SPECIAL CONDITIONS OF CONTRACT (SCC)

SPECIAL CONDITIONS OF CONTRACT

Name of Work: -Dewatering of Tail Race Tunnel of Dulhasti Power Station by providing submersible pumps, DG Sets, LT switchgear/distribution board, Change over panel, crane, pipes, Power/control cables, operation/maintenance staff etc for a period of 45 days

The following special conditions shall be read in conjunction with the corresponding relevant provisions made in the General Conditions of Contract and in case of any discrepancy or variation or contradiction between them, the provisions made under these Special Conditions of Contract, shall prevail.

Detailed scope of work:

- (i) Dewatering of TRT at Dulhasti Power Station by Electrical Submersible Pumps of various capacities with total discharge capacity of 7000 Cubic Metre per Hour, Discharge Head 25m (maximum) including all accessories – panels, hoses, pipes, fittings, power cables, etc. for continuous operation of the dewatering system. Dewatering of TRT shall be on 24*7 hours continuous basis.
- (ii) Provision and availability of additional Electrical Submersible Pumps of various capacities and panels at site with total discharge capacity equivalent to at least 40% of discharge capacity mentioned at (i) towards “stand by capacity enhancement arrangement”.
- (iii) The contractor shall maintain sufficient spare Electrical Submersible Pumps of various capacities and panels to meet any breakdown / outage and restore dewatering capacity within a reasonable period. For this the contractor shall have provision and availability of additional Electrical Submersible Pumps of various capacities and panels at site with total discharge capacity equivalent to at least 25% of discharge capacity mentioned at (i) & (ii). This requirement is separate from (ii) above and is additional capacity to supplement breakdown/outages. However, this does not absolve the bidder from his responsibility to cater any breakdown of the deployed pumps.
In case of the breakdown of any pump (s) deployed in TRT dewatering, has to be attended within 4 hours. Any failure to attend the pump which leads to level rise in TRT and consequent hindrance to MIV works, shall attract penalty. The rate of penalty shall be 7.5% of the per day charges as given in the contract for the period of hindrance in MIV works on prorata basis, however, if the hindrance in MIV works is more than 8 hours attributable to failure of pumps/TRT dewatering full charges for the day shall be levied.
- (iv) In case pumping capacity of more than as mentioned at (i) & (ii) is required, the contractor shall deploy additional pumps & accessories to site within a reasonable period (not more than 60 hrs) on mutual agreement between the contractor and NHPC on the direction of the Engineer-In-Charge. Additional payment on this account shall be made on pro-rata basis.
- (v) The contractor shall make available at site compatible Starter Panels, Control Panels, Power Cables, Pipes/Hoses, Flanges, LT Switchgear/distribution board, testing and measuring instruments, Consumables, tools & tackles etc. The contractor shall submit Tentative

list of equipment/materials to be deployed along with Technical bid as per Annexure-A.

- (vi) The contractor shall make available at site DG set(s) of requisite capacity and Lubricants/consumables etc for its operation & Maintenance in case of non-availability of 11KV/415 V Power supply. It is envisaged that DG set(s) of capacity 1000-1250 KVA shall be required to cater the load of pumps in operation for TRT dewatering. However, the Contractor shall confirm the required DG set capacity and submit details before transportation. It shall be preferable to deploy at least 2 nos. DG sets so that their total capacity is not less than the envisaged/required capacity.
- (vii) Deployment of adequate manpower for installation, 24 x 7 operation & maintenance and site management for the complete scope of work.
- (viii) **Total Duration of total works is expected to be 45 days** excluding days of Installation and De-installation of pumps along with all accessories from TRT. **The actual date of start of work shall be the date intimated by the EIC and payment shall be reckoned from that date only subject to fulfilling other terms and conditions in LOA.**
- (ix) In case dewatering is required beyond 45 days, the firm shall be paid 80% of awarded rate as per the Contract (ex. If contracted amount for dewatering is X for 45 days then amount equal to $X/45 \times 0.80$ shall be paid per day or part thereof. If the work is completed in less than 45 days, payment will be made as per actual on pro-rata basis but not less than 30 days.
- (x) Mobile crane for working/loading/unloading at work area shall be arranged by the contractor and the capacity of the crane should be adequate to handle pumps, DG sets, panels etc. to be used for the said work of dewatering.

Special Condition of Contract:

- (i) The contractor shall make himself well aware about the site condition before start of work in order to finalize the work execution plan. **The contractor, if wishes so, may visit the site before bidding/start of work at his own cost.**
- (ii) **Transportation of all material required for dewatering of TRT from Firm's Premises to Dulhasti Power Station shall start at least 20 days prior to start of work.**
- (iii) Before Transportation of submersible pumps to site, testing of all pumps is in scope of contractor. The test report and original characteristic curve shall be submitted by firm before deployment of pumps & accessories to site. The contractor shall submit detailed pump wise list to establish sum- total of all capacities is not less than the required capacity as per the scope of work. Dispatch of Pumps from firm's premises to site shall be subject to

- acceptance of the Pumps by Engineer-In-Charge based on their submitted characteristic curves & test reports.
- (iv) The contractor shall ensure sufficient material such as spare pumps, starter panels, flanges, spares of DG sets/back up DG sets, all lubricants etc. in backup for smoothly execution of works so that work could be done without any hindrances.
 - (v) Contractor shall take care of the fact that handling of equipment /materials are difficult in TRT outlet as per site condition.

Making available, handling & shifting of pumps, Starter panels, pipes, cables, DG sets, LT switchgear/distribution board (Elevation of MAT is EL 1064 and Elevation of TRT outlet platform is EL 1030) is in scope of contractor. Inclined hilly slope is there between these elevations. Therefore, contractor has to do special arrangements for lowering these pumps/panels from MAT to TRT outlet platform. Therefore, the contractor shall make himself well aware about the site condition before start of work in order to finalize the work execution plan. Mobile crane for working/loading/unloading at work area, shall be arranged by the contractor.

Shifting of material to respective sites shall be done at least a week before start of work (complete shutdown of power station) so that LT switchgear/Distribution board can be commissioned well in time. Non-compliance of this fully or partially shall attract penalty on delay of each day @1% of the contract sum. For this the contractor shall submit an action plan/work schedule for approval of the Engineer In Charge within 10 days of award of contract.

- (vi) Lowering of pumps/panels from MAT (EL 1064) to TRT Outlet(EL 1030) may require Crane and Installation of pumps, pipe lines required for dewatering in TRT shall require a Tripod type arrangement. Arrangement of Crane and tripod arrangement is in the scope of the contractor. TRT opening of Dulhasti Power Station is 8 metre approx. each and its shape is horse shoe type.
- (vii) Shifting of dewatering pumps in TRT up to EL1019 according to water level in TRT so that TRT can be dewatered up to EL1021. It may be noted that there is approx 1.5% slope/gradient in TRT, hence the contractor has to make special arrangement for shifting of pumps so that required level can be maintained. All necessary arrangement is to be done by the contractor.
- (viii) Mobile crane for working/loading/unloading at work area shall be arranged by the contractor and the capacity of the crane should be adequate to handle pumps, DG sets, panels etc. to be used for the said work of dewatering.
- (ix) The dewatering shall be done so that the water level is maintained in TRT not higher than EL1021 at all times so that no hindrance is caused to MIV works, till completion of MIV works inside power house.
- (x) After completion of MIV works inside power house, same shall be intimated to contractor by NHPC, filling of TRT shall be done in

- controlled manner so that De-installation of pumps along with all accessories from TRT can be done appropriately by contractor.
- (xi) Transportation of the contractor's all material/equipment as per the scope of work, from firm's premises to Dulhasti Power Station and back to firm's premises from Dulhasti Power Station after successful completion of work is in the contractor's scope.
 - (xii) Loading and unloading of material/equipment at firm's premises and at Dulhasti Power Station site shall be in the scope of contractor.
 - (xiii) The contractor shall make his own arrangements for safety of its equipment/materials and manpower. Protective gears for the contractor's manpower shall be responsibility of the contractor.
 - (xiv) Unfurnished accommodation, as available, shall be provided by NHPC in Hasti/Shalimar area and local conveyance for contractor's manpower shall be arranged by the contractor.
 - (xv) Work area illumination shall be in contractor's scope.
 - (xvi) Change over panel for redundant power supply shall be in the scope of contractor.
 - (xvii) Any activity/works/items, etc. related to TRT dewatering which is not specifically mentioned above and is required for successful completion of the work shall be in the scope of contractor. Nothing shall be paid extra.

Other Considerations:

- (i) The pumps would be initially lowered in TRT outlet and gradually shifted inside as the TRT water level would recede.
- (ii) In case of failure of 11KV/415V electric power supply, the pumps installed in TRT by contractor shall be operated by contractor's own DG sets.

Facilities to be provided by NHPC free of Cost:

- (ii) Power supply (415 KV) for the operation of submersible pumps shall be provided by NHPC. For this, Power supply (LT) at site/work area shall be provided by NHPC(refer Annexure-B)
- (iii) Open storage area outside Power House shall be provided by NHPC at free of cost.
- (iv) Machining facilities, if required, as available in power house workshop. However, trained machinist shall be arranged by the contractor.
- (v) Unfurnished accommodation, as available, shall be provided by NHPC in Hasti area. Water supply and electricity in the accommodation shall be provided.

Non-compliance of this Fully or partially shall attract penalty on delay of each day @1% of the contract sum.
- (b) In case of the breakdown of any pump (s) deployed in TRT dewatering, has to be attended within 4 hours. Any failure to attend the pump which leads to level rise in TRT and consequent hindrance to MIV works, shall attract penalty. The rate of penalty shall be 7.5% of the per day charges as given in the contract for the period of hindrance in MIV works on prorated basis, however, if the hindrance in MIV works is more than 8 hours in a day attributable to failure of pumps/TRT dewatering full charges for the day shall be levied.
- (c) Total LD under the contract shall not exceed 10% of the Contract Sum.

Payment Terms

The payment shall be released on actual work done basis as under:

- (i) 1st RA Bill after 10 days from the date of start of dewatering works.
