims against one cause of action and has wrongly split the claim with a view to harass the Respondent by subjecting it to multiple claims. The earlier claim for additional cost due to adverse geological conditions and the present claim of cost of compression are similar in nature. Therefore, as per aforementioned provision in law, the Claimant is not allowed to raise subsequent claims from same cause of action.

NHPC LIMITED FARIDABAD

2.1.3 Since the works under the contract had been completed on 25.01.2008, and the earlier claim was raised before the AT on 12.03.2009, the present reference could also be made along with the earlier reference. But it was not done and the present claim was raised before the AT on 20.04.2013, although details for the 2nd reference were also available when the first reference for arbitration was made by the Claimant.

2.1.4 The cause of action for both the arbitrations is the same, as in both cases the cause of action starts with the award of the contract and culminates with the final bill and alleged non-payment of claims.

2.1.5 The Respondent took support of the following judgments for the issues raised by it, as briefly narrated below:

i. **K.V. George Vs. Secy. To Govt – Supreme Court (1989)**
Held that in the aforesaid cases the principle of res judicata or for that the principles of constructive res judicata apply to arbitration proceedings and as such the award made in the second arbitration proceeding ..... cannot be sustained and is, therefore, set aside.
The judgment also laid down, that it is also in public interest that individuals should not be vexed, twice over with the same kind of litigation.

ii. **State of Maharashtra Vs. National Const. Co. – Supreme Court (1996)**
The judgment mentioned that a man shall not be twice vexed for one and the same cause.

iii. **Virgo Industries Vs. Venture tech Solutions – Supreme Court (2013)**
Held, subsequent suit is not permissible when cause of action for subsequent suit is the same as in first suit, unless leave of court is obtained in first suit as to filing of subsequent suit for omitted relief.

1770

The judgment also elaborated on the object behind the enactment of the provisions of Order 2 Rule 2 CPC which seeks to avoid multiplicity of litigations on the same cause of action.

iv. **Coffee Board Vs. Ramesh Exports – Supreme Court (2014)**

Held, when cause of action and parties involved in both suits are the same and reliefs claimed in subsequent suit could have been claimed in previous suit itself but had been omitted, only then would subsequent suit be barred under Rule 2.

The judgment also mentions that the object of Order 2 Rule 2 CPC is two-fold. First is to assure that no defendant is sued and vexed twice in regard to the same cause of action. Second is to prevent a plaintiff from splitting of claims and remedies based on the same cause of action.

v. **SBI Vs. Gacure Pharmaceuticals – Supreme Court (2014)**

The judgment reiterated the principle that when cause of action is the same, suit must include whole claim and plaintiff can not split up claim so as to omit one part and sue for the other. Relief sought in second suit could have been sought in first suit. Therefore held, cause of action for both suits being the same and plaintiff having omitted to seek certain relief in the first suit, he cannot file second suit seeking that same relief.

2.1.6 The filing of second suit has caused prejudice to the Respondent. The first prejudice is that the Respondent is being vexed twice. The second prejudice is that it is having to bear the cost of two separate arbitrations when all the claims could have been raised in the first arbitration itself.

2.1.7 In view of the above arguments/pleadings the claims under this reference be dismissed as barred by the principle of Order 2 Rule 2 CPC.

2.2 Limitation under the Limitation Act, 1963

2.2.1 As per the Limitation Act, 1963 following periods of limitation have been provided:

1771

NHPC LIMITED FARIDABAD

a.	Item 18 under suits for the price of work done by the Plaintiff for the defendant at his request, where no time has been fixed for payment.	Three years	From the time the work is done
b.	Item 55 under suits For compensation for the breach of any contract, express or implied, not herein specially provided	Three Years	From the time the contract is broken (where there are successive breaches) when the breach in respect of which the suit is instituted occurs or (when the breach is continuing) when it ceases

2.2.2 The works under the contract were completed on 25.01.2008, while the letter invoking arbitration by the Claimant was sent by the Claimant only on 26.10.2012 which was beyond the period of three years limitation available under the provisions of the Limitation Act, 1963 as noted above. Hence, the present invocation is well beyond the permissible limit under the Act and so barred in law.

2.2.3 The claims in this reference by the Claimant have been raised on the dates as noted below which are also confirmed by the Claimant:

Claim No.	Date when raised	Amount of Claim (Rs.)
1	20.01.2006	115,05,50,425
2	08.06.2007	2,54,27,000
3	14.09.2006	1,22,81,449
4	03.10.2006	1,41,99,830
5	24.06.2006	74,74,972
6a	03.07.2008	2,82,21,860
6b	25.08.2008	23,96,435
6c	27.08.2008	71,59,856

1772

NHPC LIMITED FARIDABAD

The Claim No. 1, being the major one, is being taken up in details.

2.2.4 Claim No. 1: for cost incurred for acceleration of the work

i. As per the written submissions dated 09.02.2015 by the Respondent, the claim on this account was raised by the Claimant on 20.01.2006 for an amount of Rs. 122.30 crores. The claim amount was reduced to Rs. 117.26 crores vide letter dated 14.05.2007. Again vide letter dated 22.01.2008 the claim was allegedly updated to Rs. 125 crores. The Respondent on 18.09.2008 conveyed its willingness to pay a sum of Rs. 12.58 crore subject to certain conditions e.g. other claims shall not be entertained and acceptance of conditions imposed.

ii. As noted earlier, the period of limitation available for raising a suit for claim on the issue is three years. The period of limitation would start from 20.01.2006 when the claim had been raised i.e. the cause of action. The Respondent's action of paying a part amount on 18.09.2008 had given rise to a dispute between the parties, even before the submission of final bill and thus had nothing to do with the final bill.

iii. As pointed earlier, limitation for 1st claim started running on 20.01.2006 when the claim was raised, and the claim became time barred on 19.01.2009. The limitation for invoking the claim also started running on 18.09.2008 when part payment was made by the Respondent and balance refused. The limitation came to an end on 17.09.2011 (after three years). The presentation organized through letter dated 13.07.2010 by the Respondent would not extend the limitation for the claim (as provided in Sec. 18 of the Limitation Act) which had expired on 19.01.2009 and hence the claim is liable to be rejected as time barred.

iv. The above interpretation is supported by the judgment of the Supreme Court in the case J.C. Budhraja Vs. Chairman Orissa Mining Corporation (2008) (Page 61 – 81 of compilation of judgments filed on 28.08.2014). It would be seen from the letter of 13.07.2010 that the meeting of the committee was only "to fix up the issues in various claims", and there was no acknowledgement of any liability to pay or any jural relationship between the parties.

1773

NHPC LIMITED FARIDABAD

v. The Claimant has tried to mislead the AT by falsely averring that it had invoked arbitration vide letters dated 14.11.2009 and 25.01.2010 which is evident from the letters. It was vehemently argued that the letters were also not produced before the AT inspite of opportunity given to them only to conceal the fraud. This proves the dishonest intentions of the Claimant. The letters were produced by the Respondent with the written submissions on preliminary issues dated 09.02.2015. It is evident from the letters that no invocation of arbitration was done through any of the above letters. In fact the Claimant had invoked arbitration only on 26.10.2012, as also categorically admitted in reply to Para D in the Rejoinder filed by the Claimant on 03.10.2013.

vi. Hence the claims are liable to be rejected on the ground of limitation. Further, the claims having been raised much before the final bill and also denied, thus creating disputes between the parties, submissions of the final bill and its finalization will have no bearing on the issues of limitations for these claims.

2.2.5 The Respondent has relied on the following judgments submitted in the two compilations dated 28.08.2014 and 25.09.2014, briefly narrated below :

i. **NHPC Vs. Karam Chand Thapar & Bros – (2010)**

Held that the provisions of Limitation Act apply to arbitrations and the period of limitation for commencement of an arbitration runs from the date on which, had there been no arbitration clause, the cause of action would have accrued. Also as per section 21 of the A&C Act 1996, the arbitral proceedings are deemed to commence on the date on which a request for dispute to be referred to arbitration is received by the Respondent.

ii. **J.C. Budhraja Vs. Chairman OMC – Supreme Court (2008)**

Limitation for a suit is calculated as on the date of filing of the suit. In the case of arbitration, limitation for the claim is to be calculated on the date on which the arbitration is deemed to have commenced.

NHPC LIMITED FARIDABAD

iii. **Punjab State Vs. Dina Nath – Supreme Court (2007)**

iv. **Major Inder Singh Vs. DDA – Supreme Court (1988)**
Limitation for claim and limitation for invoking arbitration are separate.

v. **Union of India Vs. L.K. Ahuja – Supreme Court (1988)**
Same as under (iv).

vi. **Venture Global Engg. Vs. Satyam Computer Services – Supreme Court (2010)**
Held, concealment of relevant and material facts, which should have been disclosed before arbitrator, is an act of fraud and covered under the above said expression .... "Public Policy".... and, therefore, that an award is in conflict with the public policy of India if the making of the award was induced or affected, by fraud or corruption or was in violation of Section 75 or Section 81.

1.3 The Respondent prayed that in view of the pleadings the claim should be barred by limitation under the Limitation Act, 1963.

3.0 SUBMISSIONS BY THE CLAIMANT

The Claimant's defence is contained in the following paras:

3.1 Order 2 Rule 2 CPC

3.1.1 The contention of the Respondent is wrong. Chronological list of events for the first reference to arbitration was submitted which shows that the claim for additional costs due to unforeseen geological and unforeseen physical conditions submitted on 21.03.2007 was rejected with detailed reasons on 18.04.2008. Invocation of arbitration under clause 67.1 of GCC was done vide letter dated 30.07.2008 and the arbitral tribunal was constituted on 26.09.2008.

3.1.2 It was pointed out that the work under the contract was completed on 25.01.2008. Defect liability period ended on 25.01.2009. Final bill was

NHPC LIMITED FARIDABAD

submitted on 10.03.2009. The arbitration in first reference had been commenced even before the final bill was filed.

3.1.3 The second reference is related to cost on account of acceleration measures taken by the Claimant on instructions of the Respondent. On 08.05.2001 the Respondent instructed the Claimant to submit an accelerated programme for completion of the work so as to compress the schedule for completion from 2040 days (67 months) to 1826 days (60 months).

3.1.4 The dispute between the parties arose or crystallized on submission of final bill. Prior to that, the Claimant wrote a letter on 24.01.2006 for approval of cost of acceleration which was forwarded by the Respondent to head office for consideration. Final claim was submitted to the Respondent on 21.03.2007. the Claimant submitted his final bill after DLP as per contract provisions on 10.03.2009. On 28.08.2008 meaning thereby that when the arbitration started in the earlier (1st) case, the issue of dispute of the present claim was not even raised.

3.1.5 Once the causes of action are different and distinct and based on independent evidence, the principle of constructive res-judicata would not apply in such case.

3.1.6 The Claimant stressed on his submissions and quoted from the same judgments as referred to by the Respondent as brought out in the following paras:

i. **1989 (4) SCC P. 595 – Para 5 & 13**

The para 13 refers to a passage from Mulla's code of Civil Procedure which stipulates that "this rule does not require that when several causes of action arise from one transaction, the plaintiff should sue for all of them in one suit. What the rule lays down is, that where there is one entire cause of action, the plaintiff cannot split the cause of action into parts so as to bring separate suits in respect of those parts.

NHPC LIMITED FARIDABAD

ii. **1996 (1) SCC – P 735 – Para 9, 11, 14 to 19**

The para 9 enunciates that the principle of res-judicata and Rule 2 of Order 2 are based on the rule of law that a man shall not be twice vexed for one and the same cause. Following principles are brought out in the judgment.

a. Whether the claim in the new suit is in fact founded upon a cause of action distinct from, that which was the foundation for the former suit. If the answer is in the affirmative, the rule will not apply.

b. If in the earlier suit, the plaintiff could not have claimed the relief which he sought in the subsequent suit, the Plaintiff's subsequent suit is not barred by Order 2 Rule 2.

iii. **2013 (1) SCC P 625 – para 10 & 11**

Principles laid down are:

"In order that a plea of a bar under Order 2 Rule 2(3) of the Civil Procedure Code should succeed, the defendant who raises the plea must make out (1) that the second suit was in respect of the same cause of action as that on which the previous suit was based; (2) that in respect of that cause of action, the plaintiff was entitled to more than one relief; (3) that being thus entitled to more than one relief the plaintiff, without leave obtained from the court, omitted to sue for the relief for which the second suit had been filed. From this analysis it would be seen that the defendant would have to establish primarily and to start with, the precise cause of action upon which the previous suit was filed, for unless there is identity between the cause of action on which the earlier suit was filed and that on which the claim in the later suit is based, there would be no scope for the application of the bar".

17710

NHPC LIMITED FARIDABAD

iv. **2014 (6) SCC P 424 – para 11 & 12**

Same principle as in case (iii) laid down. Further it elucidated that both the plaints must be read as a whole to identify the cause of action, which is necessary to establish a claim or necessary for the plaintiff to prove, if traversed. Therefore, after identifying the cause of action if it is found that the cause of action pleaded in both the suits is identical and the relief claimed in the subsequent suit could have been pleaded in the earlier suit, then the subsequent suit is barred by Order 2 Rule 2. The defendant would have to establish primarily and to start with, the precise cause of action for both the suits. Unless they are identical there would be no scope for the application of the bar.

3.1.7 The Claimant also referred to some other judgments as mentioned hereinafter:

i. **AIR 2004 SC P 1761, Para 8, 9, 16 to 21**

One great criteria is, when the question arises as to whether the cause of action in the subsequent suit is identical with that in the first suit, whether the same evidence will maintain both actions.

ii. **AIR 1993 SC P 1756, Para 6**

Elaborates that the Order 2 Rule 2 CPC provides that if the plaintiff omits any part of the claim from a cause of action or fails to claim a remedy available to him in respect of that cause of action he will thereafter be precluded from so doing in any subsequent litigation that he may commence, if he has not obtained the prior permission of the court. But the rule does not preclude a second suit based on a distinct cause of action.

iii. **AIR 2002 SC P 258, Para 5**

It has been held that the dispute with regard to the subsequent claims arose after the first reference, that is, after the final bill was prepared.

iv. **2005 (10) SCC P 218, Para 4**

In order to attract applicability of the bar enacted by Order 2 Rule 2 CPC, it is necessary that the cause of action on which the subsequent claim is founded should have arisen to the Claimant when he sought for enforcement of the first claim before the court.

NHPC LIMITED FARIDABAD

v. **AIR 2011 SC 9, Para 9, 10 & 12**

Same principle as in ref (ii) accepted. Moreover the strength of the second case and the conduct of plaintiff are not relevant for deciding whether the second suit is barred by Order 2 Rule 2 CPC.

vi. **AIR 1980 SC – P 161, Para 6 & 7**

vii. **AIR 2001 PAT P 174, Para 6, 7 & 9**

viii. **AIR 1996 SC P 2367, para 9 to 11 & 17**

Support the principle of same cause of action to attract the bar.

ix. **2007 (95 DRJ P 723, para 12**

Although supplies involved in the suit were at the same period of time, but places of supply were different. Order 2 Rule 2 CPC not attracted.

x. **185 (2011) DLT P 185, Para 1**

A cause of action is a complete bundle of facts required to be averred and proved in order to, get the relief on the suit. One cause of action may have certain common ingredients/facts with other cause of action, however, because of such common facts, it cannot mean that necessarily both the cause of action will be identical.

xi. **197 (2013) DLT P 650, para 1, 28 & 30**

Elucidated that in the context of large scale works contracts, there cannot be any rigid application of the principle of Order 2 Rule 2 CPC, unless it is demonstrated that the prejudice has been caused to either party as a result of such non-adherence.

3.1.8 Therefore, the present reference to arbitration is not barred by the principle of Order 2 Rule 2 CPC.

3.2 Limitation under the Limitation Act, 1963

3.2.1 The averments made by the Respondent are incorrect and hence denied. The contention of the Respondent that claim is time barred under the Limitation Act, 1963 is not correct. The process of amicable settlement defined in the contract was tried with the consent of both the parties, which is a matter of record. The Claimant re-invoked arbitration on 26.10.2012, after dispute was crystallized.

3.2.2 The chronology for the Claim No. 1 is briefly given below to clarify the position.

1779

NHPC LIMITED एनएचपीसी NHPC FARIDABAD

24.01.2006	Claimant proposed a cost (Rs.125 crore) for acceleration to enable them to mobilize for achieving the acceleration target.
21.03.2007	Claim in respect of first reference to arbitration sent by GIL.
25.01.2008	Project completed.
18.08.2008	Acceleration approved by NHPC, but for a meagre amount of Rs.12.58 crore, along with certain conditions which were not accepted by GIL.
18.09.2008	NHPC made part payment without any conditions.
25.01.2009	DLP completed.
10.03.2009	Final bill submitted by GIL as per Clause 60.6 of GCC.
21.05.2009	NHPC accepted part claim and referred for approval of Competent Authority.
14.11.2009	Since no settlement available from NHPC, notice under Clause 67.1 issued to NHPC by GIL.
25.01.2010	As a follow up, GIL nominated its Arbitrator and requested NHPC to nominate its Arbitrator.
13.07.2010	NHPC agreed for amicable settlement and constituted a Committee to fix up the claims.
20.07.2010	GIL presented its claims to the Committee

Protracted correspondences, reminders. In the meantime on 21.08.2012, NHPC sought opinion of Attorney General on the letters of 14.11.2009 and 25.01.2010 from GIL

26.10.2012	GIL re-invoked arbitration.
06.09.2013	NHPC made further part payment.

3.2.3 From the above sequence, it is clear that the claim was not dead even up to 13.07.2010 when the Respondent formed a Committee for fixing up the claims and inviting the Claimant for presentation. Therefore, the claim and reference is not, barred by limitation under the Limitation Act, 1983.

3.2.4 The Claimant commented on the judgments referred by the Respondent, as briefly recorded below:

1780

NHPC LIMITED FARIDABAD

(i) **NHPC vs. KARAM CHAND**

The judgment is not applicable since there was no continuing cause of action. The issue related to unprecedented flood, which was a one time incident.

(ii) **BUDHRAJA vs. CHAIRMAN OMC**

The judgment supports the contention of the Claimant. In para 3,4,5,9,22 and 23, the SC accepted the initiation of limitation from the date of acknowledgement in writing of starting settlement proceedings. In the present case, the said acknowledgement is dated 13.07.2010. Therefore, the re-invocation of arbitration even as per letter dated 26.10.2012 is within limitation period of 3 years.

(iii) **NATIONAL ALUMINIUM CO. vs KANUNGO**

In this case, plea of limitation was not accepted. Relevant paras are 3, 4 and 5 where letter confirming that the claims are under consideration and the decision is awaited was accepted as acknowledgement, extending the limitation of 3 years from the date of the letter.

(iv) **SHRIRAM MILLS vs UTILITY PREMISES**

In this case, it was held by SC that as long as negotiations are going on, the period of limitation will not start.

(v) **PUNJAB STATE vs DINANATH**

(vi) **MAJOR INDER SINGH REKHI vs DDA**

(vii) **UNION OF INDIA vs LK AHUJA & CO.**

The judgments by SC in the cases upheld the fresh starting of period of limitation from the notice of settlement and conciliation.

3.2.5 The Claimant has also relied on the following judgments / document.

(i) **AIR 2006 SC 2488 HARISHANKAR SINGHANIA vs. GAUR HARI SINGHANIA**

Para 21 / 25 of the judgment has laid down that as long as parties are in dialogue and even the differences would have surfaced, it cannot be asserted that a limitation under Article 137 has commenced. Such an interpretation will compel the parties to resort to litigation / arbitration even when there is serious hope of the parties themselves resolving the issues.

1781

NHPC LIMITED FARIDABAD

(ii) In the brief of the opinion sent by the Respondent to the Attorney General, which is on record, it was admitted that invocation of arbitration was made through letters dated 14.11.2009 and 25.01.2010.

3.2.6 In view of the above, the plea of the Respondent regarding the reference barred by limitation be dismissed.

4.0 APPRAISAL BY THE ARBITRAL TRIBUNAL

The AT has gone through the arguments and pleadings of the parties and the relevant documents and observed as under on the two preliminary issues raised by the Respondent.

4.1 ORDER 2 RULE 2 CPC

(i) The cause of action for the first reference against which Rule 2 Order 2 is being pleaded by the Respondent, is the occurrence of adverse geological and unforeseeable physical conditions met during the execution of the work of tunnelling under the agreement. Arbitration process in the above matter had been commenced on 21.03.2007 and arbitration was invoked on 30.07.2008. Statement of Claim (SOC) was submitted to AT on 12.03.2009.

(ii) The cause of action in the present (second) reference is the non-payment of the cost of acceleration of the total work under the contract from 67 months to 60 months as per directions of the Respondent, which crystalized after the payment of final bill after May, 2009.

(iii) The second reference could not have been made when first reference was made.

(iv) Evidence in the two references is not same and identical.

(v) Regarding the issue of omission or relinquishing of part of claim, it is noted that a clear assertion is made in the SOC under first reference in para 2.8 and para 2.12, that the issue of acceleration / prolongation of contract shall be dealt separately.

4.2 LIMITATION UNDER THE LIMITATION ACT, 1963

(a) CLAIM NO.1

(i) On the request of the Respondent, the Claimant submitted proposal for acceleration of the work schedule from 67 months to

1782

NHPC LIMITED FARIDABAD

60 months, obviously involving additional cost. Even after exchange of many letters, the cost factor could not be finalized although part payments were made prior to and after final bill.

(ii) The final bill was submitted by the Claimant on 10.03.2009. On 13.07.2010, the Respondent agreed to settle the dispute amicably and constituted a Committee to fix up the claims. The constitution of such a Committee amounted to acknowledgement of the claim. The claim was, therefore, live even at that time.

(iii) Even earlier letters from the Claimant to the Respondent dated 14.11.2009 and 25.01.2010 were in line with the provisions of the contract under Clause 67 of GCC for Settlement of Disputes.

(iv) The Attorney General in his opinion to the Respondent dated 21.08.2012 categorically stated that "I do not find that the Engineer has applied his mind or given a decision on the bill. As such, therefore, the period of limitation cannot be said to have commenced".

(v) Thus the claim was live up to that period.

(b) CLAIM NO. 2, 3, 4, 5, 6a, 6b & 6c

(i) Being practically identical, the other claims are being taken up together. The claims were submitted on the dates given below as mentioned earlier in para 2.2.3.

CLAIM NO.	DATE
2	08.06.2007
3	14.09.2006
4	03.10.2006
5	24.06.2006
6a	03.07.2008
6b	25.08.2008
6c	27.08.2008

(ii) All the above claims were also included in the final bill submitted on 10.03.2009 and were referred to the Committee constituted by the Respondent on 13.07.2010 for fixing up all the claims.

1783

NHPC LIMITED FARIDABAD

(iii) Hence no bar of limitation applies to these claims on 26.10.2012. All these claims were also included in the letter dated 14.11.2009 and 25.01.2010.

5.0 ORDER

Considering all the above facts and details, the preliminary objections of the Respondent regarding the principle of Rule 2 Order 2 CPC and limitation under the Limitation Act, 1963 are not considered maintainable and are dismissed.

IN THE MATTER OF ARBITRATION BETWEEN:

Gammon India Ltd, Mumbai ... Claimant

And

NHPC Ltd- Teesta V Power Station, East Sikkim ... Respondent

Dated : 02.02.2017

Under Agreement for Civil Work for Head Race Tunnel including Adits - 2, 3 & 4 at Teesta HE Project (Stage V) Lot TT-3 East Sikkim

Subject : Application filed by the Claimant on 01.08.2016

1.0. An application is filed by the Claimant (GIL) on 01.08.2016 relating to claim no. 1 for payment of acceleration claim amounting to Rs. 125 crore, details of which were submitted as Annexure C-2 to the Statement of Claim (SOC). The Respondent (NHPC) had submitted their defense arguments, including Annexure R-7 to the Statements of Defense (SOD).

1.1 In the SOD, NHPC filed reports of committees which had examined the claim of GIL and had recommended an amount of Rs. 28.16 crore (p.60). The committee further observed that:

(i) The acceleration cost has been based on additional deployment of resources from the period from which progress more than the target was worked out by the committee.

1785

NHPC LIMITED FARIDABAD

(ii) The status of the work prior to start of acceleration measures showed a short-fall of 279 days, and so proposed that the cost on account of acceleration measures may be apportioned in the ratio of benefit to the NHPC and short-fall on the account of GIL. During oral arguments (on 18.11.2015), NHPC has produced Annexure to R-7 without any detailed back-up / justification of hindrances as mentioned above.

1.2. The above details were verbally informed during the process of amicable settlement undertaken during the period from 25.01.2010 to 26.10.2012 and subsequently vide SOD during the present arbitral proceedings, These details were never intimated to the Claimant during the course of execution, even when EOT was approved up to 12.12.2008 (date of completion as per normal execution of works without acceleration measures) without levy of any liquidated damages on GIL.

1.3. In the above circumstances, to find out the methodology and mechanism by NHPC, it would be vital and appropriate to direct NHPC to (i) produce the documents related to the methodology adopted in support of the amount of Rs.28.89/28.16 crore and (ii) to produce the details of apportionment and the documents relied upon in support thereof.

NHPC LIMITED FARIDABAD

1786

2.0 On the directions of the AT, the Respondent (NHPC) filed their reply to the application of the Claimant (GIL) vide letter dated 07.09.2016. NHPC stated that the application filed by GIL at this stage is highly belated and nothing but an attempt to delay the proceedings since both GIL and NHPC have already concluded their arguments and GIL is only submitting final rejoinder arguments.

2.1 NHPC has further observed as under:

(i) The Claimant has not filed any evidence in support of their claims, and are only trying to obtain Respondent's documents to support their claim. There is no procedure in law which permits such action.

(ii) Further, at the stage of submissions of Rejoinder, the Claimant has realized that its claims are without any proof and so has filed this application.

(iii) The Project Committee findings are of no consequence since it has been modified by Head Quarter level committee. This is an internal matter of the Respondent, and what is material is the final decision of the Respondent (based on recommendations of the above committee) which is already on record of the AT as part of SOD. The calculations given in Annexure to R-7 have been fully explained during submissions by the Respondent. The statement of the claimant is totally baseless and malafide.

NHPC LIMITED FARIDABAD

2.2 In the above circumstances and in the interest of justice, the application filed by the Claimant is liable to be rejected with costs.

3.0 Final Rejoinder by the Claimant was submitted on 07.09.2016 which was later modified vide letter dated 15.09.2016. The Claimant has emphasized the following issues.

(i) The Respondent has not followed the standard rules while calculating the admissible amount, and have applied deductions without any justifications. This fact could further be revealed from the Annexure to R-7 filed by the Respondent for the first time during reply arguments on 18.11.2015. It is entirely the onus of the Respondent to produce the documents in support of the methodology used for calculating the amount considered admissible by it.

(ii) It, is not the case of the Claimant that there is a report of some committee and that the said report be made binding upon. It is a confusion on the part of the Respondent.

3.1 It is, therefore, prayed that the Respondent be directed to produce documents in support of methodology used in their calculations as explained earlier and justification of hindrances to the account of the Claimant.

1788

NHPC LIMITED FARIDABAD

4.0 The Tribunal has gone through the submissions of both the parties in detail as well as the status of the proceedings and note as below.

(i) SOC was submitted on 20.04.2013 and SOD on 05.09.2013. The Rejoinder by the Claimant was submitted on 03.10.2013.

(ii) After admission/ denial of documents and cross-examination of one witness each from both sides, oral arguments were to be taken up from the 12th hearing.

(iii) The Respondent raised some preliminary objections on 29.08.2014 (12th hearing) on which decision was sought from the Tribunal and, therefore, the same were taken up first. After submissions had been completed by both parties on 09.02.2015, the Tribunal gave its decision on 11.02.2015 (28th hearing). Thereafter, hearings on merits were commenced. The Claimant commenced their submissions on 23.03.2015 (29th hearing) and concluded on 28.07.2015 (38th hearing). The Respondent took up their submissions on 14.09.2015 (39th hearing) and concluded on 26.07.2016 (62nd hearing).

(iv) Thereafter the Claimant commenced their final rejoinder arguments on 27.07.2016 (63rd hearing) when the present application has been moved, seeking some documents from the Respondent as explained earlier.

4.1 In view of the above details, the Tribunal considers the application is quite belated. It is also observed that the basic details of Respondent's approved amounts had been available much earlier and have been fully discussed and argued by the parties. AT considers that no prejudice is likely to be caused to the Claimant due to non-availability of further documents sought through the present application.

4.2 The application of the Claimant is, therefore, not allowed and is rejected.
